

Application for a §1915(c) Home and Community-Based Services Waiver

PURPOSE OF THE HCBS WAIVER PROGRAM

The Medicaid Home and Community-Based Services (HCBS) waiver program is authorized in §1915(c) of the Social Security Act. The program permits a state to furnish an array of home and community-based services that assist Medicaid beneficiaries to live in the community and avoid institutionalization. The State has broad discretion to design its waiver program to address the needs of the waivers target population. Waiver services complement and/or supplement the services that are available to participants through the Medicaid State plan and other federal, state and local public programs as well as the supports that families and communities provide.

The Centers for Medicare & Medicaid Services (CMS) recognizes that the design and operational features of a waiver program will vary depending on the specific needs of the target population, the resources available to the state, service delivery system structure, state goals and objectives, and other factors. A State has the latitude to design a waiver program that is cost-effective and employs a variety of service delivery approaches, including participant direction of services.

Request for a Renewal to a §1915(c) Home and Community-Based Services Waiver

1. Major Changes

Describe any significant changes to the approved waiver that are being made in this renewal application:

This renewal application includes the following updates:

Appendix A: References to previous contractors have been removed.

Appendix B: The number of unduplicated participants and the number of participants served at a maximum point in time has been updated for each waiver year. Reserve capacity has also been updated.

Appendix C: The service definition of shared living has been updated to provide clarification that the live-in companion is also referred to as roommate; Employment Service Organizations have been added as providers of Peer Mentor Supports and Employment and Community Transportation services

Appendix D: The frequency of the administration of the supports intensity scale (SIS®) for individuals 22 years of age and older has been updated from three years to four years or when the individual's needs change significantly. Individuals ages 16 -21 have the Supports Intensity Scale (SIS-A®) completed on at least a triennial basis or when the individual's needs change significantly.

Appendix E: References to the previous FMS contractor has been removed.

Appendix H: The Patient experience of care survey has been added

Appendix I: References to previous contractors have been removed

Appendix J: The cost neutrality for the waiver has been updated.

Application for a §1915(c) Home and Community-Based Services Waiver

1. Request Information (1 of 3)

A. The State of Virginia requests approval for a Medicaid home and community-based services (HCBS) waiver under the authority of §1915(c) of the Social Security Act (the Act).

B. Program Title (*optional - this title will be used to locate this waiver in the finder*):

Community Living Waiver

C. Type of Request: renewal

Requested Approval Period: (*For new waivers requesting five year approval periods, the waiver must serve individuals who are dually eligible for Medicaid and Medicare.*)

☐ 3 years ☒ 5 years

Original Base Waiver Number: VA.0372**Waiver Number: VA.0372.R04.00****Draft ID: VA.008.04.00****D. Type of Waiver** (*select only one*):

Regular Waiver

E. Proposed Effective Date: (mm/dd/yy)

07/01/19

Approved Effective Date: 07/01/19**1. Request Information (2 of 3)**

F. Level(s) of Care. This waiver is requested in order to provide home and community-based waiver services to individuals who, but for the provision of such services, would require the following level(s) of care, the costs of which would be reimbursed under the approved Medicaid state plan (*check each that applies*):

☐ **Hospital**

Select applicable level of care

☐ **Hospital as defined in 42 CFR §440.10**

If applicable, specify whether the state additionally limits the waiver to subcategories of the hospital level of care:

☐ **Inpatient psychiatric facility for individuals age 21 and under as provided in 42 CFR §440.160**☐ **Nursing Facility**

Select applicable level of care

☐ **Nursing Facility as defined in 42 CFR ??440.40 and 42 CFR ??440.155**

If applicable, specify whether the state additionally limits the waiver to subcategories of the nursing facility level of care:

☐ **Institution for Mental Disease for persons with mental illnesses aged 65 and older as provided in 42 CFR §440.140**☒ **Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) (as defined in 42 CFR §440.150)**

If applicable, specify whether the state additionally limits the waiver to subcategories of the ICF/IID level of care:

Not applicable.

1. Request Information (3 of 3)

G. Concurrent Operation with Other Programs. This waiver operates concurrently with another program (or programs) approved under the following authorities

Select one:

☒ **Not applicable**☐ **Applicable**

Check the applicable authority or authorities:

☐ **Services furnished under the provisions of §1915(a)(1)(a) of the Act and described in Appendix I**☐ **Waiver(s) authorized under §1915(b) of the Act.**

Specify the §1915(b) waiver program and indicate whether a §1915(b) waiver application has been submitted or previously approved:

Specify the §1915(b) authorities under which this program operates (*check each that applies*):

- ☐ §1915(b)(1) (mandated enrollment to managed care)
- ☐ §1915(b)(2) (central broker)
- ☐ §1915(b)(3) (employ cost savings to furnish additional services)
- ☐ §1915(b)(4) (selective contracting/limit number of providers)
- ☐ **A program operated under §1932(a) of the Act.**
Specify the nature of the state plan benefit and indicate whether the state plan amendment has been submitted or previously approved:

- ☐ **A program authorized under §1915(i) of the Act.**
- ☐ **A program authorized under §1915(j) of the Act.**
- ☐ **A program authorized under §1115 of the Act.**
Specify the program:

H. Dual Eligibility for Medicaid and Medicare.

Check if applicable:

- ☒ **This waiver provides services for individuals who are eligible for both Medicare and Medicaid.**

2. Brief Waiver Description

Brief Waiver Description. *In one page or less*, briefly describe the purpose of the waiver, including its goals, objectives, organizational structure (e.g., the roles of state, local and other entities), and service delivery methods.

The Community Living waiver, is a Home and Community-Based 1915(c) waiver designed to provide support in the community for individuals with intellectual and developmental disabilities in lieu of an Intermediate Care Facility for Individuals with Intellectual Disabilities.

The goals of the Community Living Waiver are to facilitate the transition of individuals currently residing in the institutions to life in the community and to enable those community residents in need of supports to retain their community resident status through receiving those supports.

The objectives of the Community Living Waiver are to:

- 1) Promote independence for individuals through high quality services and the assurance of health, safety, and welfare through a comprehensive quality management strategy;
- 2) Offer an alternative to institutionalization and costly comprehensive services through an array of community supports that promotes inclusion and independence by enhancing, rather than replacing, existing natural supports;
- 3) Support individuals and their families in sharing responsibility for their supports and services.

The daily operation of the Community Living Waiver is carried out by the Department of Behavioral Health and Developmental Services (DBHDS), the operating agency, under the supervision and authority of the Department of Medical Assistance Services (DMAS), the Medicaid agency. DMAS exercises administrative discretion in the administration and supervision of the waiver; issues policies, rules and regulations related to the waiver; and makes payment for waiver services provided through the Virginia Medicaid Management Information System (VAMMIS). An interagency agreement, on file at both agencies, ensures accountability and effective management for all waiver requirements and assurances. It is reviewed annually and updated when needed.

Individuals access services at the local level via the Community Services Board (CSB) system, as the single point of entry. There are forty CSBs throughout Virginia, with each city or county belonging to the catchment area of one CSB.

The Community Living Waiver offers qualifying individuals the opportunity to obtain either agency-directed services or consumer-directed services, or both. Individuals may be supported by a CSB-employed or private support coordinator (case manager) contracted with a CSB.

3. Components of the Waiver Request

The waiver application consists of the following components. *Note: Item 3-E must be completed.*

A. Waiver Administration and Operation. Appendix A specifies the administrative and operational structure of this waiver.

B. Participant Access and Eligibility. Appendix B specifies the target group(s) of individuals who are served in this waiver, the number of participants that the state expects to serve during each year that the waiver is in effect, applicable Medicaid eligibility and post-eligibility (if applicable) requirements, and procedures for the evaluation and reevaluation of level of care.

C. Participant Services. Appendix C specifies the home and community-based waiver services that are furnished through the waiver, including applicable limitations on such services.

D. Participant-Centered Service Planning and Delivery. Appendix D specifies the procedures and methods that the state uses to develop, implement and monitor the participant-centered service plan (of care).

E. Participant-Direction of Services. When the state provides for participant direction of services, Appendix E specifies the participant direction opportunities that are offered in the waiver and the supports that are available to participants who direct their services. (*Select one*):

- ☒ **Yes. This waiver provides participant direction opportunities.** *Appendix E is required.*

☐ **No. This waiver does not provide participant direction opportunities.** *Appendix E is not required.*

F. Participant Rights. Appendix F specifies how the state informs participants of their Medicaid Fair Hearing rights and other procedures to address participant grievances and complaints.

G. Participant Safeguards. Appendix G describes the safeguards that the state has established to assure the health and

welfare of waiver participants in specified areas.

H. Quality Improvement Strategy. **Appendix H** contains the Quality Improvement Strategy for this waiver.

I. Financial Accountability. **Appendix I** describes the methods by which the state makes payments for waiver services, ensures the integrity of these payments, and complies with applicable federal requirements concerning payments and federal financial participation.

J. Cost-Neutrality Demonstration. **Appendix J** contains the state's demonstration that the waiver is cost-neutral.

4. Waiver(s) Requested

A. Comparability. The state requests a waiver of the requirements contained in §1902(a)(10)(B) of the Act in order to provide the services specified in **Appendix C** that are not otherwise available under the approved Medicaid state plan to individuals who: (a) require the level(s) of care specified in Item 1.F and (b) meet the target group criteria specified in **Appendix B**.

B. Income and Resources for the Medically Needy. Indicate whether the state requests a waiver of §1902(a)(10)(C)(i)(III) of the Act in order to use institutional income and resource rules for the medically needy (*select one*):

☒ **Not Applicable**

☐ **No**

☐ **Yes**

C. Statewide. Indicate whether the state requests a waiver of the statewide requirements in §1902(a)(1) of the Act (*select one*):

☒ **No**

☐ **Yes**

If yes, specify the waiver of statewide requirements that is requested (*check each that applies*):

☐ **Geographic Limitation.** A waiver of statewide requirements is requested in order to furnish services under this waiver only to individuals who reside in the following geographic areas or political subdivisions of the state.
Specify the areas to which this waiver applies and, as applicable, the phase-in schedule of the waiver by geographic area:

☐ **Limited Implementation of Participant-Direction.** A waiver of statewide requirements is requested in order to make *participant-direction of services* as specified in **Appendix E** available only to individuals who reside in the following geographic areas or political subdivisions of the state. Participants who reside in these areas may elect to direct their services as provided by the state or receive comparable services through the service delivery methods that are in effect elsewhere in the state.
Specify the areas of the state affected by this waiver and, as applicable, the phase-in schedule of the waiver by geographic area:

5. Assurances

In accordance with 42 CFR §441.302, the state provides the following assurances to CMS:

A. Health & Welfare: The state assures that necessary safeguards have been taken to protect the health and welfare of persons receiving services under this waiver. These safeguards include:

1. As specified in **Appendix C**, adequate standards for all types of providers that provide services under this waiver;
2. Assurance that the standards of any state licensure or certification requirements specified in **Appendix C** are met

for services or for individuals furnishing services that are provided under the waiver. The state assures that these requirements are met on the date that the services are furnished; and,

3. Assurance that all facilities subject to §1616(e) of the Act where home and community-based waiver services are provided comply with the applicable state standards for board and care facilities as specified in **Appendix C**.

B. Financial Accountability. The state assures financial accountability for funds expended for home and community-based services and maintains and makes available to the Department of Health and Human Services (including the Office of the Inspector General), the Comptroller General, or other designees, appropriate financial records documenting the cost of services provided under the waiver. Methods of financial accountability are specified in **Appendix I**.

C. Evaluation of Need: The state assures that it provides for an initial evaluation (and periodic reevaluations, at least annually) of the need for a level of care specified for this waiver, when there is a reasonable indication that an individual might need such services in the near future (one month or less) but for the receipt of home and community-based services under this waiver. The procedures for evaluation and reevaluation of level of care are specified in **Appendix B**.

D. Choice of Alternatives: The state assures that when an individual is determined to be likely to require the level of care specified for this waiver and is in a target group specified in **Appendix B**, the individual (or, legal representative, if applicable) is:

1. Informed of any feasible alternatives under the waiver; and,
2. Given the choice of either institutional or home and community-based waiver services. **Appendix B** specifies the procedures that the state employs to ensure that individuals are informed of feasible alternatives under the waiver and given the choice of institutional or home and community-based waiver services.

E. Average Per Capita Expenditures: The state assures that, for any year that the waiver is in effect, the average per capita expenditures under the waiver will not exceed 100 percent of the average per capita expenditures that would have been made under the Medicaid state plan for the level(s) of care specified for this waiver had the waiver not been granted. Cost-neutrality is demonstrated in **Appendix J**.

F. Actual Total Expenditures: The state assures that the actual total expenditures for home and community-based waiver and other Medicaid services and its claim for FFP in expenditures for the services provided to individuals under the waiver will not, in any year of the waiver period, exceed 100 percent of the amount that would be incurred in the absence of the waiver by the state's Medicaid program for these individuals in the institutional setting(s) specified for this waiver.

G. Institutionalization Absent Waiver: The state assures that, absent the waiver, individuals served in the waiver would receive the appropriate type of Medicaid-funded institutional care for the level of care specified for this waiver.

H. Reporting: The state assures that annually it will provide CMS with information concerning the impact of the waiver on the type, amount and cost of services provided under the Medicaid state plan and on the health and welfare of waiver participants. This information will be consistent with a data collection plan designed by CMS.

I. Habilitation Services. The state assures that prevocational, educational, or supported employment services, or a combination of these services, if provided as habilitation services under the waiver are: (1) not otherwise available to the individual through a local educational agency under the Individuals with Disabilities Education Act (IDEA) or the Rehabilitation Act of 1973; and, (2) furnished as part of expanded habilitation services.

J. Services for Individuals with Chronic Mental Illness. The state assures that federal financial participation (FFP) will not be claimed in expenditures for waiver services including, but not limited to, day treatment or partial hospitalization, psychosocial rehabilitation services, and clinic services provided as home and community-based services to individuals with chronic mental illnesses if these individuals, in the absence of a waiver, would be placed in an IMD and are: (1) age 22 to 64; (2) age 65 and older and the state has not included the optional Medicaid benefit cited in 42 CFR §440.140; or (3) age 21 and under and the state has not included the optional Medicaid benefit cited in 42 CFR § 440.160.

6. Additional Requirements

Note: Item 6-I must be completed.

A. Service Plan. In accordance with 42 CFR §441.301(b)(1)(i), a participant-centered service plan (of care) is developed for

each participant employing the procedures specified in **Appendix D**. All waiver services are furnished pursuant to the service plan. The service plan describes: (a) the waiver services that are furnished to the participant, their projected frequency and the type of provider that furnishes each service and (b) the other services (regardless of funding source, including state plan services) and informal supports that complement waiver services in meeting the needs of the participant. The service plan is subject to the approval of the Medicaid agency. Federal financial participation (FFP) is not claimed for waiver services furnished prior to the development of the service plan or for services that are not included in the service plan.

B. Inpatients. In accordance with 42 CFR §441.301(b)(1)(ii), waiver services are not furnished to individuals who are inpatients of a hospital, nursing facility or ICF/IID.

C. Room and Board. In accordance with 42 CFR §441.310(a)(2), FFP is not claimed for the cost of room and board except when: (a) provided as part of respite services in a facility approved by the state that is not a private residence or (b) claimed as a portion of the rent and food that may be reasonably attributed to an unrelated caregiver who resides in the same household as the participant, as provided in **Appendix I**.

D. Access to Services. The state does not limit or restrict participant access to waiver services except as provided in **Appendix C**.

E. Free Choice of Provider. In accordance with 42 CFR §431.151, a participant may select any willing and qualified provider to furnish waiver services included in the service plan unless the state has received approval to limit the number of providers under the provisions of §1915(b) or another provision of the Act.

F. FFP Limitation. In accordance with 42 CFR §433 Subpart D, FFP is not claimed for services when another third-party (e.g., another third party health insurer or other federal or state program) is legally liable and responsible for the provision and payment of the service. FFP also may not be claimed for services that are available without charge, or as free care to the community. Services will not be considered to be without charge, or free care, when (1) the provider establishes a fee schedule for each service available and (2) collects insurance information from all those served (Medicaid, and non-Medicaid), and bills other legally liable third party insurers. Alternatively, if a provider certifies that a particular legally liable third party insurer does not pay for the service(s), the provider may not generate further bills for that insurer for that annual period.

G. Fair Hearing: The state provides the opportunity to request a Fair Hearing under 42 CFR §431 Subpart E, to individuals: (a) who are not given the choice of home and community-based waiver services as an alternative to institutional level of care specified for this waiver; (b) who are denied the service(s) of their choice or the provider(s) of their choice; or (c) whose services are denied, suspended, reduced or terminated. **Appendix F** specifies the state's procedures to provide individuals the opportunity to request a Fair Hearing, including providing notice of action as required in 42 CFR §431.210.

H. Quality Improvement. The state operates a formal, comprehensive system to ensure that the waiver meets the assurances and other requirements contained in this application. Through an ongoing process of discovery, remediation and improvement, the state assures the health and welfare of participants by monitoring: (a) level of care determinations; (b) individual plans and services delivery; (c) provider qualifications; (d) participant health and welfare; (e) financial oversight and (f) administrative oversight of the waiver. The state further assures that all problems identified through its discovery processes are addressed in an appropriate and timely manner, consistent with the severity and nature of the problem. During the period that the waiver is in effect, the state will implement the Quality Improvement Strategy specified in **Appendix H**.

I. Public Input. Describe how the state secures public input into the development of the waiver:

The 30 day public comment period for the CL waiver renewal was initiated on February 20, 2019 and closed on March 22, 2019 at 5:00 pm EST. The entire CL waiver renewal application was open for public comment for 30 days. Notification for the public comment period was sent by email to stakeholders, advocacy organizations and other agencies. Email recipients were asked to share the notice providing additional dissemination of the notice. A website notice and the full amendment were posted on the DMAS website. On Sunday, 2/24/19, a printed legal notice was placed in a large VA newspaper, the Richmond Times Dispatch (RTD), a newspaper with statewide distribution and carried at libraries through Virginia. In addition, the legal notice was posted on the RTD's website for 7 consecutive days (2/24/2019-3/3/2019). The public notice provided the following: Name and address for submission of written and electronic comments, Deadline for submission of comments, Location to obtain paper and electronic versions of the waiver application.

Additionally, notice of the waiver renewal was made by email and letter to all federally-recognized Tribal Governments in Virginia.

There were 23 commenters.

Public comment regarding the wait list focused on concerns about aging caregivers. Families and Providers are worried that the wait list criteria for the different priority levels does not place enough weight on the age of the caregiver. Specific suggestions for changes were adding a specific criteria to priority 1 on the wait list for caregivers that are 55 and older or 70 and older.

Response: This was discussed by the stakeholder committee during waiver redesign and determined not to be as relevant as the other criteria included in priority 1 such as the health and safety of the individual or primary caregiver and other risk factors.

One comment suggested that the priority 1 individuals should have slots before moving down the wait list to other priorities.

Response: It is already current practice to offer available waiver slots to Priority 1 individuals before moving further down the wait list.

A number of comments were about service limits. Several providers wanted to be able to bill simultaneously for multiple services such as skilled and private duty nursing, or nursing and personal assistance, or personal assistance and supported employment.

Response: Virginia included service limits around most services so there is not overlap and/or duplication. Personal assistance service is currently allowable with supported employment services and this is addressed and clarified in the proposed permanent regulations.

One commenter stated that Crisis services should change eligibility language around "placement" to better cover individuals who live in their own home or with family. The current language talks mostly about "jeopardizing placement" for residential services or day services.

Response: Virginia is working to improve community based crisis services for individuals who live with their families or in their own homes. The most recent budget before the Governor includes additional resources for Crisis services across the state. DMAS is also working to increase awareness and utilization of state plan crisis services in addition to the CL wavier crisis services.

One comment asked that we allow parents of minor children to serve as paid attendants for consumer directed services as this would incentivize more parents to move their children out of institutions and back into their family homes.

Response: CMS generally precludes parents of minor children from being paid providers as it is their responsibility to provide supports to their children already.

One comment asked if Environmental Modifications could be expanded to cover door locks and fences.

Response: Environmental modifications "are necessary to ensure the health and welfare of the individual, or that enable the individual to function with greater independence". With appropriate justification and documentation, these types of modifications are allowable.

One commenter proposed language is changed to read, "Reimbursement for Environmental Modifications, Assistive Technology, and Electronic Home-Based Supports is based on approved cost up to a \$5,000 annual limit for each service."

Response: This change will be made

One commenter suggested that Service definitions, documentation and billing requirements be revised to allow more fluidity between services now defined as Group Day, Community Coaching, Community Engagement, and others. This would reflect the varied ways individuals might choose to spend their days, and better facilitate the freedom of choice.

Response: Documentation guidance will be included in the provider manual.

One comment asked if the Supported Living service could be changed to a non-licensed provider so that individuals

could use a Housing Choice Voucher and live in their own home.

Response: The Building Independence waiver is designed specifically individuals who live more independently and utilize Housing Choice Vouchers. The CL waiver has an array of service options that can accommodate this type of living arrangement.

One comment asked that individual and family/caregiver training be added to the Community Living Waiver.

Response: The CL waiver has many residential service options. If the individual is living with their family and needs those supports, the FIS waiver might be a better fit for the individual and allow him to receive those services.

Continued on B. Optional

J. Notice to Tribal Governments. The state assures that it has notified in writing all federally-recognized Tribal Governments that maintain a primary office and/or majority population within the State of the State's intent to submit a Medicaid waiver request or renewal request to CMS at least 60 days before the anticipated submission date is provided by Presidential Executive Order 13175 of November 6, 2000. Evidence of the applicable notice is available through the Medicaid Agency.

K. Limited English Proficient Persons. The state assures that it provides meaningful access to waiver services by Limited English Proficient persons in accordance with: (a) Presidential Executive Order 13166 of August 11, 2000 (65 FR 50121) and (b) Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons" (68 FR 47311 - August 8, 2003). **Appendix B** describes how the state assures meaningful access to waiver services by Limited English Proficient persons.

7. Contact Person(s)

A. The Medicaid agency representative with whom CMS should communicate regarding the waiver is:

Last Name:

Bevan

First Name:

Ann

Title:

Director, Division of Developmental Disabilities and Behavioral Health

Agency:

Virginia Department of Medical Assistance Services

Address:

600 East Broad Street

Address 2:

8. Authorizing Signature

This document, together with Appendices A through J, constitutes the state's request for a waiver under §1915(c) of the Social Security Act. The state assures that all materials referenced in this waiver application (including standards, licensure and certification requirements) are **readily** available in print or electronic form upon request to CMS through the Medicaid agency or, if applicable, from the operating agency specified in Appendix A. Any proposed changes to the waiver will be submitted by the Medicaid agency to CMS in the form of waiver amendments.

Upon approval by CMS, the waiver application serves as the state's authority to provide home and community-based waiver services to the specified target groups. The state attests that it will abide by all provisions of the approved waiver and will continuously operate the waiver in accordance with the assurances specified in Section 5 and the additional requirements specified in Section 6 of the request.

Attachments

jennifer.lee@dmas.virginia.gov

Attachment #1: Transition Plan

Check the box next to any of the following changes from the current approved waiver. Check all boxes that apply.

- ☐ Replacing an approved waiver with this waiver.
- ☐ Combining waivers.
- ☐ Splitting one waiver into two waivers.
- ☐ Eliminating a service.
- ☐ Adding or decreasing an individual cost limit pertaining to eligibility.
- ☐ Adding or decreasing limits to a service or a set of services, as specified in Appendix C.
- ☐ Reducing the unduplicated count of participants (Factor C).
- ☐ Adding new, or decreasing, a limitation on the number of participants served at any point in time.
- ☐ Making any changes that could result in some participants losing eligibility or being transferred to another waiver under 1915(c) or another Medicaid authority.
- ☐ Making any changes that could result in reduced services to participants.

Specify the transition plan for the waiver:

No transition plan is required for this renewal

Attachment #2: Home and Community-Based Settings Waiver Transition Plan

Specify the state's process to bring this waiver into compliance with federal home and community-based (HCB) settings

03/09/2020

requirements at 42 CFR 441.301(c)(4)-(5), and associated CMS guidance.

Consult with CMS for instructions before completing this item. This field describes the status of a transition process at the point in time of submission. Relevant information in the planning phase will differ from information required to describe attainment of milestones.

To the extent that the state has submitted a statewide HCB settings transition plan to CMS, the description in this field may reference that statewide plan. The narrative in this field must include enough information to demonstrate that this waiver complies with federal HCB settings requirements, including the compliance and transition requirements at 42 CFR 441.301(c)(6), and that this submission is consistent with the portions of the statewide HCB settings transition plan that are germane to this waiver. Quote or summarize germane portions of the statewide HCB settings transition plan as required.

Note that Appendix C-5 HCB Settings describes settings that do not require transition; the settings listed there meet federal HCB setting requirements as of the date of submission. Do not duplicate that information here.

Update this field and Appendix C-5 when submitting a renewal or amendment to this waiver for other purposes. It is not necessary for the state to amend the waiver solely for the purpose of updating this field and Appendix C-5. At the end of the state's HCB settings transition process for this waiver, when all waiver settings meet federal HCB setting requirements, enter "Completed" in this field, and include in Section C-5 the information on all HCB settings in the waiver.

The state assures that this waiver renewal will be subject to any provisions or requirements included in the states most recent and/or approved home and community-based settings Statewide Transition Plan. The state will implement any CMS required changes by the end of the transition period as outlined in the home and community-based settings Statewide Transition Plan.

Additional Needed Information (Optional)

Provide additional needed information for the waiver (optional):

Public Comment continued

One comment asked that face to face visits should be allowed using technology.

Response: DMAS maintains that the purpose of face to face visits is for staff to observe the individual in his natural setting. Technology limits how much you can see and observe.

One comment asked that the annual cap on Environmental Modifications, assistive technology and electronic home based supports be lifted higher than the current \$5,000.

Response: Currently, most individuals do not reach this cap.

Many comments focused on how the Supports Intensity Scale® (SIS®) seems to be an imperfect tool and does not capture all the individual's needs. Many comments asked for a review of how the SIS is used. They would like other evaluation instruments, in addition to the SIS, to be used to determine an individual's level and reimbursement tier.

Response: The SIS is a validated tool used to determine support needs. Virginia's review of the SIS has shown that the majority of individuals are placed in the appropriate level.

A number of commenters expressed concern and were against moving the SIS assessment from a three year cycle to a four year cycle.

Response: DMAS and DBHDS worked with AAIDD regarding Virginia's utilization of the SIS as we plan a move to a 4 year cycle. They had no concerns about our move to a 4 year cycle. Further, individuals whose needs have changed prior to their next scheduled SIS may request a reassessment. If documentation of a true change in needs is submitted to DBHDS, a SIS prior to the regular cycle will be scheduled.

One comment suggested moving to a system where the SIS would be conducted more frequently for younger individuals: every 2 years for those younger than 5 and older than 72.

Response: The SIS is not currently normed or used for those under than the age of 5. Other developmental assessments are called for in the regulations. Further, individuals whose needs have changed prior to their next scheduled SIS may request a reassessment. If documentation of a true change in needs is submitted to DBHDS, a SIS prior to the regular cycle will be scheduled.

Several comments asked that customized rates be allowed for all, or many more, services.

Response: Medicaid rates have a methodology and a process. The customized rates are meant to serve individuals with very high needs in very specific circumstances.

One comment asked that LPCs and LCSWs be allowed to get reimbursed as therapists under therapeutic consultation.

Response: Currently, both are eligible providers of Psychology Therapeutic Consultation in the CL waiver.

Several comments focused on the conflict of interest they perceive that CSB's have in Virginia. CSB's are the primary support coordinators/case managers for waiver individuals and they also provider many of the waiver services.

Response: Support coordinators are required to ensure freedom of choice for individuals. They must document that individuals were offered a choice of different providers.

The Virginia legislature has included language in the budget that prevents DMAS from implementing supports packages and service budgets without explicit approval from the legislature.

Response: The Virginia legislature has included language in the budget that prevents DMAS from implementing supports budgets without explicit approval from the legislature. Other elements of the supports packages and related "individual planning calendar" are not prohibited.

Many individuals sent lengthy comments describing how important the CL waiver is to them. They told us about how they were able to move out of institutions and into neighborhoods of their choice and live independently. The CL waiver services have allowed them to be happy and their health has improved. Many comments described their lives now as full of blessings and dreams.

One commenter suggested that for the Services Facilitation initial comprehensive home visit, DMAS change the language to "This may be done only once for consumer-directed services or when the consumer chooses a new Employer of Record." A new EOR should receive the exact same comprehensive training that the original EOR received to be sure he/she understand clearly their role in CD services.

Response: The Services Facilitation "initial comprehensive home visit" is permitted only when the individual first begins consumer-directed services. After that, "reassessment visits" may be billed by existing or new Services Facilitation providers. Many comments addressed consumer directed services. The comments focused on expanding the limits on Service Facilitation management training and requiring the Employer of Record to maintain proof that the attendants have taken appropriate medication management training.

Response: Completion of Services Facilitation training modules is required. These modules are updated, as needed, at least annually and are currently under review. Medication management training of CD attendants is not currently required. The impact of making such a change will be discussed.

APPENDIX I-2A : Addendum

CUSTOMIZED RATE: There is a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates for this service will be necessary. These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- More intensive staffing than assumed in the standard rate (this could be more one-to-one oversight in a residential setting, one-to-one support in a day habilitation program, or two-to-one staffing in home-based and community settings)
- More highly qualified staff (termed 'specialized' staff) that has more training, a higher level of certification (such as a certified nursing assistant), etc.
- More 'program support' funding (specifically designed to meet the needs of the individual) than assumed in the rate models for residential services only; this funding could include more oversight from a nurse or behaviorist, or other supports necessary to maintain the placement.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

SERVICES THAT MAY QUALIFY FOR A CUSTOMIZED RATE:

A.Supported Living, B.In-Home Support services, C.Community Coaching, D.Group Day, E.Sponsored Residential, F.Group Home

CUSTOMIZED RATE DETERMINATION:

DBHDS will review an application for each individual for whom a provider requests a customized rate to determine if:

- a. The individual has exceptional medical support needs that outweigh the resources provided within the current waiver rate structure and/or
- b. The individual has exceptional behavioral support needs that outweigh the resources provided within the current waiver rate structure AND
- c. The individual requires higher level staffing ratios of 1:1 or 2:1 to ensure the safety of the individual and others around them and/or
- d. The individual requires higher credentialed staff to ensure proper supports are given and/or
- e. The program budget reflects a need for increased programmatic costs based on submitted budget template.

As part of the review process, DBHDS will determine any and all providers/resources that are available in the state to support the individual. If it is determined that the individual cannot be served by other providers within the state or is being required to move to a more restrictive setting such as an institution to secure a service that could be provided within an individual's current

community setting given sufficient funding, this information will be reviewed to further validate the need for a customized rate. DBHDS has developed a customized rate review team comprised of developmental disability subject matter experts to include a registered nurse and behavioral specialist. The team will review applications to determine if a customized rate is appropriate based on the below listed criteria:

Provider adequately proves through documented protocols, Individualized Support Plans, quarterly reports, and application submission that:

1. The individual has exceptional support needs that outweigh the current waiver rate structure in either medical, behavioral or both and requires a staffing ratio of 1:1 or higher for all or some of their daily support needs Or
2. The individual requires more highly qualified staff to safely and effectively provide direct supports Or
3. The individual requires increased programmatic oversight defined as oversight that is provided by highly qualified staff (Bachelors level or higher) that requires a higher level of expertise than routinely required.

For individuals in levels 6-7:

The DBHDS customized rate review committee will meet upon application submission to review the submitted criteria. Subject matter experts in both medical and behavioral will determine if the need for a customized rate exists. After the determination is made, the rate model will be used to determine the rate approved.

For some services (In home residential, community coaching, group day) the customized rate team only needs to determine if the individual is approved for a customized rate and the model will output a standard rate applicable to all individuals approved.

While other services (Group Home, Supported living, sponsored residential) the customized rate review team must determine the number of hours of additional 1:1, 2:1, specialized staffing requirements or programmatic oversight approved, then input into the rate model at which point the model will output a rate specific to the individual.

Once approved, DBHDS will make all necessary notifications of either approval or denial, enter the approved rate into WaMS, and notify the individual/provider of their appeal rights.

For individuals in level 1-5:

If the individual for whom the provider is requesting a customized rate falls within levels 1-5, a second level review will occur in which a community resource consultant (CRC) will contact the provider to conduct site visit/review. The purpose of this review is to assure that current services are being maximized, and that all community resources and supports have been explored.

Following the site visit, the CRC can:

- (1) Move the individual's application to the Customized Rate Review Committee (CRRC)

The CRC will move the application directly to the CRRC when it is determined that all waiver and community services are being maximized and it is determined that a customized rate may be appropriate. Or

- (2) Move the individual's application to the Regional Support Team (RST) process

If the individual is referred to the RST, the RST will review the individual to determine if other providers and/or resources are available to adequately support the individual under the current rate structure. This is considered as a second level verification based on the information collected at the site visit. Or

- (3) Deny the individual(s) a customized rate.

If the CRC determines that services are not being maximized, the CRC will work with the provider to better utilize current services; however, the individual will not move forward to the CRRC

For specialized staff, DBHDS has specified wage levels that are to be used when approving customized rates. In particular, the wage assumption for these staff is set at 115 percent of the wage assumption for the 'standard' assumed wage for the applicable service. Other assumptions (benefits and productivity for direct care staff, agency overhead – except when a variable program support is negotiated for residential services, etc.) are the same as in the standard rate model for the applicable service.

A provider requests a customized rate to deliver more intensive staffing, more highly qualified staff, and additional program support. For residential services, the amounts that are agreed to by DBHDS are input into an Excel-based workbook that calculates the resultant rate for the individual. In particular, DBHDS can specify additional staffing levels, the use of 'specialized' staff (the wages for whom are priced at 115 percent of the wage for 'standard' staff), and the total amount of program support specifically designed to meet the unique needs of the individual. Other costs in the rate – such as mileage and administration – are fixed at the same amounts in the underlying rate model for the applicable service.

Customized rates for In-Home Residential, Community Coaching, and Group Day are actually fixed based on region (Northern Virginia/ Rest of State), staffing ratio (one-to-one or two-to-one), and staff qualifications ('standard' or 'specialized'). These

rates were constructed by making relevant adjustment to the underlying rate model for the applicable service.

All individuals approved for a customized rate, regardless of service type will be reviewed at least annually. Providers will be required to complete a new customized rate application and submit updated/recent supporting documentation at the time of the review.

Continued from Appendix I2a

Similar to other DD services, Virginia developed the Community Guide, Peer Mentoring Supports, and Community Transportation using independent rate models. These models reflect the costs that provider face in delivering these services. The models account for various costs, including:

- The wage of the direct support professional
- Benefits for the direct support professional
- The productivity of the direct support professional (to account for non-billable responsibilities)
- Other direct care costs, such as transportation and program supplies
- Agency overhead costs
- Programmatic factors that affect per-person costs, such as staffing ratios

For Community Transportation, the state researched public and private transportation costs for various regions throughout the state. Transportation options included: bus, "Dial A Ride", Metrorail (Northern Virginia), taxi, and Uber. The research analyzed peak and non-peak fares for senior/disabled individuals, along with regular fares. The findings from this research were incorporated into this rate model.

The rate models for Community Guide, Peer Mentoring Supports, and Community Transportation are fully funded.

For Benefits Planning services, the waiver has adopted the rates paid by the Commonwealth's vocational rehabilitation program for the same services.

Benefits Planning consists of four categories: Pre-employment benefits review, Work Incentives Development or Revision, Resolution of SSA benefits issues, and Other services. There are a total of 17 allowable activities that are encompassed within the overall four categories. A person-centered plan is developed and based on the individual's needs and hours for each activity authorized. The service is reimbursed based on a single hourly rate.

1. The State intends to utilize hourly units of service. All service areas have the same hourly rate. The annual limit for services is \$3,000 per year. The services will be authorized and reimbursed based on the person-centered planning process used to determine the activities needed and corresponding service hours.

2. Reimbursement may occur upon completion of each unit hourly unit of service.

The following information below consists of additional information for Appendix H.

Appendix H: Quality Improvement Strategy (2 of 2)

H-1: Systems Improvement

a. System Improvements

i. Describe the process(es) for trending, prioritizing, and implementing system improvements (i.e., design changes) prompted as a result of an analysis of discovery and remediation information

The RMRC is composed of DBHDS staff with clinical training and experience in the areas of behavioral health, developmental disabilities, forensics, quality improvement, nursing, behavior analysis, and medicine, as well as data analytics. Offices represented on the RMRC are:

Quality and Risk Management, Integrated Health Services, Case Management, Community Integration, Licensing, Human Rights, Others as recommended by the office of Quality and Risk Management.

The committee meets monthly to review data and discuss cases. Committee members act as liaisons to other parts of the service

system for gathering information as well as initiating improvements in the systems of care. The RMRC reviews facility and community risk data to identify trends in areas of risk and to identify potential actions toward improvement. The RMRC reports the results of its reviews and recommendations to the QIC.

Quality Service Reviews - evaluate the quality of services at an individual, provider and system-wide level to ensure:

- Individuals' needs are met, including health and safety.
- Person-centered thinking is applied and individuals are given choices and are supported in self-direction and in managing individual health and safety.
- Services and supports are provided in the most integrated settings appropriate to individuals' needs and consistent with their informed choice.
- Individuals are provided opportunities for community engagement and inclusion in all aspects of their lives

A statistically valid sample of individuals receiving services is surveyed on an annual basis. All services, including case management, are included in the review process. Thus the Quality Assurance Reviewer (QAR) gathers information needed to assess the overall supports being provided to the person and identify recommendations to support the person's team in improving the quality of supports. The data collected are used to evaluate the quality of services being provided across the state and to identify areas needing improvement.

An alert is defined as any circumstance, situation, or observation identifying a person to be in imminent or potential risk for harm. If at any point during the Person Centered Review, the QAR uncovers any indication of abuse, neglect, exploitation, or has any concerns related to medical, behavioral, rights, health, or safety issues or mistreatment, the appropriate entity is contacted immediately. This may include any protection agency, as well as identified DBHDS staff. Every effort is made to safeguard the person should such a situation arise. If immediate risk is identified, a QAR remains onsite until the appropriate authorities arrive.

Recommendations from the QSR process are presented to the QIC, RQCs, and other stakeholders. Recommendations are prioritized to determine specific actions to be taken. Implementation of actions and their results are monitored by the QIC.

Appendix H Quality Improvement Strategy*

Quality improvement reports and data are organized and reviewed under four key performance areas: Health and well-being; community integration/community inclusion; provider capacity; and person-centeredness. Quality improvement data includes performance measures that are collected as part of the waiver assurances, as well as additional measures that are identified as significant by DBHDS. Additional reports that have been compiled and reviewed by the Quality Improvement Committee and the Regional Quality Councils include: annual mortality review report; semi-annual and annual employment report; semi-annual and annual crisis report; an annual housing report; report on the outcomes of the regional support teams; semi-annual report of licensing citations and timeliness of incident reporting; semi-annual report of human rights allegations and substantiated cases of abuse, neglect, and exploitation. DBHDS is in the process of developing an annual quality improvement report; the first report will assess activities during SFY 19.

The Quality Improvement Committee meets on a monthly basis and reviews data and reports in each key performance area on a quarterly basis. The frequency of specific reports varies and may be quarterly, semi-annual, or annual, as noted above.

Results and activities are reviewed with representatives of providers, agencies, participants, and families, on a quarterly basis through the DBHDS Regional Quality Councils (RQC). Participants on the councils review quality improvement data each quarter. The data is aggregated at a state and regional level (when possible). RQC members make recommendations to the Quality Improvement Committee and a designated member from each region serves on the committee. Once DBHDS begins collecting data on approved performance measures, this data will be made available on a quarterly basis to the public through the agency website.

Note: The control numbers for the waivers are VA.358 for Family and Individual Support and VA.430 for Building Independence.

Appendix A: Waiver Administration and Operation

1. State Line of Authority for Waiver Operation. Specify the state line of authority for the operation of the waiver (*select one*):

- ☐ **The waiver is operated by the state Medicaid agency.**

Specify the Medicaid agency division/unit that has line authority for the operation of the waiver program (*select one*):

- ☐ **The Medical Assistance Unit.**

Specify the unit name:

(Do not complete item A-2)

- ☐ **Another division/unit within the state Medicaid agency that is separate from the Medical Assistance Unit.**

Specify the division/unit name. This includes administrations/divisions under the umbrella agency that has been identified as the Single State Medicaid Agency.

(Complete item A-2-a).

- ☒ **The waiver is operated by a separate agency of the state that is not a division/unit of the Medicaid agency.**

Specify the division/unit name:

Department of Behavioral Health and Developmental Services (DBHDS)

In accordance with 42 CFR §431.10, the Medicaid agency exercises administrative discretion in the administration and supervision of the waiver and issues policies, rules and regulations related to the waiver. The interagency agreement or memorandum of understanding that sets forth the authority and arrangements for this policy is available through the Medicaid agency to CMS upon request. (Complete item A-2-b).

Appendix A: Waiver Administration and Operation

2. Oversight of Performance.

a. Medicaid Director Oversight of Performance When the Waiver is Operated by another Division/Unit within the State Medicaid Agency. When the waiver is operated by another division/administration within the umbrella agency designated as the Single State Medicaid Agency. Specify (a) the functions performed by that division/administration (i.e., the Developmental Disabilities Administration within the Single State Medicaid Agency), (b) the document utilized to outline the roles and responsibilities related to waiver operation, and (c) the methods that are employed by the designated State Medicaid Director (in some instances, the head of umbrella agency) in the oversight of these activities:

As indicated in section 1 of this appendix, the waiver is not operated by another division/unit within the State Medicaid agency. Thus this section does not need to be completed.

b. Medicaid Agency Oversight of Operating Agency Performance. When the waiver is not operated by the Medicaid agency, specify the functions that are expressly delegated through a memorandum of understanding (MOU) or other written document, and indicate the frequency of review and update for that document. Specify the methods that the Medicaid agency uses to ensure that the operating agency performs its assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify the frequency of Medicaid agency assessment of operating agency performance:

DMAS is responsible for appeals, conducting quality management reviews, contract monitoring of service authorization, paying provider claims and completing federal reports, including the demonstration of cost effectiveness. DMAS and DBHDS work together to develop provider rates and ensure budget monitoring and accountability. DBHDS has an active role in the development and recent redesigning of the waiver, development of provider (policy) manuals and regulations, development of state plan amendments, leadership of advisory groups of stakeholders, development of provider communications and official memoranda and responses to the public and legislators about concerns regarding the waiver, slot distribution and service authorization procedures and functions. DBHDS also manages the related waiting list and distributes slots to CSBs, performs service authorization activities for the waiver and provides training, technical assistance and consultation.

The DMAS-DBHDS Interagency Agreement (dated December, 2009, but most recently amended in June, 2015) further describes and emphasizes the roles and responsibilities of the two agencies. It is reviewed annually and updated to ensure it reflects the current arrangement and is modified if changes or additions are needed.

DBHDS, the operating agency, is the Commonwealth's single state agency for public mental health, developmental and substance abuse services. As the agency responsible for the daily policy development and management of the Community Living Waiver, the Interagency Agreement lists DBHDS's responsibilities as:

- 1) DBHDS will certify to DMAS for purposes of provider enrollment the licensing status of programs and services licensed by DBHDS, as needed.
- 2) DBHDS will actively participate in and advise DMAS as DMAS develops new managed care projects that include or affect any Medicaid-reimbursed mental health, intellectual disability, or substance use disorders services.
- 3) Subject to review and approval by DMAS, DBHDS may subcontract services to other qualified organizations.
- 4) The DBHDS Licensing Office will inform DMAS when negative action, such as sanctions or license revocations, have been initiated.
- 5) DBHDS will serve as an expert witness, as needed, in provider and client appeal cases.
- 6) DBHDS will provide data on a routine basis and as needed to respond to reporting requirements of CMS.
- 7) DBHDS shall maintain a listing of providers licensed by DBHDS on their website.
- 8) DBHDS will coordinate with the CSBs to obtain the information and needed by DMAS for approval or denial of all out-of-state placements recommended by DBHDS.
- 9) DBHDS shall manage daily operations and recommend design changes to the waiver for individuals with I/DD, with review and final approval by DMAS.
- 10) DBHDS shall develop regulations, policy, procedures, provider memoranda, State Plan Amendments, and CMS Waiver applications and subsequent amendments for the waivers for individuals with I/DD, with the input, review and final approval and submission by DMAS to the appropriate federal and state authorities.
- 11) DBHDS shall manage the waiver waiting lists and distribute slots to the Community Services Boards according to established criteria, procedures and CMS approved waiver applications. DBHDS shall develop a consistent set of guidelines to be applied statewide for slot assignment by the Community Services Boards. DBHDS will monitor the assignment of slots by the Community Services Boards necessary to comply with CMS requirements defined in the waiver.
- 12) DBHDS shall address questions and concerns from the public or legislators regarding waivers and slot distribution.
- 13) DBHDS will convene and serve as lead of advisory committees that pertain to these waivers.

14) DBHDS shall conduct the training, and provide the technical assistance, and consultation on these waivers and waiver-related services, and participate in training with DMAS.

15) DBHDS shall collaborate with DMAS in the development of the budget and agency funding priorities. DMAS shall provide data as needed to support this function and actively participate in the development process.

16) DBHDS shall include in its budget priorities and budget proposals funding for Waiver slots and Waiver program services.

17) DBHDS and DMAS shall perform quality management review functions to assure compliance with CMS waiver requirements and jointly meet as mutually agreed to review findings and recommend program enhancements.

18) DMAS shall provide for payment of claims that meet all necessary criteria for payment of services.

19) DMAS shall conduct reviews of waiver operations consistent with waiver application and Medicaid regulations. Review may include Quality Management Reviews, Utilization Review and monitoring of the agreement.

20) The State-designated agency or its contractor shall perform prior authorization for the waivers for individuals with I/DD.

21) The two agencies will meet the performance measures and assurances as set forth by CMS for waiver applications that are operated by DBHDS.

According to the same Interagency Agreement, DMAS, the single state agency maintains the following responsibilities for the administration of Medicaid-funded programs:

1) DMAS will develop and maintain the State Medical Assistance Plan, which is approved by the Centers for Medicare and Medicaid Services (CMS).

2) DMAS shall complete federal quarterly and other reports, including the demonstration of cost effectiveness and outcome measure reporting, for CMS. DMAS shall provide DBHDS sufficient notice of its need for information, provide review and comment by DBHDS and supply to DBHDS copies of reports made pursuant to this section.

3) DMAS will submit approved waiver documents and State Plan Amendments relating to waivers to CMS, following review and comment by DBHDS, with a final copy to DBHDS.

4) DMAS will participate in the development and review of and have final approval authority for all revisions made to policies, provider manuals, regulatory packages, State Plan Amendments, or amendments to the Code of Virginia.

5) DMAS shall review, sign, and send Medicaid memoranda to DBHDS to assure individuals and providers are informed as needed.

6) DMAS will pay valid provider claims submitted by qualified providers for covered services.

7) DMAS will collaborate with DBHDS in developing budget proposals and submissions and requests for funding in the Governor's budget for covered services.

8) DMAS has the right to terminate or retract payment to a provider due to licensing, health and safety issues or quality management or utilization review findings.

9) DMAS will respond to the public and legislators regarding claims processing and any other functions that are carried out solely by DMAS and over which DMAS has final authority.

10)DMAS will maintain provider agreements with community services boards and other providers and ensure that all providers meet applicable qualifications and render covered services to Medicaid-enrolled individuals. DMAS will notify DBHDS of providers of the services.

11) DMAS will notify the DBHDS, Office of Developmental Services and Office of Licensing for providers licensed by DBHDS, when significant quality of care issues are identified or when DMAS has a reasonable basis for believing that a provider is experiencing significant financial difficulties.

12) DMAS will receive and manage provider and client appeals and provide DBHDS copies of appeal decisions.

13) DMAS will keep DBHDS informed of changes in missions and policies of DMAS and CMS, forward related communications with CMS to DBHDS and facilitate regular collaborative discussions with DBHDS and CMS to ensure compliance with state and federal statutory and regulatory requirements.

14) DMAS will participate as requested in advisory groups of stakeholders.

15) DMAS shall serve as the lead for all of out-of-state waiver placements, in accordance with the Division of Long-Term Care regulations, policies and procedures.

16) DMAS and DBHDS shall place on their respective web sites provider manuals, links to the other agency's website and any other information and documents needed by Medicaid providers.

17) DMAS shall provide information and data to DBHDS as needed to ensure the ability of DBHDS to carry out its responsibilities as outlined below.

18) DMAS will be responsible for provider rate-setting in consultation with DBHDS for rates under the ID and DS waivers. DMAS will provide notice to providers about ID and DS waivers rate changes. Final determination of all ID and DS waivers rates paid remains with DMAS.

19) On a quarterly basis, DMAS shall, in collaboration with DBHDS, monitor the costs associated with the two Waivers to ensure that the services provided remain cost effective.

20) DMAS will monitor prior-authorizations conducted by the State-designated agency or its contractor for criteria application, entry into Virginia Medicaid Medical Management System (VaMMIS) and processing time. DMAS will provide DBHDS a summary of findings and collaboratively work with DBHDS to correct any identified issues.

The two agencies work collaboratively to resolve issues that arise and require final approval by DMAS. DMAS provides guidance and oversight of DBHDS activities via joint quarterly operations meetings where issues are discussed and resolved. These meetings include collaborative efforts to develop performance measures, monitor progress toward those meeting those measures and identify barriers to completion. This group also identifies issues that may need to be addressed through the waiver, regulations or policy and procedure manuals.

DMAS' and DBHDS' staff also meet quarterly as a Quality Review Team (QRT) to review data, survey results and information used to monitor progress toward meeting CMS assurances and take steps to conduct remediation where it is indicated. The QRT also identifies trends and areas where systemic changes are needed to collect new data and information or improve its quality.

Appendix A: Waiver Administration and Operation

3. Use of Contracted Entities. Specify whether contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable) (*select one*):

- ☒ **Yes. Contracted entities perform waiver operational and administrative functions on behalf of the Medicaid agency and/or operating agency (if applicable).**

Specify the types of contracted entities and briefly describe the functions that they perform. *Complete Items A-5 and A-6.*

Virginia DMAS contracts with other entities to perform the following roles:

1) Provider Enrollment Services for completion of provider enrollment, execution of provider agreements and management of the Virginia MMIS. Information on their services can be found at www.virginiamedicaid.dmas.virginia.gov.

2) Fiscal management services (FMS) for consumer-directed services.

- ☐ **No. Contracted entities do not perform waiver operational and administrative functions on behalf of the Medicaid agency and/or the operating agency (if applicable).**

Appendix A: Waiver Administration and Operation

4. Role of Local/Regional Non-State Entities. Indicate whether local or regional non-state entities perform waiver operational and administrative functions and, if so, specify the type of entity (*Select One*):

- ☐ **Not applicable**
- ☒ **Applicable** - Local/regional non-state agencies perform waiver operational and administrative functions.

Check each that applies:

- ☒ **Local/Regional non-state public agencies** perform waiver operational and administrative functions at the local or regional level. There is an **interagency agreement or memorandum of understanding** between the State and these agencies that sets forth responsibilities and performance requirements for these agencies that is available through the Medicaid agency.

Specify the nature of these agencies and complete items A-5 and A-6:

Three main functions of the waiver administration and operation are performed in part by the local Community Services Boards/Behavioral Health Authorities (CSBs). These are facilitating individual waiver enrollment, conducting the level of care evaluation, and coordinating the development of Individual Support Plans prior to service delivery. These functions are completed by case managers employed or contracted by the CSBs as part of their Virginia statute dictated role as the single point of entry into the publicly-funded mental health, developmental, and substance abuse service system. In addition, these three functions are validated by DBHDS staff, who receive and review summaries of these elements from the CSBs/BHAs as part of the individual enrollment and service authorization processes, according to the DMAS-DBHDS Interagency Agreement. All of these functions are subject to review by the state Medicaid Agency through routine Quality Management Reviews.

CSBs are single or multiple jurisdictional entities established by local governments pursuant to section 37.2-500 or 37.2-600 of the Code of Virginia and are under the control of local elected officials (city council and board of supervisors' members who establish the CSB, approve its annual "performance contract" with DBHDS and appoint CSB board members.) The performance contract with which each CSB enters with DBHDS is for the purpose of funding services provided directly or contractually by the CSB in a manner that ensures accountability to DBHDS. It also ensures quality of services for individuals and implements the vision (articulated in DBHDS State Board Policy 1036, the DBHDS Vision Statement) of an individual-driven system of services and supports. This contract defines requirements and responsibilities for the CSB and DBHDS such as the scope of services to be provided, the population to be served, resource management, board responsibilities, state Department responsibilities, reporting requirements and dispute resolution.

DMAS additionally maintains a provider agreement with each CSB to support the provision of the above listed (and other) case management functions.

- ☐ **Local/Regional non-governmental non-state entities** conduct waiver operational and administrative functions at the local or regional level. There is a contract between the Medicaid agency and/or the operating agency (when authorized by the Medicaid agency) and each local/regional non-state entity that sets forth the responsibilities and performance requirements of the local/regional entity. The **contract(s)** under which private entities conduct waiver operational functions are available to CMS upon request through the Medicaid agency or

the operating agency (if applicable).

Specify the nature of these entities and complete items A-5 and A-6:

Appendix A: Waiver Administration and Operation

- 5. Responsibility for Assessment of Performance of Contracted and/or Local/Regional Non-State Entities.** Specify the state agency or agencies responsible for assessing the performance of contracted and/or local/regional non-state entities in conducting waiver operational and administrative functions:

The Virginia Department of Medical Assistance Services (DMAS) maintains responsibility for assessing the performance of contracted entities. DMAS employs contract monitors to oversee the daily administrative operations of these contracted entities and to provide periodic evaluation of the outcomes and deliverables (described in the next section.)

As outlined in the Code of Virginia, the DBHDS functions as the state authority for the public mental health, developmental, and substance abuse services system; and Community Services Boards and the Behavioral Health Authorities (CSBs) function as the local authorities for that system. The relationship between and the roles and responsibilities of the Department and CSBs are described in applicable provisions of the Code of Virginia, State Board of Behavioral Health and Developmental Services policies, and the community services performance contract negotiated annually by the DBHDS with each CSB. DBHDS and CSBs enter into the performance contract to fund services provided directly or contractually by the CSBs in a manner that ensures accountability to DBHDS and quality of care for individuals receiving services and implements the DBHDS vision of a system of services and supports driven by individuals receiving services that promote self-determination, empowerment, recovery, resilience, health, and the highest possible level participation by individuals receiving services in all aspects of community life, including work, school, family, and other meaningful relationships.

The performance contract requires that the CSB address and report on performance expectations and goals as part of the Continuous Quality Improvement Process supported by the Department. The CSB must report required data to the DBHDS about the demographic characteristics of individuals receiving services and the types and amounts of services it provides. The contract requires the CSB to account for all services, revenues, expenses, and costs accurately and submit reports to the Department in a timely manner. The performance contract is available on the DBHDS web site at www.dbhds.virginia.gov/OCC-default.htm.

For its part, the DBHDS disburses state general funds to each CSB subject to the CSB's compliance with the provisions of the performance contract. The DBHDS provides guidance, direction, and technical assistance to CSBs, licenses and monitors CSBs and other providers, and has the authority under the contract to utilize a variety of remedies, including requiring a corrective action plan, delaying payments, and terminating all or part of the contract, to assure CSB compliance with the contract.

Appendix A: Waiver Administration and Operation

- 6. Assessment Methods and Frequency.** Describe the methods that are used to assess the performance of contracted and/or local/regional non-state entities to ensure that they perform assigned waiver operational and administrative functions in accordance with waiver requirements. Also specify how frequently the performance of contracted and/or local/regional non-state entities is assessed:

DMAS is responsible for the assessment of performance of all contracted entities, that perform waiver operational and/or administrative functions. Medicaid agency employees are assigned the duties of contract monitor to oversee and ensure the performance of the contracted entities and complete an evaluation every six months. Contract monitors are responsible for:

- 1) Coordinating and overseeing the day-to-day delivery of services under the contract, including assurance that information about the waiver is given to potential enrollees; that individuals are assisted with waiver enrollment; that level of care evaluations are completed; that waiver requirements are met according to the individual support plan; and that prior authorization is conducted in accordance with review criteria and approved procedures;
- 2) Ensuring that services are delivered in accordance with the contract and that deliverables are in fact delivered;
- 3) Approving invoices for payment in accordance with the terms of the contract;
- 4) Completing and submitting a semi-annual report to the DMAS Contract Officer;
- 5) Reporting any delivery failures or performance problems to the DMAS Contract Officer; and
- 6) Ensuring that the contract terms and conditions are not extended, increased, or modified without proper authorization.

The evaluation measures include:

- 1) Has the contractor/agency complied with all terms and conditions of the contract/agreement during the period of this evaluation?
- 2) Have deliverables required by the contract/interagency agreement been delivered on a timely basis?
- 3) Has the quality of services required by the contract/interagency agreement been satisfactory during the evaluation period?
- 4) Are there any issues or problems you wish to bring to managements attention at this time?
- 5) Do you need assistance in handling any issues or problems associated with the contract/interagency agreement?
- 6) From an overall standpoint, are you satisfied with the contractors/agency's performance?

In addition, DMAS oversees DBHDS as the operating agency, through annual monitoring of the interagency agreement, program and financial audits, ongoing quality management reviews and quarterly meetings of agency staff in the form of operational monitoring. In addition the DMAS-DBHDS Quality Review Team (QRT) meets quarterly to review data on the performance of providers, performance deficiencies, select remediation strategies, and determine the impact of implementing such strategies on individual issues and the overall system. The functions of the QRT are described fully in Appendix H.

DMAS reviews audit findings and corrective action plans to ensure that any deficiencies identified are remediated.

Appendix A: Waiver Administration and Operation

7. Distribution of Waiver Operational and Administrative Functions. In the following table, specify the entity or entities that have responsibility for conducting each of the waiver operational and administrative functions listed (*check each that applies*):

In accordance with 42 CFR §431.10, when the Medicaid agency does not directly conduct a function, it supervises the performance of the function and establishes and/or approves policies that affect the function. All functions not performed directly by the Medicaid agency must be delegated in writing and monitored by the Medicaid Agency. *Note: More than one box may be checked per item. Ensure that Medicaid is checked when the Single State Medicaid Agency (1) conducts the function directly; (2) supervises the delegated function; and/or (3) establishes and/or approves policies related to the function.*

Appendix A: Waiver Administration and Operation

Quality Improvement: Administrative Authority of the Single State Medicaid Agency

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Administrative Authority

The Medicaid Agency retains ultimate administrative authority and responsibility for the operation of the waiver program by exercising oversight of the performance of waiver functions by other state and local/regional non-state agencies (if appropriate) and contracted entities.

i. Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance, complete the following. Performance measures for administrative authority should not duplicate measures found in other appendices of the waiver application. As necessary and applicable, performance measures should focus on:

- Uniformity of development/execution of provider agreements throughout all geographic areas covered by the waiver
- Equitable distribution of waiver openings in all geographic areas covered by the waiver
- Compliance with HCB settings requirements and other new regulatory components (for waiver actions submitted on or after March 17, 2014)

Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

1. Number and percent of satisfactory Medicaid-initiated operating agency and contractor evaluations. N: # of satisfactory Medicaid-initiated operating agency and contractor evaluations D: Total # of Medicaid-initiated operating agency and contractor evaluations.

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

DMAS meets with the operating agency (DBHDS) quarterly (in the context of the Quality Review Team meeting) and as needed to review performance and discuss how problems identified will be remediated. Follow-up letters are sent by DMAS and reports are requested on the status of remediation and individual problems. DMAS may provide training and technical assistance to ensure problems that have been identified are resolved.

ii. Remediation Data Aggregation

Remediation-related Data Aggregation and Analysis (including trend identification)

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Administrative Authority that are currently non-operational.

☒ No

☐ Yes

Please provide a detailed strategy for assuring Administrative Authority, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix B: Participant Access and Eligibility

B-1: Specification of the Waiver Target Group(s)

a. Target Group(s). Under the waiver of Section 1902(a)(10)(B) of the Act, the state limits waiver services to one or more groups or subgroups of individuals. Please see the instruction manual for specifics regarding age limits. *In accordance with 42 CFR §441.301(b)(6), select one or more waiver target groups, check each of the subgroups in the selected target group(s) that may receive services under the waiver, and specify the minimum and maximum (if any) age of individuals served in each subgroup:*

Target Group	Included	Target SubGroup	Minimum Age	Maximum Age	
				Maximum Age Limit	No Maximum Age Limit
<input type="checkbox"/>		Aged or Disabled, or Both - General			

Target Group	Included	Target SubGroup	Minimum Age	Maximum Age	
				Maximum Age Limit	No Maximum Age Limit
	<input type="checkbox"/>	Aged	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	Disabled (Physical)	<input type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	Disabled (Other)	<input type="checkbox"/>	<input type="checkbox"/>	
<input type="checkbox"/> Aged or Disabled, or Both - Specific Recognized Subgroups					
	<input type="checkbox"/>	Brain Injury	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	HIV/AIDS	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	Medically Fragile	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	Technology Dependent	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/> Intellectual Disability or Developmental Disability, or Both					
	<input checked="" type="checkbox"/>	Autism	0	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	<input checked="" type="checkbox"/>	Developmental Disability	0	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	<input checked="" type="checkbox"/>	Intellectual Disability	0	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/> Mental Illness					
	<input type="checkbox"/>	Mental Illness	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	<input type="checkbox"/>	Serious Emotional Disturbance	<input type="checkbox"/>	<input type="checkbox"/>	

b. Additional Criteria. The state further specifies its target group(s) as follows:

c. Transition of Individuals Affected by Maximum Age Limitation. When there is a maximum age limit that applies to individuals who may be served in the waiver, describe the transition planning procedures that are undertaken on behalf of participants affected by the age limit (*select one*):

- ☒ Not applicable. There is no maximum age limit
- ☐ The following transition planning procedures are employed for participants who will reach the waiver's maximum age limit.

Specify:

Appendix B: Participant Access and Eligibility

B-2: Individual Cost Limit (1 of 2)

a. Individual Cost Limit. The following individual cost limit applies when determining whether to deny home and community-based services or entrance to the waiver to an otherwise eligible individual (*select one*). Please note that a state may have only ONE individual cost limit for the purposes of determining eligibility for the waiver:

- ☒ **No Cost Limit.** The state does not apply an individual cost limit. *Do not complete Item B-2-b or item B-2-c.*
- ☐ **Cost Limit in Excess of Institutional Costs.** The state refuses entrance to the waiver to any otherwise eligible individual when the state reasonably expects that the cost of the home and community-based services furnished to

that individual would exceed the cost of a level of care specified for the waiver up to an amount specified by the state. *Complete Items B-2-b and B-2-c.*

The limit specified by the state is (select one)

- ☐ **A level higher than 100% of the institutional average.**

Specify the percentage:

- ☐ **Other**

Specify:

- ☐ **Institutional Cost Limit.** Pursuant to 42 CFR 441.301(a)(3), the state refuses entrance to the waiver to any otherwise eligible individual when the state reasonably expects that the cost of the home and community-based services furnished to that individual would exceed 100% of the cost of the level of care specified for the waiver. *Complete Items B-2-b and B-2-c.*
- ☐ **Cost Limit Lower Than Institutional Costs.** The state refuses entrance to the waiver to any otherwise qualified individual when the state reasonably expects that the cost of home and community-based services furnished to that individual would exceed the following amount specified by the state that is less than the cost of a level of care specified for the waiver.

Specify the basis of the limit, including evidence that the limit is sufficient to assure the health and welfare of waiver participants. Complete Items B-2-b and B-2-c.

The cost limit specified by the state is (select one):

- ☐ **The following dollar amount:**

Specify dollar amount:

The dollar amount (select one)

- ☐ **Is adjusted each year that the waiver is in effect by applying the following formula:**

Specify the formula:

- ☐ **May be adjusted during the period the waiver is in effect. The state will submit a waiver amendment to CMS to adjust the dollar amount.**
- ☐ **The following percentage that is less than 100% of the institutional average:**
- Specify percent:
-
- ☐ **Other:**
- Specify:*

Appendix B: Participant Access and Eligibility

B-2: Individual Cost Limit (2 of 2)

Answers provided in Appendix B-2-a indicate that you do not need to complete this section.

- b. Method of Implementation of the Individual Cost Limit.** When an individual cost limit is specified in Item B-2-a, specify the procedures that are followed to determine in advance of waiver entrance that the individual's health and welfare can be assured within the cost limit:

- c. Participant Safeguards.** When the state specifies an individual cost limit in Item B-2-a and there is a change in the participant's condition or circumstances post-entrance to the waiver that requires the provision of services in an amount that exceeds the cost limit in order to assure the participant's health and welfare, the state has established the following safeguards to avoid an adverse impact on the participant (*check each that applies*):

- ☐ The participant is referred to another waiver that can accommodate the individual's needs.
- ☐ Additional services in excess of the individual cost limit may be authorized.

Specify the procedures for authorizing additional services, including the amount that may be authorized:

- ☐ Other safeguard(s)

Specify:

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (1 of 4)

- a. Unduplicated Number of Participants.** The following table specifies the maximum number of unduplicated participants who are served in each year that the waiver is in effect. The state will submit a waiver amendment to CMS to modify the number of participants specified for any year(s), including when a modification is necessary due to legislative appropriation or another reason. The number of unduplicated participants specified in this table is basis for the cost-neutrality calculations in Appendix J:

Table: B-3-a

Waiver Year	Unduplicated Number of Participants
Year 1	11736
Year 2	11883
Year 3	12029
Year 4	

Waiver Year	Unduplicated Number of Participants
	12176
Year 5	12323

- b. Limitation on the Number of Participants Served at Any Point in Time.** Consistent with the unduplicated number of participants specified in Item B-3-a, the state may limit to a lesser number the number of participants who will be served at any point in time during a waiver year. Indicate whether the state limits the number of participants in this way: *(select one)* :

- ☐ The state does not limit the number of participants that it serves at any point in time during a waiver year.
- ☒ The state limits the number of participants that it serves at any point in time during a waiver year.

The limit that applies to each year of the waiver period is specified in the following table:

Table: B-3-b	
Waiver Year	Maximum Number of Participants Served At Any Point During the Year
Year 1	11736
Year 2	11736
Year 3	11736
Year 4	11736
Year 5	11736

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

- c. Reserved Waiver Capacity.** The state may reserve a portion of the participant capacity of the waiver for specified purposes (e.g., provide for the community transition of institutionalized persons or furnish waiver services to individuals experiencing a crisis) subject to CMS review and approval. The State *(select one)*:

- ☐ Not applicable. The state does not reserve capacity.
- ☒ The state reserves capacity for the following purpose(s).

Purpose(s) the state reserves capacity for:

Purposes	
Waiver Movement and Emergencies	
Facility Downsizing	

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

Purpose *(provide a title or short description to use for lookup):*

Waiver Movement and Emergencies

Purpose *(describe):*

Because the Commonwealth's three waivers for persons with DD (the Community Living, the Family and Individual Supports and the Building Independence waivers) all support individuals who access them from the same statewide waiting list, it is highly desirable for individuals on one of the three waivers not to have to wait to access a waiver with a different focus and set of services. Therefore, having a pool of reserve slots is desirable so that individuals already receiving services in one of the other two DD waivers who experience a change in their assessed needs may move seamlessly to the Community Living waiver when needed.

This set of reserve slots will also provide a safety net to individuals who move from the Community Living waiver to one of the other two DD waivers. That way individuals who find that their "new waiver" does not meet their needs as originally thought can return to the original (Community Living) waiver if needed.

Some of these slots will be used as emergency capacity slots for individuals who are either on the statewide waiver waiting list or are previously unknown to the DD system to ensure their health and safety in an emergency situation (e.g., being homeless or facing imminent homelessness). These emergency slots will be made available to individuals experiencing emergencies on a first come-first served basis.

Describe how the amount of reserved capacity was determined:

The reserved capacity was determined by the amount of reserved waiver slots allocated by the Virginia General Assembly.

The capacity that the State reserves in each waiver year is specified in the following table:

Waiver Year	Capacity Reserved
Year 1	25
Year 2	25
Year 3	25
Year 4	25
Year 5	25

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (2 of 4)

Purpose (provide a title or short description to use for lookup):

Facility Downsizing

Purpose (describe):

To enable individuals to transition from an ICF-IID or SNF to the community in compliance with requirements of the 2012 Settlement with the U.S. Department of Justice. Some of these slots are used for MFP transitions and some are used when individuals choose non-MFP-qualifying settings in which to transition.

Describe how the amount of reserved capacity was determined:

Slots for facility downsizing are funded by the Virginia General Assembly according to the Commonwealth's Settlement Agreement with the US Department of Justice. The Settlement Agreement prescribes a certain number of slots be set aside for facility downsizing each year.

The capacity that the State reserves in each waiver year is specified in the following table:

Waiver Year	Capacity Reserved
Year 1	60
Year 2	60
Year 3	60
Year 4	60
Year 5	60

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served (3 of 4)

d. Scheduled Phase-In or Phase-Out. Within a waiver year, the state may make the number of participants who are served subject to a phase-in or phase-out schedule (*select one*):

- ☒ The waiver is not subject to a phase-in or a phase-out schedule.
- ☐ The waiver is subject to a phase-in or phase-out schedule that is included in Attachment #1 to Appendix B-3. This schedule constitutes an intra-year limitation on the number of participants who are served in the waiver.

e. Allocation of Waiver Capacity.

Select one:

- ☐ Waiver capacity is allocated/managed on a statewide basis.
- ☒ Waiver capacity is allocated to local/regional non-state entities.

Specify: (a) the entities to which waiver capacity is allocated; (b) the methodology that is used to allocate capacity and how often the methodology is reevaluated; and, (c) policies for the reallocation of unused capacity among local/regional non-state entities:

Virginia currently has a waiting list for waiver services for individuals with I/DD. With the initiation of its three amended waivers, this statewide, needs-based waiting list will consist of individuals grouped according to priority of needs. The overall, statewide waiting list is managed by the Virginia DBHDS.

When at least 40 new waiver slots are funded by the General Assembly, one slot will be allocated to each CSB. Additional slots, up to the total number of available slots for a given waiver, will be allocated to CSBs for individuals living within that CSB's catchment area based upon a weighted formula which will factor the following objective factors/criteria:

- the region's population
- the percentage of Medicaid eligible individuals in the catchment area
- each CSB's percentage of individuals on the "Priority One" portion of the statewide waiting list.

When the General Assembly has approved less than 40 slots for a given waiver, the available slots will be divided between regions/sub-regions for distribution to the individual(s) in that region/sub-region who are determined to have the most urgent needs.

Individuals have comparable access to waiver services across the geographic areas served by the waiver due to the fact that slots are distributed in the above manner. This ensures that individuals in all areas of the state have an opportunity to receive waiver services, based on the urgency of their need, and areas with a high concentration of individuals with urgent need receive a greater share of slots in order to meet those needs. Individuals may receive waiver services in any area of the state.

Once allocated to a CSB or a regional/sub-regional group of CSBs, slots are assigned to individuals based on priority of need by a group of DBHDS trained, impartial volunteers from the area/region. These committees, known as Waiver Slot Assignment Committees (WSACs), review the needs of the highest scoring individuals within that region/sub-region. The entity which places the individual on the waiting list (i.e., CSB) may not determine who receives the next available slot.

When more than 40 newly funded slots are available in both the CL and FIS waivers at the same time, those slots will be allocated to the individual CSB according to the above methodology. Committee members will determine those in most need of a slot within the CSB based upon the total slots available between the CL and FIS waiver without knowledge of how many slots per referenced waiver. Once the WSAC has made the selection of individuals, DBHDS staff will then pair those individuals with the type of waiver slot that will best meet each individual's needs (e.g., individuals with documented needs for a residential services only available in the CL waiver, such as group home residential, will be assigned a CL slot, while individuals seeking supports in the family or individual's own home will be assigned a FIS slot).

When a waiver slot becomes available through attrition, that slot must be assigned by the CSB's WSAC to the individual who is determined to have the highest priority of need at that time in that CSB's catchment area. If vacated slots cannot be assigned to an individual from the same CSB within 90 days, the slot is released to the CSBs within that region for distribution to individual in that region with the highest priority of need. If there should be no one on the "Priority One" portion of the statewide waiting list within the region, DBHDS will reallocate the slot to another region or CSB where there is unmet Priority One need.

Just as individuals retain their waiver slot when they move from one part of the state to another, individuals remain on the statewide waiting list regardless of movement from area to area within the state.

f. Selection of Entrants to the Waiver. Specify the policies that apply to the selection of individuals for entrance to the waiver:

Waiver slot assignment is the pairing of an available (funded) waiver slot with the individual in most urgent need at the time. The slot assignment process is designed to ensure that the individual with the most urgent need in a particular locality receives a slot ahead of those with less urgent needs. Only individuals who need waiver services within 30 days and are at imminent risk of institutionalization will be assigned a waiver slot per 42 CFR 441.302.C.1-3.

Due to the fact that Virginia currently has a waiting list for individuals seeking DD waiver services, individuals who meet the diagnostic, level of care and financial criteria must also be found to meet criteria for priority of need in order to receive a slot. This must be documented in the individual's record and a sample of individuals on the waiting list is reviewed by DMAS Quality Management Review staff during their onsite reviews to assure that the criteria is being applied correctly.

There will be one waiting list from which individuals are selected for all three waivers. The waiting list will be divided into three categories: Priority One, Priority Two and Priority Three. Only when all individuals across the state in the Priority One category have been served may Priority Two (and then Priority Three) individuals access a DD waiver slot.

1. Priority One: individuals determined to meet one of the following criteria and require a waiver service within one year.

a. An immediate jeopardy exists to the health and safety of the individual due to the unpaid primary caregiver having a chronic or long-term physical or psychiatric condition or conditions that significantly limit the ability of the primary caregiver or caregivers to care for the individual; there are no other unpaid caregivers available to provide supports.

b. There is immediate risk to the health or safety of the applicant, primary caregiver, or other person living in the home due to either of the following conditions:

(1) The individual's behavior or behaviors, presenting a risk to himself or others, cannot be effectively managed by the primary caregiver or unpaid provider even with services coordinator/case manager-arranged generic or specialized supports; or

(2) There are physical care needs, such as lifting or bathing, or medical needs that cannot be managed by the primary caregiver even with services coordinator/case manager-arranged generic or specialized supports;

c. The individual lives in an institutional setting and has a viable discharge plan; OR

d. The individual is a young adult transitioning who is no longer eligible for IDEA services. After age 27, this criterion will no longer apply.

2. Priority Two: individuals meet one of the following criteria and a service is needed in one to five years.

a. The health and safety of the individual is likely to be in future jeopardy due to

i. The unpaid primary caregiver or caregivers having a declining chronic or long-term physical or psychiatric condition or conditions that significantly limit his ability to care for the individual;

ii. There are no other unpaid caregivers available to provide supports; and

iii. The individual's skills are declining as a result of lack of supports;

b. The individual is at risk of losing employment supports;

c. The individual is at risk of losing current housing due to a lack of adequate supports and services; or

d. The individual has needs or desired outcomes that with adequate supports will result in a significantly improved quality of life.

3. Priority Three: the individual may not need to access a waiver slot for more than five years as long as the current supports and services remain.

a. The individual is receiving a service through another funding source that meets current needs;

b. The individual is not currently receiving a service but is likely to need a service in five or more years; or

c. The individual has needs or desired outcomes that adequate supports will result in a significantly improved quality of life.

Individuals who are in the Priority 1 category who are determined to be most in need of supports at the time a slot is available are reviewed by the independent Waiver Slot Assignment Committee for the area in which the slot is available. The individual whose score indicates the highest need as designated by the committee, is offered the available slot. The committee reviews twice the number of people as available slots.

Between the three DD waivers, assignment to a slot in the Family and Individual Supports (FIS) waiver will typically take precedence. Individuals may be considered for a slot in one of the other two DD waivers based upon the following:

- The individual's needs cannot be met within the FIS Waiver due to the level and intensity of supports required,
- The individual is requesting and has a demonstrated need for services which are not available within in the FIS

Waiver, nor can be coordinated with EPSDT (for children), or

- The individual is in an emergency status or found to have the highest priority of need at the time a slot is available and, while the FIS waiver can meet his/her need, the only available slot is in another waiver.

Individuals may request a reserve slot in order to transfer to another waiver based upon the following:

- The individual desires to live more independently and shift to a different waiver (i.e., movement from the Community Living waiver to the FIS Waiver or from either of those to waivers to the Building Independence waiver), or
- The individual is confirmed to have imminent increasing support needs and requires more intense services available in another waiver.

Appeal rights are given to individuals who move from the previous urgent waitlist to Priority 2 or 3, and from non-urgent to Priority 3.

Appendix B: Participant Access and Eligibility

B-3: Number of Individuals Served - Attachment #1 (4 of 4)

Answers provided in Appendix B-3-d indicate that you do not need to complete this section.

Appendix B: Participant Access and Eligibility

B-4: Eligibility Groups Served in the Waiver

a. **1. State Classification.** The state is a *(select one)*:

- ☐ §1634 State
- ☐ SSI Criteria State
- ☒ 209(b) State

2. Miller Trust State.

Indicate whether the state is a Miller Trust State *(select one)*:

- ☒ No
- ☐ Yes

b. **Medicaid Eligibility Groups Served in the Waiver.** Individuals who receive services under this waiver are eligible under the following eligibility groups contained in the state plan. The state applies all applicable federal financial participation limits under the plan. *Check all that apply:*

Eligibility Groups Served in the Waiver (excluding the special home and community-based waiver group under 42 CFR §435.217)

- ☐ Low income families with children as provided in §1931 of the Act
- ☐ SSI recipients
- ☒ Aged, blind or disabled in 209(b) states who are eligible under 42 CFR §435.121
- ☐ Optional state supplement recipients
- ☒ Optional categorically needy aged and/or disabled individuals who have income at:

Select one:

- ☐ 100% of the Federal poverty level (FPL)
- ☒ % of FPL, which is lower than 100% of FPL.

Specify percentage:

- ☐ Working individuals with disabilities who buy into Medicaid (BBA working disabled group as provided in §1902(a)(10)(A)(ii)(XIII)) of the Act
- ☒ Working individuals with disabilities who buy into Medicaid (TWWIA Basic Coverage Group as provided in

§1902(a)(10)(A)(ii)(XV) of the Act)

- ☐ Working individuals with disabilities who buy into Medicaid (TWWIA Medical Improvement Coverage Group as provided in §1902(a)(10)(A)(ii)(XVI) of the Act)
- ☐ Disabled individuals age 18 or younger who would require an institutional level of care (TEFRA 134 eligibility group as provided in §1902(e)(3) of the Act)
- ☐ Medically needy in 209(b) States (42 CFR §435.330)
- ☐ Medically needy in 1634 States and SSI Criteria States (42 CFR §435.320, §435.322 and §435.324)
- ☒ Other specified groups (include only statutory/regulatory reference to reflect the additional groups in the state plan that may receive services under this waiver)

Specify:

Coverage for individuals age 19 or older and under age 65 in accordance with 435.119

Special home and community-based waiver group under 42 CFR §435.217) Note: When the special home and community-based waiver group under 42 CFR §435.217 is included, Appendix B-5 must be completed

- ☐ No. The state does not furnish waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217. *Appendix B-5 is not submitted.*
- ☒ Yes. The state furnishes waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217.

Select one and complete Appendix B-5.

- ☐ All individuals in the special home and community-based waiver group under 42 CFR §435.217
- ☒ Only the following groups of individuals in the special home and community-based waiver group under 42 CFR §435.217

Check each that applies:

- ☒ A special income level equal to:

Select one:

- ☒ 300% of the SSI Federal Benefit Rate (FBR)
- ☐ A percentage of FBR, which is lower than 300% (42 CFR §435.236)

Specify percentage:

- ☐ A dollar amount which is lower than 300%.

Specify dollar amount:

- ☐ Aged, blind and disabled individuals who meet requirements that are more restrictive than the SSI program (42 CFR §435.121)
- ☐ Medically needy without spend down in states which also provide Medicaid to recipients of SSI (42 CFR §435.320, §435.322 and §435.324)
- ☐ Medically needy without spend down in 209(b) States (42 CFR §435.330)
- ☐ Aged and disabled individuals who have income at:

Select one:

- ☐ 100% of FPL
- ☐ % of FPL, which is lower than 100%.

Specify percentage amount:

- ☐ **Other specified groups (include only statutory/regulatory reference to reflect the additional groups in the state plan that may receive services under this waiver)**

Specify:

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (1 of 7)

In accordance with 42 CFR §441.303(e), Appendix B-5 must be completed when the state furnishes waiver services to individuals in the special home and community-based waiver group under 42 CFR §435.217, as indicated in Appendix B-4. Post-eligibility applies only to the 42 CFR §435.217 group.

- a. Use of Spousal Impoverishment Rules.** Indicate whether spousal impoverishment rules are used to determine eligibility for the special home and community-based waiver group under 42 CFR §435.217:

Note: For the period beginning January 1, 2014 and extending through September 30, 2019 (or other date as required by law), the following instructions are mandatory. The following box should be checked for all waivers that furnish waiver services to the 42 CFR §435.217 group effective at any point during this time period.

- ☒ **Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group. In the case of a participant with a community spouse, the state uses spousal post-eligibility rules under §1924 of the Act.**

Complete Items B-5-e (if the selection for B-4-a-i is SSI State or §1634) or B-5-f (if the selection for B-4-a-i is 209b State) and Item B-5-g unless the state indicates that it also uses spousal post-eligibility rules for the time periods before January 1, 2014 or after September 30, 2019 (or other date as required by law).

Note: The following selections apply for the time periods before January 1, 2014 or after September 30, 2019 (or other date as required by law) (select one).

- ☒ **Spousal impoverishment rules under §1924 of the Act are used to determine the eligibility of individuals with a community spouse for the special home and community-based waiver group.**

In the case of a participant with a community spouse, the state elects to (select one):

- ☒ **Use spousal post-eligibility rules under §1924 of the Act.**
(Complete Item B-5-c (209b State) and Item B-5-d)
- ☐ **Use regular post-eligibility rules under 42 CFR §435.726 (SSI State) or under §435.735 (209b State)**
(Complete Item B-5-c (209b State). Do not complete Item B-5-d)
- ☐ **Spousal impoverishment rules under §1924 of the Act are not used to determine eligibility of individuals with a community spouse for the special home and community-based waiver group. The state uses regular post-eligibility rules for individuals with a community spouse.**
(Complete Item B-5-c (209b State). Do not complete Item B-5-d)

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (2 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

- b. Regular Post-Eligibility Treatment of Income: SSI State.**

Answers provided in Appendix B-4 indicate that you do not need to complete this section and therefore this section is not visible.

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (3 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

c. Regular Post-Eligibility Treatment of Income: 209(B) State.

The state uses more restrictive eligibility requirements than SSI and uses the post-eligibility rules at 42 CFR 435.735 for individuals who do not have a spouse or have a spouse who is not a community spouse as specified in §1924 of the Act. Payment for home and community-based waiver services is reduced by the amount remaining after deducting the following amounts and expenses from the waiver participant's income:

i. Allowance for the needs of the waiver participant (*select one*):

- ☐ The following standard included under the state plan

(*select one*):

- ☐ The following standard under 42 CFR §435.121

Specify:

- ☐ Optional state supplement standard
- ☐ Medically needy income standard
- ☐ The special income level for institutionalized persons

(*select one*):

- ☐ 300% of the SSI Federal Benefit Rate (FBR)
- ☐ A percentage of the FBR, which is less than 300%

Specify percentage:

- ☐ A dollar amount which is less than 300%.

Specify dollar amount:

- ☐ A percentage of the Federal poverty level

Specify percentage:

- ☐ Other standard included under the state Plan

Specify:

- ☐ The following dollar amount

Specify dollar amount: If this amount changes, this item will be revised.

- ☒ The following formula is used to determine the needs allowance:

Specify:

The basic maintenance needs for an individual is equal to 165% of the SSI payment for one person. Due to expenses of employment, a working individual shall have an additional income allowance. For an individual employed 20 hours or more per week, earned income shall be disregarded up to a maximum of both earned and unearned income up to 300% SSI; for an individual employed at least 8 but less than 20 hours per week, earned income shall be disregarded up to a maximum of both earned and unearned income up to 200% of SSI. If the individual requires a guardian or conservator who charges a fee, the fee, not to exceed an amount greater than 5% of the individual's total monthly income, is added to the maintenance needs allowance. However, in no case shall the total amount of the maintenance needs allowance (basic allowance plus earned income allowance plus guardianship fees) for the individual exceed 300% of SSI.

☐ **Other**

Specify:

ii. Allowance for the spouse only (select one):

☒ **Not Applicable**

☐ **The state provides an allowance for a spouse who does not meet the definition of a community spouse in §1924 of the Act. Describe the circumstances under which this allowance is provided:**

Specify:

Specify the amount of the allowance (select one):

☐ **The following standard under 42 CFR §435.121**

Specify:

☐ **Optional state supplement standard**

☐ **Medically needy income standard**

☐ **The following dollar amount:**

Specify dollar amount: If this amount changes, this item will be revised.

☐ **The amount is determined using the following formula:**

Specify:

iii. Allowance for the family (select one):

☐ **Not Applicable (see instructions)**

☐ **AFDC need standard**

☒ **Medically needy income standard**

☐ **The following dollar amount:**

Specify dollar amount: The amount specified cannot exceed the higher of the need standard for a family of the same size used to determine eligibility under the State's approved AFDC plan or the medically needy income standard established under 42 CFR §435.811 for a family of the same size. If this amount changes, this item will be revised.

☐ **The amount is determined using the following formula:**

Specify:

☐ **Other**

Specify:

iv. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 §CFR 435.726:

- a. Health insurance premiums, deductibles and co-insurance charges
- b. Necessary medical or remedial care expenses recognized under state law but not covered under the state's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these expenses.

Select one:

- ☐ **Not Applicable (see instructions)** *Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.*
- ☒ **The state does not establish reasonable limits.**
- ☐ **The state establishes the following reasonable limits**

Specify:

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (4 of 7)

Note: The following selections apply for the time periods before January 1, 2014 or after December 31, 2018.

d. Post-Eligibility Treatment of Income Using Spousal Impoverishment Rules

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care if it determines the individual's eligibility under §1924 of the Act. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

i. Allowance for the personal needs of the waiver participant

(select one):

- ☐ SSI standard
- ☐ Optional state supplement standard
- ☐ Medically needy income standard
- ☐ The special income level for institutionalized persons
- ☐ A percentage of the Federal poverty level

Specify percentage:

- ☐ The following dollar amount:

Specify dollar amount: If this amount changes, this item will be revised

- ☒ The following formula is used to determine the needs allowance:

Specify formula:

The basic maintenance needs for an individual is equal to 165% of the SSI payment for one person. Due to expenses of employment, a working individual shall have an additional income allowance. For an individual employed 20 hours or more per week, earned income shall be disregarded up to a maximum of both earned and unearned income up to 300% SSI; for an individual employed at least 8 but less than 20 hours per week, earned income shall be disregarded up to a maximum of both earned and unearned income up to 200% of SSI. If the individual requires a guardian or conservator who charges a fee, the fee, not to exceed an amount greater than 5% of the individual's total monthly income, is added to the maintenance needs allowance. However, in no case shall the total amount of the maintenance needs allowance (basic allowance plus earned income allowance plus guardianship fees) for the individual exceed 300% of SSI.

- ☐ Other

Specify:

ii. If the allowance for the personal needs of a waiver participant with a community spouse is different from the amount used for the individual's maintenance allowance under 42 CFR §435.726 or 42 CFR §435.735, explain why this amount is reasonable to meet the individual's maintenance needs in the community.

Select one:

- ☒ Allowance is the same
- ☐ Allowance is different.

Explanation of difference:

iii. Amounts for incurred medical or remedial care expenses not subject to payment by a third party, specified in 42 CFR §435.726:

- a. Health insurance premiums, deductibles and co-insurance charges
- b. Necessary medical or remedial care expenses recognized under state law but not covered under the state's Medicaid plan, subject to reasonable limits that the state may establish on the amounts of these expenses.

Select one:

- ☐ **Not Applicable (see instructions)** *Note: If the state protects the maximum amount for the waiver participant, not applicable must be selected.*
- ☒ **The state does not establish reasonable limits.**
- ☐ **The state uses the same reasonable limits as are used for regular (non-spousal) post-eligibility.**

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (5 of 7)

Note: The following selections apply for the five-year period beginning January 1, 2014.

e. Regular Post-Eligibility Treatment of Income: SSI State or §1634 State - 2014 through 2018.

Answers provided in Appendix B-4 indicate that you do not need to complete this section and therefore this section is not visible.

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (6 of 7)

Note: The following selections apply for the five-year period beginning January 1, 2014.

f. Regular Post-Eligibility Treatment of Income: 209(B) State - 2014 through 2018.

Answers provided in Appendix B-5-a indicate the selections in B-5-c also apply to B-5-f.

Appendix B: Participant Access and Eligibility

B-5: Post-Eligibility Treatment of Income (7 of 7)

Note: The following selections apply for the five-year period beginning January 1, 2014.

g. Post-Eligibility Treatment of Income Using Spousal Impoverishment Rules - 2014 through 2018.

The state uses the post-eligibility rules of §1924(d) of the Act (spousal impoverishment protection) to determine the contribution of a participant with a community spouse toward the cost of home and community-based care. There is deducted from the participant's monthly income a personal needs allowance (as specified below), a community spouse's allowance and a family allowance as specified in the state Medicaid Plan. The state must also protect amounts for incurred expenses for medical or remedial care (as specified below).

Answers provided in Appendix B-5-a indicate the selections in B-5-d also apply to B-5-g.

Appendix B: Participant Access and Eligibility

B-6: Evaluation/Reevaluation of Level of Care

As specified in 42 CFR §441.302(c), the state provides for an evaluation (and periodic reevaluations) of the need for the level(s) of care specified for this waiver, when there is a reasonable indication that an individual may need such services in the near future (one month or less), but for the availability of home and community-based waiver services.

a. Reasonable Indication of Need for Services. In order for an individual to be determined to need waiver services, an individual must require: (a) the provision of at least one waiver service, as documented in the service plan, and (b) the provision of waiver services at least monthly or, if the need for services is less than monthly, the participant requires regular monthly monitoring which must be documented in the service plan. Specify the state's policies concerning the reasonable indication of the need for services:

i. Minimum number of services.

The minimum number of waiver services (one or more) that an individual must require in order to be determined to need waiver services is:

ii. Frequency of services. The state requires (select one):

- ☐ The provision of waiver services at least monthly
- ☒ Monthly monitoring of the individual when services are furnished on a less than monthly basis

If the state also requires a minimum frequency for the provision of waiver services other than monthly (e.g., quarterly), specify the frequency:

Services must be provided at least quarterly. Case managers will continue to monitor all enrolled individuals on a monthly basis.

Monthly activity with the enrolled waiver individual is conducted by the Case Manager, to include a quarterly face to face interaction. Monthly activity includes a contact or collateral contact such as a visit or phone call to the individual, a family member, provider, physician etc. The face-to-face contacts must be completed at least quarterly

b. Responsibility for Performing Evaluations and Reevaluations. Level of care evaluations and reevaluations are performed (*select one*):

- ☐ Directly by the Medicaid agency
- ☐ By the operating agency specified in Appendix A
- ☒ By a government agency under contract with the Medicaid agency.

Specify the entity:

The case manager (employed by or contracted with a CSB under contract with DMAS) performs both the level of care evaluation and reevaluation. The results of the evaluation/reevaluation are transmitted to DBHDS for review and confirmation of eligibility.

- ☐ Other
- Specify:*

c. Qualifications of Individuals Performing Initial Evaluation: Per 42 CFR §441.303(c)(1), specify the educational/professional qualifications of individuals who perform the initial evaluation of level of care for waiver applicants:

For case management services to receive Medicaid reimbursement, the individual employed as a case manager must have, at entry level, qualifications that are documented or observable to include:

- Knowledge of

1. Services and systems available in the community including primary health care, support services, eligibility criteria and intake processes and generic community resources;
2. The nature of developmental disabilities, mental illness, substance abuse (substance use disorders), or co-occurring disorders depending on the individuals served, including clinical and developmental issues;
3. Different types of assessments, including functional assessment, and their uses in service planning;
4. Treatment modalities and intervention techniques, such as behavior management, independent living skills training, supportive counseling, family education, crisis intervention, discharge planning, and service coordination;
5. Types of developmental disability, mental health, and substance abuse programs available in the locality;
6. The person-centered service planning process and major components of a person-centered support plan;
7. The use of medications in the care or treatment of the population served; and
8. All applicable federal and state laws and regulations and local ordinances.

- Skills in

1. Identifying and documenting an individual's need for resources, services, and other supports;
2. Using information from assessments, evaluations, observation, and interviews to develop person-centered service plans;
3. Identifying and documenting how resources, services, and natural supports such as family can be utilized to promote achievement of an individual's personal life goals; and
4. Coordinating the provision of services by diverse public and private providers.

- Abilities to

1. Work as team members, maintaining effective inter- and intra-agency working relationships;
2. Work independently performing position duties under general supervision; and
3. Engage in and sustain ongoing relationships with individuals receiving services.

- d. Level of Care Criteria.** Fully specify the level of care criteria that are used to evaluate and reevaluate whether an individual needs services through the waiver and that serve as the basis of the state's level of care instrument/tool. Specify the level of care instrument/tool that is employed. State laws, regulations, and policies concerning level of care criteria and the level of care instrument/tool are available to CMS upon request through the Medicaid agency or the operating agency (if applicable), including the instrument/tool utilized.

To ensure that Virginia's home and community-based waiver programs serve only individuals who would otherwise be placed in an ICF/IID, home and community-based waiver services shall be considered only for individuals who are eligible for admission to an ICF/IID. For the case manager to make a recommendation for waiver services, Community Living waiver services must be determined to be an appropriate service alternative to delay or avoid placement in an ICF/IID, or promote exiting from either an ICF/IID placement or other institutional placement.

The tool used to determine level of care and waiver eligibility is called the Virginia Individual Developmental Disability Eligibility Survey, or "VIDES." The VIDES is based on the Level of Functioning (LOF) Survey and maintains the categories in that tool. Therefore, it is comparable to the LOF. The LOF is currently used for institutional eligibility. The state administrative code will need to be modified in order to adopt the VIDES for institutional use. It assesses the individual in eight functional areas:

- 1) Health Status
- 2) Communication
- 3) Task Learning Skills
- 4) Personal/Self Care
- 5) Motor Skills
- 6) Behavior
- 7) Community Living Skills
- 8) Self Direction

The items under the health, communication, task learning and behavior categories are scored as requiring assistance to one of the following degrees: "rarely," "sometimes," "often," "regularly."

The items under the personal/self care, mobility and community living skills categories are scored as requiring "no assistance," "prompting/structuring," "supervision," "some direct assistance" or "total care."

The items under Self Direction are scored positively or negatively.

The VIDES is used to assess level of care for individuals of all ages; however, there is an adapted version for children. There is a version of the VIDES for infants (birth through 2 years of age) and a version for children (three years through 17 years). The adult version is for those aged 18 and older. The adult and children's versions of the VIDES assess individuals in the areas of health status, communication, task learning, personal/self-care, behavior, community living, and self-direction skills. The infants' version assesses those birth through 2 years in the areas of health status, communication, task learning, motor, and social/emotional skills.

- e. **Level of Care Instrument(s).** Per 42 CFR §441.303(c)(2), indicate whether the instrument/tool used to evaluate level of care for the waiver differs from the instrument/tool used to evaluate institutional level of care (*select one*):

- ☐ The same instrument is used in determining the level of care for the waiver and for institutional care under the state Plan.
- ☒ A different instrument is used to determine the level of care for the waiver than for institutional care under the state plan.

Describe how and why this instrument differs from the form used to evaluate institutional level of care and explain how the outcome of the determination is reliable, valid, and fully comparable.

The instrument used to determine the waiver's level of care (the "Virginia Individual Developmental Disabilities Eligibility Survey" or "VIDES") was directly derived from the institutional level of care tool (the "Level of Functioning Survey" or "LOF"). The LOF was developed approximately 30 years ago and contained institutional language. The language was updated to be community-centric and person centered. Nearly all young children (even those without disabilities) would meet the criteria under the LOF; therefore, age appropriate versions were created for children 3 through 17 ("Children's VIDES") as well as for infants birth to 3 (Infants' VIDES). Because of the age of the LOF and the fact that it was originally designed to assess individuals with ID only, elements of self-determination, which are particularly relevant for persons with non-ID developmental disabilities were not a component of the instrument. An additional category was added to the adult and children's versions of the VIDES regarding self-determination. The overall scoring was adjusted to ensure consistency of results between the VIDES and LOF.

The VIDES was validated by having 6 of the 40 Community Services Boards (15%) and several of the DBHDS DD waiver staff (who have been charged with conducting the annual functional eligibility assessment for individual on that waiver) complete both the LOF (traditional functional eligibility tool) and the VIDES on individuals due for assessment and then comparing the results in each category as well as for overall eligibility determination. A high degree of correspondence was found between the two tools. In areas where there was lower correspondence, alterations were made to the instructions or wording of the items that should increase correspondences. A training module was developed to ensure consistency across assessors and between the VIDES and LOF.

The LOF and VIDES are comparable tools.

- f. Process for Level of Care Evaluation/Reevaluation:** Per 42 CFR §441.303(c)(1), describe the process for evaluating waiver applicants for their need for the level of care under the waiver. If the reevaluation process differs from the evaluation process, describe the differences:

A comprehensive assessment process must be completed by the case manager to support the waiver level of care and determine the individual's need for services and supports provided by the waiver, as well as the individual's desired outcomes. This involves the case manager gathering relevant social, psychological, medical and level of care information and serves as the basis for the development of the individual support plan.

The case manager shall initially recommend the individual for waiver services after completion of a comprehensive assessment of the individual's needs and available supports. The comprehensive assessment includes:

- a) Relevant medical information based on a medical examination completed no earlier than 12 months prior to the initiation of waiver services;
- b) The assessment that demonstrates the individual's needs for specific services. The assessment must be a DBHDS approved assessment (currently the Supports Intensity Scale® completed by an independent contractor) completed no earlier than 12 months prior to enrollment;
- c) The VIDES (level of care instrument) completed no more than six months prior to enrollment. The CSB determines whether the individual meets the ICF/IID criteria with input from the individual, his family/caregiver, as appropriate, and service/support providers involved in the individual's support in the community; and
- d) The appropriate diagnostic evaluation that confirms DD. For individuals with an intellectual disability, this is a psychological evaluation that reflects the current psychological status (diagnosis), current cognitive abilities, and current adaptive level of functioning of the individual. For an individual with a non-ID developmental disability, this may take the form of an evaluation by a physician or other professional licensed to make the determination of developmental disability as defined by Virginia Code (§ 37.2-100).

The case manager shall complete a reassessment annually in coordination with the individual and his family/caregiver, as appropriate, and service/support providers. The reassessment shall include an update of the level of care and other assessment as needed. If warranted, the case manager shall coordinate a medical examination or developmental disability diagnostic evaluation for the individual. The individual support plan shall be revised as appropriate.

The medical examination must be completed for adults based on need identified by the individual and his family/caregiver, as appropriate, provider, case manager, or DBHDS staff. Medical examinations and screenings for children must be completed according to the recommended frequency and periodicity of the EPSDT program.

A new developmental disability diagnostic evaluation shall be required whenever the individual's functioning has undergone significant change and is no longer reflective of the past evaluation.

- g. Reevaluation Schedule.** Per 42 CFR §441.303(c)(4), reevaluations of the level of care required by a participant are conducted no less frequently than annually according to the following schedule (*select one*):

- ☐ Every three months
- ☐ Every six months
- ☒ Every twelve months
- ☐ Other schedule

Specify the other schedule:

- h. Qualifications of Individuals Who Perform Reevaluations.** Specify the qualifications of individuals who perform reevaluations (*select one*):

- ☒ The qualifications of individuals who perform reevaluations are the same as individuals who perform initial evaluations.
- ☐ The qualifications are different.

Specify the qualifications:

- i. Procedures to Ensure Timely Reevaluations.** Per 42 CFR §441.303(c)(4), specify the procedures that the state employs

to ensure timely reevaluations of level of care (*specify*):

The State will employ the following procedures to ensure timely reevaluations of level of care:

1. Annual reevaluation is a component part of case management;
2. Case managers must annually report to DBHDS the date each level of care reevaluation is completed and the categories met; and
3. DMAS Quality Management Review staff will include monitoring of the completion of level of care reevaluations as a component of their on-site case management service reviews.

Case managers are required to re-evaluate the level of care no more than 365 days beyond the date of the last evaluation.

- j. Maintenance of Evaluation/Reevaluation Records.** Per 42 CFR §441.303(c)(3), the state assures that written and/or electronically retrievable documentation of all evaluations and reevaluations are maintained for a minimum period of 3 years as required in 45 CFR §92.42. Specify the location(s) where records of evaluations and reevaluations of level of care are maintained:

Records of evaluations and reevaluations of level of care will be maintained in the following locations for a period of at least six years:

1. By the case manager (initial evaluations and reevaluations), and
2. By DBHDS (summaries of the results and dates completed for both initial levels of care and reevaluations).

Appendix B: Evaluation/Reevaluation of Level of Care

Quality Improvement: Level of Care

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Level of Care Assurance/Sub-assurances

The state demonstrates that it implements the processes and instrument(s) specified in its approved waiver for evaluating/reevaluating an applicant's/waiver participant's level of care consistent with level of care provided in a hospital, NF or ICF/IID.

i. Sub-Assurances:

- a. Sub-assurance:** *An evaluation for LOC is provided to all applicants for whom there is reasonable indication that services may be needed in the future.*

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

- 1. Number and percent of all new enrollees who have a level of care evaluation prior to receiving waiver services. N: # of new enrollees who have level of care evaluation prior to receiving waiver services D: total # of new enrollees**

Data Source (Select one):**Other**

If 'Other' is selected, specify:

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

CSB staff are given a certain number of records for each waiver (representative sample based on the number of individuals they support on each waiver) to review annually. The form that they must use includes questions from the performance measures and is located on Survey Monkey. Each quarter, these staff review approximately one quarter of their total assigned number of records and respond to the questions regarding each record. DBHDS staff reviews and summarizes the information for inclusion in the quarterly report regarding performance measures reviewed by DMAS and DBHDS staff.

DMAS and DBHDS have found that this is an effective means to ensure that CSB supervisors/QA staff are examining individuals' records with an eye to waiver performance measures expectations and providing feedback/remediation to their staff as needed. For each of the measures reviewed by CSB staff, there is typically another source of data (e.g., Quality Management Reviews).

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

For those performance measures initially reviewed by case managers, it is the responsibility of the case management supervisor or quality assurance staff to address problems related to the VIDES and report their resolution to the Quality Review Team (QRT) through DBHDS on a quarterly basis. The results of the record reviews, as well as the actions taken by these staff persons, are reviewed by the QRT for appropriateness. Inappropriate actions or failure to take action will be referred to DBHDS technical assistance staff to address with the offender. DBHDS technical assistance staff will contact CSBs demonstrating significant problems complying with the intent of these assurances. Another possible action is for DMAS to target agencies with deficiencies for Quality Management Reviews (QMRs).

DMAS QMR staff who identify problems with VIDES through record reviews will require the case management provider to submit and follow a corrective action plan. Serious violations (such as missing VIDES) may be referred to DMAS' Provider Integrity unit for payment retraction.

ii. Remediation Data Aggregation

Remediation-related Data Aggregation and Analysis (including trend identification)

Responsible Party (check each that applies):	Frequency of data aggregation and analysis (check each that applies):
<input checked="" type="checkbox"/> State Medicaid Agency	<input type="checkbox"/> Weekly
<input checked="" type="checkbox"/> Operating Agency	<input type="checkbox"/> Monthly
<input type="checkbox"/> Sub-State Entity	<input checked="" type="checkbox"/> Quarterly
<input type="checkbox"/> Other Specify: <div style="border: 1px solid black; height: 30px; width: 100%; margin-top: 5px;"></div>	<input type="checkbox"/> Annually
	<input type="checkbox"/> Continuously and Ongoing
	<input type="checkbox"/> Other Specify: <div style="border: 1px solid black; height: 30px; width: 100%; margin-top: 5px;"></div>

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Level of Care that are currently non-operational.

☒ **No**

☐ **Yes**

Please provide a detailed strategy for assuring Level of Care, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix B: Participant Access and Eligibility

B-7: Freedom of Choice

Freedom of Choice. As provided in 42 CFR §441.302(d), when an individual is determined to be likely to require a level of care for this waiver, the individual or his or her legal representative is:

- i. informed of any feasible alternatives under the waiver; and
- ii. given the choice of either institutional or home and community-based services.

a. Procedures. Specify the state's procedures for informing eligible individuals (or their legal representatives) of the feasible alternatives available under the waiver and allowing these individuals to choose either institutional or waiver services. Identify the form(s) that are employed to document freedom of choice. The form or forms are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Once the case manager has determined that the individual meets functional and diagnostic criteria for the waiver (i.e., confirmed by the VIDES and the appropriate developmental disability diagnostic evaluation, he or she:

1. Offers the individual (and legal guardian or family member/caregiver, as applicable) the choice of Community Living Waiver or ICF/IID services. At this same juncture, the case manager informs the individual of the full array of services offered in this waiver for which he or she is eligible (including both consumer and agency-directed services). The case manager documents the individual's choice of waiver services or institutional care, as well as the review of all waiver services by obtaining signatures on the "Documentation of Individual Choice between Institutional Care or Home and Community-Based Services" form (DMAS 459-C).

If the individual (and family member/caregiver, as applicable) selects Community Living Waiver, confirmation of the completion of the "Documentation of Individual Choice between Institutional Care or Home and Community-Based Services" form is submitted to DBHDS for enrollment or placement on the statewide waiting list via the waiver management system. If the individual (and family member/caregiver, as applicable) selects ICF/IID placement, the case manager assists the individual with this option.

2. Once a slot has been identified for the individual and he or she has been enrolled into the waiver, the case manager meets with the individual (and family/caregiver, as applicable), to determine the individual's needs and supports necessary to provide appropriate services to the individual. At this point, the case manager provides a list to the individual (and family/caregiver, as appropriate) of the names of all available service providers, arranges for visits or interviews with the providers, as desired, confirms that any interested provider has a current DMAS participation agreement to provide the desired service and then documents in writing the individual's choice of waiver providers on the "Virginia Home and Community-Based Waiver Choice of Providers" form (DMAS 460). While individuals always have the option to change providers if desired, this form is only required to be completed again when new waiver services are initiated or when the individual is dissatisfied with the current provider and the issues cannot be resolved.

b. Maintenance of Forms. Per 45 CFR §92.42, written copies or electronically retrievable facsimiles of Freedom of Choice forms are maintained for a minimum of three years. Specify the locations where copies of these forms are maintained.

The "Documentation of Individual Choice between Institutional Care or Home and Community-Based Services" form is retained indefinitely by the case manager. These are maintained in the case managers' records/EHR.

The "Virginia Informed Choice" form (DMAS 460/459A) is retained for at least six years in the case manager's record for adults; forms are kept for children until 18 years of age plus six years.

Appendix B: Participant Access and Eligibility

B-8: Access to Services by Limited English Proficiency Persons

Access to Services by Limited English Proficient Persons. Specify the methods that the state uses to provide meaningful access to the waiver by Limited English Proficient persons in accordance with the Department of Health and Human Services "Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons" (68 FR 47311 - August 8, 2003):

Language translation services are available through a contracted entity, providing interpretation services for 150 different languages. All forms are available in alternative formats upon request.

Virginia offers language line services through AT & T to any prospective or current Medicaid participants. Applications for benefits ask what language is spoken so that staff at the Virginia Department of Social Services are aware this language line may be needed. In addition, applications for birth certificates to verify identity and citizenship as part of the application for Medicaid benefits, are available in Spanish from the Virginia Department of Health (VDH) at http://www.vdh.virginia.gov/vital_Records/vtlapp.htm. Further, VDH serves as the state clearinghouse for information on laws, policies, reports, training, conferences and other facets of linguistic services. Most of the training and services offered are available to providers serving Medicaid applicants and participants. Please see their web site for details. <http://www.vdh.virginia.gov/ohpp/CLASact/default.aspx>.

CSBs, the entities responsible for receiving waiver applications, enrolling individuals and communicating with individuals during the supports planning process are bound by a State Behavioral Health and Developmental Services Board policy which states:

"It is the policy of the Board that the Department, state facilities, and CSBs shall provide services to individuals in the public behavioral health and developmental services system in a manner that is sensitive to their beliefs, norms, values, traditions, customs, and language regardless of their racial, ethnic, or cultural backgrounds. Consistent with this policy, the Department, state facilities, and CSBs shall develop mechanisms to facilitate the involvement of the community and individuals receiving services in the design and implementation of culturally and linguistically appropriate behavioral health and developmental services."

See <http://www.dbhds.virginia.gov/library/document-library/adm-sbpolicies1023.pdf> for the full policy statement. DBHDS has an Office of Cultural and Linguistic Competency, which works with the CSBs to provide technical support for the development of further resources for cultural and linguistic competency at a regional level.

Appendix C: Participant Services

C-1: Summary of Services Covered (1 of 2)

a. Waiver Services Summary. List the services that are furnished under the waiver in the following table. If case management is not a service under the waiver, complete items C-1-b and C-1-c:

Service Type	Service		
Statutory Service	Group Day Services		
Statutory Service	Group Home Residential		
Statutory Service	Individual Supported Employment		
Statutory Service	Personal Assistance Services		
Statutory Service	Respite		
Supports for Participant Direction	Consumer-Directed Services Facilitation		

Service Type	Service		
Other Service	Assistive Technology		
Other Service	Benefits Planning		
Other Service	Center-based Crisis Supports		
Other Service	Community Coaching		
Other Service	Community Engagement		
Other Service	Community Guide		
Other Service	Community-Based Crisis Supports		
Other Service	Companion Services		
Other Service	Crisis Support Services		
Other Service	Electronic Home-Based Services		
Other Service	Employment and community transportation		
Other Service	Environmental Modifications		
Other Service	Group Supported Employment		
Other Service	In-home Support Services		
Other Service	Peer Mentor Supports		
Other Service	Personal Emergency Response System		
Other Service	Private Duty Nursing		
Other Service	Shared Living		
Other Service	Skilled Nursing		
Other Service	Sponsored Residential		
Other Service	Supported Living		
Other Service	Therapeutic Consultation		
Other Service	Transition Services		
Other Service	Workplace Assistance Services		

Appendix C: Participant Services

C-1/C-3: Service Specification

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type:

Statutory Service

Service:

Day Habilitation

Alternate Service Title (if any):

Group Day Services

HCBS Taxonomy:

Category 1:

04 Day Services

Sub-Category 1:

04020 day habilitation

Category 2:

Sub-Category 2:

Category 3:**Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ **Service is included in approved waiver. There is no change in service specifications.**
- ☐ **Service is included in approved waiver. The service specifications have been modified.**
- ☐ **Service is not included in the approved waiver.**

Service Definition (Scope):

Group Day Services include skill building or supports for the acquisition, retention, or improvement of self-help, socialization, community integration, employability and adaptive skills. They provide opportunities for peer interactions, community integration, and enhancement of social networks. Supports may be provided to ensure an individual's health and safety. Skill building is a required component of this service unless the individual has a documented degenerative condition, in which case day support may focus on maintaining skills and functioning and preventing or slowing regression rather than acquiring new skills or improving existing skills. These services take place in non-residential settings, separate from the individual's home. Group Day Services should be coordinated with any physical, occupational, behavioral, or speech/language therapies listed in the person-centered plan.

The allowable group day services include, but are not limited to:

- a. Developing problem-solving, sensory, gross and fine motor, communication and personal care skills;
- b. Developing self, social, and environmental awareness skills;
- c. Developing skills as needed in positive behavior, using community resources, community safety and positive peer interactions, volunteering and educational programs in integrated settings, forming community connections or relationships;
- d. Supporting older adults in participating in meaningful retirement activities in their communities, i.e., clubs and hobbies; and
- e. Career planning and resume developing based on career goals, personal interests, and community experiences.
- f. Group day services shall be coordinated with the therapeutic consultation plan, as applicable.
- g. Participation in community volunteer opportunities or education programs in integrated settings;
- h. Staff coverage for transportation of the individual between service activity sites; Transportation is included as part of the service. The provider may be reimbursed for the time spent transporting the individual to community locations as part of waiver billing. The provider may not also bill mileage.
- i. Personal care types of activities (i.e., assistance with ADLs) are included as an allowable activity in this service.

There is, however, a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates will be necessary.

INDIVIDUALS ELIGIBLE FOR THE CUSTOMIZED RATE:

These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- Increased staffing ratios, and/or
- Higher credentialed staff, and/or
- Increased programmatic oversight.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to

work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The service unit is an hour.

Support ratios should be based on the activity and the individual's needs as determined by the person-centered plan and limited to a ratio of no more than 7 individuals supported by 1 staff person.

Group Day Services occur one or more hours per day on a regularly scheduled basis for one or more days per week. Group day services, alone or in combination with Community Engagement, Community Coaching, Workplace Assistance, and/or Supported Employment services are limited to no more than 66 hours per week.

Medicaid will not pay for the cost of meals as part of this service.

Group Day Services Provider

Provider Qualifications**License** *(specify):*

Group day service providers must be licensed by DBHDS as a provider of

- center-based day support services OR
- non-center-based day support services

Certificate *(specify):*

Other Standard *(specify):*

Group day services providers must have a signed Provider Participation agreement with DMAS in order to provide these services. The provider designated in the Participation Agreement must directly provide the services and bill DMAS for reimbursement.

Providers must also assure that persons providing group day services have received training in the characteristics of developmental disabilities and appropriate interventions, training strategies and other methods of supporting individuals with functional limitations prior to providing Community Living Waiver services and pass an objective standardized test of skills, knowledge, and abilities approved by DBHDS that must be administered according to DBHDS' defined procedures.

Verification of Provider Qualifications**Entity Responsible for Verification:**

DBHDS Office of Licensing verifies that providers of group day services meet DBHDS licensing standards.

DMAS Quality Management Review (QMR) staff verifies that staff has received the required training.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of licensed providers and each of its services at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of day support providers annually. Staff may conduct announced and unannounced onsite reviews or desk audits of the records at any time.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

These services shall consist of skill-building, routine supports, general supports, and safety supports, provided primarily in a licensed or approved residence that enable an individual to acquire, retain, or improve the self-help, socialization, and adaptive skills necessary to reside successfully in home and community-based settings.

Group Residential services shall be authorized for Medicaid reimbursement in the person-centered plan only when the individual requires these services and when such needs exceed the services included in the individual's room and board arrangements with the service provider.

Group home residential services to the individual in the form of continuous (up to 24 hours per day) services performed by paid staff who shall be physically present in the home. These supports may be provided individually or simultaneously to more than one individual living in that home, depending on the required support. These supports are typically provided to an individual living (i) in a group home or (ii) in the home of an adult foster care provider. In either setting, the provider must comply with the Americans with Disabilities Act and provide a homelike environment for the residents. Full compliance with the HCBS Settings Regulations are expected of all providers by 3/17/2022.

Residential Support includes the expectation of the presence of a skills development (formerly called training) component, along with the provision of supports, as needed.

The allowable activities include, but are not limited to:

1) Skill-building related to personal care activities (toileting, bathing, and grooming; dressing; eating; mobility; communication; household chores; food preparation; money management; shopping, etc.);

2) Skill-building related to the use of community resources (transportation, shopping, dining at restaurants, participating in social and recreational activities, etc.);

3) Supporting the individual in developing the ability to replace challenging behavior with positive, accepted behavior for home and community environments, for example (not all inclusive):

- Developing a circle of friends;
- Handling social encounters with others; or
- Redirecting challenging behavior.

4) Monitoring health and physical conditions and providing supports with medication or other medical needs;

5) Providing supports with personal care, ADLs, and use of community resources, for example (not all-inclusive):

- Completing personal care or mealtime tasks when physically unable to do so; or
- Completing daily tasks, such as laundry, meal preparation, using the bank, or other tasks essential to the individual's health and welfare

6) Supporting with transportation to and from training sites and community resources;

7) Providing general supports as needed; and

8) Providing safety supports to ensure the individual's health and safety.

There is, however, a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates will be necessary.

INDIVIDUALS ELIGIBLE FOR THE CUSTOMIZED RATE:

These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state

operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- Increased staffing ratios, and/or
- Higher credentialed staff, and/or
- Increased programmatic oversight.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Individual Supported Employment services consist of one on one ongoing supports that enable individuals, for whom competitive employment at or above the minimum wage is unlikely, absent the provision of supports, and who, because of their disabilities, need supports to work in an integrated setting. Supported employment may include assisting the individual to locate a job or develop a job on behalf of the individual. Supported employment is conducted in a variety of settings where persons without disabilities are employed. Supported employment includes activities needed to sustain paid work by individuals, including supports and training. Personal assistance is not a part of individual supported employment.

Supported employment services include ongoing supports to obtain and maintain a job in competitive, customized employment, or self employment (including home-based self employment) for which an individual is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities. The outcome of this service is sustained paid employment at or above minimum wage in an integrated setting in the general workforce, in a job that meets personal and career goals.

The allowable activities include:

1. Vocational/job-related discovery or assessment;
2. Person-centered employment planning which results in employment related outcomes;
3. Individualized job development, with or without the individual present, that produces an appropriate job match for the individual and the employer to include job analysis and/or job carving;
4. Negotiation with prospective employers;
5. On-the-job training in work skills required to perform the job;
6. Ongoing evaluation, supervision, and monitoring of the individual's performance on the job but which do not include supervisory activities rendered as a normal part of the business setting;
7. Ongoing support services necessary to assure job retention;
8. Supports to ensure the individual's health and safety;
9. Development of work-related skills essential to obtaining and retaining employment, such as the effective use of community resources and break/lunch areas and transportation systems; and
10. Staff coverage for transportation between the individual's place of residence and the workplace when other forms of transportation are unavailable or inaccessible (i.e., time spent transporting).

The individual's assessment and individual support plan must clearly reflect the individual's need for employment-related skill building.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The service unit for individual supported employment is an hour, not to exceed 40 hours per week. Supported employment, alone or in combination with Community Engagement, Community Coaching, Workplace Assistance, and/or Group day services are limited to no more than 66 hours per week.

Providers for persons eligible for or receiving supported employment services funded under § 110 of the Rehabilitation Act of 1973 (through DARS) or §§ 602(16)(17) of the Individuals with Disabilities Education Act (IDEA) (through special education services) cannot receive payment for this service through Community Living waiver services. The case manager must assure that supported employment services are not available through these sources and document the finding in the individual's case management record. When services are provided through these sources, the individual support plan will not include them as a requested waiver service.

FFP is not available for any activities with incentive payments, subsidies, or unrelated vocational training expenses.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Personal assistance services mean direct support with activities of daily living, instrumental activities of daily living, access to the community, monitoring of self-administered medications or other medical needs, monitoring of health status and physical condition, and work-related personal assistance. These services may be provided in home and community settings to enable an individual to maintain the health status and functional skills necessary to live in the community or participate in community activities.

Each individual and family/caregiver, family, or caregiver shall have a back-up plan for the individual's needed supports in case the personal assistant does not report for work as expected or terminates employment without prior notice.

Allowable activities include:

1. Support with activities of daily living (ADLs), such as: bathing or showering, toileting, routine personal hygiene skills, dressing, transferring, etc.;
2. Support with monitoring health status and physical condition;
3. Support with medication and other medical needs;
4. Supporting the individual with preparation and eating of meals;
5. Support with housekeeping activities, such as bed making, dusting, and vacuuming, laundry, grocery shopping, etc.;
6. Support to assure the safety of the individual;
7. Support needed by the individual to participate in social, recreational and community activities;
8. Assistance with bowel/bladder programs, range of motion exercises, routine wound care that does not include sterile technique, and external catheter care when properly trained and supervised by an RN;
9. Accompanying the individual to appointments or meetings.

The personal assistant may help prepare and accompany the individual to work or post-secondary school and assist him or her with ADLs while the individual is at work or school and upon return home. DBHDS will review the individual's needs when determining the services that will be provided to the individual in the workplace or school. The assistant may not perform any functions related to the individual completing his or her job or school functions or for supervision time during work or school.

Individuals are afforded the opportunity to act as the employer in the consumer-direction of personal assistance services for the waiver. This involves hiring, training, supervision, and termination of consumer-directed supports assistants. Individuals choosing to receive services through the consumer-directed model may do so by choosing a services facilitator to provide the training and guidance needed to be an employer. If the individual is unable to independently manage his/her own consumer-directed services, a family member/caregiver or other chosen person must serve as the employer of record (EOR) on behalf of the individual.

The services facilitator coordinates support activities for those individuals electing consumer-direction of services.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour. The hours to be authorized shall be based on the individual's assessed need.

Personal assistance shall not include either practical or professional nursing services. This service shall not include skilled nursing services with the exception of skilled nursing tasks that may be delegated pursuant to nurse delegation rules in the state Code.

Personal assistance shall not be available to individuals who

- (i) receive residential services in a group home, sponsored residential home or who live in assisted living facilities, or
- (ii) receive comparable services provided through another program or service.

The services under the Community Living Waiver, VA.0372.R04.00, are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Statutory Service

Service Name: Personal Assistance Services

Provider Category:

Agency

Provider Type:

Personal Assistance Service Provider (Agency-Directed)

Provider Qualifications

License (specify):

The following types of providers can deliver personal assistance services:

1. Providers licensed by DBHDS as a provider of residential services or supportive residential services.

OR

2. Personal care agencies licensed by the Virginia Department of Health or that have accreditation from any organization recognized by the CMS for the purposes of Medicare certification.

Licensing requirements for RNs and LPNs are outlined in Chapter 30 of title 54.1 of the Code of Virginia.

Certificate (specify):

Other Standard (specify):

Personal assistance providers must have a signed provider participation agreement with DMAS in order to provide personal assistance services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

Providers licensed by DBHDS as a provider of residential services or supportive residential services must employ a program (residential services) supervisor who will provide ongoing supervision of all personal assistants and conduct the initial assessment and subsequent reassessments.

Personal care providers who are licensed by the Virginia Department of Health or have an accreditation from an organization recognized by CMS for the purposes of Medicare certification must:

- a. Employ or subcontract with and directly supervise a RN or a LPN who will provide ongoing supervision of all personal assistants. RNs must conduct the initial assessment and subsequent reassessments;
- b. The supervising RN or LPN must be currently licensed to practice nursing in the Commonwealth and have at least one year of related clinical nursing experience which may include work in an acute care hospital, public health clinic, home health agency, ICF/IID or nursing facility;
- c. Employ and directly supervise personal assistants who will provide direct support to individuals. Each assistant hired by the provider shall be evaluated by the provider agency to ensure compliance with minimum qualifications as required by the DMAS. Each assistant must:
 - 1) Be able to read and write English to the degree necessary to perform the tasks expected;
 - 2) Complete a training curriculum consistent with DMAS requirements. Prior to assigning an assistant to an individual, the provider agency must obtain documentation that the assistant has satisfactorily completed this training program. DMAS requirements may be met in one of three ways:
 - a) Registration as a certified nurse aide;
 - b) Graduation from an approved educational curriculum which offers certificates qualifying the student as a nursing assistant, geriatric assistant, or home health aide; or
 - c) Completion of provider-offered training, which is subject to approval from DMAS.
 - 3) Be physically able to do the work; and
 - 4) Have a satisfactory work record, as evidenced by two references from prior job experiences (if applicable), including no evidence of possible abuse, neglect, or exploitation of aged or incapacitated adults or children.

Providers must also assure that persons providing personal assistance services have received training in the characteristics of DD and appropriate interventions, training strategies and other methods of supporting individuals with functional limitations prior to providing waiver services and pass an objective standardized test of skills, knowledge, and abilities approved by DBHDS that must be administered according to DBHDS' defined procedures.

Verification of Provider Qualifications

Entity Responsible for Verification:

The Virginia Department of Medical Assistance Services is responsible for the verification of personal care agency provider qualifications.

DBHDS Office of Licensing verifies that providers of DBHDS licensed residential or supportive residential services meet DBHDS licensing standards.

VDH verifies that VDH licensed agencies meet VDH standards.

DMAS Quality Management Review (QMR) staff verifies that staff has received the required training.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of DBHDS licensed providers at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of personal assistance providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Statutory Service

Service Name: Personal Assistance Services

Provider Category:

Individual

Provider Type:

Consumer-Directed Personal Assistant

Provider Qualifications

License (*specify*):

Certificate (*specify*):

Other Standard (*specify*):

For consumer-directed personal assistance services (CD-PA) individuals will hire their own personal assistants and manage and supervise the assistant's performance. If an individual is unable to direct his or her own services, an adult family member/caregiver or other chosen person may act on behalf of the individual as the employer of record for the assistant.

Personal assistants do not need to be enrolled with DMAS (i.e., have a participation agreement) to provide consumer-directed PA services.

Personal assistant qualifications include the following requirements. The assistants must:

- a. Be 18 years of age or older and possess a valid Social Security number that has been issued by the Social Security Administration to the person who is to function as the assistant;
- b. Be able to read and write English to the degree necessary to perform the tasks expected and possess basic math skills;
- c. Have the required skills and physical abilities to perform the services as specified in the individual's Plan for Supports;
- d. Be willing to attend training at the individual's and the family/caregiver's, and EOR's, as appropriate, request;
- e. Understand and agree to comply with the DMAS' requirements; and
- f. Receive a tuberculosis screening according to Virginia Department of Health guidelines.

The CD Personal Assistant must submit to a criminal history record checks for barrier crimes, as defined in 12VAC30-120-1000, within 15 days from the date of employment. If the individual to be served is a minor child, consent to a search of the VDSS Child Protective Services Central Registry.

The assistant will not be compensated for services provided to the individual subsequent to the receipt of a records check verifying that the assistant has been convicted of crimes described in the Code of Virginia, §37.2-314, Subsection B, or if the assistant has a founded complaint confirmed by the DSS Child Protective Services Central Registry.

Verification of Provider Qualifications

Entity Responsible for Verification:

The individual/employer of record is responsible for the verification of

- the employee's skill set,
- the employee's willingness to attend training upon request,
- possession of basic math, reading & writing skills,
- compliance with waiver requirements, and
- receipt of verification of a TB screening according to Virginia Department of Health guidelines.

The Fiscal Management Service (FMS) is responsible for verifying that

- the employee meets the minimum age requirement,
- the employee possesses a valid SSN,
- the criminal records check/CPS registry check has been completed.

Frequency of Verification:

Initially upon hire.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Respite services are specifically designed to provide temporary, substitute care for that which is normally provided by the family or other unpaid, primary caregiver of an individual. Respite is allowed in a family home, a respite center, a sponsored residential home, or in a group home for an individual who lives with his family but is receiving respite in that group home setting. It is not allowed in a group home for a resident of that group home, an ICF/IID, or a nursing home. Services are provided on a short-term basis because of the emergency absence or need for routine or periodic relief of the primary caregiver. Such services may be provided in home and community settings to enable an individual to maintain the health status and functional skills necessary to live in the community or participate in community activities. When specified, such supportive services may include assistance with IADLs.

The allowable activities include:

- 1) Support with activities of daily living such as: bathing or showering, toileting, routine personal hygiene skills, dressing, transferring, etc.;
- 2) Support with monitoring health status and physical condition;
- 3) Support with medication;
- 4) Support with medical needs;
- 5) Support with preparation and eating of meals;
- 6) Support with housekeeping activities, such as bed-making, dusting and vacuuming, laundry, grocery shopping, etc.;
- 7) Support to ensure the safety of the individual;
- 8) Support needed by the individual to participate in social, recreational, or community activities;
- 9) Assistance with bowel/bladder programs, range of motion exercises, routine wound care that does not include sterile technique, and external catheter care when properly trained and supervised by an RN;
- 10) Accompanying the individual to appointments or meetings.

Individuals are afforded the opportunity to act as the employer in the consumer-direction of respite services for the ID Waiver. This involves hiring, training, supervision, and termination of consumer-directed supports assistants. Individuals choosing to receive services through the consumer-directed model may do so by choosing a services facilitator to provide the training and guidance needed to be an employer. If the individual is unable to independently manage his/her own consumer-directed services, or if the individual is under 18 years of age, he/she must an adult family member/caregiver or other chosen person serve as the employer of record (EOR) on behalf of the individual.

The services facilitator coordinates support activities for those individuals electing consumer-direction of services.

FFP is not claimed for the cost of room and board.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Respite is limited to 480 hours per individual per year.

Respite assistance shall not include either practical or professional nursing services or those practices regulated in the Nurse Practice Act. This service shall not include skilled nursing services with the exception of skilled nursing tasks that may be delegated.

- f. Receive a tuberculosis screening according to Virginia Department of Health guidelines.

The CD respite assistant must submit to a criminal history record checks for barrier crimes, as defined in 12 VAC 30-120-1000, within 15 days from the date of employment. If the individual to be served is a minor child, consent to a search of the VDSS Child Protective Services Central Registry.

The assistant will not be compensated for services provided to the individual subsequent to the receipt of a records check verifying that the assistant has been convicted of crimes described in the Code of Virginia, §37.2-314, Subsection B, or if the assistant has a founded complaint confirmed by the DSS Child Protective Services Central Registry.

Verification of Provider Qualifications

Entity Responsible for Verification:

The individual/employer of record is responsible for the verification of

- the employee's skill set,
- the employee's willingness to attend training upon request,
- possession of basic math, reading & writing skills,
- compliance with waiver requirements, and
- receipt of verification of a TB screening according to Virginia Department of Health guidelines.

The Fiscal Management Service is responsible for verifying that

- the employee meets the minimum age requirement,
- the employee possesses a valid SSN,
- the criminal records check/CPS registry check is completed.

Frequency of Verification:

Initially upon hire.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Statutory Service

Service Name: Respite

Provider Category:

Agency

Provider Type:

Respite Service Provider (Agency-Directed)

Provider Qualifications

License (specify):

Any of the following types of providers can provide respite services:

1. A provider licensed by DBHDS as a provider of:
 - a. Supportive in-home residential services, which may provide respite services based in and from the individual's home;
 - b. Center-based respite services, which may provide respite services based in and from the approved respite center (licensed facility);
 - c. In-home respite services, which may provide respite services based in and from the individual's home;
 - d. Out-of-home respite services, which may provide respite services based in and from the provider's home; or
 - e. Residential respite services, which may provide respite services based in and from the currently licensed group home or sponsored residential home, as long as DBHDS Office of Licensing approves the residential respite services.
2. A provider approved by DSS as a foster care home for children, which may provide respite services based from the provider's home to children only;
3. A provider approved by DSS as an adult foster care home, which may provide respite services based from the provider's home to adults not currently residing in the home only; or
4. Personal care agencies licensed by the Virginia Department of Health or that have accreditation from any organization recognized by the CMS for the purposes of Medicare certification which may provide respite services based in and from the home of the individual.

Licensing requirements for RNs and LPNs are outlined in Chapter 30 of title 54.1 of the Code of Virginia.

Certificate (*specify*):

Other Standard (*specify*):

Respite providers must have a signed provider participation agreement with DMAS in order to provide respite services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement. Providers that have a personal care/respite care provider participation agreement with DMAS may provide respite under that agreement.

Individuals employed by a personal care agency licensed by VDH (i.e., other than DBHDS licensed or DSS approved providers) who provide respite must meet the requirements of DMAS personal/respite assistant. Basic qualifications for respite assistants include:

- * Physical ability to do the work;
- * Ability to read and write English to the degree necessary to perform the tasks expected; and
- * Completion of a training curriculum consistent with DMAS requirements. Prior to assigning an assistant to an individual, the provider must obtain documentation that the assistant has satisfactorily completed a training program consistent with DMAS requirements. DMAS requirements may be met in one of three ways:

- 1) Registration as a certified nurse aide;
- 2) Graduation from an approved educational curriculum which offers certificates qualifying the student as a nursing assistant, geriatric assistant, or home health aide; or
- 3) Completion of provider-offered training.

If the provider is licensed by VDH, the respite provider must employ or subcontract with and directly supervise an RN or an LPN who will provide ongoing supervision of all respite assistants:

- 1) The RN or LPN must be currently licensed to practice in the Commonwealth or hold multi-state licensure privilege pursuant to Chapter 30 (§ 54.1-3000 et seq.) of Title 54.1 of the Code of Virginia to practice nursing and have at least one year of related clinical nursing experience, which may include work in an acute care hospital, public health clinic, home health agency, or nursing facility.
- 2) Based on continuing evaluations of the assistant's performance and individual's needs, the RN or LPN supervisor shall identify any gaps in the assistant's ability to function competently and shall provide training as indicated.

If the provider is a DBHDS-licensed or DSS-approved provider, a (residential) supervisor will provide ongoing supervision of all respite assistants.

Verification of Provider Qualifications

Entity Responsible for Verification:

DBHDS Office of Licensing verifies that DBHDS-licensed providers of respite services meet DBHDS licensing standards.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of licensed providers at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of respite providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

Appendix C: Participant Services

Category 4:

Sub-Category 4:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Services facilitation assists the individual or the individual's family/caregiver, or Employer of Record (EOR), as appropriate, in arranging for, directing, and managing services provided through the consumer-directed model of service delivery.

The services facilitator is responsible for supporting the individual or the individual's family/caregiver, or EOR, as appropriate, by collaborating with the case manager to ensure the development and monitoring of the CD services plan for supports, providing employee management training, and completing ongoing review activities as required by DMAS for consumer-directed companion, personal assistance, and respite services.

The SF is responsible for conducting an initial comprehensive visit during which an assessment of the individual's particular needs for a requested consumer-directed service is completed. This is followed by assisting in the development of the support plan for consumer-directed services. The services facilitator provides "employee management training" to the individual or EOR, as appropriate, to educate him on his responsibilities as an employer. This includes training on advertising for, screening, hiring, retaining and firing an employee, as well as how to complete the necessary employment-related paperwork regarding taxes, criminal background checks, etc. and must be completed before the CD employee is hired.

Once the individual has hired a CD employee, the SF may assist the individual with securing needed training for the employee. The SF is required to make "routine on-site" visits periodically to monitor and ensure the quality and appropriateness of the services being provided. In addition, the SF should be available to the individual by telephone during business hours and attend meetings, as requested by the individual. Annually, the SF conducts an update (or reassessment) visit to review the individual's current status as related to CD services and develop a new annual support plan.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Services facilitation is a separate waiver service to be used in conjunction with CD personal assistance, respite, or companion services and shall not be covered for an individual absent one of these consumer directed services.

The SF must make an initial comprehensive home visit to collaborate with the individual and family/caregiver as appropriate in the development of the ISP. This may be done only once for consumer-directed services. Subsequent visits, or the start of a new SF, are handled as update (or reassessment) visits, which are generally shorter in duration and reimbursed at a lower level, as the initial information has already been gathered from the individual and should be available.

The "employee management training" occurs only once at the initiation of CD services. If additional training is required for the individual, EOR or employee, this is billed under management training which is limited to up to four visits per six month period.

At least one face-to-face meeting with the individual is required at least every six months to reassess needs and ensure appropriateness of services. During these visits with the individual, the services facilitator shall observe, evaluate, and consult with the individual, EOR, and the individual's family/caregiver, as appropriate, for the purpose of documenting the adequacy and appropriateness of CD services with regard to the individual's current functioning and cognitive status, medical needs, and social needs. These are billed as "routine on-site" visits.

Provider Type:

Services Facilitation Provider

Provider Qualifications

License (specify):

Certificate (specify):

Other Standard (specify):

Services facilitation providers must have a signed provider participation agreement with DMAS in order to provide services facilitation services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

To be enrolled as a Medicaid CD services facilitator and maintain provider status, the services facilitator shall have sufficient resources to perform the required activities, including the ability to maintain and retain business and professional records sufficient to document fully and accurately the nature, scope, and details of the services provided. To be enrolled, the services facilitator shall also meet the combination of work experience and relevant education that indicate the possession of the specific knowledge, skills, and abilities as set out in DMAS' guidance documents to perform this function.

It is preferred that the CD services facilitator possess a minimum of an undergraduate degree in a human services field or be a registered nurse currently licensed to practice in the Commonwealth or hold multi-state licensure privilege. In addition, it is preferable that the CD services facilitator have two years of satisfactory experience in a human service field working with individuals with intellectual disability or individuals with other developmental disabilities.

The Medicaid reimbursed CD services facilitator shall not be the individual enrolled in the waiver, the individual's case manager, a direct service provider, the individual's spouse, a parent of the individual who is a minor child, or the EOR who is employing the assistant/companion.

Verification of Provider Qualifications

Entity Responsible for Verification:

The Virginia Department of Medical Assistance Services verifies provider qualifications.

Frequency of Verification:

The Virginia Department of Medical Assistance Services verifies provider qualifications initially and subsequently every two years.

DMAS QMR staff review a sample of services facilitation providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

State laws, regulations and policies referenced in the specification are readily available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Service Type:

Other Service

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Assistive Technology

HCBS Taxonomy:

Category 1:

14 Equipment, Technology, and Modifications

Sub-Category 1:

14031 equipment and technology

Category 2:

Sub-Category 2:

Category 3:

Sub-Category 3:

Category 4:

Sub-Category 4:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Assistive technology is specialized medical equipment, supplies, devices, controls, and appliances, not available under the State Plan for Medical Assistance, which enable individuals to increase their abilities to perform activities of daily living (ADLs), or to perceive, control, or communicate with the environment in which they live, or which are necessary for life support, including the ancillary supplies and equipment necessary to the proper functioning of such technology.

In order to qualify for these services, the individual shall have a demonstrated need for equipment or modification for remedial or direct medical benefit primarily in the individual's home, vehicle, community activity setting, or day program to specifically improve the individual's personal functioning. AT shall be covered in the least expensive, most cost-effective manner.

Equipment or supplies already covered by the State Plan may not be purchased under the waiver. The case manager is required to ascertain whether an item is covered through the State Plan before requesting it through the waiver.

Assistive technology items must be recommended and determined appropriate to meet the individual's needs by the applicable professional (e.g., physical therapist, occupational therapist, speech and language therapist), prior to preauthorization of the service.

The equipment and activities include:

1. Specialized medical equipment, ancillary equipment, and supplies necessary for life support not available under the State Plan for Medical Assistance;
2. Durable or non-durable medical equipment and supplies not available under the State Plan for Medical Assistance;
3. Adaptive devices, appliances, and controls not available under the State Plan for Medical Assistance which enable an individual to be more independent in areas of personal care and ADLs; and
4. Equipment and devices not available under the State Plan for Medical Assistance, which enable an individual to communicate more effectively.

The case manager submits service plan information to the operating agency, DBHDS, for service authorization. DBHDS employs Qualified Developmental Disability Professionals (QDDPs) to complete the approval/service authorization process. DMAS reviews a sample of DBHDS service authorizations as part of its monitoring process.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The maximum Medicaid-funded expenditure for assistive technology is \$5,000 per service plan year.

AT shall be available to individuals who are receiving at least one other waiver service and may be provided in a residential or nonresidential setting.

Assurance: The services under the Community Living Waiver, VA.0372.R04.00, are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Benefits planning is an individualized analysis and consultation service provided to assist individuals receiving waiver services and social security benefits (SSI, SSDI, SSI/SSDI) to understand their benefits and explore the possibility of work, to start work, and the effect of work on local, state, and federal benefits. This service includes education and analysis about current benefits status and implementation and management of state and federal work incentives as appropriate.

This service results in the development of guidance and documents to assist individuals and their families/legal representatives to overcome fear and ambivalence about losing necessary supports and benefits if they choose to work or stay on the job. This service enables individuals to make an informed choice about the initiation of work. This service also provides assistance, education, and training to working individuals to make successful transition to financial independence.

Allowable Activities

Each of the allowable activities are available dependent upon the individual meeting criteria for receipt of the service activity. Allowable activities include the following:

1. Pre-employment Benefits Review which may include:

•Benefits Planning Query (BPQY from SSA)

Description: A BPQY provides information about an individual's disability cash benefits, health insurance, scheduled continuing disability reviews, representative payee, and work history, as stored in SSA's electronic records. The BPQY is an important planning tool for the individual or other person who may be developing customized services for an individual who wants to start working or stay on the job.

•Pre-employment Benefits Summary and Analysis (BS&A)

Description: Work with the individual to develop a benefits analysis and net income analysis report with both a current situation and at least two other potential situations involving Social Security work incentives.

•Employment Change Benefits Summary and Analysis

Description: Work with the individual when he experiences a change in employment situation to develop a benefits analysis and net income analysis report with both a "current situation" and at least two other potential situations involving Social Security work incentives.

2. Work Incentives Development or Revisions (PASS, IRWE, BWE, IDA): Work with the individual and family/legal representative to develop:

•Plan to Achieve Self-Support (PASS):

(Part 1)

Description: Develop, in collaboration with the individual and provider, a Plan to Achieve Self-Support (PASS) and ensure that it is submitted to the Social Security Administration (SSA).

(Part 2)

Description: Ensure the approval of the PASS plan from the SSA PASS CADRE through modifications or other appropriate services.

•Impairment Related Work Expenses (IRWE):

Description: IRWEs reduce the amount of income that Social Security counts against an individual's benefits by deducting the amount of an expense from their total countable wages. In order to qualify for the IRWE, the expense must be related to the individual's disability, work, and be an expense without which he cannot work. This service involves working with the individual to develop and submit appropriate forms and supporting documents to SSA, as needed, to successfully obtain the IRWE work incentive.

•Blind Work Expenses (BWE):

Description: Work with an individual confirmed to be blind to develop and submit appropriate forms and supporting documents to SSA, as needed, to successfully obtain the BWE work incentive, which is that SSI will not count any earned income when the primary diagnosis is blindness when the expense is reasonably attributed to earning the income, i.e., guide dog, transportation to and from work, etc.

- Individual Development Accounts (IDA):

Description: Work with the individual to develop matched savings accounts to assist him in saving towards the purchase of a lifelong asset such as a home.

- Student Earned Income Exclusion (SEIE):

Description: Work with the individual to develop and submit appropriate documents to SSA to receive benefits under the SEIE work incentive. Student earned income exclusion allows individuals under the age of 22 who regularly attend school or are involved in a vocational education program to exclude earned income up to a certain amount per a month.

- Medicaid While Working – Section 1619(b)

Description: Work with the individual to develop and submit an appropriate letter and supporting documents to SSA and the Virginia Department of Social Services (VDSS), and Medicaid, as needed, to receive benefits under 1619(b), provides for the continuation of Medicaid when a beneficiary loses his SSI due to earning wages above the SSI threshold.

- Medicaid Works (Virginia's Medicaid Buy-In Program)

Description: Work with the individual who is currently eligible for and/or receiving Medicaid to complete and submit the MEDICAID WORKS agreement and supporting documents to the Virginia Department of Social Services (VDSS), as needed, to enroll in the Medicaid Buy-In program (may include Medicaid application or updating the resource section of the Medicaid application). This enables workers with disabilities to earn higher income and retain more in savings or resources than is usually allowed by Medicaid.

- Work Incentive Revisions

Description: Work with the individual to revise one of the work incentives plans above as determined needed by a significant change in status.

3. Resolution of SSA benefits issues (e.g., Overpayments, Subsidies, Student Earned Income Exclusion, Medicaid While Working)

- Overpayments:

Description: Work with the individual to address Social Security overpayments that arise.

- Subsidies:

Description: Work with the individual to develop and submit appropriate documents to SSA to receive the Subsidy work incentive.

- Work Activity Reports:

Description: Assist the individual family/legal representative in filling out and returning forms to SSA.

4. Other Services

- ABLEnow

Description: Work with the individual and family, if applicable, to open an ABLEnow account.

- Financial Health Assessment

Description: The Financial Health Assessment (FHA) is a tool used to gauge an individual's understanding of his current financial situation.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Receipt of this service shall not be tied to the receipt of any other covered waiver or Medicaid service. This service may be authorized one time per allowable activity per individual per calendar year. However, a service may be reauthorized within a calendar year if the individual's situation has changed in terms of disability conditions, benefit type, or employment status.

No vendor shall bill for waiver Benefits Planning services while the eligible individual has an open employment services case with DARS and is eligible for this through DARS.

The annual year limit for this service shall be \$3,000. No unspent funds from one plan year shall be accumulated and carried over to subsequent plan years.

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Center-based Crisis Supports

HCBS Taxonomy:

Category 1:**Sub-Category 1:****Category 2:****Sub-Category 2:****Category 3:****Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ **Service is included in approved waiver. There is no change in service specifications.**
- ☐ **Service is included in approved waiver. The service specifications have been modified.**
- ☐ **Service is not included in the approved waiver.**

Service Definition (Scope):

Center-based Crisis Supports provide long term crisis prevention and stabilization in a residential setting (Crisis Therapeutic Home) through utilization of assessments, close monitoring, and a therapeutic milieu. Services are provided through planned and emergency admissions. Planned admissions will be provided to individuals who are receiving ongoing crisis services and need temporary, therapeutic interventions outside of their home setting in order to maintain stability. Crisis stabilization admissions will be provided to individuals who are experiencing an identified behavioral health need and/or a behavioral challenge that is preventing them from experiencing stability within their home setting. All supports are individualized, follow person-centered service planning process, are meet HCBS regulations requirements (441.301(c)(4)(1) and 441.301(c)(4)(f).

In order to receive crisis stabilization services, the individual shall:

a. Meet at least one of the following:

- (i) the individual shall be experiencing a marked reduction in psychiatric, adaptive, or behavioral functioning;
- (ii) the individual shall be experiencing an increase in extreme emotional distress;
- (iii) the individual shall need continuous intervention to maintain stability; or
- (iv) the individual shall be causing harm to himself or others; and

b. Be at risk of at least one of the following:

- (i) psychiatric hospitalization;
- (ii) emergency ICF/IID placement;
- (iii) immediate threat of loss of a community service due to a severe situational reaction; or
- (iv) causing harm to self or others.

The allowable activities include but are not limited to:

1. Psychiatric, neuropsychiatry, and psychological assessment, and other assessments and stabilization techniques;
2. Medication management and monitoring;
3. Behavior assessment and positive behavior support;
4. Intensive care coordination with other agencies and providers to assist the planning and delivery of services and supports to maintain community placement of the individual;
5. Training of family members and other caregivers and service providers in positive behavioral supports to maintain the individual in the community
6. Assisting with skill building in the Crisis Therapeutic Home as related to the behavior creating the crisis in areas such as self-care/ADLs, independent living skills, self-esteem building activities, appropriate self-expression, coping skills, and medication compliance

Number 5 mentioned above provides training to those directly involved with the individual in his typical community environments (i.e., family home, group home, day services). Number 6 mentioned above is training (the Commonwealth typically uses the term "skill building") for the individual to enable him to expand his skill repertoire in order to prevent future crises.

7. Supervision of the individual in crisis to ensure his or her safety and that of others in the environment.

Center-based crisis supports is only provided to individuals age 21 and over. All medically necessary center-based crisis supports for children under age 21 are covered in the state plan pursuant to the EPSDT benefit."

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Service provision is limited to six months per year to be authorized in 30 day increments. Intensive care coordination will only be applicable to those individuals who do not have an active case manager until such time as they were connected to one.

In accordance with the CMS Informational Bulletin issued on July 7, 2014, center-based crisis supports for individuals under age 21 shall be accessed through the state plan pursuant to ESPDT. Center-based crisis supports through this waiver shall not be available to individuals under age 21.

- ☒ **Service is included in approved waiver. There is no change in service specifications.**
- ☐ **Service is included in approved waiver. The service specifications have been modified.**
- ☐ **Service is not included in the approved waiver.**

Service Definition (Scope):

Community Coaching is a service designed for individuals who need one to one support in order build a specific skill or set of skills to address a particular barrier(s) preventing a person from participating in activities of Community Engagement.

Allowable activities:

Skill building through the implementation and participation in community activities and opportunities such as:

- Activities and public events in the community
- Community educational activities and events
- Utilization of public transportation

Skill building and support in positive behavior, relationship building and social skills.

Support with self-management, eating, and personal care needs of the individual while in the community
Assuring the individual's safety through 1:1 supervision in a variety of community settings

There is, however, a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates will be necessary.

INDIVIDUALS ELIGIBLE FOR THE CUSTOMIZED RATE:

These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- Increased staffing ratios, and/or
- Higher credentialed staff, and/or
- Increased programmatic oversight.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour. Community Coaching services, alone or in combination with Community Engagement, Group Day, Workplace Assistance, and/or Supported Employment services are limited to no more than 66 hours per week.

The service is provided with a 1:1 ratio.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.

- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Community Engagement, as directed by the person and their person-centered plan, supports and fosters the ability of the individual to acquire, retain, or improve skills necessary to build positive social behavior, interpersonal competence, greater independence, employability and personal choice necessary to access typical activities and functions of community life such as those chosen by the general population. These may include community education or training, retirement, and volunteer activities. Community engagement provides a wide variety of opportunities to facilitate and build relationships and natural supports in the community, while utilizing the community as a learning environment. These activities are conducted at naturally occurring times and in a variety of natural settings in which the individual actively interacts with persons without disabilities (other than those paid to support the individual). This service is delivered solely in community locations that are natural settings for the activities in which the individuals receiving this service are interested in participating. The service may not occur in "centers." The activities enhance the individual's involvement with the community and facilitate the development of natural supports. Community Engagement must be provided in the least restrictive and most integrated settings according to the individual's person-centered plan and individual choice.

Allowable Activities:

- a. Skill building, education, support and monitoring that assists the individual with the acquisition and retention of skills in the following areas: (i) activities and public events in the community; (ii) community educational activities and events; (iii) interests and activities that encourage meaningful use of leisure time; (iv) volunteer experiences; and (vi) maintaining contact with family and friends.
- b. Skill building and education in self-direction designed to enable the individual to achieve one or more of the following outcomes particularly through community collaborations and social connections developed by the provider (e.g., partnerships with community entities such as senior centers, arts councils, etc.): (i) development of self-advocacy skills; (ii) exercise of civil rights; (iii) acquisition of skills that promote the ability to exercise self-control and responsibility over services and supports received or needed; (iv) acquisition of skills that enable the individual to become more independent, integrated, or productive in the community; (v) development of communication skills and abilities; (vi) furthering spiritual practices; (vii) participation in cultural activities; (viii) developing skills that enhance career planning goals in the community; (ix) development of living skills; (x) promotion of health and wellness; (xi) development of orientation to the community, mobility, and the ability to achieve the desired destination; (xii) access to and utilization of public transportation; or (xiii) interaction with volunteers from the community in program activities.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour. Community Engagement, alone or in combination with Group Day, Community Coaching, Workplace Assistance, and/or Supported Employment services are limited to no more than 66 hours per week.

These services cannot take place in a licensed residential setting or in the individual's residence. The service may not occur in "centers."

These services are provided at a ratio of no more than 3 individuals supported by 1 staff person.

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Community Guide Services include direct assistance to promote individuals' self-determination through brokering very specific community resources that lead to connection to and independent participation in integrated, independent housing or community activities so as to avoid isolation. This means that Community Guides investigate and coordinate as necessary the available, naturally occurring community resources to enable the individual to participate in those resources of interest to him/her. Community Guides provide information and directed assistance that helps the individual in developing supportive community relationships and exploring specific community resources that promote implementation of the person-centered plan. This service involves face to face contact with the individual to determine the individual's specific interests, which may lead to typical community activities or settings in which the individual will engage or reside. In addition to primarily engaging face to face with the individual to identify and explore community resources, there is a component of supporting the individual that may occur without him/her present. Community Guide services involve helping the individual identify the type of community options which maximize the individual's opportunities for meaningful engagement and growth in independence. The Community Guide will provide the in-depth individualized assistance needed to connect with community activities and foster engagement distinct from the generic activities provided through routine case management. This service is designed to be short-term and periodic in nature.

This service may be provided by persons with one of two foci:

I. General community guide:

This involves utilizing existing assessment information regarding the individual's general interests in order to determine specific activities and venues that are available in his community to which he desires to be connected (e.g., clubs, special interest groups, physical activities/sports teams, etc.) in order to promote his inclusion and independent participation in the life of his community. The desired result is an increase in daily or weekly natural supports, as opposed to increasing hours of paid supports.

Allowable Activities:

1. Utilize assessment and other information provided by the case manager in tandem with an in depth discussion with the individual regarding his interests in order to develop a Plan for Supports which contains a step by step strategy for the individual and his family/friends, as appropriate, to carry out in order to reduce barriers and challenges to accessing community resources/activities to support his interests. The plan for supports should identify targeted actions that will promote community integration and independent or naturally supported involvement;
2. Assist the individual in connecting to the identified, non-Medicaid funded community resources by researching and contacting the parties responsible for the identified integrated activities, supports, services, and/or resources delineated in the individual's plan for supports;
3. Provide advocacy and informal counseling that helps guide the individual in problem solving and decision making that enhances the individual's ability to interact and contribute in the local community;
4. Guide the individual and/or demonstrate on site the means of accessing the identified integrated community activities, supports, services, and/or resources;
5. Ensure the individual's active and appropriate utilization of the activities, supports, services and/or resources to which the Community Guide assisted in connecting.

II. Community housing guide:

This involves supporting an individual's move to independent housing by helping with transition and tenancy sustaining activities. The community housing guide will work in collaboration with the case manager, regional housing specialist, and others to enable the individual achieve and sustain integrated, independent living.

Allowable Activities:

1. Conduct a tenant screening that identifies the individual's preferences and barriers related to successful tenancy;
2. Develop a plan with outcomes and support activities that the community guide will provide to identify and secure safe, affordable housing and assist the individual in the community as he or she implements the plan and work with the case manager to propose recommendations as to waiver support services and activities needed in the Individual Service Plan;
3. Assist with the housing search and application process;
4. Help identify resources to cover expenses such as security deposit, moving costs, furnishings, adaptive aids, environmental modifications, moving costs and other one-time expenses;
5. Assist in arranging for and supporting the details of the move;
6. Provide education and training on the role, rights and responsibilities of the tenant and landlord during the transition from home or congregate setting;

7. Provide training in being a good tenant and lease compliance; support with activities related to household management as part of the transitional support activities
8. Assist in resolving disputes with landlords and/or neighbors to reduce risk of eviction or other adverse action during the period of time that community guide services are authorized; and
9. Assist with the housing recertification process, if or when requested by the case manager or the individual's support team.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Community Guide is expected to be a short, periodically intermittent, intense service associated with a specific outcome. An individual may receive one or more of the two types of Community Guide services in an ISP year. Each type of Community Guide service may be authorized for up to 6 consecutive months, and the cumulative total across both may be no more than 120 hours in a plan year.

Community Guide activities conducted not in the presence of the individual, such as researching and contacting potential sites, supports, services and resources, shall not comprise more than twenty-five percent of authorized plan for support hours.

The Community Guide will not supplant, replace, or duplicate activities that are required to be provided by the case manager. Prior to accessing funding for this waiver service, all other available and appropriate funding sources, including those offered by Virginia Medicaid State Plan, Division of Rehabilitative Services, and State Department of Education, must be explored and exhausted.

- ☒ **Service is included in approved waiver. There is no change in service specifications.**
- ☐ **Service is included in approved waiver. The service specifications have been modified.**
- ☐ **Service is not included in the approved waiver.**

Service Definition (Scope):

Community-based crisis supports provides services to individuals experiencing crisis events which put them at risk for homelessness, incarceration, hospitalization, and/or danger to self or others. Community-based crisis supports are ongoing supports to individuals who may have a history of multiple psychiatric hospitalizations; frequent medication changes; enhanced staffing required due to mental health or behavioral concerns; and/or frequent setting changes. Supports are provided in the individual's home and community setting. Crisis staff work directly with and assist the individual and their current support provider or family. Techniques and strategies are provided via coaching, teaching, modeling, role-playing, problem solving, or direct assistance. These services provide temporary intensive services and supports that avert emergency psychiatric hospitalization or institutional placement or prevent other out-of-home placement.

In order to receive community-based crisis supports, the individual shall:

- a. Have a history of at least one of the following:
 - (i). Previous psychiatric hospitalization(s);
 - (ii). Previous incarceration;
 - (iii). Lost previous residential/day placements; or
 - (iv). Behaviors that have significantly jeopardized placement; and
- b. Meet at least one of the following:
 - (i) the individual shall be experiencing a marked reduction in psychiatric, adaptive, or behavioral functioning;
 - (ii) the individual shall be experiencing an increase in extreme emotional distress;
 - (iii) the individual shall need continuous intervention to maintain stability; or
 - (iv) the individual shall be causing harm to himself or others; and
- b. Be at risk of at least one of the following:
 - (i) psychiatric hospitalization;
 - (ii) emergency ICF/IID placement;
 - (iii) immediate threat of loss of a community service due to a severe situational reaction; or
 - (iv) causing harm to self or others.

The allowable activities include but are not limited to:

1. Psychiatric, neuropsychiatry, and psychological assessment, and other assessments and stabilization techniques;
2. Medication management and monitoring;
3. Behavior assessment and positive behavior support;
4. Intensive care coordination with other agencies and providers to assist the planning and delivery of services and supports to maintain community placement of the individual;
5. Training of family members and other caregivers and service providers in positive behavioral supports to maintain the individual in the community;
6. Assisting with skill building as related to the behavior creating the crisis in areas such as self-care/ADLs, independent living skills, self-esteem building activities, appropriate self-expression, coping skills, and medication compliance.

Community-based crisis supports is only provided to individuals age 21 and over. All medically necessary community-based crisis supports for children under age 21 are covered in the state plan pursuant to the EPSDT benefit."

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Service provision limited to six months per year to be authorized in 30 day increments. Intensive case management shall only be applicable to those individuals who do not have an active case manager until such time as they are connected to one.

In accordance with the CMS Informational Bulletin issued on July 7, 2014, community-based crisis supports for individuals under age 21 shall be accessed through the state plan pursuant to ESPDT. community-based crisis supports through this waiver shall not be available to individuals under age 21.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.

- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Companion services provide nonmedical care, socialization, or support to individuals. This service is provided in an individual's home or at various locations in the community.

The allowable activities include:

1. Assistance or support with tasks such as meal preparation, laundry, and shopping;
2. Assistance with light housekeeping tasks;
3. Assistance with self-administration of medication;
4. Assistance or support with community access and recreational activities; and
5. Support to assure the safety of the individual.

Individuals are afforded the opportunity to act as the employer in the consumer-direction of companion services. This involves hiring, training, supervision, and termination of companions. Individuals choosing to receive services through the consumer-directed model may do so by choosing a services facilitator to provide the training and guidance needed to be an employer. If the individual is unable to independently manage his/her own consumer-directed services, an adult family member/caregiver or other chosen person must serve as the employer of record (EOR) on behalf of the individual.

Unlike personal assistance and residential support, companion services do not permit routine support with activities of daily living (such as toileting, bathing, dressing, grooming). The allowable activities center on instrumental activities of daily living (meal prep, shopping, community integration, etc.).

Companion services are provided in a one-to-one fashion and are thus occasionally coupled with residential support if an individual has a desire to pursue community interests distinct from roommates and does not have the need for support with ADLs during the time of companion services provision.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Individual must be 18 years of age or older to receive this service.

Service delivery may not exceed 8 hours per day.

Service Delivery Method (check each that applies):

Provider Type:

Companion Services Provider (Agency-Directed)

Provider Qualifications**License (specify):**

The following types of providers can deliver companion services:

1. Providers licensed by DBHDS as a provider of group home residential services, supportive in-home residential services, non-center based day support, or respite services; or
2. Personal care agencies licensed by the Virginia Department of Health or that have accreditation from any organization recognized by the CMS for the purposes of Medicare certification.

Certificate (specify):**Other Standard (specify):**

Companion providers must have a signed Provider Participation agreement with DMAS in order to provide Companion services. The provider designated in the Participation Agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

Providers of companion services must employ individuals who meet the following requirements:

1. Are 18 years of age or older and possess a valid Social Security Number;
2. Are able to read and write English to the degree necessary to perform the tasks expected and possess basic math skills;
5. Have the required skills to perform services as specified in the individuals service plan with minimal supervision;
6. Are capable of following a service plan with minimal supervision;
7. Submit to criminal history record check within 15 days from the date of employment. The companion will not be compensated for services provided to the individual subsequent to the receipt of a records check verifying that the companion has been convicted of crimes according to the requirements of the Code of Virginia, as applicable;
8. Receive an annual tuberculosis (TB) screening according to VDH guidelines; and
9. Are capable of aiding the individual in the instrumental activities of daily living.

Companions must be employees of providers that contract with DMAS to provide companion services. Providers are required to have a companion supervisor to monitor companion services. The supervisor must have a bachelors degree in the human services field and at least one year of experience working in the ID field, or be an RN with at least one year of experience working in the DD field. A RN must have a current license or certification to practice nursing in the Commonwealth within his or her profession.

Verification of Provider Qualifications

03/09/2020

Entity Responsible for Verification:

DBHDS Office of Licensing verifies that DBHDS-licensed providers of Companion services meet DBHDS licensing standards.

VDH verifies that VDH licensed providers meet VDH licensing standards.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of DBHDS-licensed providers at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

Other Standard (*specify*):

Companions do not need to be enrolled with DMAS (i.e., have a participation agreement) to provide consumer-directed companion services.

Companion qualifications include the following requirements. The companion must:

- a. Be 18 years of age or older and possess a valid Social Security number that has been issued by the Social Security Administration to the person who is to function as the assistant;
- b. Be able to read and write English to the degree necessary to perform the tasks expected and possess basic math skills;
- c. Have the required skills and physical abilities to perform the services as specified in the individual's Plan for Supports;
- d. Be willing to attend training at the individual's and the family/caregiver's, and EOR's, as appropriate, request;
- e. Understand and agree to comply with the DMAS requirements; and
- f. Receive a tuberculosis screening according to VDH guidelines.

The CD companion must submit to a criminal history record checks for barrier crimes, as defined in 12VAC30-120-1000, within 15 days from the date of employment. The companion will not be compensated for services provided to the individual subsequent to the receipt of a records check verifying that the companion has been convicted of crimes according to the requirements of the Code of Virginia, as applicable.

Verification of Provider Qualifications

Entity Responsible for Verification:

The individual/employer of record is responsible for the verification of

- the employee's skill set,
- the employee's willingness to attend training upon request,
- possession of basic math, reading & writing skills,
- compliance with Waiver requirements, and
- receipt of verification of an annual TB screening according to VDH guidelines.

The Fiscal Management Services (FMS) is responsible for verifying that

- the employee meets the minimum age requirement,
- the employee's possesses a valid SSN,
- the criminal records check is completed.

Frequency of Verification:

Initially upon hire.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Crisis Support services provide intensive supports by appropriately trained staff in the area of crisis prevention, crisis intervention, and crisis stabilization to an individual who may experience an episodic behavioral or psychiatric crisis in the community which has the potential to jeopardize their current community living situation. This service shall be designed to stabilize the individual and strengthen the current living situation so the individual can be supported in the community during and beyond the crisis period. This service may be provided in all community settings including licensed and unlicensed homes, programs, etc. All providers are required to train staff on individual rights and to ensure rights are safeguarded.

a. Crisis Prevention - Crisis prevention services provide ongoing assessment of an individual's medical, cognitive, and behavioral status as well as predictors of self injurious, disruptive, or destructive behaviors, with the initiation of positive behavior supports to prevent occurrence of crisis situations. Crisis prevention also encompasses providing support to the family and the individual through facilitating team meetings, revising the behavior plan, etc. as they implement changes to the plan for support and address any residual concerns from the crisis situation. Staff will arrange to train and mentor staff or family members who will support the individual long term once the crisis has stabilized in order to minimize or prevent recurrence of the crisis. Crisis support staff will deliver such support in a way that maintains the individual's typical routine to the maximum extent possible. Crisis prevention is not billed separately.

b. Crisis Intervention - Crisis intervention services are used in the midst of the crisis to prevent the further escalation of the situation and to maintain the immediate personal safety of those involved. Crisis Intervention is a relatively short term service that provides a highly structured intervention that may include temporary changes to the person's residence, removal of certain items from the setting, changes to the person's daily routine, and emergency referrals to other care providers. Those providing crisis intervention services must also be well-versed and fluent in verbal de-escalation techniques, including active listening, reflective listening, validation, and suggestions for immediate changes to the situation.

c. Crisis Stabilization - Crisis stabilization services begin once the acuity of the situation has resolved and there is no longer an immediate threat to the health and safety of those involved. Crisis stabilization services are geared toward gaining a full understanding of all of the factors that precipitated the crisis and may have maintained it until trained staff from outside the immediate situation arrived. Crisis stabilization plans are developed by staff trained in basic behavioral treatment and crisis management. These plans may include modifications to the environment, interventions to enhance communication skills, or changes to the individual's daily routine or structure. Staff developing these plans must be able to train support staff, family, and other significant persons in the individual's life.

Crisis support services is only provided to individuals age 21 and over. All medically necessary crisis support services for children under age 21 are covered in the state plan pursuant to the EPSDT benefit."

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Service provision is subject to the following limits:

30 days per year of crisis prevention

90 days per year of crisis intervention

60 days per year of crisis stabilization (authorized in 15 day increments)

The service unit is hourly.

In accordance with the CMS Informational Bulletin issued on July 7, 2014, crisis support services for individuals under age 21 shall be accessed through the state plan pursuant to ESPDT. Crisis support services through this waiver shall not be available to individuals under age 21.

Agency	Crisis Support Services provider

Appendix C: Participant Services**C-1/C-3: Provider Specifications for Service****Service Type: Other Service****Service Name: Crisis Support Services****Provider Category:**

Agency

Provider Type:

Crisis Support Services provider

Provider Qualifications**License (specify):**

A crisis support services provider must be licensed by DBHDS as a provider of outpatient crisis stabilization services, residential crisis stabilization services or nonresidential crisis stabilization services.

In addition to meeting the above licensing requirements, the clinical services provider must employ or utilize qualified developmental disability professionals (QDDPs), licensed mental health professionals, or other personnel competent to provide clinical or behavioral interventions. These might include crisis counseling, behavioral consultation, or related activities to individuals with DD who are experiencing serious psychiatric or behavioral problems. The face-to-face assessment or reassessment required to initiate or continue this service must be conducted by a QDDP.

The QDDP providing crisis stabilization clinical/behavioral intervention services must have:

1. At least one year of documented experience working directly with individuals who have developmental disabilities;
2. At least a bachelor's degree in a human services field including, but not limited to, sociology, social work, special education, rehabilitation counseling, or psychology; and
3. The required Virginia or national license, registration, or certification, as is applicable, in accordance with his or her profession.

Virginia attests that no duplication of crisis stabilization in the waiver and EPSDT services will be permitted and will ensure that each child has access to all services to which he/she is entitled through EPSDT.

Certificate (specify):**Other Standard (specify):**

Crisis support services providers must have a signed provider participation agreement with DMAS in order to provide these services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

All providers are required to train staff on individual rights and to ensure rights are safeguarded.

Verification of Provider Qualifications

Entity Responsible for Verification:

DBHDS Office of Licensing verifies that providers of crisis support services meet DBHDS licensing standards.

DMAS Quality Management Review (QMR) staff verifies that staff are QDDPs.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of licensed providers at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

This includes purchases of electronic devices, software, services, and supplies not otherwise provided through this waiver or through the State Plan, that would allow individuals to access technology that can be used in the individual's residence to support greater independence and self-determination.

The service will support the assessment for determining appropriate equipment/devices, acquisition, training in the use of these goods and services, ongoing maintenance and monitoring services to address an identified need in the individual's person-centered service plan (including improving and maintaining the individual's opportunities for full participation in the community) and meet the following requirements: the item or service will decrease the need for other Medicaid services (e.g., reliance on staff supports); AND/OR promote inclusion in the community; AND/OR increase the individual's safety in the home environment.

These electronic goods and services are purchased for the individual. Examples are electronic devices that verbally prompt the individual to turn off the stove or lock the front door and sensors that provide a family member or provider with information about the individual's movements around his/her living area. This service includes ongoing electronic monitoring, which is the provision of oversight and monitoring within the home of the adult individual (18 years and older) through off-site monitoring which includes live video feed; live audio feed; motion sensing system; radio frequency identification (RFID); web-based monitoring system; or other devices approved by DBHDS/DMAS. The system shall include devices to engage in live, two-way communication with the individual being monitored. Also included is the provision of stand-by intervention staff prepared for prompt engagement with the individual and/or immediate deployment to the residential setting in critical situations.

In situations in which EHBS will include live video and/or audio feed, the individual, legal guardian, authorized representative will be required to sign a consent form which acknowledges their agreement to some degree of compromise to the individual's privacy in exchange

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

A preliminary needs assessment will be conducted by a technology specialist to help determine the best type and use of technology and the overall cost effectiveness of various options.

The annual limit for this service will be \$5,000.

This service will not be available to individuals receiving residential supports that are reimbursed on a daily basis (e.g., group home, sponsored or supported living residential services).

Electronic Home-Based Supports Provider

Provider Qualifications**License** (*specify*):**Certificate** (*specify*):**Other Standard** (*specify*):

EHBS providers must have a signed provider participation agreement with DMAS in order to provide these services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

The technology specialist conducting the preliminary assessment may be:

- an occupational therapist who is certified by the Commonwealth of Virginia and specializes in assistive technologies, mobile technologies and smart home accommodations for people with developmental disabilities or other similarly credentialed specialist

An EHBS provider shall be one of the following:

- (i) an enrolled personal care agency;
- (ii) an enrolled durable medical equipment provider;
- (iii) a CSB
- (iv) a Center for Independent Living
- (v) a licensed home health provider; or
- (vi) a PERS manufacturer that has the ability to provide electronic home-based equipment, direct services (i.e., installation, equipment maintenance, and service calls), and monitoring services.

The provider of ongoing electronic monitoring systems must provide an emergency response center with fully trained operators who are capable of receiving signals for help from an individual's equipment 24-hours a day, 365, or 366, days per year as appropriate, of determining whether an emergency exists, and of notifying the appropriate responding organization or an emergency responder that the individual needs help.

The EHBS provider shall have the primary responsibility to furnish, install, maintain, test, and service the equipment, as required, to keep it fully operational. The provider shall replace or repair the device within 24 hours of the individual's notification of a malfunction of the unit or device.

The EHBS provider must properly install all equipment and must furnish all supplies necessary to ensure that the system is installed and working properly.

An EHBS provider shall install, test, and demonstrate to the individual and family/caregiver, as appropriate, the unit or device before submitting his claim for services to DMAS.

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☐ Service is included in approved waiver. There is no change in service specifications.
- ☒ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

This service is offered in order to enable individuals to gain access to an individual's place of employment or volunteer activity, other community services or events, activities and resources, homes of family or friends, civic organizations or social clubs, public meetings or other civic activities, and spiritual activities or events as specified by the support plan and when no other means of access is available. The goal of this service is to promote the individual's independence and participation in the life of his community. Use of this service must be related to the individual's desired outcomes as stated in the ISP. This service is offered in addition to medical transportation required under 42 CFR §431.53 and transportation services under the State plan, defined at 42 CFR §440.170(a), and does not replace them.

The service may include transportation in a private vehicle by a person such as a co-worker or other community member or the purchase of tickets for public transportation such as bus or subway. In either case, an administering agency will coordinate and bill DMAS.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

This service is available to individuals aged 18 years and older.

This service shall not be authorized or reimbursed for individuals who can access transportation through the State Plan or other waiver services which include a transportation component. The individual or legal guardian must verify that he does not have sufficient personal financial resources (e.g., through wages) to cover the cost of the transportation himself.

Private transportation is reimbursed according to a "trip" and the number of individuals being transported to the location (maximum of three). There are three trip rates depending on the distance traveled:

1. Under 10 miles
2. Between 10 – 20 miles
3. Over 20 miles

The purchase of tickets for public transportation and dissemination to the individual is coordinated by the administering agency.

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Other Service

Service Name: Employment and community transportation

Provider Category:

Individual

Provider Type:

Employment and Community transportation provider

Provider Qualifications

License (*specify*):

The service will be offered through an administering agency that possesses any DBHDS license to provide services to individuals with developmental disabilities, a Center for Independent Living or an Employment Service Organizations. Administering agencies shall be enrolled with DMAS (i.e., has a participation agreement) to provide these services.

Certificate (*specify*):

Other Standard (*specify*):

In the case of private transportation, the administering agency will be responsible for screening community persons to drive the individual to the designated location(s) according to the ISP.

The private driver must:

1. Be 18 years of age or older;
2. Possess a valid driver's license;
3. Possess and maintain at a minimum (1) proof of general liability insurance coverage in compliance with federal and/or state statutory requirements and (2) a satisfactory driving record defined as no reckless driving charges within the past 24 months. The insurance should insure the insured or the passengers:
 - a. Against loss from any liability imposed by law for damages;
 - b. Against damages for care and loss of services, because of bodily injury to or death of any person;
 - c. Against injury to or destruction of property caused by accident and arising out of the ownership, use, or operation of such motor vehicle or motor vehicles within the Commonwealth, any other state in the United States, or Canada;
 - d. Subject to a limit of exclusive of interest and costs, with respect to each motor vehicle of \$25,000 because of bodily injury to or death of one person in any one accident and, subject to the limit for one person, to a limit of \$50,000 because of bodily injury to or death of two or more persons in any one accident; and
 - e. Subject to a limit of \$20,000 because of injury to or destruction of property of others in any one accident.

Verification of Provider Qualifications

Entity Responsible for Verification:

The administrative entity is responsible for the verification of the private driver's:

1. possession of a current, valid driver's license and no reckless driving charges within the past 24 months,
2. possession of car insurance,
3. ensuring that the driver meets the minimum age requirement of age 18,
4. completion of an attestation signed by the private driver, the individual, and the individual's guardian or authorized representative, as appropriate, that the driver has disclosed any relevant felonies and if listed on any registry. The administering agency will ensure that the driver is not listed on the Virginia Sex Offender Registry.

Frequency of Verification:

Initially and annually the administering provider will verify and document that each private driver possesses a current, valid driver's license and car insurance.

DMAS QMR staff review a sample of providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

Service Title:

Environmental Modifications

HCBS Taxonomy:**Category 1:**

14 Equipment, Technology, and Modifications

Sub-Category 1:

14020 home and/or vehicle accessibility adaptations

Category 2:**Sub-Category 2:****Category 3:****Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Environmental modifications are physical adaptations to the individual's primary home or primary vehicle that are necessary to ensure the health and welfare of the individual, or that enable the individual to function with greater independence. Such adaptations may include, but shall not necessarily be limited to, the installation of ramps and grab-bars, widening of doorways, modification of bathroom facilities, or installation of specialized electric and plumbing systems that are necessary to accommodate the medical equipment and supplies that are necessary for the individual. Modifications may be made to a primary automotive vehicle in which the individual is transported if it is owned by the individual, a family member with whom the individual lives or has consistent and ongoing contact, or a nonrelative who provides primary long-term support to the individual and is not a paid provider of services.

Allowable activities include:

1. Physical adaptations to a house or place of residence necessary to ensure an individual's health, welfare and safety (e.g., installation of specialized electric and plumbing systems to accommodate medical equipment and supplies);
2. Physical adaptations to a house or place of residence which enable an individual to live in a noninstitutional setting and to function with greater independence that do not increase the square footage of the house or place of residence (e.g., installation of ramps and grab-bars, widening of doorways, modifications of bathroom facilities);and
3. Modifications to the primary vehicle being used by the individual.

Exclusions to this service are those modifications, adaptations or improvements to the home which are of general utility and are not intended to provide a direct medical or remedial benefit to the individual (i.e., carpeting, roof repair, central air conditioning.) Further, environmental modifications may not be used to bring a substandard dwelling up to minimum habitation standards. Also excluded are modifications that are reasonable accommodation requirements of the American's with Disabilities Act, Virginians with Disabilities Act, and the Rehabilitation Act. Modifications, adaptations or improvements, which add to the total square footage of the home, are not allowable expenditures except when necessary to complete an adaptation, as determined through preauthorization. All modifications must meet current building code.

The case manager submits service plan information to the operating agency, DBHDS for service authorization. DBHDS employs Qualified Developmental Disability Professionals (QDDPs) to complete the approval/service authorization process. DMAS reviews a sample of DBHDS's service authorizations as part of its monitoring process.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The maximum Medicaid-funded expenditure for environmental modifications is \$5,000 per year.

EM shall be available to individuals enrolled in the waiver who are receiving at least one other waiver service.

Environmental modifications shall be provided in the least expensive manner possible that will accomplish the modification required by the individual. This service shall encompass those items not otherwise covered in the State Plan for Medical Assistance or through another program.

Environmental modifications are not allowed to be reimbursed for the work site, community activity setting or day program (which exceed reasonable accommodation requirements of the employer under the Americans with Disabilities Act).

The services under the Community Living Waiver, VA.0372.R04.00, are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

Provider Category	Provider Type Title
Agency	Environmental Modifications Provider

Appendix C: Participant Services

C-1/C-3: Provider Specifications for Service

Service Type: Other Service

Service Name: Environmental Modifications

Provider Category:

Agency

Provider Type:

Environmental Modifications Provider

Provider Qualifications

License (*specify*):

Certificate (*specify*):

Other Standard (*specify*):

Environmental modifications shall be provided in accordance with all applicable federal, state, or local building codes and laws by CSB contractors or DMAS-enrolled providers.

Providers must have a signed provider participation agreement with DMAS in order to provide environmental modification services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement. Providers may also go through the CSB's OHCDs as a provider.

The contractor must:

1. Comply with all applicable state and local building codes, with accommodations to meet the individuals needs (code variations permitted in individuals residences, excluding group homes);
2. If used previously, have satisfactorily completed previous environmental modifications; and
3. Be available for any service or repair of the environmental modifications.

One modification may require the collaboration of up to three different providers:

1. A rehabilitation engineer or certified rehabilitation specialist (CRS) may be used in cases where structural modifications of the primary residence are requested to evaluate the individual's needs and subsequently act as project manager, assuring functionality of the environmental modification through quality assurance inspections once the project is finished. Alternatively, the rehabilitation engineer may actually design and personally complete the modification. A physical therapist or occupational therapist, available through the State Plan for Medical Assistance or waiver therapeutic consultation, may also be utilized to evaluate the needs for environmental modifications, when appropriate;
2. A building contractor may design and complete the structural modification; and
3. A vendor who supplies the necessary materials may be separately reimbursed, or supplies may be included in the bill of the building contractor or rehabilitation engineer.

A rehabilitation engineer/CRS may be required if (for example):

The environmental modification involves combinations of systems which are not designed to go together.

The structural modification requires a project manager to assure that the design and functionality meet ADA accessibility guidelines.

Where structural modifications of the primary residence are requested to ensure the residence is structurally sound for the modifications.

Verification of Provider Qualifications

Entity Responsible for Verification:

The Virginia Department of Medical Assistance Services

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Group Supported Employment is defined as continuous support provided by staff in a naturally occurring place of employment to groups of two to eight individuals with disabilities and involves interactions with the public and coworkers without disabilities. Examples include mobile crews and other business-based workgroups employing small groups of workers with disabilities in the community.

Group Supported Employment must be provided in a community setting that promotes integration into the workplace and interaction between participants and people without disabilities in the workplace.

These supports enable an individual to obtain and maintain a job in the general workforce for which an individual is compensated at or above the minimum wage, but not less than the customary wage and level of benefits paid by the employer for the same or similar work performed by individuals without disabilities.

The allowable activities are:

1. Vocational/job-related discovery or assessment;
2. Person-centered employment planning which results in employment related outcomes;
3. Individualized job development that produces an appropriate job match for the individual and the employer to include job analysis and/or job carving;
4. Negotiation with prospective employers;
5. On-the-job training in work skills required to perform the job;
6. Ongoing evaluation, supervision, and monitoring of the individual's performance on the job but which do not include supervisory activities rendered as a normal part of the business setting;
7. Ongoing support services necessary to assure job retention;
8. Supports to ensure the individual's health and safety;
9. Development of work-related skills essential to obtaining and retaining employment, such as the effective use of community resources and break/lunch areas and transportation systems; and
10. Staff coverage for transportation between the individual's place of residence and the workplace when other forms of transportation are unavailable or inaccessible (i.e., time spent transporting).

Personal care activities are not typically provided, but may be included. The individual's assessment and individual support plan must clearly reflect the individual's need for employment-related skill building.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour. Supported employment services, alone or in combination with Community Engagement, Community Coaching, Workplace Assistance, and/or Group Day services are limited to no more than 66 hours per week.

Providers for persons eligible for or receiving supported employment services funded under § 110 of the Rehabilitation Act of 1973 (through DARS) or §§ 602(16)(17) of the Individuals with Disabilities Education Act (IDEA) (through special education services) cannot receive payment for this service through Community Living waiver services. The case manager must assure that supported employment services are not available through these sources and document the finding in the individual's case management record. When services are provided through these sources, the individual support plan will not include them as a requested waiver service.

FFP is not available for any activities with incentive payments, subsidies, or unrelated vocational training expenses.

Service Definition (Scope):

In-Home Support services are residential services that take place in the individual's home, family home, or community settings and typically supplement the primary care provided by the individual, family or other unpaid caregiver. In-Home Support services are designed to ensure the health, safety and welfare of the individual. These services shall consist of skill-building, routine supports, general supports, and safety supports, that enable an individual to acquire, retain, or improve the self-help, socialization, and adaptive skills necessary to reside successfully in home and community-based settings.

Payment is not to be made for the cost of room and board, including the cost of building maintenance, upkeep and improvement.

Each individual and family/caregiver, family, or caregiver shall have a back-up plan for the individual's needed supports in case the personal assistant does not report for work as expected or terminates employment without prior notice.

The allowable activities are:

1) Skill-building related to personal care activities (toileting, bathing, and grooming; dressing; eating; mobility; communication; household chores; food preparation; money management; shopping, etc.);

2) Skill-building related to the use of community resources (transportation, shopping, dining at restaurants, participating in social and recreational activities, etc.);

3) Supporting the individual in developing the ability to replace challenging behavior with positive, accepted behavior for home and community environments, for example (not all inclusive):

- Developing a circle of friends;
- Handling social encounters with others; or
- Redirecting challenging behavior.

4) Monitoring health and physical conditions and providing supports with medication or other medical needs;

5) Providing supports with personal care, ADLs, and use of community resources, for example (not all-inclusive):

- Completing personal care or mealtime tasks when physically unable to do so; or
- Completing daily tasks, such as laundry, meal preparation, using the bank, or other tasks essential to the individual's health and welfare.

6) Supporting with transportation to and from community resources; and

7) Providing safety supports to ensure the individual's health and safety.

In-home Support services include the expectation of the presence of a skills development (formerly called training) component, along with the provision of supports, as needed.

There is, however, a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates will be necessary.

INDIVIDUALS ELIGIBLE FOR THE CUSTOMIZED RATE:

These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- Increased staffing ratios, and/or

- Higher credentialed staff, and/or
- Increased programmatic oversight.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour.

In-home support services are typically not provided 24 hours per day, but may be when appropriately justified.

C-1/C-3: Provider Specifications for Service

Service Type: Other Service

Service Name: In-home Support Services

Provider Category:

Agency

Provider Type:

In-home Supports provider

Provider Qualifications**License** (*specify*):

An agency licensed by DBHDS as a provider of supportive in-home residential services.

Certificate (*specify*):**Other Standard** (*specify*):

In-home Supports providers must have a signed provider participation agreement with DMAS in order to provide residential services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

Providers must also assure that persons providing In-home Supports have received training in the characteristics of IDD and appropriate interventions, training strategies and other methods of supporting individuals with functional limitations prior to providing waiver services and pass an objective standardized test of skills, knowledge, and abilities approved by DBHDS that must be administered according to DBHDS' defined procedures.

Verification of Provider Qualifications**Entity Responsible for Verification:**

DBHDS Office of Licensing verifies that providers of In-home Supports meet DBHDS licensing standards.

DMAS Quality Management Review (QMR) staff verifies that staff has received the required training.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of licensed providers at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

- ☐ Service is included in approved waiver. There is no change in service specifications.
- ☒ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Peer Mentor Supports provide information, resources, guidance, and support from an experienced, trained peer mentor to an individual who is a waiver recipient. This service is delivered to waiver recipients by other individuals with developmental disabilities who are or have been service recipients, have shared experiences with the individual, and provide support and guidance to him/her. The service is designed to foster connections and relationships which build individual resilience. Peer Mentor Supports encourage individuals with developmental disabilities to share their successful strategies and experiences in navigating a broad range of community resources beyond those offered through the waiver with waiver participants so that the waiver participant is better able to advocate for and make a plan to achieve integrated opportunities and experiences in living, working, socializing, and staying healthy and safe in his/her own life, as well as to overcome personal barriers which are inhibiting him/her from being more independent. Peer mentoring is intended to assist with empowering the individual receiving the service. This service is delivered based on the support needs of the individual as outlined in his/her person-centered plan. This service is designed to be short-term and periodic in nature.

Allowable Activities

1. The administering agency facilitates peer to peer "matches" and follows up to assure the matched relationship meets the individual's expectations;
2. The peer mentor has face to face contact with the individual to discuss his/her specific interests/desired outcomes related to realizing greater independence and the barriers to achieving them;
3. The peer mentor explains community services and programs and suggests strategies to the individual to achieve his/her desired outcomes, particularly related to living more independently, engaging in paid employment and expanding social opportunities in order to reduce the need for supports from family members or paid staff;
4. The peer mentor provides information from his/her experiences to help the individual in problem solving, decision making, developing supportive community relationships and exploring specific community resources that promote increased independence and community integration;
5. The peer mentor assists the individual in developing a personal plan for accessing the identified integrated community activities, supports, services, and/or resources.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Peer Mentor Supports is expected to be a short, periodically intermittent, intense service associated with a specific outcome. Peer Mentor Supports may be authorized for up to 6 consecutive months, and the cumulative total across that timeframe may be no more than 60 hours in a plan year.

The Peer Mentor will not supplant, replace, or duplicate activities that are required to be provided by the case manager. Prior to accessing funding for this waiver service, all other available and appropriate funding sources must be explored and exhausted.

Peer Mentors cannot mentor their own family members.

Peer Mentors must be at least 21 years of age and may provide these supports only to individuals 16 years of age and older.

Peer Mentor Adminstrating Agency

Provider Qualifications

License (specify):

The administering agency shall be a DBHDS licensed provider of DD services, Center for Independent Living or Employment Service Organization. The administering agency shall serve as the enrolled provider and maintain the documentation of the peer mentor's qualifications, criminal background and Child Protective Registry (if service recipient is under age 18) checks, and other required documentation.

Certificate (specify):

Other Standard (specify):

Peer Mentor Supports are provided by an individual with a developmental disability who has lived independently in the community for at least one year and is or has been a recipient of services, including but not limited to publicly-funded housing, Medicaid waiver services, work incentives, and supported employment.

The peer mentor must have completed DBHDS's DD Peer Mentor training curriculum and passed the accompanying test. The curriculum focuses on mentoring skills, effective communication, individuals' rights and responsibilities as citizens, participating in person-centered planning, as well as knowledge of community systems and services that support integrated employment and living in the community. The training will be delivered by trained volunteers through the DBHDS Office of Recovery Services. In the application to become a Peer Mentor the applicant will be asked to detail his/her personal experience related to managing independent living, managing self-direction of supports, experience with finding and maintaining a job, accessing the community and building community supports.

Individuals who receive supports through DD or other waivers may be peer mentors.

The Peer Mentor Supports administering agency must have a signed provider participation agreement with DMAS.

Sub-Category 4:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Personal Emergency Response System (PERS) is an electronic device and monitoring service that enable certain individuals to secure help in an emergency. PERS services shall be limited to those individuals who live alone or are alone for significant parts of the day and who have no regular caregiver for extended periods of time and who would otherwise require extensive routine supervision.

PERS is a service that monitors individuals' safety in their homes, and provides access to emergency assistance for medical or environmental emergencies through the provision of a two-way voice communication system that dials a 24-hour response or monitoring center upon activation and via the individuals' home telephone system. PERS may also include medication monitoring devices.

PERS services may be authorized when there is no one else in the home with the individual who is competent or continuously available to call for help in an emergency.

Medication monitoring units must be physician ordered and are not considered a stand-alone service. Individuals must be receiving PERS services and medication monitoring service simultaneously.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

A unit of service shall include administrative costs, time, labor, and supplies associated with the installation, maintenance, monitoring, and adjustments of the PERS. A unit of service is the one-month rental price set by DMAS. The one-time installation of the unit shall include installation, account activation, individual and caregiver instruction, and removal of PERS equipment.

PERS services shall not be used as a substitute for providing adequate supervision for the individual enrolled in the waiver.

Service Delivery Method (*check each that applies*):

Certificate (*specify*):

Other Standard (*specify*):

PERS providers must have a signed provider participation agreement with DMAS in order to provide PERS services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

(i) an enrolled personal care agency; (ii) an enrolled durable medical equipment provider; (iii) a licensed home health provider; or (iv) a PERS manufacturer that has the ability to provide PERS equipment, direct services (i.e., installation, equipment maintenance, and service calls), and PERS monitoring services.

The PERS provider must provide an emergency response center with fully trained operators who are capable of receiving signals for help from an individual's PERS equipment 24-hours a day, 365, or 366, days per year as appropriate, of determining whether an emergency exists, and of notifying an emergency response organization or an emergency responder that the PERS service individual needs emergency help.

The PERS provider shall have the primary responsibility to furnish, install, maintain, test, and service the PERS equipment, as required, to keep it fully operational. The provider shall replace or repair the PERS device within 24 hours of the individual's notification of a malfunction of the console unit, activating devices, or medication-monitoring unit.

The PERS provider must properly install all PERS equipment into a PERS individual's functioning telephone line or cellular system and must furnish all supplies necessary to ensure that the PERS system is installed and working properly.

The PERS installation shall include local seize line circuitry, which guarantees that the unit shall have priority over the telephone connected to the console unit should the phone be off the hook or in use when the unit is activated.

A PERS provider shall install, test, and demonstrate to the individual and family/caregiver, as appropriate, the PERS system before submitting his claim for services to DMAS.

The PERS provider shall have back-up monitoring capacity in case the primary system cannot handle incoming emergency signals.

All PERS equipment shall be approved by the Federal Communications Commission and meet the Underwriters' Laboratories, Inc. (UL) safety standard for home health care signaling equipment (in Underwriter's Laboratories Safety Standard 1637, Standard for Home Health Care Signaling Equipment, Fourth Edition, December 29, 2006). The UL listing mark on the equipment shall be accepted as evidence of the equipment's compliance with such standard. The PERS device shall be automatically reset by the response center after each activation, ensuring that subsequent signals can be transmitted without requiring manual reset by the individual enrolled in the waiver or family/caregiver, as appropriate.

The PERS provider shall be capable of continuously monitoring and responding to emergencies under all conditions, including power failures and mechanical malfunctions.

Verification of Provider Qualifications

Entity Responsible for Verification:

The Virginia Department of Medical Assistance Services

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Individual and continuous care (in contrast to part-time or intermittent care) for individuals with a serious medical condition and/or complex health care need, certified by a physician as medically necessary to enable the individual to remain at home, rather than in a hospital, nursing facility or ICF-IID. Care is provided by a registered nurse (RN) or a licensed practical nurse (LPN) under the direct supervision of a registered nurse.

These services are provided to an individual at their place of residence or other community settings.

The allowable activities include:

1. Monitoring of an individual's medical status;
2. Administering medications and other medical treatment; or
3. Training, consultation, nurse delegation or oversight of family members, staff, and other persons responsible for carrying out an individual's support plan for the purpose of monitoring the individual's medical status and administering medications and other medically-related procedures consistent with the Nurse Practice Act [18VAC90-20-10 et seq., by statutory authority of Chapter 30 of Title 54.1, Code of Virginia].

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is a quarter hour.

In accordance with the CMS Informational Bulletin issued on July 7, 2014, private duty nursing for individuals under age 21 shall be accessed through the state plan pursuant to ESPDT. Private duty nursing through this waiver shall not be available to individuals under age 21.

☐

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☐ Service is included in approved waiver. There is no change in service specifications.
- ☒ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Shared Living is the Medicaid payment for a portion of the total cost of rent, food, and utilities that can be reasonably attributed to a person who has no legal responsibility to support the individual and resides in the same household as the individual. The person delivering shared living services is essentially a "roommate" who does, by definition, live with the individual receiving waiver supports. These expenses may be covered when the roommate provides companionship supports, including fellowship and enhanced feelings of security, and limited ADL or IADL supports that account for no more than 20% of the anticipated companionship time on a weekly basis. The support provided by the roommate will be agreed upon by the individual and the live-in companion/roommate, and individually determined through a person-centered planning process.

Companionship supports may include:

- The provision of fellowship, which means to engage the individual in social, physical or mental activities, such as conversation, games, crafts, accompanying the person on walks, errands, appointments and social and recreational activities.
- Enhanced feelings of security which means to provide necessary social and emotional support to the individual when inside or outside of the residence.

ADL and IADL supports may also be provided, but will account for no more than 20% of the anticipated companionship time, and may include:

- Assistance with Instrumental Activities of Daily Living (IADLs) which are tasks that enable a person to live independently at home, such as meal preparation, light housework, assistance with the physical taking of medications
- Assistance with Activities of Daily Living (ADLS), either with routine prompting and/or intermittently providing direct assistance for ADLS such as dressing, grooming, feeding, bathing, toileting and transferring.

The individual will choose who lives with him/her and together, through a person centered process, determine the companionship supports provided based on preferences and need. The roommate will not have the responsibility for providing habilitative services or medical services. While the roommate may provide a certain percentage of the service delivery time providing assistance with personal care tasks the main objective of this service is to provide general fellowship, as any roommate would do, both in the home and in settings in the community. The shared living roommate is not a paid staff person.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Payment will not be made directly to the roommate but to a provider agency that will in turn transfer the appropriate amount of funds to the individual. The service is available to adult individuals, aged 18 years of age or older.

The individual must reside in his or her own home or leased residence. Payment will not be made when the individual lives in the roommate's home, in a residence that is owned or leased by the provider agency, or any other residential arrangement where the individual is not directly responsible for the residence.

The roommate must not be the individual's parent or spouse.

Category 2:

Sub-Category 2:

Category 3:

Sub-Category 3:

Category 4:

Sub-Category 4:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Skilled nursing is defined as part-time or intermittent care that may be provided concurrently with other services due to the medical nature of the supports provided. These services shall be provided for individuals enrolled in the waiver having serious medical conditions and complex health care needs who do not meet home health criteria but who require specific skilled nursing services which cannot be provided by nonnursing personnel. Skilled nursing services may be provided in the individual's home or other community setting on a regularly scheduled or intermittent basis. It may include consultation, nurse delegation as appropriate, oversight of direct support staff as appropriate, and training for other providers.

Services listed in the supports plan must be within the scope of the States Nurse Practice Act and are provided by a registered professional nurse (RN), or licensed practical nurse (LPN) under the supervision of a RN licensed to practice in the Commonwealth of Virginia.

Skilled nursing services under the waiver differ in scope from skilled nursing services in the State plan. Skilled nursing services provided under the waiver are those that do not meet home health criteria of acute, time-limited care. Skilled nursing services under this waiver are available to individuals with serious medical conditions and complex health care needs, who require specific skilled nursing services ordered by a physician which cannot be accessed under the State Plan for Medical Assistance. These services must be necessary to enable an individual to live in a noninstitutional setting in the community and cannot be provided by nonnursing personnel. Services are provided in an individual's home or community setting, or both, on a regularly scheduled or intermittent need basis.

The allowable activities include:

1. Consultation, assistance to direct support staff, and nurse delegation;
2. Training of family and other caregivers;
3. Monitoring an individual's medical status;
4. Administering medications and other medical treatment; or
5. Assurance that all items listed in 1 through 4 are carried out in accordance with the plan for supports.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

If an individual has skilled nursing needs that are short-term and intermittent in nature, the case manager must assist the individual in accessing home health services under the State Plan for Medical Assistance. The State Plan Home Health coverage provides short-term intermittent skilled nursing services for five visits without preauthorization. It must be accessed through a licensed home health agency that has a provider agreement with DMAS for skilled nursing services. Additional visits after the initial five visits require pre-authorization from DMAS preauthorization contractor.

If an individual has skilled nursing needs that are expected to be longer-term, but intermittent in nature, the case manager may assist the individual in accessing skilled nursing services under the waiver.

Skilled nursing is billed in 15 minute units.

Foster care providers shall not be the skilled nursing services providers for the same individuals for whom they provide foster care.

Skilled nursing shall not be reimbursed while the individual enrolled in the waiver is receiving emergency care or is an inpatient in an acute care hospital or during emergency transport of the individual to such facilities.

In accordance with the CMS Informational Bulletin issued on July 7, 2014, skilled nursing for individuals under age 21 shall be accessed through the state plan pursuant to ESPDT. Skilled nursing through this waiver shall not be available to individuals under age 21.

- 1) a licensed registered nurse (RN), or licensed practical nurse (LPN) under the supervision of a licensed RN employed by a DMAS-enrolled home health provider, or
- 2) a licensed registered nurse (RN), or licensed practical nurse (LPN) under the supervision of a licensed RN who is contracted with or employed by a DBHDS-licensed day support, respite, or residential provider.

The RN or LPN must have a current license issued by the Virginia Board of Nursing or a current multi-state licensure privilege to practice nursing in the Commonwealth as an RN or LPN, as applicable.

Certificate (specify):

Other Standard (specify):

Skilled nursing providers must have a signed provider participation agreement with DMAS in order to provide skilled nursing services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

Providers that have a DMAS participation agreement to provide home health services or a DMAS-enrolled Home Care Organization (HCO) may provide skilled nursing services under that agreement.

Verification of Provider Qualifications

Entity Responsible for Verification:

The Virginia Department of Health Professions verifies credentials of registered nurses and licensed practical nurses.

The Virginia Department of Medical Assistance Services verifies provider qualifications.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DMAS QMR staff review a sample of skilled nursing providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

As provided in 42 CFR §440.180(b)(9), the State requests the authority to provide the following additional service not specified in statute.

Service Title:

Sponsored Residential

HCBS Taxonomy:**Category 1:**

02 Round-the-Clock Services

Sub-Category 1:

02021 shared living, residential habilitation

Category 2:**Sub-Category 2:****Category 3:****Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Sponsored Residential Services shall consist of skill-building, routine supports, general supports, and safety supports, provided in a licensed or approved residence that enable an individual to acquire, retain, or improve the self-help, socialization, and adaptive skills necessary to reside successfully in home and community-based settings.

Service providers shall be reimbursed only for the amount and type of sponsored residential support services that are included in the individual's approved person-centered plan.

Sponsored residential services shall be authorized for Medicaid reimbursement in the person-centered plan only when the individual requires these services and when such needs exceed the services included in the individual's room and board arrangements with the service provider.

Sponsored residential services to the individual in the form of continuous (up to 24 hours per day) services performed by the sponsor family who shall be physically present in the home. These supports may be provided individually or simultaneously to up to two individuals living in that home, depending on the required support.

Sponsored residential support includes the expectation of the presence of a skills development (formerly called training) component, along with the provision of supports, as needed.

The allowable activities include, but are not limited to:

1) Skill-building related to personal care activities (toileting, bathing, and grooming; dressing; eating; mobility; communication; household chores; food preparation; money management; shopping, etc.);

2) Skill-building related to the use of community resources (transportation, shopping, dining at restaurants, participating in social and recreational activities, etc.);

3) Supporting the individual in developing the ability to replace challenging behavior with positive, accepted behavior for home and community environments, for example (not all inclusive):

- Developing a circle of friends;
- Handling social encounters with others; or
- Redirecting challenging behavior.

4) Monitoring health and physical conditions and providing supports with medication or other medical needs;

5) Providing supports with personal care, ADLs, and use of community resources, for example (not all-inclusive):

- Completing personal care or mealtime tasks when physically unable to do so; or
- Completing daily tasks, such as laundry, meal preparation, using the bank, or other tasks essential to the individual's health and welfare

6) Supporting with transportation to and from training sites and community resources;

7) Providing general supports as needed; and

8) Providing safety supports to ensure the individual's health and safety.

There is, however, a small cohort of individuals (particularly individuals being discharged from the Training Center who are extremely medically fragile and/or behaviorally challenged), for whom customized rates will be necessary.

INDIVIDUALS ELIGIBLE FOR THE CUSTOMIZED RATE:

These extremely medically fragile and/or behaviorally challenged individuals are those whose support needs place them in levels six or seven but who have a higher level of need than will be accommodated by the tier four rates, as well as any individual for whom it is determined that the only other resource is to be served out of state, in a state operated mental health or DD facility, or in a more restrictive environment. They are identified as those who require

greater support in order to find in-state providers willing to serve them. These individuals' needs outweigh the resources provided within the current waiver rate structure. Their needs may warrant:

- Increased staffing ratios, and/or
- Higher credentialed staff, and/or
- Increased programmatic oversight.

Individuals with extraordinary behavioral needs are defined as individuals who threaten the safety of staff and others around them, require increased staffing to immediately address behavioral incidents, require direct 1:1 or 2:1 intervention to mitigate harm to themselves, others, property, or prevent serious incidents in the community to preclude police involvement and/or arrest. Often, these individuals' challenging behaviors are triggered spontaneously, necessitating providers to staff individuals at 1:1 or 2:1 (depending on the severity of the behavior) for some or all of the day. Other individuals require constant supervision to mitigate the frequency of these very challenging behaviors. Individuals who have a high frequency of such behaviors will routinely require additional hours of 1:1 or 2:1 supports. This level of staff intervention allows for appropriate supervision both in the home, as well as in the community to prevent and/or reduce social isolation. Shared staffing ratios in these more unique cases (as typically occur in group homes and day services) often do not provide adequate oversight as staff is required to work directly with such individuals to prevent, mitigate, or respond immediately to behavioral incidents, while another staff protects others in the area to ensure all individuals in the setting are safe. In addition, the supervision and oversight required by more experienced/highly trained direct support staff requires clinical professionals who are themselves more highly trained and experienced than is routinely expected/present in these service settings.

Medically, an individual may require 1:1 or 2:1 staff support when he has a health history or recent health complication that puts him at risk for acute medical complications resulting in hospitalization or death. For example, an individual may require 1:1 during meal time due to severe risk of aspiration; another may require 2:1 during transfers due to a combination of illnesses such as dementia and osteoporosis, resulting in an increased risk of falling that is so high that he may sustain a fracture or head injury. In an effort to fully integrate individuals with severe medical conditions into the community, increased staff are provided during transition periods to prevent emergency medical activities. Staff may require more frequent or intensive training to have the skills needed to perform more challenging health supports such as total personal care and the implementation of nursing delegated tasks. Licensed professionals may need to provide additional supports outside of waiver funding to protect a person's health and safety such as facilitating hospital admissions and discharges, interfacing with the hospital team and providing generalized staff training on skills not covered by typical staff training programs.

Sub-Category 4:

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Therapeutic consultation is covered services designed to assist the individual and the individual's family/caregiver, as appropriate, with assessments, plan design, and teaching for the purpose of assisting the individual enrolled in the waiver.

This service shall provide expertise, training, and technical assistance in any of the following specialty areas to assist family members, caregivers, and other service providers in supporting the individual. The specialty areas shall be:

- (i) psychology,
- (ii) behavioral consultation,
- (iii) therapeutic recreation,
- (iv) speech and language pathology,
- (v) occupational therapy,
- (vi) physical therapy, and
- (vii) rehabilitation engineering.

The need for any of these services shall be based on the Individual Support Plan and shall be provided to those individuals for whom specialized consultation is clinically necessary and who have additional challenges restricting their abilities to function in the community. Therapeutic consultation services may be provided in individuals' homes, and in appropriate community settings (such as licensed or approved homes or day support programs) as long as they are intended to facilitate implementation of individuals' desired outcomes as identified in their Individual Support Plans.

The allowable activities are:

1. Interviewing the individual, family members, caregivers, and relevant others to identify issues to be addressed and desired outcomes of consultation;
2. Observing the individual in daily activities and natural environments;
3. Assessing the individual's need for an assistive device or modification and/or adjustment in the environment or services;
4. Developing data collection mechanisms and collecting baseline data;
5. Observing and assessing current interventions, support strategies, or assistive devices being used with the individual;
6. Designing a written support plan detailing the interventions, environmental adaptations, and support strategies to address the identified issues and desired outcomes; this may include recommendations related to specific devices, technology or adaptation of other training programs or activities;
7. Demonstrating specialized, therapeutic interventions, individualized supports, or assistive devices;
8. Training family/caregivers and other relevant persons to assist the individual in using an assistive device, to implement specialized, therapeutic interventions or adjust currently utilized support techniques;
9. Training relevant persons to better support the individual simply by observing the individual's environment, daily routines and personal interactions;
10. Reviewing documentation and evaluating the efficacy of assistive devices or the activities and interventions identified in the support plan;
11. In addition to the above, Behavior Consultation Services may include direct behavioral interventions and demonstration to family members/staff of such interventions. Intervention modalities shall relate to the individual's identified behavioral need. Specific goals and procedures for the Behavioral Services must be established.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service shall be one hour.

Therapeutic consultation may not include direct therapy provided to waiver individuals other than Behavioral Consultation.

Therapeutic consultation services may not duplicate the activities of other services available to the individual through the State Plan. In particular, the case manager must first access consultation from physical therapists, occupational therapists, speech and language therapists through the State Plan when State Plan services are available to an individual.

The services under the Community Living waiver are limited to additional services not otherwise covered under the state plan, including EPSDT, but consistent with waiver objectives of avoiding institutionalization.

Therapeutic consultation shall not be solely for purposes of monitoring the individual.

Only behavioral consultation in this therapeutic consultation service may be offered in the absence of any other waiver service when the consultation is determined to be necessary.

Transition Services

HCBS Taxonomy:**Category 1:**

16 Community Transition Services

Sub-Category 1:

16010 community transition services

Category 2:**Sub-Category 2:****Category 3:****Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ Service is included in approved waiver. There is no change in service specifications.
- ☐ Service is included in approved waiver. The service specifications have been modified.
- ☐ Service is not included in the approved waiver.

Service Definition (Scope):

Transition services are nonrecurring set-up expenses for individuals who are transitioning from an institution or licensed or certified provider-operated living arrangement to a living arrangement in a private residence where the person is directly responsible for his or her own living expenses.

Allowable costs are:

- a. Security deposits that are required to obtain a lease on an apartment or home;
- b. Essential household furnishings required to occupy and use a community domicile, including furniture, window coverings, food preparation items, and bed and bath linens;
- c. Set-up fees or deposits for utility or services access, including telephone, electricity, heating and water;
- d. Services necessary for the individual's health, safety, and welfare such as pest eradication and one-time cleaning prior to occupancy;
- e. Moving expenses;
- f. Fees to obtain a copy of a birth certificate or an identification card or driver's license; and
- g. Essential clothing items.

Transition services are furnished only to the extent that they are reasonable and necessary as determined and clearly identified in the service plan, and the person is unable to meet such expenses or when the services cannot be obtained from another source. Transition services do not include monthly rental or mortgage expenses; food; regular utility charges; and/or household items that are intended for purely diversional/recreational purposes. This service does not include services or items that are covered under other waiver services such as environmental modifications or assistive technology.

The case manager submits service plan information to the operating agency, DBHDS, for service authorization. DBHDS employs Qualified Developmental Disability Professionals (QDDPs) to complete the approval/service authorization process. DMAS reviews a sample of DBHDS's service authorizations as part of its monitoring process.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

Services shall be available for one transition per individual and shall be expended within nine months from the date of authorization.

The total cost of these services shall not exceed \$5,000, per-person lifetime limit.

Service Title:

Workplace Assistance Services

HCBS Taxonomy:

Category 1:

17 Other Services

Sub-Category 1:

17990 other

Category 2:**Sub-Category 2:****Category 3:****Sub-Category 3:****Category 4:****Sub-Category 4:**

Complete this part for a renewal application or a new waiver that replaces an existing waiver. Select one :

- ☒ **Service is included in approved waiver. There is no change in service specifications.**
- ☐ **Service is included in approved waiver. The service specifications have been modified.**
- ☐ **Service is not included in the approved waiver.**

Service Definition (Scope):

Workplace Assistance services are supports provided to someone who has completed job development and completed or nearly completed and job placement training (i.e., supported employment) but requires more than typical job coach services to maintain stabilization in their employment.

Workplace Assistance services are supplementary to the services rendered by the job coach services; the job coach still provides professional oversight and job coaching intervention. This service is designed for those limited number of individuals who receive individual supported employment services who are unable to maintain employment following the fading of the job coach without ongoing supports on the job site. The intent is for those individuals to receive some level of ongoing support at the job site in the areas of social skills, communication, personal care (though this may not be the only reason for the provision of this service), attention to task, etc. These are all common skill areas which, if not properly supported, may result in an individual with developmental disabilities losing community employment. This service should not be for the development of actual job skills; that work should be completed by the job coach before fading and maintained by periodic contacts on the job site/with the employer. Areas of overlap are when the Workplace Assistant first begins working with the individual (the job coach will need to show him/her the parameters of the job and discuss the individual's needs) and during the periodic visits by the job coach back to the job site (after fading) to ensure that all is still going well with the employment situation. Workplace assistance will not necessarily be billed for the entire time (hours per day) that the individual is working; it may be needed during certain critical parts of the day. However, it may be of a long-term nature and not subject to fading.

The provider provides on-site habilitative supports related to behavior, health, time management or other skills that otherwise would endanger the individual's continued employment. The provider is able to support the person related to personal care needs as well; however, this cannot be the sole use of Workplace Assistance services.

In order for an activity to qualify under Workplace Assistance services it must include all three of the following:

1. The activity must not be work skill training related which would normally be provided by a job coach
2. Services are delivered in their natural setting (where and when they are needed)
3. Services must facilitate the maintenance of and inclusion in an employment situation
4. The ratio is 1:1

Allowable activities include:

1. Skill building and supports around non-work skills necessary for the individual to maintain employment
2. Skill building and supports in the home, community, or workplace of employment maintenance related skills
3. Support to make and strengthen community connections
4. Safety supports to ensure the individual's health and safety.

Specify applicable (if any) limits on the amount, frequency, or duration of this service:

The unit of service is an hour. Workplace Assistance services, alone or in combination with Community Engagement, Community Coaching, Group Day, and/or Supported Employment services are limited to no more than 66 hours per week.

This service can be provided during the time the individual being served is working, up to and including 40 hours a week. There is no time limit on how long these services can remain authorized.

This service may not be provided simultaneously with on-the-job Personal Assistance services, nor may Workplace Assistance services be provided solely for the purpose of provision of assistance with ADLs.

Service Delivery Method (check each that applies):

- ☐ Participant-directed as specified in Appendix E
- ☒ Provider managed

Specify whether the service may be provided by (check each that applies):

- ☐ Legally Responsible Person

☒ **Relative**☒ **Legal Guardian****Provider Specifications:**

Agency	Workplace Assistance provider

Appendix C: Participant Services**C-1/C-3: Provider Specifications for Service****Service Type: Other Service****Service Name: Workplace Assistance Services****Provider Category:**

Agency

Provider Type:

Workplace Assistance provider

Provider Qualifications**License** (*specify*):

Supported employment providers must be a vendor of supported employment services with the Department of Aging and Rehabilitative Services (DARS)

OR

possess a DBHDS non-center based day support services license.

Certificate (*specify*):**Other Standard** (*specify*):

Workplace Assistance providers must have a signed provider participation agreement with DMAS in order to provide these services. The provider designated in the participation agreement must directly provide the services and bill DMAS for Medicaid reimbursement.

The staff person providing Workplace Assistance services must have completed training regarding the principles of supported employment and coordinate with the job coach providing Individual Supported Employment to the individual being supported.

Workplace Assistance may not be provided only for purposes of Personal Assistance.

Verification of Provider Qualifications**Entity Responsible for Verification:**

DARS verifies that vendors of supported employment services meet criteria to be a vendor through a recognized accrediting body.

DBHDS Office of Licensing verifies that providers of Residential or Day Support services meet DBHDS licensing standards.

DMAS Quality Management Review (QMR) staff verifies that staff has received the required training.

Frequency of Verification:

The Virginia Department of Medical Assistance Services will verify provider qualifications every two years.

DBHDS Office of Licensing staff may conduct unannounced onsite reviews of licensed providers and each of its services at any time and at least annually to determine compliance with licensing regulations. Staff may investigate complaints or incidents to determine if there is a licensing violation.

DMAS QMR staff review a sample of supported employment providers annually. Staff may conduct announced and unannounced onsite reviews at any time.

Appendix C: Participant Services

C-1: Summary of Services Covered (2 of 2)

b. Provision of Case Management Services to Waiver Participants. Indicate how case management is furnished to waiver participants (*select one*):

☐ **Not applicable** - Case management is not furnished as a distinct activity to waiver participants.

☒ **Applicable** - Case management is furnished as a distinct activity to waiver participants.

Check each that applies:

☐ **As a waiver service defined in Appendix C-3.** *Do not complete item C-1-c.*

☐ **As a Medicaid state plan service under §1915(i) of the Act (HCBS as a State Plan Option).** *Complete item C-1-c.*

☒ **As a Medicaid state plan service under §1915(g)(1) of the Act (Targeted Case Management).** *Complete item C-1-c.*

☐ **As an administrative activity.** *Complete item C-1-c.*

☐ **As a primary care case management system service under a concurrent managed care authority.** *Complete item C-1-c.*

c. Delivery of Case Management Services. Specify the entity or entities that conduct case management functions on behalf of waiver participants:

Targeted case management services as a State Plan Option service for all individuals receiving waiver services are provided through the local CSBs with oversight and licensing by DBHDS. The service may be provided directly by CSB staff or by private case managers through a contractual arrangement with a particular CSB that bills for and monitors the service.

Appendix C: Participant Services

C-2: General Service Specifications (1 of 3)

a. Criminal History and/or Background Investigations. Specify the state's policies concerning the conduct of criminal history and/or background investigations of individuals who provide waiver services (*select one*):

☐ **No. Criminal history and/or background investigations are not required.**

☒ **Yes. Criminal history and/or background investigations are required.**

Specify: (a) the types of positions (e.g., personal assistants, attendants) for which such investigations must be conducted; (b) the scope of such investigations (e.g., state, national); and, (c) the process for ensuring that mandatory investigations have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid or the operating agency (if applicable):

Per §37.2-416, §37.2-506 and §37.2-607 of the Code of Virginia, every DBHDS-licensed provider shall require any applicant who accepts employment as a direct support professional (any position that includes responsibility for service provision, case management, health, safety, development, or well-being of an individual) or as the immediate supervisor of a person in a position with this responsibility to submit to fingerprinting and provide personal descriptive information to be forwarded through the Central Criminal Records Exchange to the Federal Bureau of Investigation (FBI) for the purpose of obtaining national criminal history record information regarding the applicant. No provider licensed to provide supports to individuals with developmental disabilities shall hire for compensated employment persons who have been convicted of any offense listed in subsection B of § 37.2-314 of the Code of Virginia. The Central Criminal Records Exchange, upon receipt of an individual's record or notification that no record exists, shall submit a report to the requesting licensed provider.

Per §37.2-408.1 of the Code of Virginia, every children's residential facility that is regulated or operated by the DBHDS shall require any employee, regular volunteer or contractor who will be alone with a juvenile in the performance of his duties to submit to fingerprinting and to provide personal descriptive information, to be forwarded along with the applicant's fingerprints through the Central Criminal Records Exchange to the Federal Bureau of Investigation for the purpose of obtaining criminal history record information regarding such applicant.

The state agency shall report to the children's facility whether the applicant is eligible to have responsibility for the safety and well-being of children. No children's residential facility regulated or operated by the Department shall hire for compensated employment or allow to volunteer or provide contractual services persons who have been convicted of or are the subject of pending charges for crimes detailed in §37.2-408.1.

All agency providers must also demonstrate the completion of criminal records checks as a part of the enrollment process for a DMAS Provider Participation Agreement. All agency providers not licensed by DBHDS must demonstrate that the Criminal History Records Check has been completed as part of QMR conducted by DMAS. DMAS requires that criminal background checks be requested to the Virginia State Police prior to the start of employment with additional supervision provided to the employee until the records check results are received, typically within several days.

For consumer-directed services, the contracted FMS agent is responsible for conducting Virginia State Police criminal records checks for all consumer directed employees and this process is ensured by the DMAS contract monitor.

b. Abuse Registry Screening. Specify whether the state requires the screening of individuals who provide waiver services through a state-maintained abuse registry (select one):

- ☐ **No. The state does not conduct abuse registry screening.**
- ☒ **Yes. The state maintains an abuse registry and requires the screening of individuals through this registry.**

Specify: (a) the entity (entities) responsible for maintaining the abuse registry; (b) the types of positions for which abuse registry screenings must be conducted; and, (c) the process for ensuring that mandatory screenings have been conducted. State laws, regulations and policies referenced in this description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):

The Virginia Department of Social Services (VDSS) maintains a Child Protective Services Abuse Registry, which is a registry of founded complaints of child abuse and neglect. Screenings via this registry must be completed for personal and respite assistants and companions, as well as for DBHDS-licensed providers on each direct support professional (as specified in the Administrative Code of Virginia at 12 VAC 35-105-400). The DBHDS Office of Licensing is responsible for ensuring that Child Protective Services (CPS) registry checks have been completed as a part of the annual licensing process. DMAS QMR provides follow-up monitoring.

All other agency providers not licensed by DBHDS must demonstrate that CPS registry checks have been completed as a part of QMR conducted by DMAS. All agency providers must also demonstrate the completion of CPS registry checks as a part of the enrollment process for a DMAS provider participation agreement.

For consumer-directed services, the contracted FMS agent is responsible for conducting CPS registry checks for those employees who will be working with children. This process is verified by the DMAS contract monitor.

DMAS requires that CPS registry checks be requested prior to the start of employment with additional supervision provided to the employee until the records check results are received.

Appendix C: Participant Services

C-2: General Service Specifications (3 of 3)

d. Provision of Personal Care or Similar Services by Legally Responsible Individuals. A legally responsible individual is any person who has a duty under state law to care for another person and typically includes: (a) the parent (biological or adoptive) of a minor child or the guardian of a minor child who must provide care to the child or (b) a spouse of a waiver participant. Except at the option of the State and under extraordinary circumstances specified by the state, payment may not be made to a legally responsible individual for the provision of personal care or similar services that the legally responsible individual would ordinarily perform or be responsible to perform on behalf of a waiver participant. *Select one:*

- ☒ **No. The state does not make payment to legally responsible individuals for furnishing personal care or similar services.**
- ☐ **Yes. The state makes payment to legally responsible individuals for furnishing personal care or similar services when they are qualified to provide the services.**

Specify: (a) the legally responsible individuals who may be paid to furnish such services and the services they may provide; (b) state policies that specify the circumstances when payment may be authorized for the provision of *extraordinary care* by a legally responsible individual and how the state ensures that the provision of services by a legally responsible individual is in the best interest of the participant; and, (c) the controls that are employed to ensure that payments are made only for services rendered. *Also, specify in Appendix C-1/C-3 the personal care or similar services for which payment may be made to legally responsible individuals under the state policies specified here.*

☐ Self-directed

☐ **Agency-operated**

e. Other State Policies Concerning Payment for Waiver Services Furnished by Relatives/Legal Guardians. Specify state policies concerning making payment to relatives/legal guardians for the provision of waiver services over and above the policies addressed in Item C-2-d. *Select one:*

- ☐ **The state does not make payment to relatives/legal guardians for furnishing waiver services.**
- ☒ **The state makes payment to relatives/legal guardians under specific circumstances and only when the relative/guardian is qualified to furnish services.**

Specify the specific circumstances under which payment is made, the types of relatives/legal guardians to whom payment may be made, and the services for which payment may be made. Specify the controls that are employed to ensure that payments are made only for services rendered. *Also, specify in Appendix C-1/C-3 each waiver service for which payment may be made to relatives/legal guardians.*

For the waiver services of group home residential, sponsored residential, supported living, personal assistance, respite, companion, private duty and skilled nursing, the payment is not permitted to be made for services rendered by family members (including legal guardians of individuals who are adults) who live under the same roof as the individual, unless there is objective written documentation as to why there are no other providers available to provide the services. Spouses and parents of individuals who are minors are never permitted to receive payment as providers.

Family members who provide these services must meet the same standards as providers who are unrelated to the individual and no additional limitations exist regarding the amount of services that may be furnished by these family members. Examples of situations meeting the criteria of no other providers available might include:

- individuals living in a remote area unserved or underserved by other providers;
- individuals with documented complex medical or behavioral needs which are best met by the family member;
- individuals who require services at hard-to-staff hours; or
- numerous providers have been unsuccessful at appropriately supporting the individual
- numerous providers have assessed the situation and responded in writing that they cannot provide services.

In these cases, there shall be documented service planning team agreement that service delivery by the family member best meets the individual's preferences and support needs, and that the individual's choice of providers has been honored. Concerns that these intents will not or have not been fulfilled should be discussed with DBHDS staff.

Provider agency supervisors (or the CD services facilitator in the case of consumer-directed services), have an oversight responsibility to ensure that services are actually being rendered according to the support plan and that billing occurs only for documented services rendered. Further, DMAS Quality Management Review staff compare documentation of service delivery with the individual's support plan and compare these against payments made to ensure payments are made only for services rendered. Both the individual's case manager and QMR staff interview individuals themselves as part of their oversight efforts and ask questions about their receipt of and satisfaction with services.

Family members living under the same roof as the individual being served may not provide services unless there is objective written documentation completed by the case manager as to why there are no other providers available to provide services.

To ensure that the individual is getting the proper services, the individual's case manager is instrumental in this determination. If the case manager does not feel that it is in the best interest of the individual for a certain family member or legal guardian to be a paid service provider, it is his/her responsibility to address this. The case manager must verify that one of the above situations or another equally serious extenuating circumstance exists that necessitates a family member being a provider (i.e., slot assignment information included references to the family's inability to care for the individual). The case manager must monitor the situation to ensure that the individual's growth toward independence is not hindered by having a family member as a paid support person and that the family member remains aware that there is a different relationship once he/she is paid to support the individual.

Case managers also have recourse to DBHDS service authorization staff in the form of relaying their concerns. DBHDS staff will review the information submitted and make a determination as to whether or not authorizing a particular person as paid caregiver should or should not occur. As for all staff supporting individuals in this waiver, if a family member/legal guardian has committed a "barrier crime" as defined in Virginia Code, he or she is ineligible to be a paid provider of services.

All CL waiver services must be authorized prior to delivery by DBHDS service authorization staff who review and compare individual's assessment information and their ISP outcomes/support activities. Staff authorize services which are in compliance with regulations and in accordance with the individual's needs (inclusive of best interests). Therefore, providers may not bill for services beyond the limits which are authorized. DMAS Quality Management Review and Provider Integrity staff conduct look behinds to ensure that, for a sample of waiver participants, payment is in accord with documentation of service delivery.

Providers of services under any of the DD waivers shall not be parents or guardians of individuals enrolled in the waiver who are minor children or the adult individual's spouse. Payment may only be made for services furnished by

other family members who are living under the same roof as the individual receiving services if there is objective, written documentation as to why there are no other providers available to provide the care. This documentation must demonstrate that there are no other person available to provide supports to the individual other than the unpaid family/caregiver who lives in the home with the individual. Examples of such documentation may be:

- (i) copies of advertisements and/or interview notes showing unsuccessful efforts to hire a consumer-directed assistant;
- (ii) documentation indicating high turnover in consumer-directed assistants or other paid staff; (iii) documentation supporting the individual's special medical or behavioral needs which can only be safely met by a family member;
- (iv) documentation of the repeated inability to obtain service providers due to the family's remote location;
- (v) documentation of the failure of multiple providers to adequately provide supports to the individual; or
- (vi) documentation indicating that language is a factor in service delivery.

Such family members, if approved to provide services for the purpose of receiving Medicaid reimbursement, shall meet the same provider requirements as all other licensed providers.

- ☐ **Relatives/legal guardians may be paid for providing waiver services whenever the relative/legal guardian is qualified to provide services as specified in Appendix C-1/C-3.**

Specify the controls that are employed to ensure that payments are made only for services rendered.

- ☐ **Other policy.**

Specify:

- f. Open Enrollment of Providers.** Specify the processes that are employed to assure that all willing and qualified providers have the opportunity to enroll as waiver service providers as provided in 42 CFR §431.51:

All providers may enroll via telephone, postal mail, or web-based contact with the Department of Medical Assistance Services and its contractor for provider enrollment. There is no fee for provider application or enrollment. Interested providers submit an application and supporting documentation to DMAS' Provider Enrollment Unit, who processes the application and issues a provider enrollment number within 15 business days.

All provider enrollment information is available on the DMAS Web portal and available to the general public.

Appendix C: Participant Services

Quality Improvement: Qualified Providers

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Qualified Providers

The state demonstrates that it has designed and implemented an adequate system for assuring that all waiver services are provided by qualified providers.

i. Sub-Assurances:

- a. Sub-Assurance:** *The State verifies that providers initially and continually meet required licensure and/or certification standards and adhere to other standards prior to their furnishing waiver services.*

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance, complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

3. Number & percent of enrolled licensed/certified provider agencies continuing to meet applicable licensure/certification following initial enrollment. N: Number of enrolled licensed/certified providers continuing to meet applicable licensure/certification D: Total number of enrolled licensed/certified provider agencies.

c. Sub-Assurance: The State implements its policies and procedures for verifying that provider training is conducted in accordance with state requirements and the approved waiver.

For each performance measure the State will use to assess compliance with the statutory assurance, complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

1. Number and percent of provider agency staff meeting provider orientation training requirements. N: Number of provider agency staff meeting provider orientation training requirements. D: Total number of provider agency staff reviewed.

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

DMAS QMR staff identifies problems with any of the above measures for a given provider. They each require a corrective action plan to be developed and implemented by that provider. Failure to do so jeopardizes the provider's license/Medicaid provider agreement. DMAS QMR staff follow up on all corrective action plans by reviewing records to ensure corrections have been made within 45 days. Serious violations may be referred to DMAS' Provider Integrity unit for billing retraction

Individual providers with systemic problems will be targeted for technical assistance/training from DBHDS.

ii. Remediation Data Aggregation

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Qualified Providers that are currently non-operational.

☒ **No**

☐ **Yes**

Please provide a detailed strategy for assuring Qualified Providers, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix C: Participant Services

C-3: Waiver Services Specifications

Section C-3 'Service Specifications' is incorporated into Section C-1 'Waiver Services.'

Appendix C: Participant Services

C-4: Additional Limits on Amount of Waiver Services

a. Additional Limits on Amount of Waiver Services. Indicate whether the waiver employs any of the following additional limits on the amount of waiver services (*select one*).

☐ **Not applicable-** The state does not impose a limit on the amount of waiver services except as provided in Appendix C-3.

☒ **Applicable** - The state imposes additional limits on the amount of waiver services.

When a limit is employed, specify: (a) the waiver services to which the limit applies; (b) the basis of the limit, including its basis in historical expenditure/utilization patterns and, as applicable, the processes and methodologies that are used to determine the amount of the limit to which a participant's services are subject; (c) how the limit will be adjusted over the course of the waiver period; (d) provisions for adjusting or making exceptions to the limit based on participant health and welfare needs or other factors specified by the state; (e) the safeguards that are in effect when the amount of the limit is insufficient to meet a participant's needs; (f) how participants are notified of the amount of the limit. (*check each that applies*)

☐ **Limit(s) on Set(s) of Services.** There is a limit on the maximum dollar amount of waiver services that is authorized for one or more sets of services offered under the waiver.
Furnish the information specified above.

☐ **Prospective Individual Budget Amount.** There is a limit on the maximum dollar amount of waiver services authorized for each specific participant.
Furnish the information specified above.

--

- ☒ **Budget Limits by Level of Support.** Based on an assessment process and/or other factors, participants are assigned to funding levels that are limits on the maximum dollar amount of waiver services.
Furnish the information specified above.

Virginia is in the process of phasing in a supports level and service mix package methodology that will result in supports budgets. Since 2009 individuals supported through the Commonwealth's waivers for individuals with intellectual disability have, as part of the person-centered process, been assessed utilizing the Supports Intensity Scale® (SIS®). The information gleaned through this process has been used to inform the person-centered plan, including incorporating what is important to and important for the individual in the plan. Since 9/1/16, individuals in all three of the DD waivers are assigned to one of seven supports levels based on the results of the SIS® and Virginia Supplemental Questions (VSQ), which are used to determine intense medical and/or behavioral needs. Individuals are notified of their supports level by their case manager following the completion and scoring of the SIS® and VSQ. These assessments are completed by DBHDS's independent contractor. The seven levels are defined as follows:

- Level 1: Low support needs
- Level 2: Low to moderate support needs
- Level 3: Moderate support needs plus some behavior challenges
- Level 4: Moderate to high support needs
- Level 5: Maximum support needs
- Level 6: Significant support needs due to medical challenges
- Level 7: Significant support needs due to behavioral challenges

The support packages were developed by DBHDS's contractor, Human Services Research Institute (HSRI), based on historical expenditure and service utilization patterns. The packages were validated through comparing each package against actual service records for individuals who would be assigned to that package. The validation study was conducted by HSRI, DBHDS and CSB case management staff. However, it was deemed advantageous to re-examine the elements of the proposed packages using service use data that includes the new and redesigned services as of 9/1/16, so additional data analysis is currently underway. Once the analysis is completed and the results reviewed with stakeholders, the supports packages will be initially used as a means of beginning a case manager led discussion at the annual planning meeting of the appropriate level of supports within the person's package in order to support and encourage more engagement with the individual's local community. The supports package concept will result in individuals being able to pick and choose certain amounts of services up to a limit imposed according to the individual's assessed level of need in correspondence with the individual's living situation. If or when an individual's usage of services falls outside of the expected supports package range, case managers will be expected to identify and address issues that may be resulting in the individual being either over- or under-served to be addressed in current and future ISPs.

Once fully implemented, individuals will be matched to a supports package based on their assigned supports level and their living situation. The supports packages are comprised of services tied to where a person lives and what he/she does during the day. The residential portion may be made up of one of the following services: supported living, shared living, or some combination of in-home residential supports and personal assistance. The day supports portion may be made up of any combination of the following services: group day support, community engagement, community coaching, group supported employment and workplace assistance. Other waiver services will continue to be authorized outside of the supports package, as they are now.

During FY 2019, DBHDS will provide training and begin to implement the supports packages in conjunction with an individualized planning calendar that portrays the individual's typical week in terms of paid supports, natural supports, and personal strengths. DBHDS service authorization staff will review this information but service authorization will not be tied to the predicted supports package initially. Additional data will be gathered and analyzed to determine the packages' sufficiency to provide the appropriate level of supports.

The Commonwealth anticipates that the analysis and preparation of introductory materials by DBHDS and DMAS staff will be completed by late June, at which time meetings with various stakeholder groups will be scheduled. The Commonwealth will use those meetings to determine the need for modifications to the proposed support packages and related processes. It is anticipated that the supports package functionality in WaMS will be completed for testing by a limited number of case managers in the second quarter of SFY 2019 (October 1, 2018 – December 31, 2018) with some of the individuals they support and provide feedback to DBHDS/DMAS for further refinement. Large-scale training for all users will occur during the third quarter, after feedback from testers has been received and incorporated. Full implementation will occur during the fourth quarter of SFY 2019 (April 1, 2019 – June 30, 2019).

The proposed methodology will be reviewed with stakeholders in late June of 2018. Once finalized, the supports packages, including services in each and cost ranges will be posted on the DBHDS website for purposes of transparency. DMAS will continue to participate in stakeholder meetings where support packages will be routinely presented and discussed.

Ultimately, case managers will employ the supports packages as part of the process to approve services to match needs. DBHDS will work with the CSBs to identify issues which may require modifying procedures or enhancing training of case managers.

It is recognized that while individuals grouped in a certain level have similar support needs, each person is unique. Therefore, some individuals may require supports above and beyond those permitted by their supports budget. Case managers will be able to approve modifications to supports packages as needed but at least every twelve months as related to continued need and discussion of alternatives. Modifications may be made

- for reasons of health and safety,
- to permit additional time to make support adjustments (such as the development of natural/community supports) for those who are current waiver recipients, or
- to provide increased services to ensure successful transition into less restricted settings, which overtime will require a less intense level of support.

In certain circumstances, particularly for individuals who require the highest level of supports for medical or behavioral reasons (i.e., Levels 6 and 7), DBHDS will also review requested exceptions to individuals' expected supports packages. Individuals who are denied requested modifications/exceptions will be offered the right to appeal.

Conversations about current service usage and support packages/alternatives will take place during the annual ISP meeting. The Commonwealth does not intend for the supports packages limits to be "hard caps" for individuals, but guidelines for case managers to use to facilitate critical conversations with individuals, their families and providers about the typical support needs and related services for individuals of similar support needs levels. They will also be useful in determining where less expensive/intrusive services may be appropriate (e.g., Electronic Home-based Supports or PERS substituting for staff presence) and where there is a need to focus on building natural supports in lieu of paid supports.

Those individuals who are currently far above or below the supports package level for their support needs will not be forced to "come into line" immediately; however, this will enable conversations about why those individuals either may need the level of support that they are currently receiving or begin a conversation about exploring alternate services (e.g., Benefits Planning in order to allay fears about receiving supported employment and working vs. a large number of group day hours per week).

Note: The SIS is already in use in Virginia; however support packages are not. Currently services are authorized against regulatory and policy limits and as demonstrated by documentation of individual need submitted with the authorization request.

- ☐ **Other Type of Limit.** The state employs another type of limit.
Describe the limit and furnish the information specified above.

Appendix C: Participant Services

C-5: Home and Community-Based Settings

Explain how residential and non-residential settings in this waiver comply with federal HCB Settings requirements at 42 CFR 441.301(c)(4)-(5) and associated CMS guidance. Include:

1. Description of the settings and how they meet federal HCB Settings requirements, at the time of submission and in the future.

2. Description of the means by which the state Medicaid agency ascertains that all waiver settings meet federal HCB Setting requirements, at the time of this submission and ongoing.

Note instructions at Module 1, Attachment #2, HCB Settings Waiver Transition Plan for description of settings that do not meet requirements at the time of submission. Do not duplicate that information here.

The statewide transition plan is currently under review by CMS.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (1 of 8)

State Participant-Centered Service Plan Title:

Individual Support Plan (ISP)

- a. Responsibility for Service Plan Development.** Per 42 CFR §441.301(b)(2), specify who is responsible for the development of the service plan and the qualifications of these individuals (*select each that applies*):

- ☐ **Registered nurse, licensed to practice in the state**
- ☐ **Licensed practical or vocational nurse, acting within the scope of practice under state law**
- ☐ **Licensed physician (M.D. or D.O)**
- ☐ **Case Manager** (qualifications specified in Appendix C-1/C-3)
- ☒ **Case Manager** (qualifications not specified in Appendix C-1/C-3).
Specify qualifications:

ID and DD Targeted Case Management must be provided by a CSB or through a contractual arrangement between a CSB and a private provider. The CSB must be licensed by DBHDS as a provider of case management services and operate a 24-hour emergency services system.

A Participation Agreement to provide Targeted Case Management must be obtained from DMAS by the CSB. The CSB may directly operate Targeted Case Management Services or may contract with private agencies. If services are contracted, the CSB remains the responsible provider, and only the CSB may bill DMAS for Medicaid reimbursement.

An employee of a CSB or private provider, who provides ID or DD Targeted Case Management services, must possess a combination of work experience with persons with intellectual and/or other developmental disabilities and relevant education that indicates that he or she has the knowledge, skills, and abilities (KSAs) as established by DBHDS. These include:

- Knowledge of

1. Services and systems available in the community including primary health care, support services, eligibility criteria and intake processes and generic community resources;
2. The nature of developmental disabilities, mental illness, substance abuse (substance use disorders), or co-occurring disorders depending on the individuals served, including clinical and developmental issues;
3. Different types of assessments, including functional assessment, and their uses in service planning;
4. Treatment modalities and intervention techniques, such as behavior management, independent living skills building, supportive counseling, family education, crisis intervention, discharge planning, and service coordination;
5. Types of developmental disabilities, mental health, and substance abuse programs available in the locality;
6. The person-centered service planning process and major components of a person-centered support plan;
7. The use of medications in the care or treatment of the population served; and
8. All applicable federal and state laws and regulations and local ordinances.

- Skills in

1. Identifying and documenting an individual's need for resources, services, and other supports;
2. Using information from assessments, evaluations, observation, and interviews to develop person-centered service plans;
3. Identifying and documenting how resources, services, and natural supports such as family can be utilized to promote achievement of an individual's personal life goals; and
4. Coordinating the provision of services by diverse public and private providers.

- Abilities to

1. Work as team members, maintaining effective inter- and intra-agency working relationships;
2. Work independently performing position duties under general supervision; and
3. Engage in and sustain ongoing relationships with individuals using services.

A person providing Targeted Case Management Services is not required to be a member of an organizational unit that provides only case management services. The case manager who is not a member of an organized case management unit must possess a job description that describes case management activities as job duties, provide services as defined for Targeted Case Management services, and comply with service expectations and documentation requirements as required for organized case management units.

☐ **Social Worker**

Specify qualifications:

☐ **Other**

Specify the individuals and their qualifications:

--

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (2 of 8)

b. Service Plan Development Safeguards. *Select one:*

- ☐ Entities and/or individuals that have responsibility for service plan development may not provide other direct waiver services to the participant.
- ☒ Entities and/or individuals that have responsibility for service plan development may provide other direct waiver services to the participant.

The state has established the following safeguards to ensure that service plan development is conducted in the best interests of the participant. *Specify:*

CSBs, through the case management function, have a significant role in the development of the service plan. Some CSBs are also providers of certain waiver services (CSB waiver provider participation varies across the state). To mitigate influence, the following safeguards are in place:

- CSBs may be providers of waiver services, provided there is a separation of direct service provision units and case management units.
- If an individual selects a case manager employed by a private provider contracting with the local CSB, that entity may not provide any waiver services to the individual other than Services Facilitation.
- It is never permitted for a case manager (employed by a CSB or private provider) to be a direct support provider or supervise direct support providers of waiver services for individuals for whom he/she provides case management.

Each case manager must inform the individual and family member/caregiver, as appropriate, of the variety of services available through the waiver and offer choice among all providers serving the area in which the individual desires services. These two elements are documented on the "Documentation of Individual Choice between Institutional Care or Home and Community-Based Services" (Individual Choice) and the "Virginia Informed Choice" forms respectively, which are signed by the individual and family member/caregiver, as appropriate.

A completed Individual Choice form must be confirmed by DBHDS staff in the waiver management system in order to enroll an individual into the waiver. The presence of the Virginia Informed Choice form in the record is confirmed by CSB staff performing waiver record reviews. Data regarding these reviews is collected quarterly by DBHDS. Finally, DMAS Quality Management Review staff look for these two forms in each case management record reviewed and inquire about choice when conducting personal interviews with individuals/family members.

In addition to the above requirements supported by waiver regulations, the Performance Contract (mentioned in Appendix A) between DBHDS and each CSB states that the CSB agrees not to restrict or seek to influence the individual's choice among qualified service providers, although case managers may make recommendations, based on their professional judgment, to individuals regarding those available service options that best meet the needs and expressed desires documented in the individuals' ISP.

Case management services are available and provided through the Community Services Boards who are the only qualified providers as designated in the state plan. Only CSBs are charged with the responsibility of developing the services plan but in collaboration with the individual and his providers.

- a. During the planning meetings, services are identified that best support the individual. When individuals are offered services, full disclosure of all available and willing providers of those designated services is offered and the individual's choice documented.
- b. The state plan designated only qualified providers as those licensed for care management, which are the CSBs. CSBs offer choice of case management services by offering choice within agency when available, among other localities with whom they have agreements, and private providers when available.
- c. Oversight and review of the assurance that choice of providers and services is conducted through the quality management review and program integrity process at the state Medicaid agency.
- d. The state recognizes that CSBs are the only qualified providers of case management services and if they provide services within the locality, those services are maintained under separate divisions and administered by the CSBs. No case manager is allowed to develop the plan and also provide waiver services to the individual.
- e. While some localities also provide waiver services within that locality, the case management and service provision units are administratively separate. Additionally, no case manager of an entity is allowed to provide services to that same individual whether with the locality or another provider to ensure a separation in roles.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (3 of 8)

- c. **Supporting the Participant in Service Plan Development.** Specify: (a) the supports and information that are made available to the participant (and/or family or legal representative, as appropriate) to direct and be actively engaged in the service plan development process and (b) the participant's authority to determine who is included in the process.

Prior to service plan development, the individual identifies the people in his/her life that he/she would like to have support him/her with planning. Case managers and other team members are strongly encouraged to explore and develop "planning partners" (someone to help the individual set service plan meeting times and locations, as well as help the individual understand and direct his/her own service planning) and circles of support for individuals. This might include, for some individuals, the establishment of a microboard. The individual may wish to choose a planning partner who is a family member, a friend or a provider representative. A planning partner may be chosen from among all available team members. If the individual is not interested in a planning partner or is unable to find one, these activities remain the responsibility of the case manager.

The individual's preferences for the annual meeting are recorded in the personal profile including the support needed to direct and fully participate, the identified planning partner, meeting logistics, whom to invite, as well as any cultural and other considerations. The personal profile (a component of the Individual Support Plan) assists the individual and the people who support him/her to consider what is working and what is not working in all areas of living to better understand what is important to and important for the person. Other partners/providers participating in the planning share what they have learned about supporting the individual. Planning meetings focus on the individual's talents and gifts, desired outcomes and the role of each team member in undertaking the steps to achieve these outcomes.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (4 of 8)

- d. Service Plan Development Process.** In four pages or less, describe the process that is used to develop the participant-centered service plan, including: (a) who develops the plan, who participates in the process, and the timing of the plan; (b) the types of assessments that are conducted to support the service plan development process, including securing information about participant needs, preferences and goals, and health status; (c) how the participant is informed of the services that are available under the waiver; (d) how the plan development process ensures that the service plan addresses participant goals, needs (including health care needs), and preferences; (e) how waiver and other services are coordinated; (f) how the plan development process provides for the assignment of responsibilities to implement and monitor the plan; and, (g) how and when the plan is updated, including when the participant's needs change. State laws, regulations, and policies cited that affect the service plan development process are available to CMS upon request through the Medicaid agency or the operating agency (if applicable):

(a) The plan is developed by the individual and his/her chosen team members. At a minimum the case manager and the individual (legal guardian, as applicable) participate in service plan development, but typically all service providers are a part of the person-centered planning process. Other typically involved parties are members of the individual's family and other people who are significant to the individual. There shall be no more than 365 days between Individual Support Plan effective dates. The planning process may begin as early as eight weeks prior to the planned start date of the plan. The person-centered planning meeting should be scheduled at a time and location convenient to the individual. Information regarding Virginia's Person-Centered ISP and process can be found in the DBHDS Waiver Management System, by contacting the Division of Developmental Services, or by visiting <http://www.dbhds.virginia.gov/developmental-services/provider-development>.

(b) The CSB responsible for assessing an individual's needs gathers the "Essential Information" in concert with the individual and those who know him or her best. This includes elements such as contact information, health information, historical information regarding the individual's development, family, education, employment. Some other information gathered through this process is legal status and identified health and behavioral support needs as determined through the risk assessment. The Essential Information also includes the description of a plan for self-sufficiency and a review of most integrated settings with the actions that will be taken when something more integrated is desired.

The risk assessment is a component of the annual person-centered plan. The risk assessment, as a component of the essential information, must be completed every year. To assess other support needs, each individual 22 years of age and older has the Supports Intensity Scale® (SIS®) completed every four years or when the individual's needs change significantly. Youth 16 years of age through 21 years of age have the Supports Intensity Scale® (SIS-A®) completed on at least a triennial basis or when the individual's needs change significantly. Those individuals 5 to 15 years old have the Children's SIS® or other approved alternative, developmentally appropriate assessment completed to assess their support needs on a biennial basis. Children under 5 years of age have their needs assessed biennially using an approved alternative, developmentally appropriate instrument.

Finally, the individual, with the support of anyone he or she chooses, completes the "personal profile." The personal profile considers eight life areas and compares the life the person has today with the life he wants. It is a snapshot of the individual's desires and is completed in preparation for annual planning. There are five parts to the personal profile: My Meeting, My Talents and Contributions, The Life I Want, My Life Today, and Getting the Life I Want (which identifies what's important to and what's important for the person in many different aspects of life).

The section "My Meeting" details individual preferences and needed supports for annual planning. "My Talents and Contributions" highlight great things about the person identifying abilities that can be developed and ways to connect the person with others. "My Life Today" briefly describes what the individual's life is like currently, which is contrasted with "The Life I Want" providing an opportunity for the individual to describe what a good life means to him/her. This description should capture the individual's vision of a desirable future and is completed following the identification of talents and contributions and the life area review.

The final section, "Getting the Life I Want," considers "what's working" and "what's not working" to arrive at what is important to and important for the person in regards to: home, community and interests, relationships, work and alternates to work, learning, money, transportation and travel and health and safety.

(c) The individual is informed of available waiver services by the case manager prior to enrollment. This is documented on the "Documentation of Individual Choice between Institutional Care or Home and Community-Based Services" form. Once the individual is enrolled in the waiver, the waiver services are once again presented, discussed, and choice of providers offered.

(d) The individual (or someone of his/her choosing) reviews the personal profile at the meeting. Partners share additional information which is added to the final version of the profile and agreed to by the individual. During the "shared planning" phase, the desired outcomes of the individual (including changes to the existing plan) for the next year are identified by determining what needs to remain the same, what needs to change and the balance between what is important to the individual and what is important for the individual's health, safety, and value in the community. The health portion of the "Essential Information" section of the person-centered plan, which is discussed during the shared planning phase, thoroughly queries the individual's past and present conditions/needs for support. To ensure that health and safety is addressed, each identified health and behavioral support need must be addressed under outcomes developed during the shared planning process. Descriptions of the steps needed to resolve each outcome, data collection methods

and target dates are included. The results of the SIS® (or other approved assessment for children), routine supports, and health and safety supports needed are discussed and providers are selected to assist with supporting the individual to accomplish the desired outcomes. An evaluation of how the plan achieves the desired outcomes, from the individual's and responsible partners' perspectives, is completed prior to final agreements.

(e) Waiver and nonwaiver services are coordinated by the case manager, who has responsibility for linking the individual to needed services and monitoring their receipt, regardless of funding source. As with all participating providers, the case manager outlines his/her supports to the individual in a "Plan for Supports" (a component of the overall ISP).

(f) All supports agreed to during the meeting are further defined by each provider following the meeting in their Plan for Supports. Support instructions, for each activity aimed at achieving desired outcomes and keeping the individual healthy and safe are developed specific to the individual's preferences. Descriptions of what is needed to consider each activity accomplished and the frequency of delivery are included. These Plans for Supports outline what the provider will do to support each outcome, how often/by when and how long, and include a schedule of services.

Providers of residential support, personal assistance, day support, and supported employment services have the option of initially developing a "60-day assessment plan," an interim plan for the first 60 days that the individual is with a new provider or service. This is designed to permit the provider to gather some situational information about the individual, as well as to give the individual the opportunity to experience the provider/service. Towards the end of the 60-day period, a decision is made by both provider and individual to maintain or terminate the relationship. If the individual will be remaining with the provider, an "annual plan" addressing identified needs and preferences is developed and implemented.

The implementation of the Plans for Support are monitored by the case manager who receives quarterly reviews from each provider regarding the status of each outcome, changes to the support needs and preferences as more is learned about the individual, and changes needed to the plan as desired by the individual. The case manager also meets with the individual (and family/caregiver, as appropriate) at least every 90 days to discuss the status of supports received and resulting satisfaction/dissatisfaction.

(g) Whenever an individual requests a change, in services and/or providers, the individual and each provider work together to update the Plan for Supports, which is then sent to the case manager for approval. In addition, the Plan for Supports is reviewed at least quarterly by all providers, [per 12 VAC 35-105-660 (licensing regulations)], who must forward the results of their reviews to the case manager. The individual's or legal guardian's signature must be obtained for all changes to the plan.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (5 of 8)

- e. Risk Assessment and Mitigation.** Specify how potential risks to the participant are assessed during the service plan development process and how strategies to mitigate risk are incorporated into the service plan, subject to participant needs and preferences. In addition, describe how the service plan development process addresses backup plans and the arrangements that are used for backup.

Currently, each provider licensed by DBHDS is required to identify a staff person responsible for risk management, document and implement a plan to identify, monitor, reduce, and minimize risks associated with personal injury, property damage or loss, and other source of potential liability. As part of the plan, the provider shall conduct and document at least annually its own safety inspections of all locations and document/implement needed safety improvements. The provider must implement written policies to identify individuals at risk for falls and develop and implement a fall prevention/management plan for each at risk individual. include policies to identify individuals at risk for falls and develop a prevention/management program. Providers must document serious injuries to employees and individuals and evaluate injuries at least annually, documenting and implementing recommendations for improvement. Providers must also develop, document and implement infection control measures, including the use of universal precautions to minimize the risk of infection/contagion. Finally, licensed providers are required to develop a written emergency preparedness and response plan for all services and locations [12 VAC 35-105-520]. DBHDS Office of Licensing staff make annual unannounced onsite reviews to ensure provider compliance with these regulations, as well evaluate the physical facilities in which the services are provided [12 VAC 35-105-70].

Annually, the case manager completes a risk assessment to determine individuals' potential risks, particularly health and behavioral. This information is used to inform the team's discussion at the individual's person-centered planning meeting, and supports required to minimize health, physical, and social risks to the individual are included in the Individual Support Plan. The Managed Care Organization Care Coordinator also completes a comprehensive Health Risk Assessment for individuals served. Issues identified are included in the MCO's Individual Care Plan. The person-centered service plan has a section titled "shared planning" specifically to document health and safety related outcomes as identified in the risk assessment. Areas of potential risk to the individual that are identified on the annual risk assessment must be addressed under outcomes developed during the shared planning process. Activities related to this information are discussed at the annual planning meeting and detailed in each provider's Plan for Supports as necessary.

Individuals' person-centered service plans must include "Essential Information" in the form of emergency contact information, health information such as the presence of an advance directive, medication information (including location of side information), the presence of allergies, communicable diseases, mental health service needs, physical limitations and restrictions, chronic conditions, etc.

The individual is supported in selecting a variety of back-up measures including, but not limited to, natural/informal supports in the community or other agency-directed resources. Those providing back-up may be a family member, neighbor or friend willing and available to assist the individual in his or her home, if the scheduled service provider is unavailable. The case manager serves as a resource in assisting the individual and family in initial planning for needed supports in anticipation of program closures (e.g., for inclement weather). This activity is documented on the Individual Support Plan in the "Back-Up Plan" section of the essential information. For consumer-directed services, the importance of a back-up plan, types of back-up and the ways to develop a plan are also described in the Employee Management Manual, given to individuals upon becoming employers and reviewed by the services facilitator. Individuals who do not have back-up supports for Shared Living, Personal Assistance, Companion, or In-Home Support services in particular risk the denial of those services.

Community resources are identified and utilized to assist in the unlikely event that the individual has no family or friends to provide back-up supports. Options are individually identified based on individual needs and preferences. All available resources are considered during the planning process.

Individuals unable to identify adequate safeguards for back-up supports are not approved for waiver services. At this point, recommendations are made to the individual and family for identifying strategies to resolve the unmet back-up needs for future approval of waiver services. Referrals to other providers/services are also considered.

Plans for Supports (provider-specific service plans) are modified as individual needs change in order to ensure safety and continuing back-up for all services. As each individual's needs are unique, each Plan for Supports is reflective of specific supports required by that individual.

DMAS QMR verifies during their onsite reviews that individuals' service plans address all assessed needs, including risk factors and include necessary back-up plans.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (6 of 8)

- f. Informed Choice of Providers.** Describe how participants are assisted in obtaining information about and selecting from among qualified providers of the waiver services in the service plan.

The state ensures that each individual found eligible for the waiver will be given a choice of all qualified providers of each service included in his or her written service plan.

Individuals receive a list of service providers from the case manager at the time of enrollment into the waiver. In addition to providers listed on the DBHDS Licensing website, individuals have ongoing access to information about available providers through the case manager, should they be unsatisfied or for any other reason desire a change. Case managers are required to inquire about and document individuals' satisfaction with services on a quarterly basis.

The case manager provides support to the individual in the selection of service providers by encouraging the individual or family member/caregiver to directly contact the provider(s) to ask questions and gain information about the providers' service delivery philosophies and approaches. In some situations the case manager facilitates site visits. The case manager can assist the individual in identifying a provider to best meet his/her needs by discussing location, service delivery approach and other criteria important to the individual or family/caregiver.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (7 of 8)

- g. Process for Making Service Plan Subject to the Approval of the Medicaid Agency.** Describe the process by which the service plan is made subject to the approval of the Medicaid agency in accordance with 42 CFR §441.301(b)(1)(i):

As described in D-1d, the case manager submits service plan information to the operating agency, DBHDS, for service authorization. DBHDS employs Qualified Developmental Disability Professionals (QDDPs) to complete the approval/service authorization process. DMAS reviews a sample of DBHDS's service authorizations as part of its monitoring process.

In addition, all service plans are subject to review by the Medicaid agency via the Quality Management Review (QMR) to ensure that services are approved and appropriate for the individual. An approved sampling process is employed to determine the number of records reviewed for each provider. The purpose of the QMR is to determine whether services delivered were appropriate, continue to be needed by the individual, and the amount and kind of services delivered were required. DMAS analysts conduct QMR of all documentation, which shows the individual's level of care. Visits are conducted on-site and are unannounced. Quality Management Reviews are conducted continuously throughout the year.

The QMR visit is accomplished through a review of the individual's record, evaluation of the individual's health and functional status, and consultation with the individual and family/caregiver, as appropriate. Specific attention is paid to all applicable documentation, which may include assessments, service plans, consumer-directed services facilitator notes, daily logs, individual service authorization requests (through the waiver management system), schedules, attendance sheets, progress notes, and any other documentation necessary to determine if appropriate payment was made for services delivered. QMR reviews are conducted continuously.

A financial review is included as a part of a utilization review. The purpose of the financial review and verification of services is to ensure that the provider bills only for those services which have been provided in accordance with DMAS policy, are approved in the ISP, and are covered by the waiver.

Appendix D: Participant-Centered Planning and Service Delivery

D-1: Service Plan Development (8 of 8)

- h. Service Plan Review and Update.** The service plan is subject to at least annual periodic review and update to assess the appropriateness and adequacy of the services as participant needs change. Specify the minimum schedule for the review and update of the service plan:

- ☒ Every three months or more frequently when necessary
- ☐ Every six months or more frequently when necessary
- ☐ Every twelve months or more frequently when necessary
- ☐ Other schedule

Specify the other schedule:

i. Maintenance of Service Plan Forms. Written copies or electronic facsimiles of service plans are maintained for a minimum period of 3 years as required by 45 CFR §92.42. Service plans are maintained by the following (*check each that applies*):

- ☐ Medicaid agency
- ☐ Operating agency
- ☒ Case manager
- ☐ Other

Specify:

Appendix D: Participant-Centered Planning and Service Delivery

D-2: Service Plan Implementation and Monitoring

a. Service Plan Implementation and Monitoring. Specify: (a) the entity (entities) responsible for monitoring the implementation of the service plan and participant health and welfare; (b) the monitoring and follow-up method(s) that are used; and, (c) the frequency with which monitoring is performed.

The case manager is responsible for monitoring the implementation of the ISP. The case manager must continuously monitor the appropriateness of the plan and make revisions as needed. At a minimum, the case manager must review each provider's quarterly review every three months to determine if the individual's outcomes and support activities are being met, determine if any modifications are necessary, confirm the status of the individual's health and welfare, and assess the individual's satisfaction with services.

The case manager is required to have a face-to-face contact with the individual at least every 90 days. The purpose of the face-to-face contact is to observe the individual, to verify services are being provided as described in the service plan, assess the individual's satisfaction with his choice of services/providers, ensure his/her health, safety and welfare, including the effectiveness of his back-up plans and identify any unmet needs or changes needed to the service plan. Back-up plan effectiveness is assessed by ensuring that the designated back-up person(s) were available and provided needed supports when the service provider was unavailable. If it is determined that this is not the case, an alternate back-up plan must be put into place or this individual must choose a service which offers continuous staff availability for continued enrollment in the waiver.

One of the case manager's duties is to link the individual to supports and services he needs, whether those services are waiver-funded or not. Examples of common nonwaiver-funded services are health services, therapies, camps and other vacation opportunities, and post-secondary education opportunities. Once the case manager has linked an individual to these supports, they should be included in the case management plan and monitored with a frequency appropriate to their provision.

If there is evidence of serious problems revealed upon case management review including 1) the individual, family, or primary caregiver is dissatisfied with services, 2) services are not delivered as described in the service plan, 3) failure of the provider/individual/family/AR to allow required monitoring visits, or 4) the individual's health and safety are at risk, the case manager must take necessary actions and document in the individual's appropriate record(s). Actions may include: requesting a written response from the provider; reporting the information to the appropriate licensing, certifying, or approving agency; reporting the information to DBHDS or DMAS; requiring that the provider participate in mandatory technical assistance and/or training in the violation area; informing the individual of other providers of the service in question; and as a last resort, after all other options to mitigate identified issues have been exhausted, informing the individual that eligibility may be in jeopardy should he or she choose to continue receiving services from a provider who cannot ensure health and safety or other requirements. Any time abuse or neglect is suspected, the case manager is required to inform Adult Protective Services or Child Protective Services, as appropriate (and DBHDS Office of Human Rights if it involves a DBHDS-licensed provider).

Information about monitoring results is conveyed to DBHDS quarterly via an on-line submission of case management supervisory review data. Data submitted (for a sample of each CSB's individuals receiving waiver services) include items for assessment of (1) whether all needs in the following areas were addressed by planned outcomes in the Individual Support Plan: work and alternatives to work, learning and other pursuits, community & interests, relationships, home, transportation & travel, money, health & safety; (2) whether the Individual Support Plan was updated/revised when the individual's needs changed, and (3) whether waiver services were delivered as delineated in the Individual Support Plan. If there are negative responses to any of these items, the reason and action taken to remediate the situation must be detailed in the information submitted to DBHDS.

b. Monitoring Safeguards. *Select one:*

- ☐ Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may not provide other direct waiver services to the participant.
- ☒ Entities and/or individuals that have responsibility to monitor service plan implementation and participant health and welfare may provide other direct waiver services to the participant.

The state has established the following safeguards to ensure that monitoring is conducted in the best interests of the participant. *Specify:*

Private case management providers contracting with the local CSB may not provide any other waiver services to the individual other than Services Facilitation. CSBs may be providers of waiver services provided there is a separation of direct service provision units and case management units. It is never permitted for a case manager (employed by a CSB or private provider) to be a direct support provider or supervise direct support providers of waiver services for individuals for whom he/she provides case management.

Individuals who are dissatisfied with their case manager may choose another from the same agency, or (1) for ID case management, select another CSB that has a memorandum of agreement with the home CSB, (2) for DD case management, select either another CSB that has a memorandum of agreement with the home CSB or a private case management provider with which the CSB has a contract.

Case managers' monitoring of service provision and ensuring that the choices of the individual are implemented are reviewed by DBHDS and DMAS QMR staff.

Appendix D: Participant-Centered Planning and Service Delivery

Quality Improvement: Service Plan

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Service Plan Assurance/Sub-assurances

The state demonstrates it has designed and implemented an effective system for reviewing the adequacy of service plans for waiver participants.

i. Sub-Assurances:

- a. Sub-assurance: Service plans address all participants assessed needs (including health and safety risk factors) and personal goals, either by the provision of waiver services or through other means.**

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

4. Number and percent of service plans that include a back-up plan when required for services to include in home supports, personal assistance, respite, companion, and shared living. N= Number of service plans that include a back-up plan when required. D= Total number of service plans reviewed that require a back-up plan.

b. Sub-assurance: The State monitors service plan development in accordance with its policies and procedures.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

- c. *Sub-assurance: Service plans are updated/revised at least annually or when warranted by changes in the waiver participants needs.*

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

1. Number and percent of service plans reviewed and revised by the case manager by the individual's annual review date. N: Number of service plans reviewed and revised by the case manager by the individual's annual review date D: Total number of service plans reviewed

Data Source (Select one):

Record reviews, on-site

e. Sub-assurance: Participants are afforded choice: Between/among waiver services and providers.

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

1. Number and percent of individuals whose case management records contain an appropriately completed and signed form that specifies choice was offered among waiver services. N: Number of case management records that contain documentation of choice among waiver services D: Total number of records reviewed

Data Source (Select one):

Record reviews, on-site

Responsible Party for data aggregation and analysis (check each that applies):	Frequency of data aggregation and analysis (check each that applies):

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

As DMAS Quality Management Review (QMR) staff identifies problems with any of the above measures for a given provider, they require a Corrective Action Plan to be developed and implemented by that provider. Failure to do so jeopardizes the provider's Medicaid provider agreement. Serious violations may be referred to DMAS's Provider Integrity unit for payment retraction.

Individual providers with systemic problems will be targeted for technical assistance/training from DBHDS.

ii. Remediation Data Aggregation

Remediation-related Data Aggregation and Analysis (including trend identification)

Responsible Party (check each that applies):	Frequency of data aggregation and analysis (check each that applies):
<input checked="" type="checkbox"/> State Medicaid Agency	<input type="checkbox"/> Weekly
<input checked="" type="checkbox"/> Operating Agency	<input type="checkbox"/> Monthly

	<input type="checkbox"/> Continuously and Ongoing
	<input type="checkbox"/> Other Specify: <div style="border: 1px solid black; height: 30px; margin-top: 5px;"></div>

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Service Plans that are currently non-operational.

☒ **No**

☐ **Yes**

Please provide a detailed strategy for assuring Service Plans, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix E: Participant Direction of Services

Applicability (from Application Section 3, Components of the Waiver Request):

- ☒ **Yes. This waiver provides participant direction opportunities.** Complete the remainder of the Appendix.
- ☐ **No. This waiver does not provide participant direction opportunities.** Do not complete the remainder of the Appendix.

CMS urges states to afford all waiver participants the opportunity to direct their services. Participant direction of services includes the participant exercising decision-making authority over workers who provide services, a participant-managed budget or both. CMS will confer the Independence Plus designation when the waiver evidences a strong commitment to participant direction.

Indicate whether Independence Plus designation is requested (select one):

- ☐ **Yes. The state requests that this waiver be considered for Independence Plus designation.**
- ☒ **No. Independence Plus designation is not requested.**

Appendix E: Participant Direction of Services

E-1: Overview (1 of 13)

- a. Description of Participant Direction.** In no more than two pages, provide an overview of the opportunities for participant direction in the waiver, including: (a) the nature of the opportunities afforded to participants; (b) how participants may take advantage of these opportunities; (c) the entities that support individuals who direct their services and the supports that they provide; and, (d) other relevant information about the waiver's approach to participant direction.

Individuals are afforded the opportunity to act as the employer in the consumer-direction of personal assistance, respite, and companion services. This takes place in conjunction with their initial decision to receive waiver vs. institutional services and is documented on the same form (the "Documentation of Individual Choice Between Institutional Care or Home and Community-based Services" form). There may be other junctures at which this choice is also offered, e.g., once the individual is assigned a waiver slot or when the individual or family/caregiver expresses dissatisfaction with agency-directed services. The case manager, explaining the consumer-directed option should inform the individual and family/caregiver that this involves the hiring, training, supervision, and termination, if necessary, of consumer-directed assistants.

Individuals selecting services through the consumer-directed model may choose a Medicaid-enrolled services facilitator (SF) to provide the training and guidance needed to be an employer. As the employer, the individual is eligible for and receives waiver services and is responsible for hiring, training, supervising, and firing assistants. If the individual is unable to independently manage his/her own consumer-directed services, or if the individual is under 18 years of age, a family member/caregiver must serve as the employer of record (EOR) on behalf of the individual. A services facilitator or person serving as an EOR cannot also be a paid caregiver. The SF cannot also be the consumer-directed services employee.

The SF completes an assessment for consumer-directed services, a Plan for Supports, and maintains documentation of services provided as outlined, including documentation of face-to-face visits with the individual at least every six months to ensure appropriateness of consumer-directed services.

Specific duties of the individual (or individual's employer of record) as the employer of the CD employee include: checking references, determining that the employee meets basic qualifications, training, supervising performance, and submitting time sheets (or, in the case of non-medical transportation services, mileage documentation) to the Fiscal Management Services (FMS) agent on a consistent and timely basis.

When the case manager is also acting in the role as services facilitator for a single individual, the face to face contact that she has as a case manager must be separate and distinct from the face to face visit she has in the role of services facilitator. There must be separate documentation for the two services as they are reimbursed separately.

All consumer-directed services require the services of a FMS agent. This is not a waiver service. As specified in the DMAS contract, the FMS agent conducts all payroll functions on behalf of the individual, including the requesting and processing of criminal background investigations, payment of assistants, and filing of IRS wage withholdings.

Appendix E: Participant Direction of Services

E-1: Overview (2 of 13)

b. Participant Direction Opportunities. Specify the participant direction opportunities that are available in the waiver.
Select one:

- ☒ **Participant: Employer Authority.** As specified in *Appendix E-2, Item a*, the participant (or the participant's representative) has decision-making authority over workers who provide waiver services. The participant may function as the common law employer or the co-employer of workers. Supports and protections are available for participants who exercise this authority.
- ☐ **Participant: Budget Authority.** As specified in *Appendix E-2, Item b*, the participant (or the participant's representative) has decision-making authority over a budget for waiver services. Supports and protections are available for participants who have authority over a budget.
- ☐ **Both Authorities.** The waiver provides for both participant direction opportunities as specified in *Appendix E-2*. Supports and protections are available for participants who exercise these authorities.

c. Availability of Participant Direction by Type of Living Arrangement. *Check each that applies:*

- ☒ **Participant direction opportunities are available to participants who live in their own private residence or the home of a family member.**
- ☒ **Participant direction opportunities are available to individuals who reside in other living arrangements where services (regardless of funding source) are furnished to fewer than four persons unrelated to the proprietor.**

☒ **The participant direction opportunities are available to persons in the following other living arrangements**

Specify these living arrangements:

Consumer-direction opportunities are available to individuals who reside in group homes of four or more persons unrelated to the proprietor.

Appendix E: Participant Direction of Services

E-1: Overview (3 of 13)

d. Election of Participant Direction. Election of participant direction is subject to the following policy (*select one*):

- ☐ **Waiver is designed to support only individuals who want to direct their services.**
- ☐ **The waiver is designed to afford every participant (or the participant's representative) the opportunity to elect to direct waiver services. Alternate service delivery methods are available for participants who decide not to direct their services.**
- ☒ **The waiver is designed to offer participants (or their representatives) the opportunity to direct some or all of their services, subject to the following criteria specified by the state. Alternate service delivery methods are available for participants who decide not to direct their services or do not meet the criteria.**

Specify the criteria

Individuals assessed as having an intellectual disability that may limit or prevent the ability to consumer-direct services may designate a representative to act as the Employer of Record for consumer-directed supports on his or her behalf, or obtain agency-directed services.

An individual shall not receive consumer-directed services if at least one of the following conditions exists:

- (a) The individual is younger than 18 years of age or is unable to be the employer of record and no one else can assume this role;
- (b) The health, safety, or welfare of the individual enrolled in the waiver cannot be assured or a back-up emergency plan cannot be developed; or
- (c) The individual has medication or skilled nursing needs or medical/behavioral conditions that cannot be safely met via the consumer-directed model of service delivery.

In the above situation, the individual will be assisted by the case manager to select an agency from which to receive his personal assistance, respite, or companion services.

Appendix E: Participant Direction of Services

E-1: Overview (4 of 13)

e. Information Furnished to Participant. Specify: (a) the information about participant direction opportunities (e.g., the benefits of participant direction, participant responsibilities, and potential liabilities) that is provided to the participant (or the participant's representative) to inform decision-making concerning the election of participant direction; (b) the entity or entities responsible for furnishing this information; and, (c) how and when this information is provided on a timely basis.

The case manager provides an informational overview of consumer-directed services to individuals and family members/caregivers, as appropriate, at the time the Individual Choice form is signed (prior to enrollment) and in more detail at the initial person-centered Individual Support Plan development meeting. Individuals electing to consumer-direct one or more services then select a services facilitator (SF). The SF is responsible for initiating services with the individual upon being notified by the case manager of being chosen. The SF meets with the individual to determine his/her preferences and needs that will inform the development of the consumer-directed portion of the service plan.

The SF provides the individual with a copy of the Employee Management Manual which details the responsibilities and liabilities of consumer-directing services, allowing the individual time to evaluate the pros and cons of consumer-direction and to make a final decision. The SF, using the DMAS Employee Management Manual, must provide training to the individual on the responsibilities of and procedures associated with consumer-direction within seven days of being authorized for consumer-directed services.

Appendix E: Participant Direction of Services

E-1: Overview (5 of 13)

f. Participant Direction by a Representative. Specify the state's policy concerning the direction of waiver services by a representative (*select one*):

- ☐ The state does not provide for the direction of waiver services by a representative.
- ☒ The state provides for the direction of waiver services by representatives.

Specify the representatives who may direct waiver services: (*check each that applies*):

- ☒ Waiver services may be directed by a legal representative of the participant.
- ☒ Waiver services may be directed by a non-legal representative freely chosen by an adult participant.

Specify the policies that apply regarding the direction of waiver services by participant-appointed representatives, including safeguards to ensure that the representative functions in the best interest of the participant:

Individuals who choose the consumer-directed model must have the capability to function as the employer and hire and train their own assistants and supervise their performance. If an individual is unable to direct his/her own supports or is under 18 years of age, a family member/caregiver may serve as the Employer of Record on behalf of the individual. For individuals appointing another person to direct supports on their behalf, the case manager ensures and documents that both parties have considered the responsibilities of this role and assesses that the selected person can perform these functions and will act in the best interest of the individual.

It is the responsibility of the SF to provide ongoing support to the individual and employer of record (if applicable) in the consumer-directed model of support. As a safeguard, the SF cannot be the individual, the individual's case manager, direct service provider, spouse or parent of the individual who is a minor child, or a family/caregiver employing the assistant. The SF monitors the service plan quarterly and on an as-needed basis and conducts a face-to-face meeting with the individual at least every six months to reassess the individual's needs and to ensure appropriateness of consumer-directed services received by the individual. During visits with the individual, the SF must observe, evaluate and consult with the individual and his/her family member/caregiver, as appropriate, and document the adequacy and appropriateness of consumer-directed services for the individual's current functioning and cognitive status, medical needs and social needs. In addition, the SF shall review timesheets during the face-to-face visits or more often as needed, to ensure that the number of service plan approved hours is not exceeded. If discrepancies are identified, the SF must discuss these with the individual or employer of record to resolve discrepancies and must notify the case manager and fiscal management services agent of the final decision.

Appendix E: Participant Direction of Services

E-1: Overview (6 of 13)

g. Participant-Directed Services. Specify the participant direction opportunity (or opportunities) available for each waiver service that is specified as participant-directed in Appendix C-1/C-3.

Waiver Service	Employer Authority	Budget Authority
Companion Services	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Respite	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Personal Assistance Services	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Appendix E: Participant Direction of Services

E-1: Overview (7 of 13)

h. Financial Management Services. Except in certain circumstances, financial management services are mandatory and integral to participant direction. A governmental entity and/or another third-party entity must perform necessary financial transactions on behalf of the waiver participant. *Select one:*

- ☒ **Yes. Financial Management Services are furnished through a third party entity.** (Complete item E-1-i).

Specify whether governmental and/or private entities furnish these services. *Check each that applies:*

☐ **Governmental entities**

☒ **Private entities**

- ☐ **No. Financial Management Services are not furnished. Standard Medicaid payment mechanisms are used.** Do not complete Item E-1-i.

Appendix E: Participant Direction of Services

E-1: Overview (8 of 13)

i. Provision of Financial Management Services. Financial management services (FMS) may be furnished as a waiver service or as an administrative activity. *Select one:*

- ☐ **FMS are covered as the waiver service specified in Appendix C-1/C-3**

The waiver service entitled:

- ☒ **FMS are provided as an administrative activity.**

Provide the following information

i. Types of Entities: Specify the types of entities that furnish FMS and the method of procuring these services:

The Department of Medical Assistance Services secured financial management services for the consumer-directed model of service delivery through a competitive Request for Proposal process. DMAS holds a contract with a single fiscal employer agent (FEA).

ii. Payment for FMS. Specify how FMS entities are compensated for the administrative activities that they perform:

Payment is rendered to the FEA on a monthly billing cycle with a per member per month fee and includes all administrative functions specified in the contract between DMAS and the FEA.

iii. Scope of FMS. Specify the scope of the supports that FMS entities provide (*check each that applies*):

Supports furnished when the participant is the employer of direct support workers:

- ☒ **Assist participant in verifying support worker citizenship status**
- ☒ **Collect and process timesheets of support workers**
- ☒ **Process payroll, withholding, filing and payment of applicable federal, state and local employment-related taxes and insurance**
- ☒ **Other**

Specify:

The Fiscal Employer Agent is responsible for requesting criminal background screenings of potential consumer-directed employees. Additionally, the FEA requests screenings from the Department of Social Services Child Protective Services Central Registry, if the individual is a minor child.

Supports furnished when the participant exercises budget authority:

- ☐ **Maintain a separate account for each participant's participant-directed budget**
- ☐ **Track and report participant funds, disbursements and the balance of participant funds**
- ☐ **Process and pay invoices for goods and services approved in the service plan**
- ☐ **Provide participant with periodic reports of expenditures and the status of the participant-directed budget**
- ☐ **Other services and supports**

Specify:

Additional functions/activities:

- ☐ **Execute and hold Medicaid provider agreements as authorized under a written agreement with the Medicaid agency**
- ☐ **Receive and disburse funds for the payment of participant-directed services under an agreement with the Medicaid agency or operating agency**
- ☐ **Provide other entities specified by the state with periodic reports of expenditures and the status of the participant-directed budget**
- ☐ **Other**

Specify:

iv. Oversight of FMS Entities. Specify the methods that are employed to: (a) monitor and assess the performance of FMS entities, including ensuring the integrity of the financial transactions that they perform; (b) the entity (or entities) responsible for this monitoring; and, (c) how frequently performance is assessed.

The Department of Medical Assistance Services employs contract monitors to oversee and assess the performance and deliverables of the Fiscal Employer Agent. Payroll system edits are required as a part of the FEA contract and the contract monitors randomly conducts system checks for financial integrity. The contractor's performance is also assessed and evaluated in a bi-annual performance review and documented on a contract monitoring evaluation form.

Appendix E: Participant Direction of Services

E-1: Overview (9 of 13)

j. Information and Assistance in Support of Participant Direction. In addition to financial management services, participant direction is facilitated when information and assistance are available to support participants in managing their services. These supports may be furnished by one or more entities, provided that there is no duplication. Specify the payment authority (or authorities) under which these supports are furnished and, where required, provide the additional information requested (*check each that applies*):

- ☒ **Case Management Activity.** Information and assistance in support of participant direction are furnished as an element of Medicaid case management services.

Specify in detail the information and assistance that are furnished through case management for each participant direction opportunity under the waiver:

The individual's case manager informs him/her (and family members/caregivers, as appropriate) about the option of consumer-directed personal assistance, respite, and companion services at the point of enrollment and at other appropriate junctures, such as at the annual Individual Support Plan meeting or when a request for alternative services is made. When consumer-directed personal assistance, respite, or companion services are chosen, the case manager facilitates the individual's access to consumer-directed services by offering the choice of services facilitators and linking the individual to the Medicaid enrolled SF of his/her choice.

The case manager submits information regarding consumer-directed services to DBHDS for service authorization and, following that event, monitors the consumer-directed service via quarterly reviews submitted by the SF and face-to-face contacts with the individual enrolled in the waiver.

- ☒ **Waiver Service Coverage.**

Information and assistance in support of participant direction are provided through the following waiver service coverage(s) specified in Appendix C-1/C-3 (*check each that applies*):

Participant-Directed Waiver Service	Information and Assistance Provided through this Waiver Service Coverage
Center-based Crisis Supports	<input type="checkbox"/>
Community Guide	<input type="checkbox"/>
Transition Services	<input type="checkbox"/>
Group Home Residential	<input type="checkbox"/>
Workplace Assistance Services	<input type="checkbox"/>
Skilled Nursing	<input type="checkbox"/>

- ☐ **Administrative Activity.** Information and assistance in support of participant direction are furnished as an administrative activity.

Specify (a) the types of entities that furnish these supports; (b) how the supports are procured and compensated; (c) describe in detail the supports that are furnished for each participant direction opportunity under the waiver; (d) the methods and frequency of assessing the performance of the entities that furnish these supports; and, (e) the entity or entities responsible for assessing performance:

Appendix E: Participant Direction of Services

E-1: Overview (10 of 13)**k. Independent Advocacy** *(select one).*

- ☒ **No. Arrangements have not been made for independent advocacy.**
- ☐ **Yes. Independent advocacy is available to participants who direct their services.**

Describe the nature of this independent advocacy and how participants may access this advocacy:

Appendix E: Participant Direction of Services

E-1: Overview (11 of 13)

l. Voluntary Termination of Participant Direction. Describe how the state accommodates a participant who voluntarily terminates participant direction in order to receive services through an alternate service delivery method, including how the state assures continuity of services and participant health and welfare during the transition from participant direction:

Individuals may elect at any time to initiate or discontinue consumer-directing their supports. The individual also may exercise the option of combining agency-directed and consumer-directed supports in order to meet his/her service needs. In the event that an individual elects to discontinue consumer-directed services but still needs and desires similar services, the case manager will aid the individual in selecting and securing services from an agency provider by offering choice of agency-directed providers and linking the individual with the Medicaid-enrolled provider of choice.

Appendix E: Participant Direction of Services

E-1: Overview (12 of 13)

m. Involuntary Termination of Participant Direction. Specify the circumstances when the state will involuntarily terminate the use of participant direction and require the participant to receive provider-managed services instead, including how continuity of services and participant health and welfare is assured during the transition.

The services facilitator or case manager, as appropriate, shall initiate involuntary disenrollment from consumer direction of the individual when any of the following conditions occur:

- (1) The health, safety, or welfare of the individual is at risk;
- (2) The individual or EOR, as appropriate, demonstrates consistent inability to hire and retain a personal assistant; or
- (3) The individual or EOR, as appropriate, is consistently unable to manage the assistant, as may be demonstrated by, but shall not necessarily be limited to, a pattern of serious discrepancies with timesheets.

Prior to involuntary disenrollment, the services facilitator or case manager, as appropriate, shall:

- (1) Verify that essential training has been provided to the individual or EOR, as appropriate, to improve the problem condition or conditions;
- (2) Document in the individual's record the conditions creating the necessity for the involuntary disenrollment and actions taken by the services facilitator or case manager, as appropriate;
- (3) Discuss with the individual or the EOR, as appropriate, the agency directed option that is available and the actions needed to arrange for such services while providing a list of potential providers; and
- (4) Provide written notice to the individual and EOR, as appropriate, of the right to appeal such involuntary termination of consumer direction. Such notice shall be given at least 10 business days prior to the effective date of this action.

If the services facilitator initiates the involuntary disenrollment from consumer direction, then he shall inform the case manager. The individual shall be permitted to select an agency from which to receive his personal assistance, respite, or companion services.

Appendix E: Participant Direction of Services

E-1: Overview (13 of 13)

- n. Goals for Participant Direction.** In the following table, provide the state's goals for each year that the waiver is in effect for the unduplicated number of waiver participants who are expected to elect each applicable participant direction opportunity. Annually, the state will report to CMS the number of participants who elect to direct their waiver services.

Table E-1-n

	Employer Authority Only	Budget Authority Only or Budget Authority in Combination with Employer Authority
Waiver Year	Number of Participants	Number of Participants
Year 1	1300	
Year 2	1300	
Year 3	1300	
Year 4	1300	
Year 5	1300	

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant Direction (1 of 6)

- a. Participant - Employer Authority** Complete when the waiver offers the employer authority opportunity as indicated in Item E-1-b:

- i. Participant Employer Status.** Specify the participant's employer status under the waiver. *Select one or both:*

- ☐ **Participant/Co-Employer.** The participant (or the participant's representative) functions as the co-employer (managing employer) of workers who provide waiver services. An agency is the common law employer of participant-selected/recruited staff and performs necessary payroll and human resources functions. Supports are available to assist the participant in conducting employer-related functions.

Specify the types of agencies (a.k.a., agencies with choice) that serve as co-employers of participant-selected staff:

- ☒ **Participant/Common Law Employer.** The participant (or the participant's representative) is the common law employer of workers who provide waiver services. An IRS-approved Fiscal/Employer Agent functions as the participant's agent in performing payroll and other employer responsibilities that are required by federal and state law. Supports are available to assist the participant in conducting employer-related functions.

ii. Participant Decision Making Authority. The participant (or the participant's representative) has decision making authority over workers who provide waiver services. *Select one or more decision making authorities that participants exercise:*

- ☒ **Recruit staff**
- ☐ **Refer staff to agency for hiring (co-employer)**
- ☐ **Select staff from worker registry**
- ☒ **Hire staff common law employer**
- ☒ **Verify staff qualifications**
- ☒ **Obtain criminal history and/or background investigation of staff**

Specify how the costs of such investigations are compensated:

The contracted FMS requests and obtains criminal history checks of self-directed employees on behalf of the individual/employer. The FMS receives reimbursement for the cost of these investigations as a part of the administrative contract billing.

- ☒ **Specify additional staff qualifications based on participant needs and preferences so long as such qualifications are consistent with the qualifications specified in Appendix C-1/C-3.**

Specify the state's method to conduct background checks if it varies from Appendix C-2-a:

The method to conduct background checks does not vary from Appendix C-2-a

- ☒ **Determine staff duties consistent with the service specifications in Appendix C-1/C-3.**
- ☐ **Determine staff wages and benefits subject to state limits**
- ☒ **Schedule staff**
- ☒ **Orient and instruct staff in duties**
- ☒ **Supervise staff**
- ☒ **Evaluate staff performance**
- ☒ **Verify time worked by staff and approve time sheets**
- ☒ **Discharge staff (common law employer)**
- ☐ **Discharge staff from providing services (co-employer)**
- ☐ **Other**

Specify:

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (2 of 6)

b. Participant - Budget Authority *Complete when the waiver offers the budget authority opportunity as indicated in Item E-1-b:*

Answers provided in Appendix E-1-b indicate that you do not need to complete this section.

i. Participant Decision Making Authority. When the participant has budget authority, indicate the decision-making authority that the participant may exercise over the budget. *Select one or more:*

- ☐ **Reallocate funds among services included in the budget**
- ☐ **Determine the amount paid for services within the state's established limits**
- ☐ **Substitute service providers**
- ☐ **Schedule the provision of services**
- ☐ **Specify additional service provider qualifications consistent with the qualifications specified in Appendix C-1/C-3**
- ☐ **Specify how services are provided, consistent with the service specifications contained in Appendix C-1/C-3**
- ☐ **Identify service providers and refer for provider enrollment**
- ☐ **Authorize payment for waiver goods and services**
- ☐ **Review and approve provider invoices for services rendered**
- ☐ **Other**

Specify:

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (3 of 6)

b. Participant - Budget Authority

Answers provided in Appendix E-1-b indicate that you do not need to complete this section.

ii. Participant-Directed Budget Describe in detail the method(s) that are used to establish the amount of the participant-directed budget for waiver goods and services over which the participant has authority, including how the method makes use of reliable cost estimating information and is applied consistently to each participant. Information about these method(s) must be made publicly available.

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (4 of 6)

b. Participant - Budget Authority

Answers provided in Appendix E-1-b indicate that you do not need to complete this section.

- iii. Informing Participant of Budget Amount.** Describe how the state informs each participant of the amount of the participant-directed budget and the procedures by which the participant may request an adjustment in the budget amount.

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (5 of 6)

b. Participant - Budget Authority

Answers provided in Appendix E-1-b indicate that you do not need to complete this section.

iv. Participant Exercise of Budget Flexibility. *Select one:*

- ☐ Modifications to the participant directed budget must be preceded by a change in the service plan.
- ☐ The participant has the authority to modify the services included in the participant directed budget without prior approval.

Specify how changes in the participant-directed budget are documented, including updating the service plan. When prior review of changes is required in certain circumstances, describe the circumstances and specify the entity that reviews the proposed change:

Appendix E: Participant Direction of Services

E-2: Opportunities for Participant-Direction (6 of 6)

b. Participant - Budget Authority

Answers provided in Appendix E-1-b indicate that you do not need to complete this section.

- v. Expenditure Safeguards.** Describe the safeguards that have been established for the timely prevention of the premature depletion of the participant-directed budget or to address potential service delivery problems that may be associated with budget underutilization and the entity (or entities) responsible for implementing these safeguards:

Appendix F: Participant Rights

Appendix F-1: Opportunity to Request a Fair Hearing

The state provides an opportunity to request a Fair Hearing under 42 CFR Part 431, Subpart E to individuals: (a) who are not given the choice of home and community-based services as an alternative to the institutional care specified in Item 1-F of the request; (b) are denied the service(s) of their choice or the provider(s) of their choice; or, (c) whose services are denied, suspended, reduced or terminated. The state provides notice of action as required in 42 CFR §431.210.

Procedures for Offering Opportunity to Request a Fair Hearing. Describe how the individual (or his/her legal representative) is informed of the opportunity to request a fair hearing under 42 CFR Part 431, Subpart E. Specify the notice(s) that are used to

offer individuals the opportunity to request a Fair Hearing. State laws, regulations, policies and notices referenced in the description are available to CMS upon request through the operating or Medicaid agency.

State regulations (12 VAC 30-110-70) require that the notice to individuals who have had a Medicaid-covered service denied, reduced, suspended, terminated or not acted upon within required timeframes include appeal rights. Notices must also be provided when an individual's choice of provider or choice of HCBS versus institutional services are not provided or are not acted upon within the required time frames.

The individual must be notified in writing of the right to a hearing and the procedure for requesting a hearing at the time of the application and at the time of any adverse action by DMAS, DBHDS, the case manager, individual service providers or the Department of Social Services. Copies of these notices are retained in the case management file. For applicants and individuals not familiar with English, a translation of the appeal rights understood by the applicant or individual must be included. Appeal rights at the time of any action by DMAS, DBHDS, the case manager, individual service providers, or the Department of Social Services must be issued at least ten days prior to the date of action, except for specified exceptions. The individual then has 30 days from the date of denial to request an appeal.

When an individual's request for a Medicaid-covered service is denied, reduced, suspended, terminated, or not acted upon within required time frames, the case manager must send the written notification of the action and the right to appeal the action to the individual.

The contents of the notification letter must include:

- 1) What action the agency intends to take;
- 2) The reason(s) for the intended action;
- 3) The specific regulations that support or change in law that requires the action;
- 4) The right to request an evidentiary hearing, and the methods and time limits for doing so;
- 5) The circumstances under which benefits are continued if a hearing is being requested; and
- 6) The right to representation.

Unless otherwise specified, written notification must be mailed by the case manager to the individual or legal guardian at least 10 days prior to the date of action when an agency reduces, suspends, or terminates one or all Medicaid-covered services.

Exceptions to the 10-Day Advance Notice Requirements:

The 10-day advance written notice is required to be sent to the individual or legal guardian except in the following instances: (Note that in these circumstances the written notice is still required, even though advance notice is not.)

1. When the agency has factual information confirming the death of an individual;
2. When an individual or guardian provides a written request indicating that:
 - a) He/she no longer wishes services to continue; OR
 - b) He/she gives information that requires termination or reduction and indicates an understanding of the action required by supplying this information;
3. The individual has been admitted to an institution and is ineligible for further services, including a regular admission to an ICF/IID or a nursing home, or has been incarcerated;
4. The individual's whereabouts are unknown, as evidenced by returned mail;
5. The agency establishes the fact that the individual has been accepted for Medicaid services by another local jurisdiction, state, territory, or commonwealth;
6. The individual's physician prescribes a change in the level of care;
7. When the individual's request for admission into a Medicaid-covered service or when the individual's request for an increase in a Medicaid-covered service is denied or not acted upon promptly for any reason, i.e., diagnostic or functional eligibility, funding, no provider.

All notification letters must be filed in the case management record.

Appeals must be requested in writing and postmarked within 30 days of receipt of the notice of adverse action. The individual or his authorized representative may write a letter or complete an Appeal Request Form. Forms are available on the DMAS website, at local departments of social services, or by calling (804) 371-8488. A copy of the notice or letter about the action should be included with the appeal request. The appeal request must be signed and mailed to the:

Appeals Division
Department of Medical Assistance Services
600 E. Broad Street

Richmond, Virginia 23219

Appeal requests may also be faxed to: (804) 371-8491

If an appeal is filed before the effective date of the action, services may continue during the appeal process. Individuals are notified of this fact initially at the time of application for waiver services through receipt from the case manager of a booklet titled "About Your Appeal." This booklet contains the following text:

"For reduction or termination of coverage, if your request is made before the effective date of the action and the action is subject to appeal/review, your coverage may continue pending the outcome of the appeal/review."

In addition, at the time of any adverse action by DMAS, DBHDS, the CSB, or the Dept. of Social Services the individual must be issued a letter notifying him/her of his/her right to appeal that contains the following paragraph:

"If this is a termination or reduction in services and if you file an appeal before the effective date of this action, [date], services may continue during the appeal process. However, if you appeal and the Appeals Division upholds this decision, you may be required to reimburse the Medical Assistance Program for the waiver services provided after [date]. Additionally, if you file an appeal, you must inform your case manager of this action in order for your services to continue beyond the above stated end date."

DMAS will decide whether continued coverage applies. After receiving confirmation from DMAS that an appeal has been validated and that continued coverage applies, the case manager must notify the provider (after confirming with the individual or family member/caregiver, if applicable, that the individual wishes to receive continued services) that services must continue at the same level until the appeal decision is rendered.

Similarly, in the case of the discharge, if the individual files an appeal during the 30 days following notification of discharge, the appropriate entity must be notified and the waiver slot must remain assigned to the current individual until an appeal decision has been issued. If the individual does not appeal within 30 days following the date of notification, the slot may be reassigned.

If the agency's action is upheld by the hearing officer, and services were continued solely because of the appeal, the individual will be expected to repay DMAS for all services received during the appeal period. For this reason, the individual may choose not to receive continued services.

Appendix F: Participant-Rights

Appendix F-2: Additional Dispute Resolution Process

a. Availability of Additional Dispute Resolution Process. Indicate whether the state operates another dispute resolution process that offers participants the opportunity to appeal decisions that adversely affect their services while preserving their right to a Fair Hearing. *Select one:*

- ☒ **No. This Appendix does not apply**
☐ **Yes. The state operates an additional dispute resolution process**

b. Description of Additional Dispute Resolution Process. Describe the additional dispute resolution process, including: (a) the state agency that operates the process; (b) the nature of the process (i.e., procedures and timeframes), including the types of disputes addressed through the process; and, (c) how the right to a Medicaid Fair Hearing is preserved when a participant elects to make use of the process: State laws, regulations, and policies referenced in the description are available to CMS upon request through the operating or Medicaid agency.

Appendix F: Participant-Rights

Appendix F-3: State Grievance/Complaint System

a. Operation of Grievance/Complaint System. *Select one:*

- ☐ **No. This Appendix does not apply**
- ☒ **Yes. The state operates a grievance/complaint system that affords participants the opportunity to register grievances or complaints concerning the provision of services under this waiver**

b. Operational Responsibility. Specify the state agency that is responsible for the operation of the grievance/complaint system:

Individuals receiving supports through the waiver may register a grievance or complaint with DMAS or DBHDS and are informed that filing a grievance or making a complaint are not a pre-requisite or substitute for a fair hearing.

DMAS refers any complaints/grievances received to the operating agency, DBHDS. DBHDS is the primary agency that receives complaints and grievances. The agency does not have a formal complaint system but does ensure that concerns expressed are taken seriously and efforts are made to investigate and resolve them. Concerns are directed to appropriate staff and documentation is kept of the efforts made and final resolution.

c. Description of System. Describe the grievance/complaint system, including: (a) the types of grievances/complaints that participants may register; (b) the process and timelines for addressing grievances/complaints; and, (c) the mechanisms that are used to resolve grievances/complaints. State laws, regulations, and policies referenced in the description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

Individuals receiving supports through the waiver may register the following types of grievances/complaints:

- 1) Safety, endangerment, or welfare issues;
- 2) Suspicion of Medicaid fraud;
- 3) Violations of Medicaid regulations, policy, or Code of Virginia, including HIPAA;
- 4) Issues regarding DMAS contractors for pre-admission screening, pre-authorization, or fiscal management services;
- 5) Issues related to parties other than parents, such as social worker, doctor, therapist;
- 6) Issues related to a provider of Services Facilitation;
- 7) Difficulty with services and/or provider agencies.

All individual grievances/complaints are responded to within 24 hours and logged using an automated system. DMAS staff must respond to and log the grievance/complaint and resolution as soon as feasible (depending on the nature and extent of the complaint) into the Waiver Complaint Database. The mechanisms for the response may include follow-up by phone, letter, home visit, provider agency visit, QMR, and/or referral to another agency (e.g., DBHDS Office of Licensing, Department of Social Services Child Protective Services, Department of Aging and Rehabilitative Adult Protective Services, Medicaid Fraud Control Unit, Health Department).

DMAS has a phone number in the Division of Long Term Care that individuals can call with a complaint or to ask questions. Individuals can also write a letter and mail or fax it in to the division. Complaints, questions or concerns are either referred to Licensing at DBHDS or another agency, or information is gathered for a QMR review, if appropriate. Complaints or concerns regarding DBHDS-licensed providers may be submitted in written or telephonic form and are then referred to the appropriate Licensing Specialist for investigation.

Appendix G: Participant Safeguards

Appendix G-1: Response to Critical Events or Incidents

a. Critical Event or Incident Reporting and Management Process. Indicate whether the state operates Critical Event or Incident Reporting and Management Process that enables the state to collect information on sentinel events occurring in the waiver program. *Select one:*

- ☒ **Yes. The state operates a Critical Event or Incident Reporting and Management Process** (complete Items b through e)
- ☐ **No. This Appendix does not apply** (do not complete Items b through e)

If the state does not operate a Critical Event or Incident Reporting and Management Process, describe the process that

the state uses to elicit information on the health and welfare of individuals served through the program.

--

b. State Critical Event or Incident Reporting Requirements. Specify the types of critical events or incidents (including alleged abuse, neglect and exploitation) that the state requires to be reported for review and follow-up action by an appropriate authority, the individuals and/or entities that are required to report such events and incidents and the timelines for reporting. State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

There are several elements to Virginia's Critical Incident Reporting and Management process.

I. FOR ALL PROVIDERS OF SERVICES IN THIS WAIVER

Overall state critical incident reporting requirements are under the purview of the Virginia Department of Aging and Rehabilitative Services (DARS) for adults and the Virginia Department of Social Services (VDSS) for children. Protective services for adults are described in the Virginia State Code at §63.2-1605. Protective services for children are described in the Virginia State Code at §63.2-1501 et. seq.

Adult Protective Services (APS) investigates reports of abuse, neglect, and exploitation of adults 60 years of age or older and incapacitated adults (inclusive of individuals with I/DD) age 18 or older. APS also assists in the development and implementation of programs to respond to and prevent adult abuse, neglect, or exploitation; prepares, disseminates, and presents educational programs and materials on adult abuse, neglect, and exploitation to mandated reporters and the public; and operates the APS 24-hour toll-free hotline (1-888-832-3858) and provides training and technical assistance to the hotline staff.

Reports of suspected abuse, neglect, or exploitation of adults must be made to the local department or the APS hotline.

Upon receipt of a report of suspected abuse, neglect, or exploitation of an adult, the local department determines the validity of the report and initiates an investigation within 24 hours of the time the report is received. APS must also refer any appropriate matter and all relevant documentation to the appropriate licensing, regulatory, or legal authority for administrative action or criminal investigation.

In the case of children, the local department of social services (ldss) that first receives a complaint or report of child abuse or neglect assumes responsibility to ensure that a family assessment or an investigation is conducted. All complaints and reports of suspected child abuse or neglect are recorded in the child abuse and neglect information system and either screened out or determined valid. In all valid complaints or reports of child abuse or neglect the ldss shall determine whether to conduct an investigation or a family assessment. A valid complaint or report is one in which: (i) the alleged victim child or children are under the age of 18 years at the time of the complaint or report; (ii) the alleged abuser is the alleged victim child's parent or other caretaker; (iii) the local department receiving the complaint or report has jurisdiction; and (iv) the circumstances described allege suspected child abuse or neglect as defined in § 63.2-100 of the Code of Virginia.

To make a complaint or report of child abuse or neglect, a person may telephone the VDSS 24-hour toll-free child abuse and neglect hotline (1-800-552-7096) or contact a local department of social services pursuant to §63.2-1510 of the Code of Virginia.

Virginia defines these terms for adults as follows:

"Abuse" means (i) knowing and willful conduct that causes physical injury or pain or (ii) knowing and willful use of physical restraint, including confinement, as punishment, for convenience or as a substitute for treatment, except where such conduct or physical restraint, including confinement, is a part of care or treatment and is in furtherance of the health and safety of the incapacitated person. [§18.2-369]

"Incapacitated adult" means any person 18 years of age or older who is impaired by reason of mental illness, intellectual disability, physical illness or disability, advanced age or other causes to the extent the adult lacks sufficient understanding or capacity to make, communicate or carry out reasonable decisions concerning his well-being. [§18.2-369]

"Neglect" means the knowing and willful failure by a responsible person to provide treatment, care, goods or services which results in injury to the health or endangers the safety of an incapacitated adult [§18.2-369].

"Adult exploitation" means the illegal, unauthorized, improper, or fraudulent use of an adult as defined in § 63.2-1603 or his funds, property, benefits, resources, or other assets for another's profit, benefit, or advantage, including a caregiver or person serving in a fiduciary capacity, or that deprives the adult of his rightful use of or access to such funds, property, benefits, resources, or other assets. "Adult exploitation" includes (i) an intentional breach of a fiduciary obligation to an adult to his detriment or an intentional failure to use the financial resources of an adult in a manner that results in neglect of such adult; (ii) the acquisition, possession, or control of an adult's financial resources or property through the use of undue influence, coercion, or duress; and (iii) forcing or coercing an adult to pay for goods or services or perform

services against his will for another's profit, benefit, or advantage if the adult did not agree, or was tricked, misled, or defrauded into agreeing, to pay for such goods or services or to perform such services. [§63.2-100].

Any person may voluntarily report suspected "abuse, neglect and exploitation" (in various forms) to DARS offices of Adult Protective Services the LDSS or the APS Hotline. The Code of Virginia (§ 63.2-1606) requires those designated as "mandated reporters" immediately, upon determining there is a reason for suspicion, report any suspected instances of abuse, neglect, or exploitation to the local department or the protective services hotline. Mandated reporters for APS include the following persons acting in their professional capacity:

1. Any person licensed, certified, or registered by health regulatory boards listed in §54.1-2503, with the exception of persons licensed by the Board of Veterinary Medicine;
2. Any mental health services provider as defined in §54.1-2400.1;
3. Any emergency medical services personnel certified by the Board of Health pursuant to §32.1-111.5, unless such provider immediately reports the suspected abuse, neglect or exploitation directly to the attending physician at the hospital to which the adult is transported, who shall make such report forthwith;
4. Any guardian or conservator of an adult;
5. Any person employed by or contracted with a public or private agency or facility and working with adults in an administrative, supportive or direct care capacity;
6. Any person providing full, intermittent or occasional care to an adult for compensation, including but not limited to, companion, chore, homemaker, and personal care workers; and
7. Any law-enforcement or probation officer.

Mandated reporters for CPS include the following persons acting in their professional or official capacity:

1. Any person licensed to practice medicine or any of the healing arts;
2. Any hospital resident or intern, and any person employed in the nursing profession;
3. Any person employed as a social worker or family-services specialist;
4. Any probation officer;
5. Any teacher or other person employed in a public or private school, kindergarten or nursery school;
6. Any person providing full-time or part-time child care for pay on a regularly planned basis;
7. Any mental health professional;
8. Any law-enforcement officer or animal control officer;
9. Any mediator eligible to receive court referrals pursuant to § 8.01-576.8;
10. Any professional staff person, not previously enumerated, employed by a private or state-operated hospital, institution or facility to which children have been committed or where children have been placed for care and treatment;
11. Any person 18 years of age or older associated with or employed by any public or private organization responsible for the care, custody or control of children;
12. Any person who is designated a court-appointed special advocate pursuant to Article 5 (§ 9.1-151 et seq.) of Chapter 1 of Title 9.1;
13. Any person 18 years of age or older who has received training approved by the Department of Social Services for the purposes of recognizing and reporting child abuse and neglect;
14. Any person employed by a local department as defined in § 63.2-100 who determines eligibility for public assistance;
15. Any emergency medical services provider certified by the Board of Health pursuant to § 32.1-111.5, unless such provider immediately reports the matter directly to the attending physician at the hospital to which the child is transported, who shall make such report forthwith;
16. Any athletic coach, director or other person 18 years of age or older employed by or volunteering with a private sports organization or team;
17. Administrators or employees 18 years of age or older of public or private day camps, youth centers and youth recreation programs; and
18. Any person employed by a public or private institution of higher education other than an attorney who is employed by a public or private institution of higher education as it relates to information gained in the course of providing legal representation to a client.

Local departments or the APS 24-hour, toll-free hotline, upon receiving the initial report, must immediately notify the local law-enforcement agency when in receipt of a report describing any of the following:

1. Sexual abuse as defined in §18.2-67.10;
2. Death that is believed to be the result of abuse or neglect;

3. Serious bodily injury or disease as defined in § 18.2-369 that is believed to be the result of abuse or neglect;
4. Suspected financial exploitation of an adult; or
5. Any other criminal activity involving abuse or neglect that places the individual in imminent danger of death or serious bodily harm.

For CPS, the local department must notify the local attorney for the Commonwealth and the local law-enforcement agency immediately, but in no case more than two hours of receipt of the complaint, for all complaints of suspected child abuse or neglect involving the following:

1. Death of a child;
2. Injury or threatened injury to the child in which a felony or Class 1 misdemeanor is also suspected;
3. Sexual abuse, suspected sexual abuse or other sexual offense involving a child, including but not limited to the use or display of the child in sexually explicit visual material, as defined in § 18.2-374.1;
4. Abduction of a child;
5. Felony or Class 1 misdemeanor drug offense involving a child; and
6. Contributing to the delinquency of a minor in violation of § 18.2-371

APS has 45 days to complete the investigation and 10 days after the investigation closes to notify the responsible parties of the results.

CPS has 45 days to complete investigations but there are exceptions and circumstances that allow longer time. CPS timeframes are found in §§ 63.2-1505 and 63.2-1506 of the Code of Virginia.

II. FOR DBHDS-LICENSED PROVIDERS

Licensing and Human Rights regulations [12 VAC 35-105-160 and 12 VAC 35-115-230] state that the provider shall collect, maintain and report:

1. Each allegation of abuse or neglect to the assigned human rights advocate within 24 hours from the receipt of the initial allegation. These reports are currently made electronically through the Computerized Human Rights Information System (CHRIS). The provider shall provide a report through CHRIS of the results of the investigation of abuse or neglect to the provider and the human rights advocate within 10 working days from the date the investigation began. The report shall include but not be limited to the following: whether abuse, neglect or exploitation occurred; type of abuse; and whether the act resulted in physical or psychological injury.
2. Deaths and serious injuries via CHRIS to DBHDS within 24 hours of discovery, and by phone to the legally authorized representative as applicable within 24 hours. This report should include: the date and place of death or serious injury; nature of injuries and treatment required and circumstances of death or serious injury.
3. Each instance of restraint that does not comply with the human rights regulations or approved variances, or that results in injury to an individual within 24 hours to the legally authorized representative and, via CHRIS, to the assigned human rights advocate.

The Human Rights Advocate and the Local Human Rights Committee (LHRC) receive information from providers on the type, resolution level, and findings of each complaint of a human rights violation and implementation of variances in accordance with the LHRC meeting schedule or as requested by the advocate.

DMAS receives telephone reports of complaints (some involving critical incidents) related to Medicaid providers. These are referred to VDSS, DARS, DBHDS or other appropriate agency for follow-up, if appropriate. Also, these complaints may result in provider getting a DMAS Quality Management Review (QMR). During on-site visits, QMR staff report any identified health and safety violations to DBHDS, VDSS, DARS or other appropriate agency as required by law. The QMR includes seeking information on incidents that should have been reported and the actual disposition.

New providers are trained by the Human Rights Advocate on what would be considered elements of a good investigation during the initial onsite provider review. This happens between 30-60 days of licensing. The Human Rights Advocate also provides ongoing regional training on human rights, to include investigations, for all existing providers. Information and training on investigations is available on the DBHDS website. A thorough investigation may include the following:

- Recognize the event (i.e., abuse, neglect) that requires an investigation;

- Take immediate action to ensure safety of individual(s);
- Complete and document required initial reporting (CHRIS, DSS, Law Enforcement as applicable);
- Collect relevant facts (medical records, case notes, incident reports, photographs, videos, etc.);
- Conduct interviews and collect written statements from everyone involved or knowledgeable of the incident;
- Analyze, inventory, and maintain evidence in accordance with procedures;
- Identify Corrective Action;
- Summarize and report findings along with corrective action plan to DBHDS and individual(s) involved;
- Implement and track any appropriate administrative or clinical care and treatment-related actions in order to prevent future occurrences, when it is determined that a violation has occurred; and
- Decide whether an administrative intervention is necessary (i.e., policy review, continued fact-finding), when it is determined that a violation has not occurred.

c. Participant Training and Education. Describe how training and/or information is provided to participants (and/or families or legal representatives, as appropriate) concerning protections from abuse, neglect, and exploitation, including how participants (and/or families or legal representatives, as appropriate) can notify appropriate authorities or entities when the participant may have experienced abuse, neglect or exploitation.

Information and training regarding human rights protections required by DBHDS Office of Human Rights regulations (12 VAC 35-115-10-260) is provided to the individual and family/caregiver, as applicable, by the case manager and all DBHDS-licensed providers at the initiation of Waiver services and annually thereafter. These include the individuals' right to be free from abuse, neglect and exploitation. Individuals are also informed by their case manager that they may make a report directly to Adult/Child Protective Services, the local human rights committee or other direct care providers or professionals, to register a complaint on his or her behalf.

DMAS offers annual training to QMR staff on how to recognize and report abuse, neglect and exploitation.

DMAS continues to stress the importance of the protection from abuse, neglect, and exploitation of the Commonwealth's elderly and citizens with disabilities. The Guide for Long-Term Care Services in Virginia (rev. 7/1/2013), available on the DMAS website and distributed to all local departments of social services, contains information on reporting abuse, neglect and exploitation. The Consumer-Directed Employer of Record Manual (rev. March 2015), utilized by consumer-directed employers and services facilitators, includes information about abuse, neglect and exploitation as well as the APS/CPS hotlines.

d. Responsibility for Review of and Response to Critical Events or Incidents. Specify the entity (or entities) that receives reports of critical events or incidents specified in item G-1-a, the methods that are employed to evaluate such reports, and the processes and time-frames for responding to critical events or incidents, including conducting investigations.

I. APS receives and responds to all reports of critical incidents of abuse, neglect or exploitation, as required by their regulations. Reports are investigated by assigned APS staff members who must initiate an investigation of a valid report within 24 hours of report receipt. Investigations are finalized and closed as soon as possible given the nature and extent of the complaint. The complainant is informed of the investigation disposition (founded or unfounded) at case closure. APS has 45 days to complete the investigation and 10 days after the investigation closes to notify the complainant of the results.

CPS responds to valid reports of child abuse or neglect as required by their regulations 22VAC40-705 and 22VAC40-730 and guidance manual.

II. The DBHDS Office of Licensing receive reports of critical incidents (i.e., serious injuries or deaths) of individuals in DBHDS-licensed settings) via a self-report, provider staff, family members, advocates and other community members. Providers are required to make these reports within 24 hours of discovery. DBHDS staff conducts announced and unannounced onsite reviews at any time and as part of the investigations of complaints or incidents as needed. Providers must report each allegation of abuse or neglect to the assigned human rights advocate within 24 hours from the receipt of the initial allegation. The provider submits a report via CHRIS of the results of the investigation of abuse or neglect to the Office of Human Rights within 10 working days from the date the investigation began unless an exemption has been granted. The report shall include but not be limited to the following: whether abuse, neglect or exploitation occurred; the type of abuse; and whether the act resulted in physical or psychological injury. Deaths and serious injuries must be reported to DBHDS within 24 hours of discovery. The report must include the date and place of death or serious injury, the nature of injuries and treatment required and the circumstances of death or serious injury.

If the DBHDS Office of Licensing detects noncompliance with any licensing regulations, including critical incident reporting, DBHDS develops a findings report requiring that the provider submit a corrective action plan to DBHDS within 15 business days of the issuance of the licensing report. Extensions may be granted when requested but are not to exceed an additional 10 business days.

III. DBHDS Office of Human Rights Advocates are required to close CHRIS cases within 60 days of initial notification. This is monitored by the Human Rights Regional Manager.

Office of Human Rights protocols require the responsible Advocate to verify that all provider corrective actions are being implemented. Cases are not closed until verification of implementation is documented by the Advocate in the advocate action section of CHRIS. In the event that the timeframe is extended due to a "pending higher level appeal" or when there is a delayed response from the provider, the assigned Advocate refers the case for further action to the Regional Manager.

The advocate may verify implementation of any corrective action through additional onsite visits and/or reviews of policies and/or other documents.

Proposed updates to waiver regulations will require providers with a history of noncompliance with regulations, as evidenced by multiple citations by either DBHDS Office of Licensing or DMAS QMR, resulting in the need for a corrective action plan in key identified areas such as health, safety, or failure to address the identified needs of the individual, will be required to undergo mandatory training and technical assistance in the specific area(s) of noncompliance. Failure to complete the mandatory training or identified technical assistance may result in referral to DMAS Provider Integrity or termination of the provider's Medicaid participation agreement.

Investigations:

Licensed providers are required to conduct internal investigations of serious incidents and allegations of abuse and neglect and report their findings to the Department. Newly licensed providers receive on-site training by the Office of Human Rights regarding what is reportable as abuse, neglect and serious injury and how to submit the report in CHRIS. Providers also have access to training resources and tools related to conducting abuse/neglect investigations via the DBHDS website.

Licensing and Human Rights staff monitor provider reports and investigations through CHRIS. Licensing and Human Rights staff conduct independent investigations when reported incidents result in an individual's death or are otherwise determined to require additional oversight.

All Human Rights and Licensing staff attend a three day competency-based training course resulting in certification to

conduct serious incident investigations. The following are standard components that staff is taught during this training:

- *Systematic process of evidence collection for the purpose of describing and explaining an incident.
- *How to draw conclusions and utilize standardized tools for reporting investigative findings
- *Effective ways of collecting relevant facts through interviewing witnesses, reviewing documentation and examining physical evidence.
- *Utilization of agency protocols regarding when to include other agencies like Social Services, Law Enforcement etc. and instruction to defer to the Investigator Manual for ongoing consistency.

- e. Responsibility for Oversight of Critical Incidents and Events.** Identify the state agency (or agencies) responsible for overseeing the reporting of and response to critical incidents or events that affect waiver participants, how this oversight is conducted, and how frequently.

The DBHDS Office of Human Rights (OHR) has an electronic reporting system ("CHRIS") that relays information from all DBHDS-licensed providers to OHR regarding reported instances of abuse, neglect and exploitation violations. The Quality Review Team (QRT), made up of DMAS and DBHDS staff, reviews information from CHRIS quarterly regarding individuals served by this waiver.

DMAS is responsible for monitoring the report of and response to critical incidents/events affecting individuals receiving this waiver through a review of reports provided by DARS. These reports are reviewed on a quarterly basis by the QRT and examine investigations of critical incidents, i.e., incidents of neglect, self-neglect, physical abuse, mental abuse, sexual abuse, financial exploitation, other exploitation and the percentage of individuals who accepted and refused protective services. The data collected will be reviewed and analyzed to identify trends. Any trends noted will be used to provide information for future training and provider development.

The QRT also reviews reports from the DBHDS Mortality Review Committee of deaths of individuals receiving services from DBHDS-licensed providers.

Appendix G: Participant Safeguards

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions (1 of 3)

- a. Use of Restraints.** *(Select one): (For waiver actions submitted before March 2014, responses in Appendix G-2-a will display information for both restraints and seclusion. For most waiver actions submitted after March 2014, responses regarding seclusion appear in Appendix G-2-c.)*

- ☐ **The state does not permit or prohibits the use of restraints**

Specify the state agency (or agencies) responsible for detecting the unauthorized use of restraints and how this oversight is conducted and its frequency:

- ☒ **The use of restraints is permitted during the course of the delivery of waiver services.** Complete Items G-2-a-i and G-2-a-ii.

- i. Safeguards Concerning the Use of Restraints.** Specify the safeguards that the state has established concerning the use of each type of restraint (i.e., personal restraints, drugs used as restraints, mechanical restraints). State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

The human rights regulations define restrictions as anything that limits or prevents an individual from freely exercising his rights and privileges. Restrictions on Freedom of everyday life are outlined in 12 VAC35-115-100. The use of seclusion, restraint and time out is outlined in 12VAC35-115-110. Restraints (defined in regulation as the use of a mechanical device, medication, physical intervention or hands-on hold to prevent an individual from moving his body to engage in a behavior that places him or others at imminent risk" [12 VAC 35-115-30]) may only be used in an emergency or when recommended by a qualified professional ("Providers may use restraint in a behavioral treatment plan to address behaviors that present an immediate danger to the individual or others, but only after a licensed professional has conducted a detailed and systematic assessment of the behavior and the situations in which the behavior occurs." [12 VAC 35-115-105])

DBHDS encourages the use of evidence based positive behavioral supports to support individuals with challenging behaviors over more restrictive interventions ("Providers shall not use . . . restraint for any behavioral, medical or protective purpose unless other less restrictive techniques have been considered and documentation is placed in the individual's services plan that these less restrictive techniques did not or would not succeed in reducing or eliminating behaviors that are self-injurious or dangerous to other people or that no less restrictive measure was possible in the event of a sudden emergency." [12 VAC 35-115-110])

Parameters for the use of restraints are detailed in the DBHDS Human Rights regulations (12 VAC 35-115-110) and the DBHDS Licensing regulations (12 VAC 35-105-830) and include:

- * Providers shall not use restraint as a punishment or reprisal or for the convenience of staff.
- * Providers shall not use restraint solely because criminal charges are pending against the individual.
- * Providers shall not use restraint for any behavioral, medical or protective purpose unless other less restrictive techniques have been considered and the service plan includes documentation that these less restrictive techniques did not or would not succeed in reducing or eliminating behaviors that are self-injurious or dangerous to other people or that no less restrictive measure was possible in the event of a sudden emergency.
- * Providers that use restraint shall develop written policies and procedures (to be reviewed by Office of Licensing staff) that comply with applicable federal and state laws and regulations.
- * Providers shall submit all proposed restraint and time out policies and procedures to the DBHDS Human Rights Advocate and upon request to the Local Human Rights Committee for review and comment .
- * Application of restraint shall be documented in the individual's record and, at a minimum, include physician's order, date and time, employees involved, circumstances and reasons for use, duration, type of technique used and outcomes.

Pharmacological restraints would NOT be appropriate in this waiver's venues. Therefore, providers may ONLY employ:

- * mechanical restraints, which is defined as "the use of a mechanical device that cannot be removed by the individual to restrict the freedom of movement or function of a limb or portion of an individual's body when that behavior places him or others at imminent risk," [12 VAC 35-115-30] or
- * physical restraints (also referred to as "manual hold") which is defined as "the use of a physical intervention or hands-on hold to prevent an individual from moving his body when that individual's behavior places him or others at imminent risk." [12 VAC 35-115-30]

Providers must have a written policy that states who is qualified/trained to implement any restraint or time out ("Providers that use . . . restraint shall develop written policies and procedures that comply with applicable federal and state laws and regulations . . . and sound therapeutic practice. These policies and procedures shall include . . . trained, qualified staff shall monitor the individual's medical and mental condition continuously while the restriction is being used." [12 VAC 35-115-110]). Further, regulations state that, "Providers shall ensure that only staff who have been trained in the proper and safe use of . . . restraint techniques may initiate, monitor and discontinue their use." [12 VAC 35-115-110]. In addition, the Office of Licensing requires that, "The use . . . shall be consistent with the provider's policies and procedures."

Providers implementing physical restraints generally have staff trained in using either the Mandt or Therapeutic Options [See <http://www.therops.com/therapeuticoptions.html>] systems. Providers implementing a mechanical restraint (most commonly the protective wearing of a helmet, glove or mitten)

must have staff trained by the appropriate professional to administer whatever restrictive device/procedure according to the needs of the individual and as defined in policy. Ideally, as staff are trained to recognize the individual's cues as to when the restraint or time out is needed, so should they work with the individual to help him recognize when he needs the protective device/time apart from others so that he can self-administer (at that point the device/removal ceases to be a restraint/time out, as "the voluntary use of protective equipment [is] not considered restraints." [12 VAC 35-115-110]

In addition to the safeguards mentioned above, human rights regulations state the following:
 "Each individual is entitled to be completely free from any unnecessary use of . . . restraint."

The provider's duties [regarding the use of restraint include]:

1. Providers shall meet with the individual or his authorized representative upon admission to the service to discuss and document in the individual's services record, his preferred interventions in the event his behaviors or symptoms become a danger to himself or others and under what circumstances, if any, the intervention may include restraint.
2. Providers shall document in the individual's services record all known contraindications to the use of . . . any form of physical or mechanical restraint including medical contraindications and a history of trauma and shall flag the record to alert and communicate this information to staff.
3. Individuals shall be given the opportunity for motion and exercise, to eat at normal meal times and take fluids to use the restroom and to bathe as needed.
4. Each use of restraint shall end immediately when criteria for removal are met.
5. Providers shall ensure that a qualified professional who is involved in providing services to the individual reviews every use of physical restraint as soon as possible after it is carried out and documents the results of his review in the individual's services record.
6. Providers shall ensure that review and approval by a qualified professional for the use or continuation of restraint for medical or protective purposes is documented in the individual's services record.
 Documentation includes:
 - a. Justification for any restraint
 - b. Time-limited approval for the use or continuation of restraint; and
 - c. Any physical or psychological conditions that would place the individual at greater risk during restraint.
7. Providers may use . . . mechanical restraint for behavioral purposes in an emergency only if a qualified professional involved in providing services to the individual has, within one hour of the initiation of the procedure:
 - a. conducted a face-to-face assessment of the individual and documented that alternatives to the proposed use of . . . mechanical restraint have not been successful in changing the behavior or were not attempted, taking into account the individuals' medical and mental condition, behavior, preferences, nursing and medication needs and ability to function independently;
 - b. determined that the proposed . . . mechanical restraint is necessary to protect the individual or others from harm injury or death;
 - c. documented in the individual's services record the specific reason for the . . . mechanical restraint;
 - d. documented in the individual's services record the behavioral criteria that the individual must meet for release from . . . mechanical restraint; and
 - e. explained to the individual, in a way that he can understand, the reason for using mechanical restraint . . . , the criteria for its removal, and the individual's right to a fair review of whether the mechanical restraint . . . was permissible.
8. Providers shall limit each approval for restraint for behavioral purposes . . . to four hours for individuals age 18 and older, two hours for children and adolescents ages 9 to 17 and one hour for children under age nine.

9. Providers shall not issue standing orders for the use of . . . restraint for behavioral purposes.

10. Providers shall ensure that no individual is in time out for more than 30 minutes per episode.

11. Providers shall monitor the use of restraint for behavioral purposes . . . through continuous face-to-face observation, rather than by an electronic surveillance device.” [12 VAC 35-115-110]

Each instance of restraint shall be compiled on a monthly basis and the report shall include:

- Type(s) (physical restraint or mechanical restraint)
- Rationale for the use of restraint (behavioral purpose, medical purpose or protective purpose).
- Duration of the restraint.

Providers shall submit an annual report of each instance of restraint and seclusion by the 15th of January each year or more frequently if requested by DBHDS. Each instance of restraint or seclusion shall be compiled on a monthly basis and available for review by DBHDS as requested. The DBHDS Computerized Human Rights Information System (CHRIS) captures use of restraints that result in allegations of abuse or neglect.

DBHDS human rights regulations require that providers report to the Human Rights Advocate (an employee of DBHDS) the use of any restraint not included in their policies or permitted by regulation (“Any instance of . . . restraint that does not comply with these regulations or approved variances, or that results in injury to an individual, shall be reported to the authorized representative, as applicable, and the assigned human rights advocate within 24 hours.” [12 VAC 35-115-230])

If it is discovered through a DBHDS Licensing or Human Rights review of a provider's services or individual/employee report that an unauthorized use of restraints (or any use of seclusion) occurred and was not properly reported, the provider will be required to develop a corrective action plan and may face additional sanctions.

- ii. State Oversight Responsibility.** Specify the state agency (or agencies) responsible for overseeing the use of restraints and ensuring that state safeguards concerning their use are followed and how such oversight is conducted and its frequency:

DBHDS Office of Licensing and Human Rights are responsible for overseeing the use of restraints in DBHDS-licensed programs. Providers that use restraint shall develop written policies and procedures (to be reviewed by Office of Licensing staff prior to the issuance of a license) that comply with applicable federal and state laws and regulations. .

This responsibility is shared by DBHDS and DMAS. The DBHDS Office of Licensing, Office of Human Rights, and DMAS Quality Management Review staff visit providers onsite on an on-going basis to examine records and may talk to staff and individuals receiving services to determine unauthorized use of restraints.

Approaches Used to Detect Unauthorized Use of Restraint and Other Restrictive Interventions

A. Providers shall notify the department whenever a regulatory, accreditation or certification agency or third party payer identifies problems in the provider's compliance with any applicable restraint standard

B. Individuals receiving services or their authorized representatives have a right to complain that the provider has violated any of their rights, including violations of regulations governing the use of restraint.

C. All employees of a provider must, as a condition of employment report all suspected abuse or neglect to the director, including acts such the use of physical or mechanical restraints on a person that is not in compliance with federal and state laws, regulations, and policies, professionally accepted standards of practice, or the person's individualized plan; use of more restrictive services to punish the person or that is not consistent with the individualized service plan; the failure to comply with standards related to monitoring, motion and exercise, meals, fluid intake, use of restroom and bathing.

D. Whenever abuse or neglect are reported: (1) the provider investigates the allegation and makes a determination as to whether the allegation is substantiated, (2) the Human Rights Advocate reviews the findings of the provider's investigation and ensures that its corrective action plan is implemented, as appropriate.

E. The DBHDS Quality Improvement Committee quarterly reviews aggregate data related to the use of alleged and founded abuse and neglect, including abuse and neglect related to the use of restraint and other restrictive procedures.

A Local Human Rights Committee (LHRC) is a group of at least five people appointed by the State Human Rights Committee (SHRC). At least two members are individuals who are receiving, or have received within 5 years of their appointment, Mental Health, Developmental Disability or Substance Abuse services. At least one member must be a health care provider. At least one-third of the members are individuals or family members of individuals. The remaining appointments include persons with interest, knowledge or training in the MH, DD or SA field. There are numerous LHRCs statewide. All DBHDS-licensed providers are required comply with requests of the LHRC to investigate and correct conditions or practices that interfere with the free exercise of individuals' human rights. In this way, there is Virginia citizen oversight of these providers and assurance to the community that DBHDS-licensed providers are held accountable for respecting the human rights of those they support.

LHRCs are required to meet at least quarterly and are responsible for:

1. review of any restriction on the dignity rights of any individual imposed pursuant to 12VAC35-115-100 or freedoms of everyday life pursuant to 12VAC35-115-100 that lasts longer than 7 days or is imposed 3 or more times in a 30 day period,
2. review of provider policies, procedures, practices or behavior plans that could jeopardize the rights of individuals receiving services from that provider,
3. review any behavioral treatment plan that involves the use of restraint or time out, and its independent review committee approval to determine whether the plan is in accordance with the Human Rights Regulations prior to implementation,
4. review behavioral treatment plans involving use of restraint and time out quarterly to determine if the use of restraint has resulted in improvements in functionality of the individual.

If the LHRC finds that a provider's plan violates or has the potential to violate the rights of the individual, the LHRC shall notify and make recommendation to the director of the Office of Human Rights.

The process of oversight includes the following chain of command: all meetings of LHRCs are attended by a Human Rights Advocate (DBHDS staff), who reports to the state Director of Human Rights, who is a member of the DMAS-DBHDS Quality Review Team and can thus relay information to the Medicaid agency at that meeting and at other appropriate junctures.

The Office of Human Rights relies on provider self-report through the DBHDS Computerized Human Rights Information System (CHRIS) within 24 hours of any use of restraint that does not comply with the regulations or approved variances or that results in injury to an individual.

Detection of inappropriate/ineffective, misapplication or unauthorized use of restraints may also occur in the context of a Licensing, Human Rights or DMAS Quality Management Review on-site review of the provider's services. Such events would warrant a plan of correction.

Should a human rights violation complaint be filed by an individual or his/her representative, the provider is responsible for providing to the Human Rights Advocate information on the type, resolution level and findings of the complaint.

Per 12 VAC 35-115-230, DBHDS licensed providers shall submit an annual report of each instance of restraint by the 15th of January each year, or more frequently if requested by DBHDS. Each instance of restraint shall be compiled on a monthly basis and the report shall include:

- a. The type(s) of restraint employed (e.g., physical or mechanical);
- b. The rationale for the use of restraint (e.g., behavioral purpose, medical purpose, protective purpose); and
- c. The duration of the restraint.

In addition, the QRT monitors, through data collected from DBHDS Offices of Licensing and Human Rights, providers that are cited for abuse as a result of unauthorized use of restraints.

DMAS is responsible for monitoring the reporting of and response to critical incidents and events affecting waiver individuals through a review of reports provided by VDSS, as detailed in G-1-e. DMAS also participates (through the QRT) in a discussion of DBHDS Human Rights and Office of Licensing findings.

All providers are required to collect and maintain on a monthly basis, and report at least annually to the DBHDS the following information concerning the use of each instance of restraint:

- a. Type of restraint to include physical restraint (manual hold), mechanical restraint, and pharmacological restraint
- b. Rationale for use to include, behavioral purpose, medical purpose or protective purpose
- c. Duration of restraint used. Duration for behavioral purposes is defined as the actual time the individual is in restraint from the time of initiation of restraint until the time the individual is released. Duration of restraint for medical and protective purposes is defined as the length of the episode as indicated in the order.

Providers shall report each instance of restraint that does not comply with the human rights regulations or approved variance that result in injury to an individual to the individual's authorized representative and the assigned Human Rights Advocate within 24 hours.

Providers shall report each instance of serious injury resulting from the use of restraint to the department's assigned Licensing Specialist with 24 hours of discovery and by phone to the individual's authorized representative.

Appendix G: Participant Safeguards

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions (2 of 3)

b. Use of Restrictive Interventions. *(Select one):*

- ☐ **The state does not permit or prohibits the use of restrictive interventions**

Specify the state agency (or agencies) responsible for detecting the unauthorized use of restrictive interventions and how this oversight is conducted and its frequency:

- ☒ **The use of restrictive interventions is permitted during the course of the delivery of waiver services** Complete Items G-2-b-i and G-2-b-ii.

i. Safeguards Concerning the Use of Restrictive Interventions. Specify the safeguards that the state has in effect concerning the use of interventions that restrict participant movement, participant access to other individuals, locations or activities, restrict participant rights or employ aversive methods (not including restraints or seclusion) to modify behavior. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency.

The following restrictive interventions/actions are prohibited in DBHDS-licensed settings [12 VAC 35-105-820]:

1. Prohibition of contacts and visits with attorney, probation officer, placing agency representative, minister or chaplain;
2. Any action that is humiliating, degrading, or abusive;
3. Subjection to unsanitary living conditions;
4. Deprivation of opportunities for bathing or access to toilet facilities except as ordered by a licensed physician for a legitimate medical purpose and documented in the individual's record;
5. Deprivation of appropriate services and treatment;
6. Deprivation of health care;
7. Administration of laxatives, enemas, or emetics except as ordered by a physician or other professional acting within the scope of his license for a legitimate medical purpose and documented in the individual's record;
8. Limitation on contacts with regulators, advocates or staff attorneys employed by the department or the disAbility Law Center of Virginia.
9. Deprivation of drinking water or food necessary to meet an individual's daily nutritional needs except as ordered by a licensed physician for a legitimate medical purpose and documented in the individual's record;
10. Prohibition on contacts and visits with family or legal guardian except as permitted by other applicable state regulations or by order of a court of competent jurisdiction;
11. Delay or withholding of incoming or outgoing mail except as permitted by other applicable state and federal regulations or by order of a court of competent jurisdiction; and
12. Deprivation of opportunities for sleep or rest except as ordered by a licensed physician for a legitimate medical purpose and documented in the individual's record.

The use of time out (defined as the involuntary removal of an individual by a staff person from a source of reinforcement to a different, open location for a specified period of time or until the problem behavior has subsided to discontinue or reduce the frequency of problematic behavior) is permitted. Parameters for its use are detailed in the DBHDS Human Rights regulations (12 VAC 35-115-110) and the DBHDS Licensing regulations (12 VAC 35-105-830) and include:

1. Providers shall not use time out as a punishment or reprisal or for the convenience of staff.
2. Providers shall not use time out for any behavioral, medical or protective purpose unless other less restrictive techniques have been considered and the ISP includes documentation that these less restrictive techniques did not or would not succeed in reducing or eliminating behaviors that are self-injurious or dangerous to other people or that no less restrictive measure was possible in the event of a sudden emergency.
3. Providers that use time out shall develop written policies and procedures (to be reviewed by Office of Licensing staff in the initial application) that comply with applicable federal and state laws and regulations.
4. Use of time out shall be documented in the individual's record and at a minimum includes:
 - a. Physician's order;
 - b. Date and time;
 - c. Employees or contractors involved;
 - d. Circumstances and reasons for use, including but not limited to other behavior management techniques attempted;
 - e. Duration;
 - f. Type of technique used; and
 - g. Outcomes, including documentation of debriefing of the individual and staff involved following the incident.

Restrictive procedures are only to be used in an emergency or when recommended by a qualified professional ("Providers may use time out in a behavioral treatment plan to address behaviors that present an immediate danger to the individual or others, but only after a licensed professional has conducted a detailed systematic assessment of the behavior and the situations in which the behavior occurs" [12 VAC 35-115-105]). DBHDS strongly encourages the use of a proactive behavioral approach to handling challenging behavior over more restrictive procedures. "Each individual is entitled to be completely free from any unnecessary use of . . . time out." [12 VAC 35-115-110]

Providers must have a policy to state who is qualified/trained to implement time out (“Providers that use . . . time out shall develop written policies and procedures that comply with applicable federal and state laws and regulations . . . and sound therapeutic practice. These policies and procedures shall include . . . trained, qualified staff shall monitor the individual’s medical and mental condition continuously while the restriction is being used.” [12 VAC 35-115-110]). Further, regulations state that, “Providers shall ensure that only staff who have been trained in the proper and safe use of . . . time out techniques may initiate, monitor and discontinue their use.” [12 VAC 35-115-110]

The providers’ duties regarding the use of time out include:

1. Providers shall meet with the individual or his authorized representative upon admission to the service to discuss and document in the individual’s services record, his preferred interventions in the event his behaviors or symptoms become a danger to himself or others and under what circumstances, if any, the intervention may include time out.
2. Providers shall document in the individual’s services record all known contraindications to the use of . . . time out including medical contraindications and a history of trauma and shall flag the record to alert and communicate this information to staff.
3. Providers shall not use time out as a punishment or reprisal for the convenience of staff.
4. Individuals shall be given the opportunity for motion and exercise, to eat at normal meal times and take fluids to use the restroom and to bathe as needed.
5. Each use of time out shall end immediately when criteria for removal are met.
6. Providers shall ensure that no individual is in time out for more than 30 minutes per episode.

Definitions:

"Time out" is defined as the involuntary removal of an individual by a staff person from a source of reinforcement to a different, open location for a specified period of time or until the problem behavior has subsided to discontinue or reduce the frequency of problematic behavior.

"Seclusion" is defined as the involuntary placement of an individual alone in an area secured by a door that is locked or held shut by a staff person, by physically blocking the door, or by any other physical or verbal means, so that the individual cannot leave it.

If conducted in accordance with the regulations, “time out” is not “seclusion”. When time out is used, there should be no verbal directive or physical barrier preventing the individual to leave. The language dictating the proper use of “time out” is noted below:

12VAC35-115-105 B: Providers may use individualized restrictions such as restraint or time out in a behavioral treatment plan to address challenging behaviors that present an immediate danger to the individual or others, but only after a licensed professional has conducted a detailed and systematic assessment of the behavior and the situations in which the behavior occurs. Providers shall document in the individual's services record that the lack of success or probable success of less restrictive procedures attempted or considered, and the risks associated with not treating the behavior, are greater than any risks associated with the use of the proposed restrictions.

DBHDS relies largely on self-reporting to detect any unauthorized use of time out and other restrictive procedures. Reports are typically made to the Human Rights Advocate through the DBHDS web based reporting system known as CHRIS. This is also monitored by site visits by Office of Licensing and Human Rights staff. If it is discovered through a DBHDS Licensing or Human Rights review of a provider’s services or individual/employee report that a restrictive intervention was employed that conflicts with Licensing or Human Rights regulations, the provider will be required to develop a corrective action plan and may face additional sanctions.

In addition, DBHDS employs a contractor (Delmarva) to conduct on-site “Person Centered Reviews” and “Provider Quality Reviews” throughout the year. Delmarva reports all instances of restrictive interventions (including restraints and seclusion) noted to DBHDS. Each quarter the OHR Director or designee will receive and review each incident in the above mentioned report. Any incident of seclusion, as defined in 12 VAC35-115-110, that’s identified will be forwarded to the regional manager for immediate investigation and possible citation for human rights violation.

While self-report is a critical element of the Commonwealth’s safeguards of this aspect, per G.2.a.iii, “The DBHDS Office of Licensing, Office of Human Rights, and DMAS Quality Management Review staff visit providers onsite on an on-going basis to examine records and may talk to staff and individuals receiving services to determine unauthorized use of restraints.” Per G.2.a.i, “If it is discovered through a DBHDS Licensing or Human Rights review of a provider’s services or individual/employee report that an unauthorized use of restraints (or any use of seclusion) occurred and was not properly reported, the provider will be required to develop a corrective action plan and may face additional sanctions.” QMR would also result in a corrective action plan and report to DBHDS for follow-up. These on-site reviews by DBHDS and DMAS staff are a means to identify unauthorized use of restrictive interventions. Information about unauthorized use of restrictive interventions is also collected by the DBHDS contractor Delmarva (see response to question #19), reported to DBHDS and then acted upon.

The use of restrictive interventions is also reviewed by DMAS Quality Management Review staff as they conduct on-site visits. Unapproved/inappropriate uses (e.g., lack of staff training, lack of appropriate procedures, failure to follow established procedures) result in a required corrective action plan for the provider.

- ii. State Oversight Responsibility.** Specify the state agency (or agencies) responsible for monitoring and overseeing the use of restrictive interventions and how this oversight is conducted and its frequency:

The state agencies responsible for overseeing the use of restrictive interventions in DBHDS-licensed agencies are the DBHDS Office of Licensing and Office of Human Rights. Representatives of both of these offices participate on the Quality Review Team with DMAS and thus communicate at least quarterly through that forum. The DBHDS Office of Licensing, Office of Human Rights, and DMAS Quality Management Review staff, visit providers onsite to examine records, and may talk to staff and individuals receiving services to determine unauthorized use of restraints.

Providers that use time out shall develop written policies and procedures (to be reviewed and approved by DBHDS Office of Licensing staff) that comply with applicable federal and state laws and regulations. In addition, providers shall submit all proposed time out policies and procedures to the Human Rights Advocate for review at the initial new provider site visit and comment when proposing changes or upon request. LHRCs are required to meet at least quarterly. If the LHRC finds that a provider's plan violates or has the potential to violate the rights of the individual, the LHRC shall notify and make recommendation to the program director.

DBHDS relies largely on self-reporting to detect any unauthorized or inappropriate use of restrictive procedures. This is also monitored by regular site visits by Office of Licensing and Human Rights staff. If it is discovered through a DBHDS Licensing or Human Rights review of a provider's services or individual/employee report that any of the regulatory safeguards concerning the use of time out were not followed, the provider will be required to develop a corrective action plan and may face additional sanctions. DMAS Quality Management Review staff also monitor incidents of the use of restrictive interventions in completing on-site provider reviews. These are delineated as approved/appropriate or unapproved/inappropriate. The latter are reported to DBHDS Office of Licensing and also result in the requirement that the provider submit a corrective action plan.

DMAS does not pay for devices used for the purpose of restraint.

Approaches Used to Detect Unauthorized Use of Restraint and Other Restrictive Interventions

A. Providers shall notify DBHDS whenever a regulatory, accreditation or certification agency or third party payer identifies problems in the provider's compliance with any applicable restraint standard

B. Individuals receiving services or their authorized representatives have a right to complain that the provider has violated any of the rights, including violations of regulations governing the use of restraint.

C. All employees of a providers must, as a condition of employment report all suspected abuse or neglect to the director, including acts such the use of physical or mechanical restraints on a person that is not in compliance with federal and state laws, regulations, and policies, professionally accepted standards of practice, or the person's individualized plan; use of more restrictive services to punish the person or that is not consistent with the individualized service plan; the failure to comply with standards related to monitoring, motion and exercise, meals, fluid intake, use of restroom and bathing.

D. Whenever abuse or neglect are reported:

- (1) advocates monitor, review, consult and investigate, as appropriate, and
- (2) a trained investigator, investigates the allegation and makes a recommendations to the provider.

Appendix G: Participant Safeguards

Appendix G-2: Safeguards Concerning Restraints and Restrictive Interventions (3 of 3)

c. Use of Seclusion. *(Select one): (This section will be blank for waivers submitted before Appendix G-2-c was added to WMS in March 2014, and responses for seclusion will display in Appendix G-2-a combined with information on restraints.)*

- ☒ The state does not permit or prohibits the use of seclusion

Specify the state agency (or agencies) responsible for detecting the unauthorized use of seclusion and how this oversight is conducted and its frequency:

Providers of services through this waiver are NOT permitted to use seclusion. Because of this, any use of seclusion is viewed as abuse and must be reported as such electronically through the Computerized Human Rights Information System (CHRIS). In order to identify cases for review by OHR, search terms have been established to qualitatively screen the complaints and abuse allegations data in CHRIS in an automated manner (via SQL code). By design, the dataset to be screened by OHR will include false positives as to decrease the probability of missing potential cases. Each quarter the OHR will receive and review a report from the above screening. Any incident of seclusion, as defined in 12 VAC35-115-110, that is identified will be forwarded to the Office of Human Rights Regional Manager for immediate investigation and possible citation for human rights violation.

If, during the course of regular site visits made to providers by staff with DBHDS Offices of Licensing and Human Rights or through individual or provider staff report, it is discovered that a provider has used seclusion, the provider will be required to develop a corrective action plan and may face additional sanctions. DMAS Quality Management Review staff also look for evidence of the unauthorized use of seclusion in completing on-site provider reviews. If detected, such instances are reported to DBHDS Office of Licensing and Office of Human Rights, and the provider is required to submit to DMAS a corrective action plan.

- ☐ **The use of seclusion is permitted during the course of the delivery of waiver services.** Complete Items G-2-c-i and G-2-c-ii.

i. Safeguards Concerning the Use of Seclusion. Specify the safeguards that the state has established concerning the use of each type of seclusion. State laws, regulations, and policies that are referenced are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

ii. State Oversight Responsibility. Specify the state agency (or agencies) responsible for overseeing the use of seclusion and ensuring that state safeguards concerning their use are followed and how such oversight is conducted and its frequency:

Appendix G: Participant Safeguards

Appendix G-3: Medication Management and Administration (1 of 2)

This Appendix must be completed when waiver services are furnished to participants who are served in licensed or unlicensed living arrangements where a provider has round-the-clock responsibility for the health and welfare of residents. The Appendix does not need to be completed when waiver participants are served exclusively in their own personal residences or in the home of a family member.

a. Applicability. Select one:

- ☐ **No. This Appendix is not applicable** (do not complete the remaining items)
- ☒ **Yes. This Appendix applies** (complete the remaining items)

b. Medication Management and Follow-Up

i. Responsibility. Specify the entity (or entities) that have ongoing responsibility for monitoring participant medication regimens, the methods for conducting monitoring, and the frequency of monitoring.

The licensed provider is required to monitor medication administration errors and develop quality assurance activities in relation to medication errors. In Virginia, DBHDS-licensed providers responsible for medication administration and storage shall provide in-service training to employees and consultation to individuals and authorized representatives on issues of basic pharmacology including medication side effects. Staff should be familiar with that information and observant for signs of deleterious side effects. In addition, staff who administer medications are required to learn about side effects as part of the mandatory medication administration training contained in the Board of Nursing Regulations 18VAC90-21-10 through 18VAC90-21-40. Providers shall report such errors in the DBHDS Computerized Human Rights Information System (CHRIS) if licensed medical attention is received. The DBHDS Office of Human Rights would then review and monitor this information if the error is being investigated by the provider as neglect.

The DBHDS Office of Licensing conducts monitoring of medication administration during annual inspections of each provider. The Office of Licensing will take negative action (i.e., issue a provisional license or even pursue the revocation of a provider's license) against a provider due to a pattern of serious, medication related issues. Medication toxicity is considered an injury to the body and, as such, is a reportable event under the Human Rights regulations.

Similarly, DMAS QMR staff are trained to look critically at situations in which individuals are prescribed medications for behavioral reasons or have multiple medications prescribed. These scenarios are reported back to the QMR supervisor for referral to DMAS's Medical Director for additional perspective and guidance.

- ii. Methods of State Oversight and Follow-Up.** Describe: (a) the method(s) that the state uses to ensure that participant medications are managed appropriately, including: (a) the identification of potentially harmful practices (e.g., the concurrent use of contraindicated medications); (b) the method(s) for following up on potentially harmful practices; and, (c) the state agency (or agencies) that is responsible for follow-up and oversight.

DBHDS Office of Licensing staff monitors medication regimens when they conduct their on-site provider reviews. Unannounced inspections may also occur in response to complaints or reports of serious incidents or events. Should potentially harmful practices be identified, the provider is required to develop a Corrective Action Plan and submit it to the reviewing agency. Very serious findings regarding medication practices may lead to a provisional license, which entails monthly monitoring of the provider by Office of Licensing staff. Failure to resolve the issues that led to the provisional license will result in pursuit of license revocation. A provider may hold no more than two consecutive provisional licenses of six months duration each before action to pursue revocation of that license is pursued.

DMAS Quality Management Reviews are conducted on a random sample of providers throughout the year. DMAS may take action to terminate the DMAS provider agreement as a result of its own reviews or the revocation of a provider's license.

Appendix G: Participant Safeguards

Appendix G-3: Medication Management and Administration (2 of 2)

c. Medication Administration by Waiver Providers

i. Provider Administration of Medications. *Select one:*

- ☐ Not applicable. *(do not complete the remaining items)*
- ☒ Waiver providers are responsible for the administration of medications to waiver participants who cannot self-administer and/or have responsibility to oversee participant self-administration of medications. *(complete the remaining items)*

- ii. State Policy.** Summarize the state policies that apply to the administration of medications by waiver providers or waiver provider responsibilities when participants self-administer medications, including (if applicable) policies concerning medication administration by non-medical waiver provider personnel. State laws, regulations, and policies referenced in the specification are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

DBHDS-licensed providers may administer medication. All medications shall be administered in accordance with the physician's instructions and the provider shall document all medications administered, including over-the-counter medications. Licensing regulations [12 VAC 35-105-770 through 12 VAC 35-105-790] require each provider to develop and implement written policies addressing:

- the safe administration, handling, storage and disposal of medications;
- the use of medication orders;
- the handling of packaged medications brought by individuals from home/other residences;
- staff authorized to administer medication and training required for administration of medication (a Virginia Board of Nursing approved Medication Administration Curriculum is required in accordance with 18 VAC 90-21-10 to 40);
- the use of professional samples; and
- the window within which medications can be given in relation to the ordered time of administration.

The provider must maintain a daily log of all medicines received and refused by each individual. This log shall identify the staff who administered the medication, the name of the medication and dosage administered or refused, and the time the medication was administered or refused.

Virginia Department of Health licensed providers of personal assistance and respite services may administer medication. Direct support staff are monitored by a registered nurse, licensed to practice in the Commonwealth of Virginia. The RN is required to provide monthly supervision and oversight to the personal or respite assistant in regards to medication administration, as well as other tasks.

Consumer-directed personal assistance or respite employees may assist with the administration of medication that would typically be self-administered, but because of a disability, they are unable to do so. The individual must be able to supervise and direct the attendant in how to administer the medication. This is monitored by the services facilitator, who is required to either be a registered nurse or establish a relationship with the individual's primary care provider in order to review medical concerns, including medication.

State policy requires that all nonmedical provider personnel responsible for medication administration successfully complete the 32 hour medication course in accordance with the Board of Nursing Regulations 18VAC90-21-10 through 40. Upon completion of the course, personnel who administer medications or supervise self-administration of medication must pass a written and practical exam at the conclusion of training that measures minimum competency in medication administration.

The curriculum shall include a minimum of 32 hours of classroom instruction and practice in the following:

1. Preparing for safe administration of medications to individuals in specific settings by:
 - a. Demonstrating an understanding of the individual's rights regarding medications, treatment decisions and confidentiality.
 - b. Recognizing emergencies and other health-threatening conditions and responding accordingly.
 - c. Identifying medication terminology and abbreviations.
2. Maintaining aseptic conditions by:
 - a. Implementing universal precautions.
 - b. Insuring cleanliness and disinfection.
 - c. Disposing of infectious or hazardous waste.
3. Facilitating individual self-administration or assisting with medication administration by:
 - a. Reviewing administration records and prescriber's orders.
 - b. Facilitating individual's awareness of the purpose and effects of medication.
 - c. Assisting the individual to interpret prescription labels.

- d. Observing the five rights of medication administration and security requirements appropriate to the setting.
 - e. Following proper procedure for preparing medications.
 - f. Measuring and recording vital signs to assist the individual in making medication administration decisions.
 - g. Assisting the individual to administer oral medications.
 - h. Assisting the individual with administration of prepared instillations and treatments of:
 - (1) Eye drops and ointments.
 - (2) Ear drops.
 - (3) Nasal drops and sprays.
 - (4) Topical preparations.
 - (5) Compresses and dressings.
 - (6) Vaginal and rectal products.
 - (7) Soaks and sitz baths.
 - (8) Inhalation therapy.
 - (9) Oral hygiene products.
 - i. Reporting and recording the individual's refusal to take medication.
 - j. Documenting medication administration.
 - k. Documenting and reporting medication errors.
 - l. Maintaining client records according to facility policy.
 - m. Sharing information with other staff orally and by using documents.
 - n. Storing and securing medications.
 - o. Maintaining an inventory of medications.
 - p. Disposing of medications.
4. Facilitating the individual's self-administration or assisting with the administration of insulin. Instruction and practice in the administration of insulin shall be included only in those settings where required by individual needs and shall include:
- a. Cause and treatment of diabetes;
 - b. The side effects of insulin;
 - c. Preparation and administration of insulin; and
 - d. Signs of severe hypoglycemia and administration of glucagon.
5. Facilitating individual self-administration or assisting with the administration of auto-injectable epinephrine pursuant to an order issued by the prescriber for a specific individual in a facility licensed by DBHDS under the provisions of subsection D of section 54.1-3408 of the Code of Virginia.
6. Pursuant to subsection L of § 54.1-3408 of the Code of Virginia, the board requires successful completion of the curriculum approved by the DBHDS for unlicensed persons to administer medication via a gastrostomy tube to a person receiving services from a program licensed by the DBHDS.

iii. Medication Error Reporting. *Select one of the following:*

- ☐ **Providers that are responsible for medication administration are required to both record and report medication errors to a state agency (or agencies).**

Complete the following three items:

- (a) Specify state agency (or agencies) to which errors are reported:

- (b) Specify the types of medication errors that providers are required to *record*:

(c) Specify the types of medication errors that providers must *report* to the state:

- Ⓒ **Providers responsible for medication administration are required to record medication errors but make information about medication errors available only when requested by the state.**

Specify the types of medication errors that providers are required to record:

DBHDS-licensed providers are required to record the following medication errors:

- (1) the wrong medication is given to an individual,
- (2) the wrong individual is given the medication,
- (3) the wrong dosage is given to an individual,
- (4) medication is given to an individual at the wrong time or not at all, or
- (5) the proper method is not used to give the medication to the individual.

In the event of medication errors or adverse drug reactions in DBHDS-licensed agencies, regulations [12 VAC 35-105-780] require that:

- first aid shall be administered if indicated;
- staff shall contact a poison control center or the appropriate medical personnel and take actions as directed;
- the individual's physician shall be notified as soon as possible;
- actions taken by staff shall be documented;
- errors must be recorded in the individual's medication log; and
- the provider shall review medication errors at least quarterly.

- iv. State Oversight Responsibility.** Specify the state agency (or agencies) responsible for monitoring the performance of waiver providers in the administration of medications to waiver participants and how monitoring is performed and its frequency.

For DBHDS-licensed providers, monitoring of medication administration occurs through the DBHDS Office of Licensing, which reviews each provider agency annually. Licensing specialists review medication administration records at least annually during announced and unannounced reviews. Providers failing to comply with state regulations or their own policies regarding medication administration are cited and must submit and implement corrective action plans.

DMAS Quality Management Review staff also review medication regimens and medication administration records when they conduct on-site provider reviews. Identification of potential harmful practices result in the requirement that the provider develop a corrective action plan to be submitted to DMAS. Very serious findings regarding medication practices may lead to a referral to DBHDS Office of Licensing or Virginia Department of Health, depending on the licensing entity. DMAS may take action to terminate the DMAS provider agreement as a result of its own reviews or the revocation of a provider's license due to egregious health and safety concerns.

Proposed updates to waiver regulations will require providers with a history of noncompliance with regulations, as evidenced by multiple citations by either DBHDS Office of Licensing or DMAS QMR, resulting in the need for a corrective action plan in key identified areas such as health (which could include medication errors), safety, or failure to address the identified needs of the individual, will be required to undergo mandatory training and technical assistance in the specific area(s) of noncompliance. Failure to complete the mandatory training or identified technical assistance may result in referral to DMAS Provider Integrity or termination of the provider's Medicaid participation agreement.

Appendix G: Participant Safeguards

Quality Improvement: Health and Welfare

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Health and Welfare

The state demonstrates it has designed and implemented an effective system for assuring waiver participant health and welfare. (For waiver actions submitted before June 1, 2014, this assurance read "The State, on an ongoing basis, identifies, addresses, and seeks to prevent the occurrence of abuse, neglect and exploitation.")

i. Sub-Assurances:

- a. **Sub-assurance: The state demonstrates on an ongoing basis that it identifies, addresses and seeks to prevent instances of abuse, neglect, exploitation and unexplained death.** (Performance measures in this sub-assurance include all Appendix G performance measures for waiver actions submitted before June 1, 2014.)

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

- 2. Number and percentage of substantiated cases of abuse/neglect/exploitation for which the required corrective action was verified by DBHDS as being implemented.**
N= Number of substantiated cases of abuse/neglect/exploitation for which the required corrective action was verified as being implemented within 90 days. D= Total number of substantiated cases of abuse/neglect/exploitation.

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

Subassurance (1) PM # 1's reference to "in accordance with the regulations" includes the following considerations: that the investigation was conducted by a person properly trained to conduct investigations with documentary evidence of witness interviews and/or investigations of other relevant factors, notification with documentary evidence of witness interviews and/or investigations of other relevant factors, notification to the State within 10 working days and a positive determination by DBHDS on the efficacy of findings.

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

As DBHDS Office of Licensing or DMAS Quality Management Review (QMR) staff identifies problems with any of the above measures for a given provider, they each require a corrective action plan to be developed and implemented by that provider. Failure to do so jeopardizes the provider's license/Medicaid provider agreement. Serious violations may be referred to DMAS's Provider Integrity unit for payment retraction.

Individual providers with systemic problems will be targeted for technical assistance/training from DBHDS. These events and their results will be documented in a quarterly report of technical assistance provided in response to Office of Licensing and DMAS identified issues.

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Health and Welfare that are currently non-operational.

☒ No

☐ Yes

Please provide a detailed strategy for assuring Health and Welfare, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix H: Quality Improvement Strategy (1 of 3)

Under §1915(c) of the Social Security Act and 42 CFR §441.302, the approval of an HCBS waiver requires that CMS determine that the state has made satisfactory assurances concerning the protection of participant health and welfare, financial accountability and other elements of waiver operations. Renewal of an existing waiver is contingent upon review by CMS and a finding by CMS that the assurances have been met. By completing the HCBS waiver application, the state specifies how it has designed the waiver's critical processes, structures and operational features in order to meet these assurances.

- Quality Improvement is a critical operational feature that an organization employs to continually determine whether it operates in accordance with the approved design of its program, meets statutory and regulatory assurances and requirements, achieves desired outcomes, and identifies opportunities for improvement.

CMS recognizes that a state's waiver Quality Improvement Strategy may vary depending on the nature of the waiver target population, the services offered, and the waiver's relationship to other public programs, and will extend beyond regulatory requirements. However, for the purpose of this application, the state is expected to have, at the minimum, systems in place to measure and improve its own performance in meeting six specific waiver assurances and requirements.

It may be more efficient and effective for a Quality Improvement Strategy to span multiple waivers and other long-term care services. CMS recognizes the value of this approach and will ask the state to identify other waiver programs and long-term care services that are addressed in the Quality Improvement Strategy.

Quality Improvement Strategy: Minimum Components

The Quality Improvement Strategy that will be in effect during the period of the approved waiver is described throughout the waiver in the appendices corresponding to the statutory assurances and sub-assurances. Other documents cited must be available to CMS upon request through the Medicaid agency or the operating agency (if appropriate).

In the QIS discovery and remediation sections throughout the application (located in Appendices A, B, C, D, G, and I) , a state spells out:

- The evidence based discovery activities that will be conducted for each of the six major waiver assurances; and
- The *remediation* activities followed to correct individual problems identified in the implementation of each of the assurances.

In Appendix H of the application, a state describes (1) the *system improvement* activities followed in response to aggregated, analyzed discovery and remediation information collected on each of the assurances; (2) the correspondent *roles/responsibilities* of those conducting assessing and prioritizing improving system corrections and improvements; and (3) the processes the state will follow to continuously *assess the effectiveness of the OIS* and revise it as necessary and appropriate.

If the state's Quality Improvement Strategy is not fully developed at the time the waiver application is submitted, the state may

provide a work plan to fully develop its Quality Improvement Strategy, including the specific tasks the state plans to undertake during the period the waiver is in effect, the major milestones associated with these tasks, and the entity (or entities) responsible for the completion of these tasks.

When the Quality Improvement Strategy spans more than one waiver and/or other types of long-term care services under the Medicaid state plan, specify the control numbers for the other waiver programs and/or identify the other long-term services that are addressed in the Quality Improvement Strategy. In instances when the QIS spans more than one waiver, the state must be able to stratify information that is related to each approved waiver program. Unless the state has requested and received approval from CMS for the consolidation of multiple waivers for the purpose of reporting, then the state must stratify information that is related to each approved waiver program, i.e., employ a representative sample for each waiver.

Appendix H: Quality Improvement Strategy (2 of 3)

H-1: Systems Improvement

a. System Improvements

- i.** Describe the process(es) for trending, prioritizing, and implementing system improvements (i.e., design changes) prompted as a result of an analysis of discovery and remediation information.

The Department of Medical Assistance Services (DMAS) Quality Management Review (QMR) team, and the Department of Behavioral Health and Developmental Services (DBHDS) divisions of Developmental Services (DDS) and Quality Management (QMD) are responsible for oversight and improvement of the quality of services delivered under the DD waivers. Performance data is collected across a broad range of monitoring activities, including licensing and human rights investigations and inspections; quality management reviews (QMR); serious incident reporting; case management data reporting; quality service reviews (QSR); mortality reviews; post-move monitoring; and reports on Community Services Board (CSB) performance.

The Offices of Licensing and Human Rights assure the health and welfare of individuals through the oversight and monitoring of licensed providers to assure that providers are operating within regulatory requirements, are providing services that meet individuals' needs in a safe and secure manner, and that individuals' human rights are respected.

Performance measure data is reviewed by the Quality Review Team (QRT), which meets quarterly, and the DBHDS Quality Improvement Committee (QIC), which meets monthly. The QRT reviews data related to the waiver assurances, while the QIC reviews the quality of community services provided to individuals with DD. Information flows freely between the QIC and the QRT and is used to determine priorities and oversee the implementation of system changes. Representatives from DMAS and DBHDS participate on the QRT and QIC.

QRT

The QRT is co-led by DMAS and DBHDS and includes staff from DMAS QMR and the DBHDS Division of Developmental Services (DDS), Office of Human Rights (OHR), Office of Licensing (OL), and Division of Quality Management and Development (QMD)

Performance measure data related to each of the waiver assurances is reviewed. When performance is not meeting goals, the team reviews data from each unit noted above to monitor progress toward attainment of performance measures. The team also reviews data from:

DBHDS OHR – reports on performance measures and other data related to the health and welfare of waiver recipients. This includes allegations of abuse and neglect reported through the Computerized Human Rights Information System (CHRIS), use of seclusion and restraint, and implementation of corrective action plans. DBHDS OL - staff conduct reviews on-site, unannounced inspections, as well as investigations of serious incidents. OL reports on provider reviews conducted during the last quarter. These reports address any deficiencies found and plans of correction issued.

DBHDS DDS - reports on CSB performance in the following area:

*Timely completion of individuals' VIDES (level of care tool).

DBHDS QMD - reports on the efficacy of case management services and the support activities being met in individuals' ISPs.

DMAS QMR - aggregates data associated with waiver performance measures from their ongoing provider reviews.

DMAS QMR conducts on-site and desk audit reviews. When an issue regarding an individual's services and supports is identified, DMAS takes action at the individual level. For example, if an individual is found not to have had services delivered as required in the support plan, DMAS instructs the provider to re-evaluate the needs of the individual and ensure that services are delivered accordingly. The provider must complete a corrective action plan (CAP) to explain how the matter will be remediated. DMAS then follows up on all CAPs.

The information collected from these reviews is presented on a quarterly basis to the QRT. The team reviews this aggregated data, recommends remediation, and monitors for changes in the data. This can be done through methods such as: retraining of providers; IT system enhancements for the collection of data; review of regulations to identify needed changes; and review of policy manuals for changes.

The team identifies barriers to attainment and the steps needed to address them. These remediation steps are in addition to any provider or individual remediation. Remediation can include: statewide or regional provider

training (DBHDS Provider Development staff may provide targeted training and technical assistance as part of remediation efforts), policy revisions, strengthening health and safety for the individual receiving supports, making changes to systems (e.g., payment, IT), change in licensing status, targeted QMR, payment retraction or ceasing referrals to providers.

QIC

The DBHDS QIC meets monthly and focuses on the following key performance areas: health and well-being, community integration/inclusion, person centeredness, and provider capacity/competence

The QIC is chaired by the Commissioner of DBHDS and includes representatives from Quality Management, Developmental Services, DMAS, training centers, community providers, CSBs, and Regional Quality Councils. QIC subcommittees include 5 Regional Quality Councils, Mortality Review Committee, and the Risk Management Committee.

Mortality Review Committee (MRC) - monitors the mortality among individuals with developmental disabilities who fall under the auspices of DBHDS. This includes data analysis and information review for individuals of all ages whose death was reported while receiving Medicaid DD waiver services or services from state facilities.

The DBHDS supports a culture that seeks to reduce risk and promote safety in the life of every individual served. The DBHDS mortality review process enhances quality by providing information that triggers corrective action to reduce future risk and affords a retrospective examination that results in actions to decrease adverse events and lead to continuous improvement. This process generates review and changes in policy and procedure, development of protocols, best practice standards, focused training, and strategies for system improvement.

The membership of the MRC includes the Department's Medical Director, who also serves as the Committee Chair, the Assistant Commissioner for Quality Management and Development, the Director of the Office of Integrated Health, the Associate Director of the Office of Licensing, the Director of Data Quality & Visualization, the Director of Quality and Risk Management, and others as designated by the Committee Chair.

Following review of a death, the Committee may take one or more of the following actions:

- Request additional information relevant to the death from the provider or others;
- Identify safety issues that require action to reduce the risk of future adverse events;
- Communicate to the provider issues identified as part of the mortality review;
- Issue a Safety and Quality Alert to all providers regarding risks identified as part of a single mortality review or a pattern of findings;
- Establish a subcommittee to study or take action to address an identified risk;
- Make recommendations to the DBHDS Quality Improvement Committee to reduce the risk of death, based on a single finding or a pattern of findings;
- Take other actions deemed necessary to reduce the risk to individuals served in community and facility programs.

Issuing Health, Safety and Quality Alerts is one approach the MRC has developed to educate providers about risk factors and risk reduction strategies. These alerts are distributed to providers via email and posted on the DBHDS website. Some of the past alerts' topics include choking and constipation risks, medication administration issues, and information about specific medical conditions or experiences. The topics of Safety Alerts are available at: <http://www.dbhds.virginia.gov/office-of-integrated-health/safety-alerts-archive>

Data quality and monitoring efforts are led by the Office of Data Quality & Visualization. At least annually, the MRC conducts a trend analysis of mortality data to identify patterns at the individual service-delivery and system levels. The MRC reports its findings to the QIC and the Commissioner for further assessment and recommendations. A new process for collection of Committee determinations is related to whether a cause of death, or a factor in the death, was potentially preventable. The MRC will begin capturing three additional fields for the SFY2018 death reviews.

A. An indicator of whether the cause of death, or a factor in the death¹, was potentially preventable².

1. Factor in the death: In an effort to identify, address and prevent unexpected deaths the MRC is not only considering whether actions leading to the death itself were preventable but also whether there were co-morbid conditions that were potentially preventable. For example if an individual had an

unexpected heart attack that was not deemed potentially preventable but had a Stage 2 Decubitus ulcer, data would be captured that there was a potentially preventable factor. This allows for the collection of data for prevention efforts of information that may otherwise be lost.

2. Potentially Preventable: The actions and events immediately surrounding the individual's death, that may be related to deficits in the timeliness or absence of:

- a. Coordination of care (including medication management)
- b. Access to care, including delay in seeking treatment
- c. Execution of established protocols
- d. Assessment of the individual's needs or changes in status.

B. A narrative text of the potentially preventable factor

C. A narrative of the follow-up action

Regional Quality Councils (RQC) - work in conjunction with the Quality Improvement Committee (QIC) to assess relevant data, identify trends, and recommend regional quality improvement initiatives or responsive actions in the region.

The Regional Quality Councils focus on improvement of the quality of services for individuals with developmental disabilities who 1) are currently residing at any of the Training Centers, 2) are receiving DD Waiver services, 3) meet the criteria for the DD waiver wait list and are receiving services under the Commonwealth Coordinated Care – Plus waiver, or 4) currently reside in a nursing home or ICF/IID.

The functions of the RQCs are as follows:

1. To systematically review regional data generated from quality management reports; all data shall be aggregate and contain no protected health information.
2. To assess the data as it relates to the specific region.
3. To identify trends in the region.
4. To monitor quality improvement efforts.
5. To plan and recommend regional quality improvement initiatives or responsive actions in the region for submission to the DBHDS QIC.

The RQC' voting membership includes individuals experienced in data analysis (DBHDS staff), residential, day support, employment, and case management providers, CSB quality assurance/quality improvement staff, individuals receiving services (self-advocates), family members, and may include other relevant stakeholders. The work of the RQC is directed by the DBHDS QIC and each RQC meets quarterly to carry out the functions assigned by the DBHDS QIC.

Risk Management Review Committee (RMRC) - The goal of the Risk Management Review Committee is to improve quality and safety by learning from past performance, errors, and near misses, and to gain awareness of areas of vulnerability in practice and to improve these areas, thereby creating a safer environment for the delivery of services.

*See the Main- Optional section for additional information. Scroll to the bottom below the public comment data.

b. System Design Changes

- i. Describe the process for monitoring and analyzing the effectiveness of system design changes. Include a description of the various roles and responsibilities involved in the processes for monitoring & assessing system design changes. If applicable, include the state's targeted standards for systems improvement.

Recommendations for system design changes may be made to both the QRT and the QIC. Recommendations are based upon specific performance measure data and in addition to specific interventions, may also include a timeline for implementation, improvements that are expected to occur, and the specific data that will be measured to assess the effectiveness of system design changes.

The DBHDS Office of Data Quality and Visualization (DQV) is a resource for assisting staff in developing a plan to monitor and analyze the effectiveness of system changes. DQV assists programs to develop questions and further plan their analyses. This process has been facilitated by the DBHDS OneSource Data Warehouse providing ease of access to a wide breadth of information about providers and individuals receiving services. In an effort to exercise the versatility of the process and establish models for ongoing quality monitoring for program areas, the DQV regularly applies a process established by Avedis Donabedian, a physician and founder of the study of quality in health care and medical outcomes research, to the development of its quality monitoring efforts.

General Steps in Quality Monitoring and Improvement:

1. Determining what to monitor
2. Determining priorities in monitoring
3. Selecting an assessment approach
4. Formulating criteria and standards
5. Obtaining the necessary information
6. Choosing when and how to monitor
7. Constructing a monitoring system
8. Bringing about behavior change

DQV assists in establishing a plan for monitoring data which is then reported back to the QRT and/or the QIC. Results are evaluated over time to determine whether or not the system changes are having their intended impact. When the desired outcomes are not achieved, staff will seek input from relevant stakeholders to determine additional barriers that are impacting performance and identify and implement additional actions. The QRT and QIC are responsible for monitoring and assuring the successful implantation of system change.

Information about recommended systems changes and their outcomes are communicated to stakeholders through a variety of forums including; quarterly RQC meetings, QIC meetings, quarterly Settlement Agreement Stakeholder meetings, as well as annual quality improvement reports posted on the DBHDS website.

- ii. Describe the process to periodically evaluate, as appropriate, the Quality Improvement Strategy.

The quality improvement strategy is evaluated on an annual basis by the QRT through the review of performance indicators and data collected regarding remediation success/failure, as well as an assessment regarding the adequacy of the current performance measures. In conducting this review, the QRT incorporates feedback from the QIC. The annual review may result in changes to performance measures, priorities, data collection and/or performance measures, or modifications to committees or the roles of key entities.

Appendix H: Quality Improvement Strategy (3 of 3)

H-2: Use of a Patient Experience of Care/Quality of Life Survey

a. Specify whether the state has deployed a patient experience of care or quality of life survey for its HCBS population in the last 12 months (*Select one*):

- ☐ No
- ☒ Yes (*Complete item H.2b*)

b. Specify the type of survey tool the state uses:

- ☐ HCBS CAHPS Survey :
- ☒ NCI Survey :
- ☐ NCI AD Survey :
- ☐ Other (*Please provide a description of the survey tool used*):

Appendix I: Financial Accountability

I-1: Financial Integrity and Accountability

Financial Integrity. Describe the methods that are employed to ensure the integrity of payments that have been made for waiver services, including: (a) requirements concerning the independent audit of provider agencies; (b) the financial audit program that the state conducts to ensure the integrity of provider billings for Medicaid payment of waiver services, including the methods, scope and frequency of audits; and, (c) the agency (or agencies) responsible for conducting the financial audit program. State laws, regulations, and policies referenced in the description are available to CMS upon request through the Medicaid agency or the operating agency (if applicable).

DMAS requires all providers of services to comply with state and federal laws and regulations and holds them accountable for this. While DMAS does not impose an independent audit requirement for participating providers, provider agencies may be required to obtain an independent audit as a part of the licensing process through DBHDS. Some agencies are exempt from licensing according as agencies approved for payment by the DMAS per section 32.1-162.8 of the Code of Virginia. Providers exempt from licensing remain subject to complaint investigations in keeping with state law. The provider is responsible to provide DMAS all documentation that will verify services were rendered as billed. This would entail both medical and personnel records.

DMAS' Medicaid Management Information System (MMIS) is an automated claims processing and review system. The MMIS system has built in controls (system edits) to ensure provider billings are in accordance with state and federal regulations prior to claims being approved for payment. Currently there are over 1,550 system edits in the Virginia MMIS, which rejects duplicate claims, and claims for services or service levels that are not authorized under Medicaid policy as example. As a part of claims processing, DMAS also utilizes two products that consists of regularly-updated system edits which prevent improper payments. These packages are Correct Coding Initiative edits which were developed by CMS and Claim Check, a commercial software product. Changes or updates to the MMIS system edits are submitted on an Information Service Request form and reviewed by a MMIS change committee. Upon approval by the committee, the changes or updates are programmed. The MMIS is updated quarterly to include the CMS updates to the National Correct Coding Initiative (NCCI) edits. Other covered service and service limit system edits are continually updated as needed due to changes to Virginia Medicaid policies.

DMAS ensures financial integrity and accountability through multiple processes occurring across several divisions. The Fiscal and Purchases Division is responsible for the timely and accurate processing and recording of financial transactions to include collection of provider and recipient overpayments. The fiscal division is charged with recovering overpayments and verifying proper documentation of the amounts. This division does not perform reviews.

The Internal Audit Division reviews claims for correct billing performing tests on claims in the MMIS for patterns that are anomalies across provider types. The Division focuses on the accurate processing of claims through MMIS to identify possible patterns of fraud, waste abuse. This division uses concurrent auditing of claims to uncover any problems in the waiver, using over 300 checks on a continuous basis before claims are paid. They also review claims after they are paid to identify irregularities in payment patterns.

The Division of Program Integrity conducts financial reviews utilizing internal staff as well as contractors acquired through a competitive procurement process. The Provider Review Unit (PRU) in the Division of Program Integrity investigates allegations of provider fraud and abuse that result in overpayments of Medicaid benefits. The PRU receives allegations from providers, state agencies, law enforcement agencies, individuals, and other DMAS units. These allegations typically involve misspent funds involving fee-for-service provider issues such as: billing for a service using a code that the provider has previously been instructed not to use, billing for more expensive services or procedures than were actually provided or performed (commonly known as up-coding), billing for services that were never rendered, performing medically unnecessary services, and misrepresenting non-covered treatments as medically necessary covered treatments.

The PRU and DMAS contractors could potentially review any provider group, though all audits are designated to specific provider types and services through an annual comprehensive risk-based audit plan. On average, 60-65 audits per year by PRU and DMAS contractors are designated specifically for waiver services. The PRU utilizes JAVA Surveillance and Utilization Review System (J-SURS). This claims-based data mining software packages is used to determine which providers are exceeding the billing norms for their peer groups. Contractors use proprietary algorithms to select providers to review and claims to review for those providers.

The division monitors provider activity; to identify potentially fraudulent or abusive billing practices; develop corrective action plans; and when necessary recommend policy changes to prevent abusive billing practices; and to refer abusive providers to other state agencies. Cases are referred to Medicaid Fraud Control Unit (MFCU) when potentially egregious abuse is identified. The PRU supervisor serves as the liaison to the MFCU and is responsible for reviewing and submitting all fraud referrals from DMAS and its contractors. The MFCU determines if the case warrants further investigation as fraud.

The Program Integrity Division and contract auditors conduct almost all reviews as desk reviews of medical and personnel records to determine if services were provided as billed. In certain cases, such as those where fraud is suspected, record collection will be conducted on-site. In addition to ensuring that services are appropriate and adequately documented, these reviews also determine if the services were provided by qualified staff members.

PRU Cases selected for review are tracked in an Oracle database system. Contractor cases are tracked using a

standardized case tracking spreadsheet. Using this data, management reports can be generated detailing the status of each review. Reviews look at a focused sample of records from a 12-month period. The sample is selected using all claims of a selection of recipients for that 12-month period, with a focus on recipients with claims that are most likely to contain overpayments. After reviewing the records, the PRU Analyst completes the Integrity Review and closes the case if there is no abuse (no billing errors are identified) and send them correspondence indicating such. When billing errors have been identified, an overpayment letter is sent to the provider and recovery is sought regardless of the dollar value. If the provider disagrees, they have the right to appeal.

Overpayments are recovered either by submission of a check from the provider, or through offsets of future provider payments from our MMIS claims payment system. To ensure that all provider overpayments are handled appropriately to meet Federal timelines, each month, the PRU technical support staff produces a report, Authorization to Recover Provider Overpayment Log, from the Fiscal database, and the PRU supervisor checks the overpayments against the monthly submissions to Fiscal. In addition, the report goes to PRU analysts to double check against their case activity. If an overpayment is the result of an inappropriate and/or fraudulent billing/claim, the process is to set-up a receivable (AR) in Oracle Accounting system at discovery/notification of improper payment. Fiscal division is notified by Program Integrity and/or Office of the Attorney General. DMAS performs due diligence either by requesting a check from the provider and/or establishing a negative balance in MMIS to recoup the outstanding AR balance from future claim remittances. Any funds recouped are applied to a Provider's outstanding balance. The federal share of the balance is returned to CMS accordingly.

The provider has four opportunities to provide input to the audit: Response to Preliminary Investigation, Request for an Informal Fact Finding Conference (IFFC), Formal Evidential Hearing, and Circuit Court. All are dictated by State regulations and handled by the Department's Appeals Division.

DMAS and DBHDS undergo an annual independent audit through the Virginia Auditor of Public Accounts, which includes a review of the waiver, to ensure compliance with state and federal accounting practices. The Virginia Auditor of Public Accounts is the entity responsible for conducting the periodic independent audit of the waiver program under the provisions of Single Audit Act. DMAS is also subject to audits from CMS through the medical integrity audits.

Whatever the FFP was at the time of the original payment is the rate used to calculate the FFP (federal share). CMS requires states to return the federal share of any overpayment within 360 days/year of discovery. DMAS has elected to return the federal share of any overpayments at one year from discovery, regardless if we have collected the outstanding balance or not for compliance reasons. If nothing is collected by the one year mark, the federal share of the overpayment is returned to CMS using state funds.

Appendix I: Financial Accountability

Quality Improvement: Financial Accountability

As a distinct component of the States quality improvement strategy, provide information in the following fields to detail the States methods for discovery and remediation.

a. Methods for Discovery: Financial Accountability Assurance:

The State must demonstrate that it has designed and implemented an adequate system for ensuring financial accountability of the waiver program. (For waiver actions submitted before June 1, 2014, this assurance read "State financial oversight exists to assure that claims are coded and paid for in accordance with the reimbursement methodology specified in the approved waiver.")

i. Sub-Assurances:

a. Sub-assurance: The State provides evidence that claims are coded and paid for in accordance with the reimbursement methodology specified in the approved waiver and only for services rendered.

(Performance measures in this sub-assurance include all Appendix I performance measures for waiver actions submitted before June 1, 2014.)

Performance Measures

For each performance measure the State will use to assess compliance with the statutory assurance (or sub-assurance), complete the following. Where possible, include numerator/denominator.

For each performance measure, provide information on the aggregated data that will enable the State to analyze and assess progress toward the performance measure. In this section provide information on the method by which each source of data is analyzed statistically/deductively or inductively, how themes are identified or conclusions drawn, and how recommendations are formulated, where appropriate.

Performance Measure:

1. Number and percent of adjudicated waiver claims that were submitted and reimbursed using the correct rate in accordance with the approved DMAS rate schedule. N: Number of adjudicated claims reimbursed with the approved rate. D: Total number of adjudicated claims

- ii. If applicable, in the textbox below provide any necessary additional information on the strategies employed by the State to discover/identify problems/issues within the waiver program, including frequency and parties responsible.

b. Methods for Remediation/Fixing Individual Problems

- i. Describe the States method for addressing individual problems as they are discovered. Include information regarding responsible parties and GENERAL methods for problem correction. In addition, provide information on the methods used by the state to document these items.

If DMAS staff identifies problems with the above measure for providers, they require a corrective action plan to be developed and implemented by the provider. Failure to do so jeopardizes the Medicaid provider agreement.

If claims have been paid inappropriately, referral is made to DMAS Program integrity Division for collection and overpayment.

Individual providers with systemic problems will be targeted for technical assistance/training from DMAS. These events and their results will be documented in quarterly reports of technical assistance.

The provider has four opportunities to provide input to the audit: Request for Reconsideration, Request for an Information Fact Finding Conference (IFFC), Formal Evidential Hearing, and Circuit Court. All are dictated by State regulations and handled by the Department's Appeals Division. To address the education letter upon receipt, the provider has thirty days to submit additional documentation or information to explain their understanding of the regulations and policy. An exit conference is held telephonically with provider. Preliminary report is revised if applicable and then the final report is written. A total of 99 referrals were made in the last fiscal year. This includes both provider and recipient referrals. DMAS does not perform on-site, unannounced visits for payment review. DMAS QMR staff reviews claims submitted by selected providers based on a statistically valid sample of 95/5 confidence level.

- ii. **Remediation Data Aggregation**
Remediation-related Data Aggregation and Analysis (including trend identification)

Responsible Party (check each that applies):	Frequency of data aggregation and analysis (check each that applies):

c. Timelines

When the State does not have all elements of the Quality Improvement Strategy in place, provide timelines to design methods for discovery and remediation related to the assurance of Financial Accountability that are currently non-operational.

☒ **No**

☐ **Yes**

Please provide a detailed strategy for assuring Financial Accountability, the specific timeline for implementing identified strategies, and the parties responsible for its operation.

Appendix I: Financial Accountability

I-2: Rates, Billing and Claims (1 of 3)

a. Rate Determination Methods. In two pages or less, describe the methods that are employed to establish provider payment rates for waiver services and the entity or entities that are responsible for rate determination. Indicate any opportunity for public comment in the process. If different methods are employed for various types of services, the description may group services for which the same method is employed. State laws, regulations, and policies referenced in the description are available upon request to CMS through the Medicaid agency or the operating agency (if applicable).

Rate determination and oversight is a shared responsibility between the Department of Medical Assistance Services (DMAS) and the Department of Behavioral Health and Developmental Services (DBHDS). The DMAS Provider Reimbursement Division ensures that rates are based on the approved methodologies; are in accordance with authorized funding; and consistent with economy, efficiency, and quality of care' and are sufficient to attract a sufficient number of providers. A complete listing of all current waiver services rates are maintained on the DMAS Web site (http://www.dmas.virginia.gov/Content_pgs/pr-rsetting.aspx) and is available to the public for review. Individuals may call DMAS to request a written copy of the rate schedule.

Services are reimbursed on a prospective, fee-for-service basis, with the exceptions discussed below. Rates vary by region with higher rates paid for services in Northern Virginia to account for higher wage and other costs compared to the rest of the Commonwealth. All providers – including public providers – are paid the same rates for waiver services. There is no rate reconciliation methodology for public providers or Medicaid cost report for these services. In general, rates are adequate to attract a sufficient number of providers to furnish services to individuals.

DBHDS engaged Burns & Associates, Inc. (B&A), a national consultant experienced in developing provider reimbursement rates for home and community based services, to conduct a rate study. The rate study process began in 2014 and the same process is used in new rates. The rate study encompassed several activities, including varied opportunities for public comment.

- DBHDS identified policy goals that could be affected by the rates. These goals included providing adequate funding for direct support professionals' wages, benefits, and training to reduce turnover and professionalize the workforce; moving away from one-size-fits-all rates to better support members across the continuum of needs, including those transitioning from institutional settings; and encouraging individualized and person-centered supports, consistent with the home and community based services rule.*
- A rate-setting advisory group comprised of providers was convened several times during the rate-setting process to serve as a 'sounding board' to discuss project goals and materials.*
- All providers were invited to complete a survey related to their service design and costs. A second survey directed towards consumer-directed services facilitation providers was administered in 2016 in order to finalize those rate models.*
- Benchmark data was identified and researched, including the Bureau of Labor Statistics' cross-industry wage and benefit data as well as rates for comparable services in other waiver programs.*
- Proposed rate models that outline the specific assumptions related to each category of costs were developed.*
- Analysis was conducted to use Supports Intensity Scale® (SIS®) assessment data to create 'tiered' rates for residential and day habilitation services to recognize the need for more intensive staffing for individuals with more significant needs. Specifically, each member is assigned to one of seven levels based on assessment results in the areas of home living support needs, community living support needs, health and safety needs, medically-related support needs, and behaviorally-related support needs. These seven levels, in turn, are cross-walked to four rate categories: low needs (level 1), modest needs (level 2), moderate to significant needs (levels 3 and 4), and highest needs (levels 5, 6, and 7).*
- The proposed rate models and supporting documentation were posted on a dedicated website. Providers and other stakeholders were notified of the posting via email. A webinar was conducted and recorded to explain the proposals. A dedicated email address was created to accept comments and suggestions for a period of approximately one month. DBHDS reviewed every comment submitted and prepared a written document summarizing its response to each, including any resulting revision to the rate models or an explanation for why no change was made. This non-required comment period occurred before the proposed rates were formally incorporated into the waiver application. The entire application, including the rates, was then subject to a formal comment period overseen by DMAS.*

Based on the rate study, B&A developed independent rate models intended to reflect the costs that providers face in delivering a given service. Specific assumptions are made for these various costs, including:

- The wage of the direct support professional*
- Benefits for the direct support professional*
- The productivity of the direct support professional (to account for non-billable responsibilities)*
- Other direct care costs, such as transportation and program supplies*
- Agency overhead costs*
- Programmatic factors that impact per-person costs, such as staffing ratios*

Specific cost assumptions were based on provider-reported data as well as other benchmarks. Wage and benefit assumptions were derived primarily from BLS data to ensure waiver providers' competitiveness. Assumptions related to

agency overhead costs are based primarily on cost data from private (non-public) providers. Specifically, overhead is divided into administrative and program support. Administrative costs are those associated with the operation of an organization, but which are not program-specific, including general management, financial/accounting, and human resource staff. Program support costs are expenses that are neither direct care nor administrative. Such activities are program-specific, but not on behalf of an individual member, such as training of direct care workers, program development, supervision, and quality assurance. The rate models assume that 11 percent of the total rates support agency administrative costs. Another 10 percent (on average) of the total rate is assumed to cover program support costs.

The rate setting methodology described above was used to establish benchmark rates for the following services:

- Shared living
- Supported living residential
- In-Home Support
- Sponsored residential
- Group home residential
- Skilled and Private Duty Nursing
- Therapeutic Consultation
- Crisis Supports (crisis support services, community-based crisis supports, center-based crisis supports)
- PERS
- Group supported employment
- Community engagement
- Group day support
- Workplace assistance services
- Personal assistance (agency and consumer direction)
- Respite Care (agency and consumer direction)
- Companion Care (agency and consumer direction)
- Service Facilitation
- Benefits Planning Services (added for amendment effective 7/1/18)

The rate model assumptions are used to construct the fee-for-services rates, but the individual assumptions are not prescriptive to service providers. For instance, providers are not required to pay the wages assumed in the rate models. Rather, providers have the flexibility within the total rate to design programs that meet members' needs, consistent with service requirements and members' individual support plans.

While there is no formal schedule for annual cost of living increases to the rates, the use of detailed and transparent rate models allows for periodic review and adjustment of the rates. For example, the rate models were revised in March 2016 to account for more current BLS wage information and a change in the Internal Revenue Services. Rates are not increased automatically for inflation but may be increased if authorized by the state budget through the VA General Assembly. Rate increases are subject to funding by the General Assembly as part of the state budgeting process. Recommendations for rate adjustments as part of budget deliberations may come from DMAS and DBHDS or service recipients, providers, and other members of the public.

Most of the rate models have been fully funded, but for certain services a lesser 'adopted' rate has been implemented:

- Skilled Nursing rates for registered nurses are funded at 61 percent of the rate model for Northern Virginia and 63 percent for the rest of the state.
- Skilled Nursing rates for licensed practical nurses are funded at 71 percent of the rate model for Northern Virginia and 71 percent for the rest of the state.
- Private Duty Nursing rates for registered nurses are funded at 61 percent of the rate model for Northern Virginia and 63 percent for the rest of the state.
- Private Duty Nursing rates for licensed practical nurses are funded at 73 percent of the rate model for Northern Virginia and 74 percent for the rest of the state.
- Agency rates for Personal Assistance, Respite, and Companion Care are funded at 65 percent of the rate model for Northern Virginia and 67 percent for the rest of the state.
- Consumer-directed rates for Personal Assistance, Respite, and Companion Care are funded at 69 percent of the rate model for Northern Virginia and 66 percent for the rest of the state.
- Across all consumer-directed services facilitation supports, rates are funded at an average of 88 percent of the rate model for Northern Virginia and 83 percent for the rest of the state.

Rate and reimbursement methodologies for services not included in the rate-setting effort described above are as follows:

- *For Supported Employment-Individual services, providers are reimbursed at the same rate as their agreements with the Department of Aging and Rehabilitative Services (DARS) in order to encourage the seamless delivery of employment supports. DARS establishes each provider's Supported Employment rates on an annual basis through a Purchase of Service Application, which is similar to a cost report. The hourly rate is calculated by dividing budgeted costs by budgeted service hours. Budgeted costs include employee compensation allocated to services, professional fees, supplies, communications, building expenses, rental and maintenance of equipment, printing and publications, travel, training, membership dues, non-mortgage interest and capital depreciation.*
- *Reimbursement for Environmental Modifications, Assistive Technology, and Electronic Home-Based Supports is based on approved cost up to a \$5,000 annual limit. Reimbursement for Transition Services is based on approved cost up to a \$5,000 lifetime limit. Reimbursement for Individual and Family/ Caregiver Training is based on approved cost up to a \$4,000 annual limit.*

• *For Personal Emergency Response Services, which has low utilization and few providers, the Commonwealth's rates were compared to the rates paid by other states in order to ensure reasonableness. PERS monthly monitoring rates were identified in 1915(c) waivers for persons with intellectual and developmental disabilities in twenty-two other states for validation. This comparison found that the average Virginia rate falls within the third or middle quintile of these other states.*

Please see Main module for information related to customized rate methodology.

- *Rates for Community Guide and Employment and Community Transportation services followed a similar process as the overall rate setting methodology as described above except that there was not a provider survey (because the services are new, there was nothing to survey).*

Continued in Main Optional B

- b. Flow of Billings.** *Describe the flow of billings for waiver services, specifying whether provider billings flow directly from providers to the state's claims payment system or whether billings are routed through other intermediary entities. If billings flow through other intermediary entities, specify the entities:*

Provider billings flow directly to the State's claims payment system, with the exception of those provider billings for consumer-directed services and those services (Assistive Technology, Environmental Modifications and Transition Services) for which the CSBs is not the service provider and acts as a conduit between DMAS and non-provider agencies in the community. Providers submit claims on the CMS-1500 to the private contractor, the fiscal agent for DMAS. The contractor reviews the claims and determines whether it should be paid, denied or pended. If it is denied, the provider is notified and the reason is explained. If a claim is pended, DMAS is responsible for reviewing and making a determination to either pay or deny.

Consumer-directed services are paid through a contract with a fiscal management services agent. DMAS procures fiscal agent services through an RFP process and contracts with the vendor for all payroll functions. Time sheets for consumer-directed personal assistants, respite assistants and companions are submitted directly to the FMS by the individual/employer after authorization and approval of the employer. The fiscal management service contractor submits payment to the employee attendant for authorized services. DMAS provides direct oversight of the contract to ensure compliance with federal and state law. DMAS contract monitors on a weekly basis sample approved assistant applications to ensure all qualifications are met. Payments are made only to those assistants that have approved assistant applications.

The CSB may enter into a contractual arrangement with non-providers such as building contractors, stores that may provide AT items or even on-line vendors. After making the purchase, the CSB then bills DMAS for the modification/item. Those vendors (such as DME companies or others) who wish to become DMAS enrolled providers may do so. There is no requirement that billing for these services flow through the CSBs. It is merely one option.

On a quarterly basis, the contractor obtains payroll information for CD attendants to determine if payroll information was properly supported by testing a judgmental sample of the entries from the payroll register and other state and federal tax forms.

Appendix I: Financial Accountability**I-2: Rates, Billing and Claims (2 of 3)****c. Certifying Public Expenditures (select one):**

- ☒ **No. state or local government agencies do not certify expenditures for waiver services.**
- ☐ **Yes. state or local government agencies directly expend funds for part or all of the cost of waiver services and certify their state government expenditures (CPE) in lieu of billing that amount to Medicaid.**

Select at least one:

- ☐ **Certified Public Expenditures (CPE) of State Public Agencies.**

Specify: (a) the state government agency or agencies that certify public expenditures for waiver services; (b) how it is assured that the CPE is based on the total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-a.)

- ☐ **Certified Public Expenditures (CPE) of Local Government Agencies.**

Specify: (a) the local government agencies that incur certified public expenditures for waiver services; (b) how it is assured that the CPE is based on total computable costs for waiver services; and, (c) how the state verifies that the certified public expenditures are eligible for Federal financial participation in accordance with 42 CFR §433.51(b). (Indicate source of revenue for CPEs in Item I-4-b.)

Appendix I: Financial Accountability**I-2: Rates, Billing and Claims (3 of 3)**

d. Billing Validation Process. Describe the process for validating provider billings to produce the claim for federal financial participation, including the mechanism(s) to assure that all claims for payment are made only: (a) when the individual was eligible for Medicaid waiver payment on the date of service; (b) when the service was included in the participant's approved service plan; and, (c) the services were provided:

DMAS ensures that, when claims are paid, the individual is Medicaid-eligible at the time the services were rendered and the services being billed are approved services in the service plan for that individual. When submitting a claim, the provider enters all elements from the CMS-1500. As noted in section I-1, all services must be pre-authorized by DBHDS. Secondly, prior to payment, all claims are processed using automated edits that:

1. Verify individual eligibility;
2. Check for a valid pre-authorization;
3. Verify there is no duplicate billing;
4. Verify that the provider submitting claims meets provider participation criteria and has a valid participation agreement with DMAS;
5. Check for any service limits.

Quality Management Review (QMR) ensures that services are approved and appropriate for the individual. The purpose of the QMR is to determine whether services delivered were appropriate, continue to be needed by the individual, and the amount and kind of services were required. DMAS analysts conduct QMR of all documentation that shows the individual's level of care. Visits are conducted on-site and are unannounced. DMAS QMR staff reviews claims submitted by selected providers based on a statistically valid sample of 95/5 confidence level.

The QMR visit is accomplished through a review of the individual's record, evaluation of the individual's medical and functional status, and consultation with the individual and family/caregiver, as appropriate. Specific attention is paid to all applicable documentation, which may include service plans, supervisory notes, services facilitator notes, daily logs, self-directed employee time sheets, progress notes, case manager notes and any other documentation.

The amended waivers will all utilize a web-based, electronic submission service authorization process. Providers relay their information (such as plans for support) to the case manager who then ensures that all requests meet the individual's needs and are in line with the discussions during the person-centered planning meeting. The case manager submits required documentation via the electronic system to DBHDS service authorization staff. These staff ensure that all services being requested are justified by assessed needs, service limits are observed, and that the individual requires the services being requested. Once these have been confirmed, the staff will authorize: notification goes back to the case manager and provider and entry into VAMMIS is accomplished. If required elements are missing, the request may be pending for more information, rejected or denied (depending on the circumstances).

Individuals seeking case management services through the Community Services Board Single Point of Entry are offered a choice of case manager.

Choice of providers is always an option and can be exercised at any time by individuals once they have a Waiver slot. The CSB/BHA support coordinator/ case manager is responsible for reviewing with the individual and AR, as appropriate, the list of available providers and documenting choice of providers on the Virginia Informed Choice form 1) at initiation of Waiver services 2) whenever requested thereafter for any reason by the individual and AR, as appropriate 3) if the support coordinator/ case manager has a documented reason to believe that the individual may benefit from offering choice of providers (e.g., if the support coordinator/ case manager, in consultation with the individual and AR, as appropriate, determines that the individual's person-centered plan outcomes are consistently not being achieved); or 4) if the individual and AR, as appropriate, expresses dissatisfaction with current services. Choice of providers is offered whenever a new service is offered. The annual Person-Centered Planning meeting includes a discussion of services options and satisfaction with supports and services received.

The Individual Choice form documents choice of waiver vs. institution and is completed following initial waiver eligibility screening, as well as annually while the individual is on the statewide waiting list.

For PTs and OTs, The evaluations may be directly reimbursed through the State Plan or through Therapeutic Consultation, if the individual is already receiving those services. CRSs/Rehab Engineers may be reimbursed directly through either EM or AT if their services are required.

Individuals seeking case management services through the Community Services Board Single Point of Entry are offered a choice of case manager.

- e. Billing and Claims Record Maintenance Requirement.** Records documenting the audit trail of adjudicated claims (including supporting documentation) are maintained by the Medicaid agency, the operating agency (if applicable), and

providers of waiver services for a minimum period of 3 years as required in 45 CFR §92.42.

Appendix I: Financial Accountability

I-3: Payment (1 of 7)

a. Method of payments -- MMIS (select one):

- ☐ **Payments for all waiver services are made through an approved Medicaid Management Information System (MMIS).**
- ☒ **Payments for some, but not all, waiver services are made through an approved MMIS.**

Specify: (a) the waiver services that are not paid through an approved MMIS; (b) the process for making such payments and the entity that processes payments; (c) and how an audit trail is maintained for all state and federal funds expended outside the MMIS; and, (d) the basis for the draw of federal funds and claiming of these expenditures on the CMS-64:

Consumer-directed payroll for personal assistance, respite and companion services are paid through the Fiscal Management Services (FMS) contractor. The individual/employer directly submits authorized employee time sheets to FMS contractor, which processes the billing and makes payment directly to the individual's employee. The claim information is still captured in the VAMMIS system to satisfy reporting requirements to CMS and are subject to all audit and accounting oversight measures.

Self-directed personal assistance, respite, and companion service providers are not able to receive direct payment from DMAS. There is no option for consumer-directed providers to bill DMAS.

The administrative activity is a per member per month fee and includes the contractor's direct and indirect costs. Direct costs include staffing, project supplies and materials, facilities, software, equipment, telecommunications, postage, printing, and subcontracts. Indirect costs include administrative staffing and services, general purpose equipment, facilities, telecommunications and general use office supplies.

DMAS employs contract monitoring staff within the Division of Long-Term Care to provide ongoing oversight for the administration of the contract for fiscal management services. The vendor provides a bi-weekly payroll register documenting the individual payments associated with eligible waiver individuals for each service provided to the individual by qualified assistant(s) for the pay period. DMAS staff authorize each voucher for payment through DMAS's Fiscal and Purchases Division for generation of payment through the Virginia Department of Accounts. The payroll process is subject to random audit through the various oversight entities, including the auditor of public accounts (Virginia Department of Accounts) and the DMAS Division of Internal Audit.

In addition, DMAS staff provide quarterly reports to the Budget and Contract Management Division within DMAS to ensure that the vendor complies with the requirements of the contract, including fiscal accountability.

- ☐ **Payments for waiver services are not made through an approved MMIS.**

Specify: (a) the process by which payments are made and the entity that processes payments; (b) how and through which system(s) the payments are processed; (c) how an audit trail is maintained for all state and federal funds expended outside the MMIS; and, (d) the basis for the draw of federal funds and claiming of these expenditures on the CMS-64:

- ☐ **Payments for waiver services are made by a managed care entity or entities. The managed care entity is paid a monthly capitated payment per eligible enrollee through an approved MMIS.**

Describe how payments are made to the managed care entity or entities:

--

Appendix I: Financial Accountability

I-3: Payment (2 of 7)

b. Direct payment. *In addition to providing that the Medicaid agency makes payments directly to providers of waiver services, payments for waiver services are made utilizing one or more of the following arrangements (select at least one):*

- ☐ ***The Medicaid agency makes payments directly and does not use a fiscal agent (comprehensive or limited) or a managed care entity or entities.***
- ☒ ***The Medicaid agency pays providers through the same fiscal agent used for the rest of the Medicaid program.***
- ☒ ***The Medicaid agency pays providers of some or all waiver services through the use of a limited fiscal agent.***

Specify the limited fiscal agent, the waiver services for which the limited fiscal agent makes payment, the functions that the limited fiscal agent performs in paying waiver claims, and the methods by which the Medicaid agency oversees the operations of the limited fiscal agent:

DMAS contracts with a Fiscal Management Service (FMS), to make payment for all consumer-directed services. The fiscal employer agent ensures that attendants have completed required employment paperwork; processes individual/employer enrollment packets and attendant employment packets; obtains criminal record checks and child abuse background checks; processes time sheets, deducts and files state and federal income and employment taxes and pays consumer-directed employees. Oversight of the FMS operations is conducted by contract monitors employed by the Medicaid agency.

There is no option for self-directed providers to bill Medicaid directly.

DMAS employs contract monitoring staff within the Office of Community Living to provide ongoing oversight for the administration of the contract for fiscal management services. The FMS vendor provides weekly estimated and reconciled payroll registers, documenting the individual payments associated with eligible waiver individuals for each service provided to the individual by qualified assistant(s) for the pay period. DMAS staff authorizes each voucher for payment through DMAS' Fiscal and Purchases Division for generation of payment through the Virginia Department of Accounts. The payroll process is subject to random audit through the various oversight entities, including the auditor of public accounts (Virginia Department of Accounts) and the DMAS Division of Internal Audit. Data from the operation meetings are used to develop the annual performance audit.

In addition, the FMS provides the DMAS fiscal office with quarterly, tax accrual reconciliation reports, annual FICA refund voucher reports, and annual unclaimed property reports for checks that have not been cashed. The FMS also provides monthly reports to DMAS Provider Reimbursement (rate setting) staff and weekly financial operations reports to DMAS contract monitors.

The FMS provides the following program reports to DMAS contract monitors: weekly operations reports that reflect employer and employee enrollment, background checks, discontinued employment, and timesheet processing; weekly Call Center activity reports; and quarterly program activity reports. DMAS contract monitors provide on-site weekly monitoring of the FMS and hold bi-weekly operations meetings with management, fiscal, IT, Call Center, and operations staff. DMAS contract monitors complete an annual performance audit of the FMS, develop corrective action plans, when necessary, and provide twice yearly reports to the DMAS Contract Management Division ensure contract compliance, including fiscal accountability.

In addition to the on-going monitoring conducted by the DMAS employed contract monitors, DMAS contracts with an independent auditor to conduct quarterly post payment reviews of the consumer directed payroll. The auditor conducts analysis of the F/EA payroll register showing employer, employee, pay rates, hours worked, gross pay, state and federal taxes, unemployment insurance and other withholdings. The independent auditor has the expertise and resources necessary to accurately and efficiently review large payroll registers and supporting tax and payroll bank account information ensuring fiscal controls.

For Environmental Modifications/Assistive Technology, when the CSB is not the provider, the CSBs may act as a conduit between the service provider and DMAS. They may be involved in purchasing items for Assistive Technology directly (from stores or online providers – particularly for items such as communication devices, computer programs, I-pads, etc. that regular DME companies do not deal with) or may work with a building contractor to perform some Environmental Modification for which the CSB bills DMAS and then reimburses the contractor. It is not advantageous to building contractors to become Medicaid waiver providers in general. Provider Integrity audits the CSBs in these instances, as they are the provider-of-record for the service. At this time the CSBs do not receive payments for processing payments. Some CSBs have contracts with certain vendors. Some CSBs require three bids.

- ☐ **Providers are paid by a managed care entity or entities for services that are included in the state's contract with the entity.**

Specify how providers are paid for the services (if any) not included in the state's contract with managed care entities.

I-3: Payment (3 of 7)

c. Supplemental or Enhanced Payments. Section 1902(a)(30) requires that payments for services be consistent with efficiency, economy, and quality of care. Section 1903(a)(1) provides for Federal financial participation to states for expenditures for services under an approved state plan/waiver. Specify whether supplemental or enhanced payments are made. Select one:

- ☒ **No. The state does not make supplemental or enhanced payments for waiver services.**
- ☐ **Yes. The state makes supplemental or enhanced payments for waiver services.**

Describe: (a) the nature of the supplemental or enhanced payments that are made and the waiver services for which these payments are made; (b) the types of providers to which such payments are made; (c) the source of the non-Federal share of the supplemental or enhanced payment; and, (d) whether providers eligible to receive the supplemental or enhanced payment retain 100% of the total computable expenditure claimed by the state to CMS. Upon request, the state will furnish CMS with detailed information about the total amount of supplemental or enhanced payments to each provider type in the waiver.

Appendix I: Financial Accountability***I-3: Payment (4 of 7)***

d. Payments to state or Local Government Providers. Specify whether state or local government providers receive payment for the provision of waiver services.

- ☐ **No. State or local government providers do not receive payment for waiver services. Do not complete Item I-3-e.**
- ☒ **Yes. State or local government providers receive payment for waiver services. Complete Item I-3-e.**

Specify the types of state or local government providers that receive payment for waiver services and the services that the state or local government providers furnish:

CSBs are eligible to be providers of waiver services for which they meet provider criteria. Some choose to be waiver providers and others do not. Their provision of waiver services depends on historical factors and the guidance of their local governance. Some provide only case management and emergency services (required by state statute). Others also provide some combination of services that may include any of the following: residential supports, respite, day supports, supported employment, crisis stabilization, assistive technology, environmental modifications, behavior consultation, personal assistance, or companion services.

CSBs are established by local governments pursuant to section 37.2-500 or 37.2-601 of the Code of Virginia and are under the control of local elected officials (city council and board of supervisors members who establish the CSB, approve its annual "performance contract" with DBHDS and appoint CSB board members).

Appendix I: Financial Accountability***I-3: Payment (5 of 7)***

e. Amount of Payment to State or Local Government Providers.

Specify whether any state or local government provider receives payments (including regular and any supplemental payments) that in the aggregate exceed its reasonable costs of providing waiver services and, if so, whether and how the state recoups the excess and returns the Federal share of the excess to CMS on the quarterly expenditure report. Select one:

- ☒ *The amount paid to state or local government providers is the same as the amount paid to private providers of the same service.*
- ☐ *The amount paid to state or local government providers differs from the amount paid to private providers of the same service. No public provider receives payments that in the aggregate exceed its reasonable costs of providing waiver services.*
- ☐ *The amount paid to state or local government providers differs from the amount paid to private providers of the same service. When a state or local government provider receives payments (including regular and any supplemental payments) that in the aggregate exceed the cost of waiver services, the state recoups the excess and returns the federal share of the excess to CMS on the quarterly expenditure report.*

Describe the recoupment process:

Appendix I: Financial Accountability

I-3: Payment (6 of 7)

f. Provider Retention of Payments. Section 1903(a)(1) provides that Federal matching funds are only available for expenditures made by states for services under the approved waiver. Select one:

- ☒ *Providers receive and retain 100 percent of the amount claimed to CMS for waiver services.*
- ☐ *Providers are paid by a managed care entity (or entities) that is paid a monthly capitated payment.*

Specify whether the monthly capitated payment to managed care entities is reduced or returned in part to the state.

Appendix I: Financial Accountability

I-3: Payment (7 of 7)

g. Additional Payment Arrangements

i. Voluntary Reassignment of Payments to a Governmental Agency. Select one:

- ☒ *No. The state does not provide that providers may voluntarily reassign their right to direct payments to a governmental agency.*
- ☐ *Yes. Providers may voluntarily reassign their right to direct payments to a governmental agency as provided in 42 CFR §447.10(e).*

Specify the governmental agency (or agencies) to which reassignment may be made.

ii. Organized Health Care Delivery System. Select one:

- ☐ *No. The state does not employ Organized Health Care Delivery System (OHCDS) arrangements*

under the provisions of 42 CFR §447.10.

- ☉ ***Yes. The waiver provides for the use of Organized Health Care Delivery System arrangements under the provisions of 42 CFR §447.10.***

Specify the following: (a) the entities that are designated as an OHCDs and how these entities qualify for designation as an OHCDs; (b) the procedures for direct provider enrollment when a provider does not voluntarily agree to contract with a designated OHCDs; (c) the method(s) for assuring that participants have free choice of qualified providers when an OHCDs arrangement is employed, including the selection of providers not affiliated with the OHCDs; (d) the method(s) for assuring that providers that furnish services under contract with an OHCDs meet applicable provider qualifications under the waiver; (e) how it is assured that OHCDs contracts with providers meet applicable requirements; and, (f) how financial accountability is assured when an OHCDs arrangement is used:

(a) In Virginia, CSBs are OHCDs entities for the waiver services of assistive technology, environmental modifications and transition services. CSBs are all licensed by DBHDS to provide at least one other waiver or State Plan service.

(b) Providers of these three waiver services have the option to directly enroll as a DMAS provider should they not desire to work through the CSB.

(c) Individuals have the right to choose their provider of services despite the OHCDs arrangement and frequently tell the CSB staff whom they would like to provide the device, complete their home modification, etc. QMR staff inquire about whether this choice took place when they meet with individuals and family/caregivers.

(d) While those agencies or individuals who provide these three services may not actually enter into a contractual arrangement with the CSB through which they are paid (as these services generally represent short-term or single purchase transactions), those who provide goods and services through an OHCDs arrangement must still meet all ID waiver requirements. Furthermore, the CSB case manager is required to document the successful delivery or completion of the item/modification/service once completed.

(e) & (f) An independent professional consultation shall be obtained from staff knowledgeable of that item (e.g., Physical Therapist, Occupational Therapist, Speech and Language Therapist, etc.) for each AT request prior to service authorization. All AT items to be covered shall meet applicable standards of manufacture, design, and installation. The AT provider shall obtain, install, and demonstrate, as necessary, such AT prior to submitting his claim to DMAS for reimbursement. The provider shall provide all warranties or guarantees from the AT's manufacturer to the individual and family/caregiver, as appropriate.

A physical therapist or occupational therapist may be utilized to evaluate the needs for environmental modifications and make recommendations about what is required, when appropriate. Alternately, a rehabilitation engineer or Certified Rehabilitation Specialist may be used in cases where structural modifications of the primary residence are requested to evaluate the individual's needs and subsequently act as project manager, assuring functionality of the environmental modification through quality assurance inspections once the project is finished. The rehabilitation engineer may actually design and personally complete the modification.

A rehabilitation engineer/CRS may be required if (for example):

- *The environmental modification involves combinations of systems which are not designed to go together.*
- *The structural modification requires a project manager to assure that the design and functionality meet ADA accessibility guidelines.*
- *Where structural modifications of the primary residence are requested to ensure the residence is structurally sound for the modifications.*

The case manager must document notification by the individual or individual's representative of satisfactory completion or receipt of the service or item of Assistive Technology. For Environmental Modifications the case manager must, upon completion of each modification, meet face-to-face with the individual and the family/caregiver, as appropriate, to ensure that the modification was completed satisfactorily and is able to be used by the individual.

All three services must be preauthorized and are thus scrutinized for need for service, appropriate professional recommendation (particularly Assistive Technology), cost effectiveness, and remaining within the monetary limits for the service. DMAS QMR staff further review these elements during their service reviews. DMAS Provider Integrity Audits ensure that services performed under these contracts meet applicable requirements and meet financial accountability standards.

For PTs and OTs, The evaluations may be directly reimbursed through the State Plan or through Therapeutic Consultation, if the individual is already receiving those services. CRSs/Rehab Engineers may be reimbursed directly through either EM or AT if their services are required.

Part of the service authorization process for EM/AT is the review (by DBHDS staff who perform service

authorization) of documentation by the appropriate professional that the particular item or modification is necessary for the individual. Without this information accompanying the service authorization request, the request will not move forward. In addition, the service authorization staff ensure that all service limits (including monetary limits for EM/AT) are observed before authorization is finalized.

iii. Contracts with MCOs, PIHPs or PAHPs.

- ☒ **The state does not contract with MCOs, PIHPs or PAHPs for the provision of waiver services.**
- ☐ **The state contracts with a Managed Care Organization(s) (MCOs) and/or prepaid inpatient health plan(s) (PIHP) or prepaid ambulatory health plan(s) (PAHP) under the provisions of §1915(a)(1) of the Act for the delivery of waiver and other services. Participants may voluntarily elect to receive waiver and other services through such MCOs or prepaid health plans. Contracts with these health plans are on file at the state Medicaid agency.**

Describe: (a) the MCOs and/or health plans that furnish services under the provisions of §1915(a)(1); (b) the geographic areas served by these plans; (c) the waiver and other services furnished by these plans; and, (d) how payments are made to the health plans.

- ☐ **This waiver is a part of a concurrent §1915(b)/§1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The §1915(b) waiver specifies the types of health plans that are used and how payments to these plans are made.**
- ☐ **This waiver is a part of a concurrent ?1115/?1915(c) waiver. Participants are required to obtain waiver and other services through a MCO and/or prepaid inpatient health plan (PIHP) or a prepaid ambulatory health plan (PAHP). The ?1115 waiver specifies the types of health plans that are used and how payments to these plans are made.**
- ☐ **If the state uses more than one of the above contract authorities for the delivery of waiver services, please select this option.**

In the textbox below, indicate the contract authorities. In addition, if the state contracts with MCOs, PIHPs, or PAHPs under the provisions of §1915(a)(1) of the Act to furnish waiver services: Participants may voluntarily elect to receive waiver and other services through such MCOs or prepaid health plans. Contracts with these health plans are on file at the state Medicaid agency. Describe: (a) the MCOs and/or health plans that furnish services under the provisions of §1915(a)(1); (b) the geographic areas served by these plans; (c) the waiver and other services furnished by these plans; and, (d) how payments are made to the health plans.

Appendix I: Financial Accountability

I-4: Non-Federal Matching Funds (1 of 3)

a. State Level Source(s) of the Non-Federal Share of Computable Waiver Costs. Specify the state source or sources of the non-federal share of computable waiver costs. Select at least one:

- ☒ **Appropriation of State Tax Revenues to the State Medicaid agency**
- ☐ **Appropriation of State Tax Revenues to a State Agency other than the Medicaid Agency.**

If the source of the non-federal share is appropriations to another state agency (or agencies), specify: (a) the state entity or agency receiving appropriated funds and (b) the mechanism that is used to transfer the funds to the Medicaid Agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching

arrangement, and/or, indicate if the funds are directly expended by state agencies as CPEs, as indicated in Item I-2-c:

☐ **Other State Level Source(s) of Funds.**

Specify: (a) the source and nature of funds; (b) the entity or agency that receives the funds; and, (c) the mechanism that is used to transfer the funds to the Medicaid Agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if funds are directly expended by state agencies as CPEs, as indicated in Item I-2-c:

Appendix I: Financial Accountability

I-4: Non-Federal Matching Funds (2 of 3)

b. Local Government or Other Source(s) of the Non-Federal Share of Computable Waiver Costs. Specify the source or sources of the non-federal share of computable waiver costs that are not from state sources. Select One:

☒ **Not Applicable.** There are no local government level sources of funds utilized as the non-federal share.

☐ **Applicable**

Check each that applies:

☐ **Appropriation of Local Government Revenues.**

Specify: (a) the local government entity or entities that have the authority to levy taxes or other revenues; (b) the source(s) of revenue; and, (c) the mechanism that is used to transfer the funds to the Medicaid Agency or Fiscal Agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement (indicate any intervening entities in the transfer process), and/or, indicate if funds are directly expended by local government agencies as CPEs, as specified in Item I-2-c:

☐ **Other Local Government Level Source(s) of Funds.**

Specify: (a) the source of funds; (b) the local government entity or agency receiving funds; and, (c) the mechanism that is used to transfer the funds to the state Medicaid agency or fiscal agent, such as an Intergovernmental Transfer (IGT), including any matching arrangement, and/or, indicate if funds are directly expended by local government agencies as CPEs, as specified in Item I-2-c:

Appendix I: Financial Accountability

I-4: Non-Federal Matching Funds (3 of 3)

c. Information Concerning Certain Sources of Funds. Indicate whether any of the funds listed in Items I-4-a or I-4-b that make up the non-federal share of computable waiver costs come from the following sources: (a) health care-related taxes or fees; (b) provider-related donations; and/or, (c) federal funds. Select one:

☒ *None of the specified sources of funds contribute to the non-federal share of computable waiver costs*

☐ *The following source(s) are used*

Check each that applies:

☐ *Health care-related taxes or fees*

☐ *Provider-related donations*

☐ *Federal funds*

For each source of funds indicated above, describe the source of the funds in detail:

Appendix I: Financial Accountability

I-5: Exclusion of Medicaid Payment for Room and Board

a. Services Furnished in Residential Settings. *Select one:*

☐ *No services under this waiver are furnished in residential settings other than the private residence of the individual.*

☒ *As specified in Appendix C, the state furnishes waiver services in residential settings other than the personal home of the individual.*

b. Method for Excluding the Cost of Room and Board Furnished in Residential Settings. *The following describes the methodology that the state uses to exclude Medicaid payment for room and board in residential settings:*

The amount of waiver services an individual is authorized to receive is based on documentation that demonstrates the adequacy and appropriateness of the services with regard to the individual's current functioning, cognitive status, health, safety and social needs. The Department of Medical Assistance Services pays providers an established rate to cover the costs of providing waiver services to the individual. Rates do not cover the costs of individuals' room and board. Providers are only permitted to bill for allowable activities described for each waiver service.

Generally, the fees collected from federal benefits (SSI, SSA, SSDI, Railroad Retirement, etc.) cover the costs of room and board for residential services. If not, providers use other sources of revenue to cover the remainder. Other revenue sources that are used include, but are not limited to:

** private pay fees;*

** fees from consulting, training, and other contractual services;*

** charitable sources (endowments, organization or private foundations, United Way, fundraising efforts);*

** HUD 811 and Section 8 programs; or*

** State General Fund and local funding.*

Appendix I: Financial Accountability

I-6: Payment for Rent and Food Expenses of an Unrelated Live-In Caregiver

Reimbursement for the Rent and Food Expenses of an Unrelated Live-In Personal Caregiver. *Select one:*

☐ *No. The state does not reimburse for the rent and food expenses of an unrelated live-in personal caregiver who resides in the same household as the participant.*

☒ *Yes. Per 42 CFR §441.310(a)(2)(ii), the state will claim FFP for the additional costs of rent and food that can be reasonably attributed to an unrelated live-in personal caregiver who resides in the same household as the waiver participant. The state describes its coverage of live-in caregiver in Appendix C-3 and the costs attributable to rent and food for the live-in caregiver are reflected separately in the computation of factor D (cost of waiver services) in Appendix J. FFP for rent and food for a live-in caregiver will not be claimed when*

03/09/2020

the participant lives in the caregiver's home or in a residence that is owned or leased by the provider of Medicaid services.

The following is an explanation of: (a) the method used to apportion the additional costs of rent and food attributable to the unrelated live-in personal caregiver that are incurred by the individual served on the waiver and (b) the method used to reimburse these costs:

*a) The state will make an individual-by-individual determination of the actual costs of room and board apportioned to the live-in companion up to the average Department of Housing and Urban Development (HUD) Fair Market Rent (FMR) amount in the highest rent region in "Rest of State" (ROS) (Tidewater) and in Northern Virginia (NOVA). Room and board payments to the live-in companion will include the reimbursable monthly cost of rent/mortgage, food, and internet service.**

- The room and board expenses for the live-in companion are determined to be equal, on the average, to one-half of the lesser of the HUD FMR amount of room and board paid by the individual receiving services.*
- The reimbursement would incorporate statewide estimates to project costs. The reimbursement formula would include ½ the amount of monthly rent, food, and internet service, with a flat 11% administrative overhead fee provided to the provider agency. The rental reimbursement range will incorporate a maximum amount (cap) for both geographic regions Tidewater (ROS) and NOVA.*
- The assistance being received by the individual from any federal benefit programs will be deducted to offset the rent amount paid by the waiver.*
- The state has determined that the amount of any benefits the individual may be eligible to receive (i.e., SNAP) will be deducted from the household costs for rent, food and utilities prior to calculating costs associated with the live-in companion.*
- If the lease is a related party transaction, total payment for the portion of rent attributable to the live-in companion is further limited to the landlord's actual cost of ownership.*
- If the individual owns their own home and is making mortgage payments, the annual interest paid on the mortgage will be included in the rental amount.*

** NOTE: Research by our subcontractor, Burns and Associates, indicated that the HUD FMR rent amounts include utility costs, so separate assumptions were removed. Internet is not included in the FMR so that assumption was built into the model.*

b) The licensed coordinating agency will bill DMAS for the live-in companion's rent and food expenses and then transmit that to the individual for paying the expenses.

The enrolled provider agency will bill DMAS monthly for the live-in companion's rent and food expenses and will reimburse the waiver participant monthly for these expenses.

NOTE: Research by our subcontractor, Burns and Associates, indicated that the HUD FMR rent amounts include utility costs, so separate assumptions were removed. Internet is not included in the FMR so that assumption was built into the model.

Documentation (e.g., copy of the actual lease/mortgage payment statement) must be submitted to service authorization staff with the request for authorization of Shared Living.

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (1 of 5)

a. Co-Payment Requirements. *Specify whether the state imposes a co-payment or similar charge upon waiver participants for waiver services. These charges are calculated per service and have the effect of reducing the total computable claim for federal financial participation. Select one:*

- ☒ ***No. The state does not impose a co-payment or similar charge upon participants for waiver services.***
- ☐ ***Yes. The state imposes a co-payment or similar charge upon participants for one or more waiver services.***

i. Co-Pay Arrangement.

Specify the types of co-pay arrangements that are imposed on waiver participants (check each that applies):

Charges Associated with the Provision of Waiver Services (if any are checked, complete Items I-7-a-ii through I-7-a-iv):

- ☐ **Nominal deductible**
- ☐ **Coinsurance**
- ☐ **Co-Payment**
- ☐ **Other charge**

Specify:

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (2 of 5)
a. Co-Payment Requirements.
ii. Participants Subject to Co-pay Charges for Waiver Services.

Answers provided in Appendix I-7-a indicate that you do not need to complete this section.

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (3 of 5)
a. Co-Payment Requirements.
iii. Amount of Co-Pay Charges for Waiver Services.

Answers provided in Appendix I-7-a indicate that you do not need to complete this section.

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (4 of 5)
a. Co-Payment Requirements.
iv. Cumulative Maximum Charges.

Answers provided in Appendix I-7-a indicate that you do not need to complete this section.

Appendix I: Financial Accountability

I-7: Participant Co-Payments for Waiver Services and Other Cost Sharing (5 of 5)

b. Other State Requirement for Cost Sharing. Specify whether the state imposes a premium, enrollment fee or similar cost sharing on waiver participants. Select one:

- ☒ **No. The state does not impose a premium, enrollment fee, or similar cost-sharing arrangement on waiver participants.**
- ☐ **Yes. The state imposes a premium, enrollment fee or similar cost-sharing arrangement.**

Describe in detail the cost sharing arrangement, including: (a) the type of cost sharing (e.g., premium, enrollment fee); (b) the amount of charge and how the amount of the charge is related to total gross family income; (c) the groups of participants subject to cost-sharing and the groups who are excluded; and, (d) the mechanisms for the collection of cost-sharing and reporting the amount collected on the CMS 64:

--

Appendix J: Cost Neutrality Demonstration

J-1: Composite Overview and Demonstration of Cost-Neutrality Formula

Composite Overview. Complete the fields in Cols. 3, 5 and 6 in the following table for each waiver year. The fields in Cols. 4, 7 and 8 are auto-calculated based on entries in Cols 3, 5, and 6. The fields in Col. 2 are auto-calculated using the Factor D data from the J-2-d Estimate of Factor D tables. Col. 2 fields will be populated ONLY when the Estimate of Factor D tables in J-2-d have been completed.

Level(s) of Care: ICF/IID

Col. 1 Year	Col. 2 Factor D	Col. 3 Factor D'	Col. 4 Total: D+D'	Col. 5 Factor G	Col. 6 Factor G'	Col. 7 Total: G+G'	Col. 8 Difference (Col 7 less Column4)
1	71255.33	10717.00	81972.33	235588.00	4848.00	240436.00	158463.67

Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (1 of 9)

a. Number Of Unduplicated Participants Served. Enter the total number of unduplicated participants from Item B-3-a who will be served each year that the waiver is in operation. When the waiver serves individuals under more than one level of care, specify the number of unduplicated participants for each level of care:

Table: J-2-a: Unduplicated Participants

Waiver Year	Total Unduplicated Number of Participants (from Item B-3-a)	Distribution of Unduplicated Participants by Level of Care (if applicable)	
		Level of Care:	
		ICF/IID	
Year 1	11736		11736
Year 2	11883		11883
Year 3	12029		12029
Year 4	12176		12176
Year 5	12323		12323

Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (2 of 9)

b. Average Length of Stay. Describe the basis of the estimate of the average length of stay on the waiver by participants in item J-2-a.

The projected length of stay on the waiver is based on the actual average length of stay reported on the CMS-372 from SFY 2015 SFY 2017. The average length of stay is 339 days.

Appendix J: Cost Neutrality Demonstration

J-2: Derivation of Estimates (3 of 9)

c. Derivation of Estimates for Each Factor. Provide a narrative description for the derivation of the estimates of the following factors.

i. Factor D Derivation. The estimates of Factor D for each waiver year are located in Item J-2-d. The basis and methodology for these estimates is as follows:

In 2016, DBHDS analyzed FY 2014 claims data to establish baseline users and units estimates at the service level for the first 5 years of the redesigned FIS waiver. These estimates were compared against actual data on users and units from FY 2016 (final data as reported on the CMS-372 based on service date) and FY 2017 (preliminary data based on paid date). For each service where the average percent of participants utilizing specific services was higher in 2016 and 2017 than the estimates based on 2014 data, the percent was increased to reflect the actual observed percentage of participants utilizing the service in 2016 and 2017. The ratios of users to enrollment and units to user were assumed to be constant over the waiver period, except in instances in which certain policy goals are anticipated to change utilization trends. Cost information reflects the results of DBHDS' provider rate study.

When DHBDS conducted its analysis of 2014 claims, the number of individuals receiving services, the number of users of each covered service, and the number of units used for each service were determined. For existing services the State has assumed that the ratio of users to total enrollees will remain constant, as will the number of units consumed per user. Unit costs are based on the State's fee schedule. DBHDS conducted a review of provider payment rates in 2014 and 2015. Based on the results of the review, a new fee schedule was established. The General Assembly provided funding for the implementation of the new rates, which began July 2016.

The average cost per unit estimates are directly based on the fee schedule, accounting for estimated distributions of services in Northern Virginia and the rest of the State and other applicable factors (such as members' levels of need or group home size). Estimated distributions are based on analyses of claims data, the results of Supports Intensity Scale assessments included in a pilot study, and provider survey results.

The average cost per unit estimates for in-home residential support, community coaching, group day, group home residential, sponsored residential, and supported living also account for customized rates for these services. Customized rates are established for individuals requiring more support than assumed in the rate model to which they would otherwise be assigned. The average cost per unit for these services incorporates slightly higher rates for a limited number of individuals utilizing the specific services.

ii. Factor D' Derivation. The estimates of Factor D' for each waiver year are included in Item J-1. The basis of these estimates is as follows:

In calculating Factor D', staff reviewed actual utilization and expenditure trends for acute care services by CL Waiver enrollees, as reported on the CMS-372 reports in FY 2015, 2016, and 2017. In those three years, no clear trends emerged. In 2015, Factor D' was \$10,999 per participant, it was \$13,546 in 2016 and it was \$9,612 in 2017. In the absence of a clear trend, staff used the approved Factor D' estimate for FY 2018 and FY 2019, \$10,435 per participant (which was slightly lower than the average of Factor D' as reported on the CMS-372 reports for FY 2015-2017) and inflated it by the average annual percent change in the Consumer Price Index (CPI) for Medical Services between FY 2014 and FY 2018. This factor derived from the CPI was 2.7%. The costs associated with Part D are not included in data used to determine estimates.

iii. Factor G Derivation. The estimates of Factor G for each waiver year are included in Item J-1. The basis of these estimates is as follows:

The Factor G values from 2015 -2017, along with the approved estimates for 2018 and 2019, were used to determine growth rates. DMAS calculated the percent change in the Factor G values each year between 2015 and 2019. DMAS then took the average of those percent values which was 4.2%. A 4.2% growth factor was then applied to the 2019 Factor G value to get the WY1 (2020) projected value, 4.2% growth was applied to the WY1 (2020) projected value to arrive at the WY2 (2021) projected value and so on through WY5 (2024).

- iv. Factor G' Derivation.** The estimates of Factor G' for each waiver year are included in Item J-1. The basis of these estimates is as follows:

In calculating Factor G', staff reviewed actual utilization and expenditure trends for acute care services by comparable institutional enrollees, as reported on the CMS-372 reports in FY 2015, 2016, and 2017. Staff used the approved Factor G' estimate for FY 2018 and FY 2019, \$4,721 per participant and inflated it by the average annual percent change in the Consumer Price Index (CPI) for Medical Services between FY 2014 and FY 2018. This factor derived from the CPI was 2.7%. The costs associated with Part D are not included in data used to determine estimates. Staff used this approach to deriving Factor G' to be consistent with the approach used to derive Factor D'.

Appendix J: Cost Neutrality Demonstration

Appendix J: Cost Neutrality Demonstration**J-2: Derivation of Estimates (9 of 9)****d. Estimate of Factor D.**

i. Non-Concurrent Waiver. Complete the following table for each waiver year. Enter data into the Unit, # Users, Avg. Units Per User, and Avg. Cost/Unit fields for all the Waiver Service/Component items. Select Save and Calculate to automatically calculate and populate the Component Costs and Total Costs fields. All fields in this table must be completed in order to populate the Factor D fields in the J-1 Composite Overview table.

Waiver Year: Year 5
